Upright flush mounting in printed circuits with minimum rocking; or, point-to-point wiring. Glass dielectric and foil fused to form single element with high stability. Gold-plated 1¼″ Dumet leads spaced 0.2″. General performance to MIL-C-11272B. **WVDC:** 300 V, −55° C to +125° C. **Temperature Coefficient:** +140 (±25) ppm/° C at 100 kHz. Varies from +115 ppm/° C at −55° C to +165 ppm/° C at +125° C. Maximum deviation at any temperature, 5 ppm. Drift less than 0.1% or 0.1 pF, whichever is greater. **Tol.:** Suffix **J**, ±5%; **K**, ±10% and **C**, ±0.25 pF; ±20%, ±2%, ±1% on request.

### TYPE TYO6

Size: .300″ lg. x .200″ w. x .115″ thick. Weight, 0.3–0.4 gram.

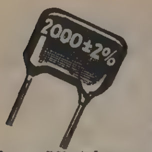
# Elmenco Dur-Mica Capacitors

## TYPE DM DUR-MICA DIPPED SILVERED MICA CAPACITORS



Highly reliable, compact silvered mica capacitors coated for maximum protection against moisture and temperature extremes. Meet or exceed MIL-C-5D and EIA standards for fixed mica capacitors. **Operating Temperature Range:** −55° C to +150° C. **Type DM:** Per MIL-C-5D. **Type SCDM:** Single coat of resin; thinner than regular DM-10's and DM-15's. To order, use prefix **SC. Tolerances Available:** ±10%, ±5%, ±2%, ±1%, ±½%, ±0.5 pF and ±1.0 pF. Prices are for ±5% tolerance (suffix **J**) unless otherwise noted. **Working Voltage:** As shown; MIL-C-5D indicated by sixth character in MIL number (e.g., CM05C**D**060D03): A=100, C=300, and D=500 WVDC.

### TYPE DM-5—50 WVDC

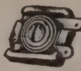
## TRIMMER AND PADDER CAPACITORS

A



B

### TRIMMERS

ll types 175 WVDC, 350 DCT.

**ype 40:** Miniature, ⅜" x ⅛". **Type 42:** Midget, ⅜" ¾". **Type 46:** Standard, " x ⅝". India ruby ica. Ceramic base.

**ote:** Type 46 trimmer ssembly with mtg. racket and adjusting haft for ease of tuning is lso available. Add prefix **S"** to trimmer number; rices on request. Type 0, 42 and 46 also availble as printed circuit rimmers. Add prefix **"PC"** o trimmer number; prices vailable on request.

### PADDERS

**ype 30, 30-M:** ⅞" x 15/16". 30" is 250 WVDC, 500 DCT; "30-M", 500 VVDC, 1000 VDCT.

**ote:** Type 30 (300 series) r Type 30-M (300-M eries) padders are availble with special adjustng screw to accommoate a tuning knob. Add refix **"L"** to padder umber. Prices available n request.

# Elmenco Film Capacitors

## TYPE DP MYLAR® AND MYLAR PAPER CAPACITORS

.05 ± 10%
600V-EM

Designed for use in a variety of circuits ranging from TV bypass to critical industrial applications requiring stringent electrical and environmental characteristics. Non-inductively wound and vacuum dipped to obtain solid impregnation and rugged moisture-resistant coat. Special winding design provides insulation resistance comparable to competitive polyester film units. High reliability maintained in constant operation at 125° C at full rated voltage (derating required at higher temperatures). Miniaturized for transistor circuitry yet compare favorably in price with commercial general purpose units. Crimped radial leads to facilitate use in printed circuits. Leads are tinned copper clad steel. #20 gauge and 1⅝" lg. min. below the crimp. Standard tolerance, ±10%; ±5%, 2% and 1% available. ®Reg. DuPont TM.

### 100 WVDC

Pure Mylar dielectric; derate 1%/°C over 85° C.

## PRECISION DIPPED MYLAR* TUBULARS

Precision dipped tubular capacitors that combine missile and computer quality with radio-TV cost. Type MD (100 WVDC) have Mylar dielectric; Type MPD (200, 400 and 600 WVDC) have Mylar-paper dielectric. Non-inductively wound and vacuum dipped to obtain solid impregnation and a rugged, moisture-proof coat. Miniaturized for transistor circuitry. Offer high reliability in operation at 125° C without derating. Case dimensions similar to the Elmenco Type DP capacitors described elsewhere. **Tolerance:** ±10%; available in ±5%, ±2% and ±1%.
*Registered DuPont trademark.

# Arco PRECISION POLYSTYRENE CAPACITORS

## TYPE PJ POLYSTYRENE CAPACITORS

Superior quality, polystyrene dielectric enclosed in silicone-treated fused polystyrene jacket. **Dissipa-on:** .01% max. at 25° C; .02% max. at 85° C. **Temperature ange:** −55° C to +85° C. **Temperature Coefficient:** −120, 15 ppm/° C. **Stability:** ±0.1% max. capacitance drift. **Toler-nce:** ±5% standard; ±10%, ±3%, ±2%, ±1% and .5% n request.

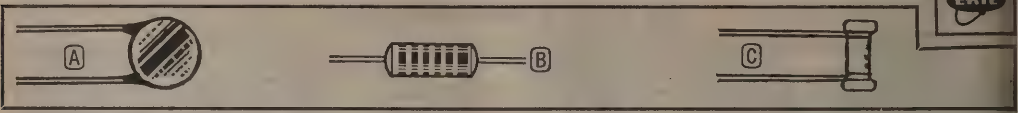
NOTE: Peak voltage for capacity values from .0001 µF to .04 µF is 500 volts. From .05 µF to 1.0 µF is 300 volts.

# Erie CERAMICON® CERAMIC DISC CAPACITORS



## CERAMICON® CERAMIC DISC CAPACITORS (FIG. A)

Have flat ceramic dielectric with silver fired onto the dielectric. Lead wires soldered to silver electrodes. Case is phenolic, vacuum-wax impregnated. Very efficient at high frequencies. Reliable to 85° C. **Size:** All are .156" thick. Style 831, .290" dia.; Style 801, .360" dia.; Style 851, .437" dia.; Style 871, .490" dia.; Style 811, .593" dia.; Style 841, .675" dia. Standard lead lgth., 1½" min.

### GENERAL PURPOSE HI-K® CERAMICONS

Popular for by-pass and non-critical coupling applications. **WVDC:** 1000. **Tolerance:** ±10% except 10K–20K pF, ±20%.

## HIGH-CAPACITANCE, LOW-VOLTAGE TRANSCAP® DISC CERAMICONS (FIG. A)

Low-cost disc-type capacitors for 12 and 25-volt transistorized applications such as by-passing and filtering. Both types have passed 1000-hour life tests at 85° C, Series 5600 at 12 volts and Series 5800 at 37½ volts (150% of rated voltage). **Voltage:** Series 5600, 12 WVDC; 5800, 25 WVDC. **Tolerance:** 5600, ±20%; 5800, +80% and −20%. **Size, O.D.:** 5635, .275"; 5655, .420"; 5615, .550"; 5645, .660"; 5685, .800"; 5835, .290"; 5855, .437"; 5815, .593"; 5865, .895".

## CERAMICON® CERAMIC TUBULAR CAPACITORS

### GENERAL PURPOSE TUBULARS (FIG. B)

all fixed capacitors consisting of a ceramic dielectric with silver ctrodes. Excellent high frequency characteristics, suited for ipling and by-passing in all except frequency determining cir- ts. **WVDC:** 500; 1500 VDC flash test. **Tolerance:** ±10%. **erating Temperature Range:** −55° C to +85° C. All are Style (Fig. B), .250″ dia. x .562″ lg.

### NPO TEMPERATURE COMPENSATING TUBULARS

ghly stable capacitors ideal for circuits which demand great bility, high Q, low loss and close tolerance. Meet specs on EIA . RS198 for Class 1; Temp. Comp., Class 2 Hi-K; are on L for MIL-C-20D and MIL-C-11015C (85° C). WVDC: 500; 0 VDC flash test. **Capacity Tolerance:** 0.5–10 pF, ±.25 pF; pF and up, ±5%. **TC Tolerance, PPM/° C:** 0.5–2.0 pF, ±250; -3.3 pF, ±120; 4.7-10 pF, ±60; 12 pF and up, ±30. **Size:** le 301, .200″ dia. x .400″ w. with 1.25″ lg. leads; non-insulated h white baked enamel coating. Style 315, .250″ dia. x .562″ lg. cision molded body with 1.25″ lg. leads. Style 316, same as but .250″ dia. x .812″ lg. body.

### MIL-C-20D TEMPERATURE COMPENSATING TYPES

Equivalent to Erie series 301, 315 and 316 Ceramicons, but meet MIL-C-20D specifications in NPO/N750 types. Capacity tolerance is indicated by Suffix to Type No.; e.g., **C,** ±.25 pF; **G,** ±2%; **J,** ±5%.

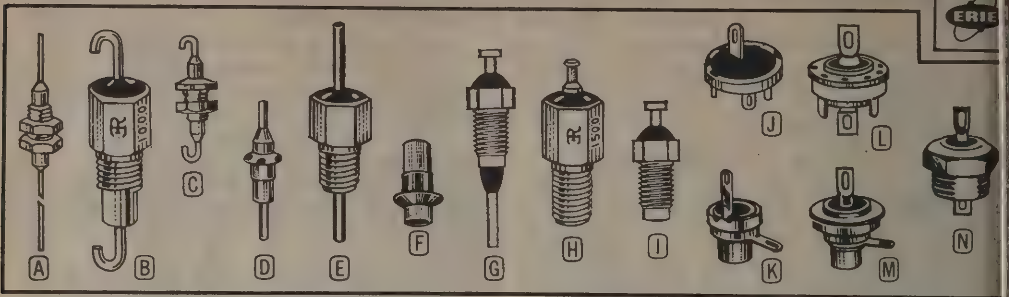
# Erie CERAMICON® FEED-THRU, STAND-OFF, BUTTON® MICA CAPACITORS



## FEED-THRU CERAMICONS®

Bypass RF to ground. Style 362 wire and 327 hook terminals can serve as tie points or support other elements; long enough for point-to-point wiring. Style 2499, miniature version of 327, is popular in aerospace. Styles 2499, 2443 and 327 are sealed in metal housings with low-loss thermosetting plastic. Style 2425 is 0.988″ lg. overall with miniature 8-32 bushing. **WVDC:** 500 volts except 2425-001, 200 volts (−55° C, +85° C); 2425-003, 100 volts (−55° C, +125° C). **Tol.:** ±20% unless otherwise noted.

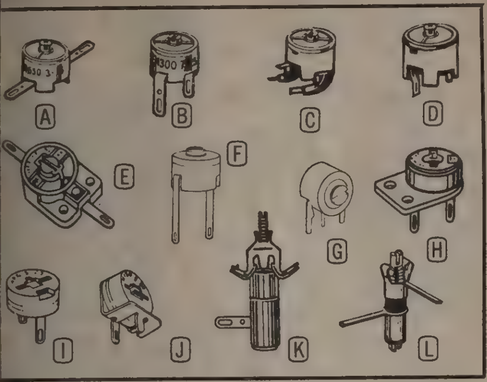
# Erie CERAMIC AND PLASTIC TRIMMER CAPACITORS



## ERIE STYLE 538
## MINIATURE CERAMIC DISC TRIMMERS

able under the most exacting conditions. Top of base and underle of titanium dioxide rotor are lapped optically flat. Silver ectrodes are applied to top of base and rotor, so that capacity changed by varying the amount of overlap; change per degree of tation is approximately constant. 200 WVDC. Body .375″ dia. x h. (538 006, .275″ h.). Style 538 000 is Fig. A; 538 002 is Fig. B; 8 006 is Fig. C; 538 011 is Fig. D.

## STYLE 557 CERAMIC DISC TRIMMERS

Excellent stability and high max.-to-min. capacitance ratio. Phenolic base; .500″ dia. ceramic rotor. Rated 350 WVDC. Body .500″ dia. x .324″ h. Style 557 000 and 557 006, Fig. H, have .531″ x .750″ base with two .124″ dia. mounting holes spaced .312″; 557 006 has top-extending screw. Style 557 013 and MIL type 557 091, Fig. I, have no mounting holes.

# Erie MONOBLOC SUBMINIATURE CERAMIC CAPACITORS

## MONOBLOC SUBMINIATURE CERAMICS

Subminiature ceramic capacitors produced by Erie's exclusive Monobloc Process®. This unique process utilizes ceramic films prepared from proprietary formulations which are subsequently fired into solid structures of one or more layers. Maximum capacitance-to-volume ratio—up to 20 µF per cubic inch—is obtained consistent with fine performance and dependability. Besides high volumetric efficiency, other features include: A wide range of capacitance values (from 5 pF to 0.5 µF); inherent stability with monolithic structure; conservative ratings for long, trouble-free life. Available to established reliability, military, and commercial specifications, and in choice of hermetically sealed glass-encased, precision molded, and phenolic-coated models.

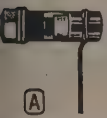
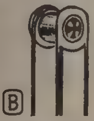
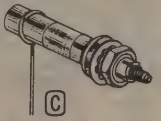
### PRECISION GLASS AND QUARTZ TRIMMERS



A



B



C

g. A types have 1.5″ lg. wire lead and #10-32 bushing with hex it for panel mount. Fig. B types have four 1.0″ lg. wire leads reiiring #64 .036″ dia. holes for printed circuit mount. **WVDC:** 00. **Q:** 500 min. at 1 MHz. **Insulation Resistance:** 1000 megims min. **Temperature Coefficient Tolerance, PPM/° C:** ±50 unless otherwise noted.

# Erie Capacitors, Filters

## "RED CAP" CERAMIC CAPACITORS

Molobloc process construction. Meet or exceed all applicable requirements of MIL-C-20 and MIL-C-11015. Lower value capacitors incorporate electrically and mechanically rugged, single plates. Higher values are obtained by stacking parallel plates with noble metal electrodes and firing at very high temperatures to form an inherently reliable, fused monolithic "bloc". Encapsulated with Jet Seal, a hard, bright polymeric coating, to provide mechanical and electrical protection under the most severe environmental conditions.

### GENERAL PURPOSE TYPES

### ±20% TOLERANCE

For applications in circuits requiring the utmost in volumetric efficiency at temperatures between −55° C and +85° C. Not intended for resonant or frequency determining applications.

## TIN-PLATED DC FILTERS FOR 30 kHz TO 10 GHz OPERATION

A wide selection of precision-built, low-pass EMI suppression filters. Hermetically sealed in tin-plated subminiature cases for positive protection against any environmental condition. Available in L, T and pi-section types for operation in various frequency ranges up to 10 GHz. **Tolerance:** ±.010. **Operating Temperature Range:** −55° C to +85°, 125° or 150° C as specified. **Case Size:** Series 9010, 0.645″ dia.; all others, 0.375″ dia.; overall length given in tables below. All have two flag terminals and ¼-28 threaded bushing 0.190″ lg. Supplied with lockwasher and hex nut.

**Note:** Curves showing minimum full-load insertion loss characteristics, measured per MIL-STD-220, are available.

## SUBMINIATURE LOW-PASS FILTERS FOR EMI SUPPRESSION

ie Filtercons are high-frequency low-pass RF filters designed provide maximum effective attenuation in the UHF range, minating parallel resonance peaks. Performance superior to ndard tubular feed-thru capacitors at frequencies above 100 Hz. Erie Broad-Band EMI Suppression Filters are miniaturized L-section types for use in low-voltage circuits; suppress interference caused by switches, relays, etc. over an extremely wide frequency range. For both Filtercons and broadband types, minimum insertion loss figures are per MIL-STD-220 for a temperature range of −55° C to +125° C unless otherwise noted.

### SINGLE-SECTION FILTERCONS™

gle-section, low-pass EMI filters for bushing or eyelet mount-. **Series 1201:** Small bushing type for rugged use; filter element dered inside the bushing; ends potted with resin. **Series 1202:** rge-bushing version of 1201; same husky construction but has ok terminals. **Type 1203:** Miniature version of 1201 with heavily ned eyelet for soldering into chassis. **Type 1204:** Same as 1202 ies but with tinned eyelet for solder installation. **Type 1250:** Subminiature, low-voltage bushing type similar in construction to the larger 1201 series; offers improved volumetric efficiency and simple mounting. **Series 1270 and 1280:** Larger versions of type 1250, 1270-009 and -024 have miniature bushing; 1270-016 and -025 have high capacity bushing; 1280-001 is for high voltage use. Filtercon EMI filters listed in table below are stock items. Other models are available on special order; prices on request.

### SERIES 1200 BROADBAND L-SECTION EMI SUPPRESSION FILTERS

oadband filters specifically designed to suppress RF interence caused by electromechanical switches, relays, motor comutators, SCR and transistor switching, etc. Offering lightweight, mpact construction excellent for aerospace applications, these n-polar devices are suitable for use on either low-voltage DC or C lines. Combine operating reliability and high attenuation own to 30 kHz) in a miniature, hermetically sealed, silver-plated el case. **WVDC:** 50 at 85° C; 35 at 105° C; 28 at 125° C (or equivalent AC peak). **Approx. Size:** .375″ dia. x .720″ lg., hex case types .995″ lg.; 1/4-32 bushing. Terminal styles available: Series 1200-000 thru -005, two #22 wire leads 1″ lg. min.; 1200-010 thru -015, one #22 wire lead, one flag terminal; 1200-021 thru -025 and -028, two flag terminals and .187″ lg. thread; 1200-091 thru -095 and -098, two flag terminals and .312″ lg. thread; 1200-016 thru -020 and -027, two flag terminals, .320″ lg. thread, hex case. With washer and nut.

# GENERAL ELECTRIC Film Type Capacitors

## LECTROFILM®-B TUBULAR CAPACITORS

Very small size, high reliability, wide temperature range (−55 to +125° C). Extended foil construction with excellent resistanc to humidity, vibration and shock. Wound with high-purity fo and closely controlled capacitor-grade polyester film dielectric these compact rolls are wrapped with tape and ends sealed wit epoxy resin. Lightweight, non-metallic case; welded lead construction (1⅝″ long minimum) for strong, positive-contact terminals. Withstand voltage of 250% of rated DC voltage applie for 1 second without momentary or intermittent arcing, breakdown, etc. **Tolerance:** ±10%; ±5% available on request.

## TYPE AF LECTROFILM®-B DIPPED CAPACITORS

Designed for PC board use in test, measurement, control, communication and other electronic equipment. Extended foil construction employs high purity aluminum foil windings with capacitor-grade polyester film dielectric; tinned, copper-clad steel leads dipped in flame-retardant PVC compound for humidity resistance. High insulation resistance: After 2 minutes at rated DC voltage (or 500 VDC, whichever is less) at 85° C insulation resistance is 1500 megohm-microfarads minimum. Operating temperature, −55° C to +85° C. Can withstand a life test of 250 hours at 85° C with 150% of rated DC voltage applied. **Size:** 0.032″ dia., #20 AWG copper clad tinned leads, 1.273″ lg. min.: AF11, .700″ lg. and AF12, .800″ lg. with leads spaced .375″; AF13, 1.250″ lg. with leads spaced .719″. **Tolerance:** ±10%; ±5% and ±20% available on request.

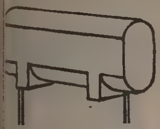
# GENERAL ELECTRIC "BLACK HAWK" FILM CAPACITORS



Ideal for printed circuit board applications in test and measurement, control, communications and consumer products. Has rugged epoxy molded case with mounting feet and radial leads, 1½" long minimum. **Temperature Range:** −55° C to +125° C, with proper derating above 85° C. **Tolerance:** ±10%.

# GENERAL ELECTRIC Computer Grade Capacitors

## SERIES 88F EXTENDED CAPABILITY COMPUTER GRADE CAPACITORS

Similar in appearance to standard Series 86F computer grade capacitors, but offering higher ripple current capability and lower equivalent series resistance. Screw-type terminal inserts. Sealed by rubber gasket recessed in molded phenolic cover; PVC insulation. Provides 1500 hour life at 85° C. Temp. range, −40° to +85° C. Available in 21 case sizes. Additional 100 WVDC and 150 WVDC values available on request.

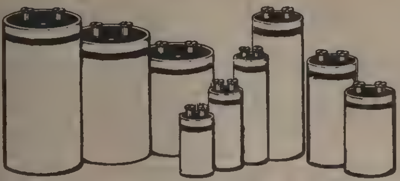
†Add suffix **AMA** to all GE numbers.

# GENERAL ELECTRIC Tantalum Capacitors

## SERIES 86F500 HIGH CAPACITANCE COMPUTER GRADE CAPACITORS



ilar in construction and performance to standard Series 86F mputer grade capacitors, but with even higher capacitance ues (up to 540,000 μF at 5 WVDC). Temperature range, 40° to +65° C; to 85° C with proper derating. Offer high ripple rent capability, low equivalent series resistance and long life. se insulation is standard PVC; screw-type terminal inserts.

Sealed by rubber gasket recessed in molded phenolic cover. Suffix **M** designates units with polymeric insulating sleeve. For units with sleeve and bracket, change suffix M to **L** (e.g., 86F501**L**). And, add to net **8c** each for size codes A, B and C; **10c** for code D; **12c** for code E; **16c** for code F; **20c** for codes G, H and J.

### *COMPUTER GRADE CASE SIZES

Sizes are given with insulated case.

| Code | Size, Inches Dia. x Lgth. | Code | Size, Inches Dia. x Lgth. |
|---|---|---|---|
| A | 1.385 x 2.140 | F | 2.510 x 4.140 |
| B | 1.385 x 3.140 | G | 3.010 x 4.140 |
| C | 1.385 x 4.140 | H | 3.010 x 5.640 |
| D | 1.760 x 4.140 | J | 3.010 x 8.640 |
| E | 2.010 x 4.140 | | |

## SUBMINIATURE TUBULAR TANTALUM WET-SLUG CAPACITORS

aximum volumetric efficiency in a subminiature package. Ideal r filtering, energy storage, bypass and coupling applications here space is at a premium. Provide excellent parameter characteristics over a temperature range of −55° to +85° C. Withand environmental requirements of MIL-C-3965. Fully insulated sign. Low, stable leakage current. Suitably sintered anode is ctrolytically formed to a proper voltage, positioned on supports thin a specially treated silver case, and gelled electrolyte is ded. Unit is then sealed using roll crimp around a Teflon†/astomer bushing. Solder-coated lead is welded to the tantalum ed-thru lead; capacitor is wrapped with insulating tape, with oxy end-fill to cover the tantalum-to-nickel lead weld. **Tolerce:** ±20%.

egistered DuPont trademark.

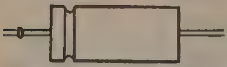
# GENERAL ELECTRIC Tantalum Capacitors



## TANTALUM WET-SLUG CAPACITORS

Tantalum wet-slug capacitors offer highest voltage x microfarad ratings ever in MIL case sizes; two to three times higher than Std. MIL ratings. Special Teflon*/elastomer double O-ring seal provides excellent thermocycle capability and long life. Broad dual-rated temperature range (−55° to +85°/125° C). Low leakage current makes these capacitors ideal for timing and other critical circuit applications. Thixotropic gelled electrolyte assures electrical stability throughout extreme temperature ranges. Capable of withstanding environmental tests of MIL-C-3965 and MIL-C-39006. Ideal for filtering, energy storage, bypass and coupling in applications where reliability and small size are essential. **Note:** Prices shown are for capacitors with insulated case; for uninsulated units, change suffix G8 to **G3** or G7 to **G2** (e.g., 69F2101G3 for ±10% tolerance) and deduct **4c** from net price shown.

## TANTALUM-FOIL TUBULAR CAPACITORS

Low leakage current decreases with time; ideal for transistorized circuits. Also available with true hermetic tantalum-to-glass seal write for information. Prices shown are for uninsulated units. For insulation, add **4c** to price and add suffix **G2** for 125° C units; for 85° C insulated units under 200 volts, add suffix **G4.**

## MINIATURE METALLIZED POLYESTER CAPACITORS

ypes LUMZ and LMZP non-polar, non-inductive capacitors are ghest grade non-hermetic metallized polyester capacitors in- nded for use in the most stringent industrial applications. To sure reliability, they are tested 100% for capacity, insulation sistance, power factor and dielectric strength at 150% of rated ltage. Unlike some inexpensive capacitors they can be used in plications down to micro-volt range. Impregnated with a styrene monomer to provide added moisture resistance and stability. Leads are of tinned copper for easy soldering and are a minimum of 1" long. **Temperature Range:** −40° C to +85° C without voltage derating and to +125° C with 50% derating. **Minimum Insulation Resistance:** 25,000 megohms-μF at 25° C. **Power Factor:** 1% maximum at 1 KHz. **Standard Capacity Tolerance:** ±10%; closer tolerance on request.

### TYPE LUMZ CAPACITORS

ith axial leads, two layers of polyester outer wrap and special gh temperature epoxy end seals.

## MULTIFILM CAPACITORS

Type LALZ

rimary advantages of these Multifilm non-polar, non-inductive apacitors are small size, rugged construction and low price while aintaining the properties required for high quality industrial pplications. The dielectric consists of multiple layers of plastic enerated by the application of successive coatings of lacquer hich contribute to the increased reliability of these capacitors. oatings are applied to a substrate and each one is polymerized efore the application of the next. This type of construction nables the fabrication of a reliable, inexpensive film that is ubstantially thinner than conventional dielectrics. Subsequent etallizing of the film and removal of the substrate results in a nique dielectric system and very small size. Capacitors windings re molded in high temperature polypropylene which adds to the tability and moisture resistance of these units. **Temperature ange:** −40° C to +85° C without voltage derating. **Voltage ating:** In addition to their DC rating they can be used in AC pplications up to 35 volts and 120 Hz. **Minimum Insulation esistance:** 250 megohms-μF for 1 μF and above; 750 megohms r below 1 μF. **Standard Capacity Tolerance:** 1 μF and above, 10%; below 1 μF, ±20%; ±5% tolerance on request.

# ITT SEMICONDUCTORS Capacitors

## TYPE TAG MINIATURE TANTALUM CAPACITORS

**Flexible**

**Preformed Leads**

Resin-dipped, solid polar electrolytic tantalum capacitors for commercial applications: Telecommunications, radio and television, sound systems, test equipment, industrial and commercial controls. Rugged construction allows installation in moderate environments experiencing moderate shock and vibration; can be mounted in any position. Available with rugged preformed leads (0.2″ or 0.25″) or flexible leads. Anode is a porous body of sintered tantalum powder on which is formed a dielectric layer of tantalum pentoxide. The thickness of this layer, which covers the total surface of the anode, is adjusted during manufacture to provide the correct voltage rating. Manganese dioxide, a solid semiconducting electrolyte, is deposited in the pores of the anode to form the negative electrode. The extremely stable oxide layer allows only a very small leakage current even after long storage; the solid electrolyte guarantees very stable electrical performance over wide temperature ranges and long time periods. Type TAG capacitors are self-healing, accomplished by a minute burn-out of the cathode layer around the leak, limited by the resistance of the electrical circuit (minimum of 3 ohms/volt).

### SPECIFICATIONS

**Capacitance:** 0.1 to 100 μF. **Tolerance:** +50%, −20% standard; ±20% or ±10% available at extra cost. **DC Voltage:** 3 to 35 volts. **Temperature Range:** Continuous operation, −55° to +85° C. **Surge Voltage:** 1.15 times rated voltage (5 times per hour for one-minute periods). **Reverse Voltage:** Not to exceed 0.3 volt for units rated less than 6 volts; 0.5 volt for units rated 6 volts or higher. **Dissipation Factor:** Less than 10% at 120 Hz and 25° C. **Impedance:** Nominally less than other electrolytic types (see ratings in table). **Leakage Current:** Does not exceed 0.05 times capacitance (μF) times rated voltage (volts), or 2 μA, whichever is greater (measured through 1000 ohm resistor with rated voltage applied for 3 minutes at 25° C). At 85° C, typical leakage current is less than 10 times the value at 25° C. **Current Limiting in Circuit:** Minimum resistance of 3 ohms/volt is recommended for the circuit to prevent burnout of the cathode layer. **Humidity:** Tested after exposure to 95% maximum humidity at 40° C for 21 days with no voltage applied. **Shock and Vibration:** Withstands 30g shock and vibration of 15g from 0–2000 Hz. **Lead Strength:** Withstands a pull of 1 pound for 10 seconds; tolerate two 90° bends without failure. **Mounting and Soldering:** Can be dip-soldered with maximum bath temperature of 250° C. Soldering time should not exceed 3 seconds; case should not be dipped to closer than ¼″ of the bath surface.

### †CASE SIZES

| Case Code | Dia., In. | Length, Inches Flexible Lead | Length, Inches Preformed Lead‡ | Wt., Oz. |
|---|---|---|---|---|
| 1 | 0.138 | 0.236 | 0.374 | .005 |
| 2 | 0.158 | 0.256 | 0.394 | .007 |

| 7 | 0.236 | 0.335 | 0.473 | .016 |

‡On special order (see below).

### VARIATIONS AVAILABLE

**Tolerance:** For ±20% tolerance, change suffix in ITT No. from -50/20 to **-20** and add **1c** to price; for ±10% tolerance, change suffix to **-10** and add **3c** to price. **Leads:** For 0.25″ preformed leads, change prefix TAG 20- to **TAG 25-** and add **0.5c** to price. For flexible leads, change prefix to **TAG 00-**; same price. **Leakage:** For .02 $C_N$ x $V_N$ or 1 μA, add **1.5c** to price. **Coding:** Plain stamping on request; same price.

### STANDARD RATINGS AND PRICES

Standard units have +50%, −20% tolerance; 0.2″ preformed leads; leakage of .05 $C_N$ x $V_N$ or 2 μA. Special variations available, as indicated at left.

## MINIATURE TEFLON® DIELECTRIC TRIMMER CAPACITORS

Ideally suited for VHF and UHF applications requiring low minimum capacity and delta C. Provide high resolution and electrical stability. Linear tuning; high Q, 2000 at 150 MHz typically; insulation resistance, $10^6$ megohms; temperature range, −55° C to +150° C. High resistance to shock and vibration. Gold metal parts and Teflon insulation. **Torque:** 0.2 to 3.0 oz.-in. **Voltage Breakdown:** 2,000 volts. **Adjustment:** 80 turns per inch.

®Registered DuPont trademark.

| Johnson No. | Mounting | Nom. pF max. | Cap per sec min. | Net Each |
|---|---|---|---|---|
| 273-0001-001 | PC | 1.5 | 0.25 | 60c |
| 273-0001-002 | Solder lug | 1.5 | 0.25 | 70c |

Subminiature trimmer capacitor for limited delta C applications. Thin Teflon dielectric provides superior electric characteristics Q, TC and VDC. High alumina stator, brass rotor, beryllium copper and brass terminals are silver plated and iridited. Q is typically 2500 at 1 MHz and 300 at 100 MHz. Insulation resistance 10,000 megohms min. after one minute at 100 VDC. Starting and running torque 0.4 to 1.5 oz.-in. **Working Voltage:** 100 VDC up to 85° C, 50 VDC up to 125° C. **Min. Breakdown Voltage:** 200 VDC at 25° C.

## CERAMIC DISC TRIMMER CAPACITORS

Micro-miniature trimmer capacitor exhibits extreme stability and long life due to encapsulation of titinate rotor plate. High alumina stator for lower loss and higher strength. Precision lapping of bearing surfaces for smooth linear tuning. Designed to meet or exceed applicable portions of MIL-C-81. **Operating Range:** −55° C to +125° C. **Working Voltage:** 100 VDC up to 85° C, 50 VDC up to 125° C.

| Johnson No. | Nominal Cap. pF Min. | Nominal Cap. pF Max. | Min. DC Voltage Breakdown | Net Each |
|---|---|---|---|---|
| 274-0009-005 | 2.5 | 9.0 | 200 | $3.95 |
| 274-0020-005 | 3.5 | 20.0 | 200 | 3.95 |
| 274-0025-005 | 5.0 | 25.0 | 200 | 3.95 |

## AIR VARIABLE CAPACITORS

Sub-miniature air variable capacitors are available in a variety of sizes, mounting configurations and section types. Rotors and stators are precision machined from one piece of solid brass for outstanding stability, uniformity and freedom from moisture entrapment. Offer high Q, typically 2000 at 150 MHz; exceptionally low temperature coefficient: Type T plus 30 ± 15 ppm/° C; Type V plus 45 ± 15 ppm/° C. Silver-plated metal parts. Type T ceramic is 95% alumina grade L-624 or better; type V ceramic is steatite grade L-423 or better.

### TYPE "T" CAPACITORS

Designed to meet or exceed EIA-RS 2-4 and MILSTP. 202 C methods 204A and 201A. Offer excellent retrace characteristics. Can be supplied with tuning slot on both ends of rotor. High temperature versions available as specials. **Air Gap:** 0.008″. **Min. DC Voltage Breakdown:** 250 volts.

| Total Plates | Nominal Cap. pF | | Lgth. Inch | Mounting Style | | | |
|---|---|---|---|---|---|---|---|
| | | | | Vertical | | Horizontal | |
| | Min. | Max. | | Johnson No. 187- | Net Each | Johnson No. 187- | Net Each |
| 6 | 1.3 | 5.4 | 0.36 | 0103-005 | 66c | 0103-105 | 70c |
| 12 | 1.7 | 11.0 | 0.47 | 0106-005 | 70c | 0106-105 | 74c |
| 12 | 1.9 | 15.7 | 0.58 | 0109-005 | 78c | 0109-105 | 82c |

**Minimum of 4 plates to max. of 20 plates also available on special order.**

### TYPE "V" CAPACITORS

High capacity in small space. Exceptionally uniform delta C and voltage characteristics. High torque, 2.5 to 10 oz.-in. Slotted rotor or shaft extension for convenient adjustment. **Air Gap:** .010″. **Peak Voltage Breakdown:** 650 volts.

#### PRINTED CIRCUIT TYPES—SINGLE SECTION

| Johnson No. | Nominal Cap. pF per sec Max. | Nominal Cap. pF per sec Min. | Plates per Section | L ± 1/32″ | Net Each |

## MIL-C-5D DIPPED SILVER MICA CAPACITORS

Meet or exceed both MIL-C-5D military specifications and EIA specification RS-153. Solder-coated brass leads except Type RDM10, solder-coated copper-clad steel leads. **Tolerance:** ±5% except as indicated. **Temperature Range:** −55° C to +125° C; others available. **Vibration Frequency:** Withstands 10–2000 Hz. **Voltage:** 500 WVDC except as noted.

### CHARACTERISTIC DESIGNATIONS

| * | Capacitance Drift | TC, ppm/° C |
|---|---|---|
| C | ± (0.5% + 0.1 pF) | −200 to +200 |
| D | ± (0.3% + 0.1 pF) | −100 to +100 |
| E | ± (0.1% + 0.1 pF) | −20 to +100 |
| F | ± (0.05% + 0.1 pF) | 0 to +70 |

*Characteristic letter, given as first letter of part number suffix.

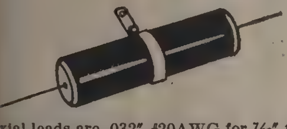
## TYPE 977 INDUSTRIAL ALUMINUM ELECTROYLTIC CAPACITORS



Feature all-welded construction, low leakage current, low dissipation factor, extended shelf life and 1.5-volt reverse voltage. Supplied with PVC insulating sleeve. xial leads are .032″ #20AWG for 7/16″ to 3/4″ cans, .040″ #18AWG r 7/8″ and larger dia. cans. **Temperature Range:** −20° C to 85° C. **Tolerance:** −10%, +100%, 3–50 WVDC; −10%, 75%, 51–350 WVDC; −10%, +50%, 351–450 WVDC.

†Add .008″ to dia. and length for PVC insulating sleeve.

# TYPE 974 SUBMINIATURE TUBULAR ELECTROLYTIC CAPACITORS

**Miconics Industries Inc.**

In aluminum case with insulating sleeve; tubular, all-welded construction. Have low DCL, DF and ESR; high C/V factor and surge rating; extended operating life. Supplied with axial wire leads and with case polarized at negative potential. Types for vertical mounting, and non-polar design also available. **Temp. Range:** −30° C to +85° C. **Tolerance:** 3–50 WVDC, −10% +75%; 51–150 WVDC, −10% +50%.

### DECI-CAPS

ets requirements of MIL-C-11015C for moisture, vibration and ck resistance. Epoxy-molded monolithic construction offers power factor and high stability. High density cordwood kaging. **Operating Range:** −55° C to +125° C. **Capacitance nge:** 4.7–27,000 pF. **Tolerance:** ±10%. **Working Voltage:** -470 pF, 200 VDC; 560–27,000 pF, 100 VDC. **Insulation istance:** 20,000 megs min. **Dielectric Strength:** 500 VDC to pF; 250 VDC, 560–27,000 pF. **Life:** 1000 hours at 125° C ler twice rated voltage. **Size:** .250″ x .100″.

### HY-CAPS

eets requirements of MIL-C-11015 for moisture, vibration and ock resistance. Monolithic construction for coupling, bypass d filter circuits. **Operating Range:** −55° C to +125° C; less an ±15% capacitance change. **Capacitance Range:** .01–2.5 μF. **lerance:** ±20%. **Working Voltage:** 100 VDC. **Life:** 1000 hours 125° C under twice rated voltage.

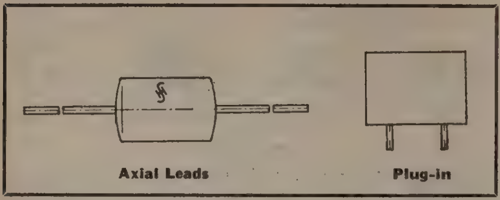
# SIEMENS CORPORATION TYPE MKH METALLIZED POLYESTER FOIL CAPACITORS



Metallized polyester foil capacitors are small in size with excellent characteristics for a wide variety of applications, especially in filters or for blocking and coupling. Metallized, self-healing polyester foil is joined at the face ends and the leads are soldered to the metallized low loss winding to ensure reliable contact. Can be used in high current pulse forming networks with minimum failure due to arc-over or direct shorts. Operating temperature, −40° to +100° C. Available in oval axial-lead style, or in rectangular plug-in type.

## TYPE B 32 231 WITH AXIAL LEADS

## SPECIFICATIONS

**Voltage Loading:** DC voltage may reach 1.25 times rated WVDC for up to 2000 hours of intermittent operation; 1.5 times rated WVDC in voltage peaks (milliseconds). **Capacitance Drift:** ±3% up to 85° C; +3%, −6% up to 100° C. **Operating Temperature:** −40° to +100° C. **Relative Humidity:** Type B 32 234, average annual relative humidity less than or equal to 75% with maximum of 95% during 30 days per annum, otherwise 85%; type B 32 231, average annual relative humidity less than or equal to 65% with maximum of 85% during 60 days per annum, otherwise 75%. **Insulation (Time Constant):** During operational life, the insulation may decrease for a short period to about 10% of value at time of delivery, especially when the capacitor is subjected to the maximum permissible humidity for a long period. **Dissipation Factor:** Tan $\delta$ value less than $10 \times 10^{-3}$ ($5 \times 10^{-3}$ average) at 1 kHz, less than $20 \times 10^{-3}$ ($15 \times 10^{-3}$ average) at 10 kHz, for capacitance values less than 3.9 μF. Tan $\delta$ value less than $12 \times 10^{-3}$ ($7 \times 10^{-3}$ average) at 1 kHz, less than $30 \times 10^{-3}$ ($18 \times 10^{-3}$ average) at 10 kHz, for capacitance values greater than 3.9 μF. Measured at +20° C. **Capacitance Tolerance:** ±10%. Available with ±20% tolerance on request.

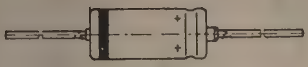
# ALUMINUM ELECTROLYTIC AND POLY-CARBONATE STACKED-FOIL CAPACITORS

## MINIATURE ALUMINUM ELECTROLYTIC CAPACITORS



l welded electrolytic capacitors combine very small volume with tstanding electrical characteristics, specially suitable for tran-torized equipment. Offer long life at temperatures from −40° to 85° C, with excellent loss factor, leakage currents and impedance lues. All connections are welded to assure contact reliability; gative pole is connected to case. Axial leads, with etched foil odes in an insulated cylindrical aluminum case fitted with a bber seal at one end. **Loss Factor:** Approximate value of Tan δ .10 for 3 WVDC types, .08 for 6 WVDC, .06 for 10 to 35 WVDC, 3 for 70 WVDC, .02 for 100 WVDC (all at 50 Hz and +25° C). **akage Current:** $I_r$ (µA) = .02 x C (µF) x V (Volts) when storage thout voltage does not amount to more than four weeks, easured 5 minutes after application of rated voltage at 20° C. **ad Size:** 1.57″ long; #20 AWG except microminiature type 1313(*), #24. **Tolerance:** +50%, −10% except microminiature pe B41313(*), +100%, −10%.

## TYPE MKM (B 32 541) STACKED-FOIL CAPACITORS

etallized polycarbonate capacitors with fixed 0.40″ lead spacing r PC mounting. Unique, stack foil construction holds volume to alf that of equivalent metallized film types; and, offers extremely w self-induction. **Temp. Range:** −40° C to +100° C operating. **apacitance Drift:** ±3% max. up to 85° C. **Dissipation:** Less than equal to 3 x $10^{-3}$ at 1 kHz. **AC Voltage:** 250 VDC units are pable of 100 VAC operation; 100 VDC units handle 75 VAC, 00 hours at 85° C. **Insulation Resistance:** Greater than 30,000 egohms for operating voltages less than 100 V; 75,000 megohms r 100 volts or over. **Tolerance:** ±5%. **Also Available:** Type 32 540 version with 0.30″ lead spacing.

# *TRW* Mylar Capacitors

## TYPE 663UW TUBULAR MYLAR* CAPACITORS

Instrument quality capacitors for maximum space saving; tough, durable moisture-resistant plastic case. Conservatively rated for long life and reliable service. Can be produced to high reliability specs comparable to MIL-C-14157 and MIL-C-27287 except size and temp. on special order. Dense thermosetting epoxy endfill bonds securely to lead and case. **Insulation Resistance:** Greater than 70,000 megs-μF, 25° C, but need not exceed 140,000 megohms. **Temperature Range:** −55° C to +85° C; up to +125° C with 50% derating. **Humidity Resistance:** Will meet or exceed requirements of MIL-C-27287, para. 3.12. **Dielectric Strength:** Two times rated voltage. **Life:** 250 hours at 85° C and 125% of rated voltage. **Tolerance:** ±10%; also available in ±20%, ±5%, ±2% and ±1%.

## TYPE 601PE "SLIM-LINE" MYLAR CAPACITORS

Special shape and leads for maximum space saving and flexibility in transistor and printed circuit applications. Replaces ceramic discs where stability with temperature change is important. Features high insulation resistance. Available in units comparable to MIL-C-14157 and MIL-C-27287 specifications on special order. Dipped epoxy coating over extended foil (non-inductive) Mylar dielectric. **Insulation Resistance:** Greater than 50,000 megohms-μF at 100 VDC, 25° C for 2 minutes, max. **Temperature Range:** Up to 85° C; derate 50% at 125° C. **Temperature Cycling:** Min. insulation resis., 25,000 megohms after MIL-STD-202B, Method 102A, Condition D no voltage applied test, capacitance change less than 1%, same test. **Dissipation Factor:** Less than 1% at 1 kHz 25° C. **Dielectric Strength:** 100 VDC. **Tolerance:** Units shown ±10%. Available in ±20% and ±5%; prices on request.

## TYPES X663F AND X663FR FLAT METALLIZED MYLAR CAPACITORS

Ultraminiature, lightweight design available with axial or radial leads to fit crowded chassis layouts. Thin, oval profile offers significant space saving. Feature high insulation resistance; self healing; long, stable life. **Insulation Resistance:** Better than 30,000 megohm-μF at 25° C, but need not exceed 30,000 megohms. **Dissipation Factor:** Less than 1.0% at 1000 ±20 Hz thru 1.0 μF at 25° C ±5° (.022 μF, 100 and 200 WVDC rated 1.5%); 1.5–50 μF at 60 ±6 Hz. **Temperature Range:** −55° C to +100° C; to +125° C with 50% derating. **Humidity Resistance:** Comply with test requirements of MIL-STD-202C, method 103B, condition A, para. 3.4. **Dielectric Strength:** Twice rated voltage for one minute. **Life:** 250 hours at +100° C and 125% of rated voltage. **Tolerance:** ±10%; also available in ±20%, ±5%, ±2% and ±1%; prices on request.

## YPE X483 ULTRAMINIATURE ETALLIZED POLYCARBONATE DIELECTRIC CAPACITORS

ermetically sealed, metal enclosed units er outstanding electrical properties: High , low DF and dielectric absorption; plus cellent retrace, TC and stability. Prode environmental protection to meet or ceed requirements of MIL-C-18312 and IL-C-19978B. Ideal for transistor cirtry and where close initial tolerances are quired. Low dielectric absorption and cellent retrace make these suitable for mputer, timing, filter and other critical cuits which may operate to 125° C. High sulation resistance. Both leads insulated. **mperature Range:** −55° C to +125° C th full rated voltage. **Tolerance:** ±10%; her tolerances available on request. Also ailable in 100 V and 400 V on request.

## YPE X440 PRINTED CIRCUIT ICROMINIATURE METALLIZED OLYCARBONATE CAPACITORS

ecifically designed for fitting components today's miniaturized designs. Metallized lycarbonate dielectric, non-inductive nding. Epoxy case with standoffs; radial ads 24 gauge tinned solid wire on 0.2″ nters. Life test and humidity resistance eet MIL-C-27287. **Voltage Rating:** 50 DC from −55° C to +125° C. **TC:** −150 m/° C. **Tolerance:** ±10%; other toleraces available. Maximum size, .290″ w. x 45″ d. x .320″ h.

## TYPE X463UW ULTRAMINIATURE METALLIZED POLYCARBONATE CAPACITORS

Small size, lightweight, low dielectric absorption and extremely high insulation resistance for use in portable and airborne equipment as well as in precision test equipment. **Insulation Resistance:** 6,000 megohms-µF, 85° C but need not exceed 50,000 megohms. **Tolerance:** ±10%.

## TYPE 935 SUBMINIATURE SOLID TANTALUM PRECISION MOLDED CAPACITORS

Specially designed to offer the maximum microfarad volts per unit volume. Molded epoxy case affords excellent physical and environmental protection. Tinned nickel leads. **Temperature Range:** −55° C to +85° C; to 125° C with 1/3 derating. **Environmental Tests:** Meet or exceed requirements of MIL-C-39003 for shock, vibration, salt spray, moisture resistance, temperature and immersion cycling. **Tolerance:** ±10%; other tolerances available on request. **Size:** 0.218″ dia. x 0.531″ lg. except 0.1–4.7 µF, 0.175″ dia. x .360″ lg.

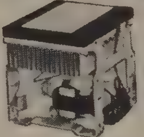
## THERMOELECTRICS

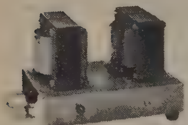
3951-1

3953-1

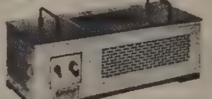
3955-1



3970-1



3971-1



7200-1

CAMBION TE components (modules) and 40-watt assemblies, listed below, may be operated by using the following **standard parts** to assemble a simple variable DC power supply: (1) autotransformer; (2) input transformer; (3) filter choke; (4) 2 silicon rectifiers; (5) rectifier heat sink. Operating instructions, power supply schematic and mounting recommendations are supplied with each component module and assembly.

### COMPONENTS

| Cambion Type No. | Description | Net Each |
|---|---|---|
| 3950-1 | 6.5 ampere module; 2.3 VDC; 6.8 watts with Ts at 27° C | $ 39.60 |
| 3951-1 | 6.5 ampere module; 5.7 VDC; 20 watts with Ts at 27° C | 52.80 |
| 3953-1 | 6.5 ampere annular ring; 5.7 VDC; 20 watts with Ts at 27° C | 52.80 |
| 3954-1 | 6.5 ampere module; 2.3 VDC; 9 watts with Ts at 27° C | 39.60 |
| 3955-1 | 5.2 ampere Cascade module; 5.7 VDC; 1 watt at 60° C$_A$T with atmospheric pressure, at Ts=27° C | 151.80 |
| 3958-1 | Ceramic high performance unit; 3.6 VDC at 9.0 amps; 19.5 watts pumping capacity with $T_s$ at 27° C | 60.00 |

### ASSEMBLIES

| Cambion Type No. | Description | Net Each |
|---|---|---|
| 3970-1 | 6.5 ampere assembly (two 3951's in series); 12 VDC; 40 watts with Ts at 35° C. With heat sink, bracket and fan assembly (115 V, 60 Hz AC) | $286.00 |
| 3971-1 | Fixed output, non-regulated DC power supply for 3970-1 assembly. Other power supplies available for all modules. | 81.80 |

### INSTRUMENTS

| Cambion Type No. | Description | Net Each |
|---|---|---|
| 7200-1 | Package cold plate unit for plug-in operation (110/120 VAC, 60 Hz at approx. 1 A). Cold plate temperatures to −15° C with $Q_c$ at 40 watts | $296.00 |
| 7210-1 | Variable controlled cold plate; cold plate temperatures adjustable to −10° C with $Q_c$ at 40 watts | 348.40 |
| 7220-1 | Proportionally controlled cold or warm plate. Set point range of 0° C to 40° C. $Q_c$=12 watts at cold plate temperature of 0° C | 522.80 |

## BATTERY HOLDERS

2880-01-02

2233-01-02

For mercury ("C" size) and zinc nickel-plated ("D" size) batteries. Snap-in holders with locking strap to hold mercury batteries under extreme vibration and shock. Body material phosphor bronze except type 2895-01-02, cold rolled steel.

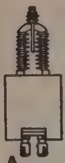
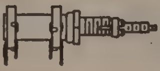
### *ORDERING INSTRUCTION CHART

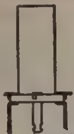
er by Basic Part No. followed by desired suffix no. 1 (for uency range) and suffix no. 2 (for terminal and collar or teral board type) selected from the following chart: 1531-3-2 for l form with 20–50 MHz slug and with 2 collars with 2 terals each.

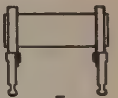
| SUFFIX NO. 1 h | | | SUFFIX NO. 2 | | |
|---|---|---|---|---|---|
| h | Slug Color | Frequency Range, MHz | Dash No. | Terminal-Collar Locations | Type Term. Bd. (Shielded Forms) |
| | Yellow | .2–1.5 | -1 | 2 ring terminals | 2 term. bd. |
| | Red | 1–20 | -2 | 2 collars—2 term. ea. | 3 term. bd. |
| | Green | 20–50 | -3 | 2 collars—1 term. ea. | 4 term. bd. |
| | White | 50–200 | -4 | 1 top collar—2 term. | 5 term. bd. |
| | Black | 100 and up | -5 | 1 bot. collar—2 term. | 6 term. bd. |
| | Purple | 2–50 | | | |
| | Blue | 40–300 | | | |

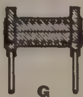
ffix No. 1: Dash numbers on these shielded forms available -1 thru -4, and -6 and -7. ‡These part numbers **available** **hout slug.** Specify by ordering with -0 for suffix 1. §No final x (Suffix No. 2) required on these types.

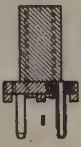


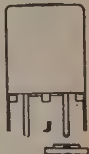


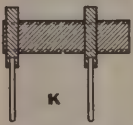


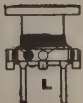


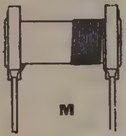












CAMBION supplies both variable and fixed inductance coils, wound on ceramic or molded forms, or supplied in electromagnetic and electrostatic shielded housings. This listing comprises the more popular items. Ask for complete catalog or for further information if you do not see what you want listed. Variable inductance ranges are supplied in standard EIA 10% overlapping incrementals, within overall ranges shown. Order by part and dash number or specify inductance range wanted if you do not know correct dash number.

## MS (MILITARY STANDARD) RF MOLDED CHOKES—QPL APPROVED

Molded epoxy, type LT4K chokes, conforming to MS spec indicated, per MIL-C-15305C. Tolerance (suffix -2, ±10%; suffix -3, ±20%) is as called out by MS spec. Popular ratings only listed. **All** MS nos. are available under each series. Order items not listed by applicable MS number. **Minimum standard package, 25 pieces.**

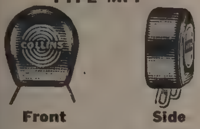
# Molded Toroids, Inductors

**TYPE MPF**



**TYPE HSA**

**TYPE HSD**

**TYPE PCT**

**Collins molded toroids are built per MIL-T-27B, Grade 5, ss R. All hermetically sealed, metal-clad types are built per L-T-27B, Grade 4, Class R. Inductance tolerance ±1% unless erwise noted.**

## CORE TYPE 050 SUBMINIATURE TOROIDS

### MOLDED PLASTIC TYPE MPF

lded in hi-temp resin with tinned brass terminals .170″ long, ced 60° apart. Normally used for frequencies up to 30 kHz. mp. range, −55° C to +105° C. Mounts by 3-48 tapped screw e in center. **Size:** 0.688″ w. x 0.738″ h. x 0.375″ thick.

## HERMETICALLY SEALED TYPE HSA AND HSD

Sealed version of the Type MPF gives optimum case size for printed circuit applications. Compression glass header gives seal. For inductance value and $R_{DC}$ refer to corresponding MPF number. **HSD:** Mounting tab 3/32″ w. x 3/16″ long, leads spaced .150″ x 1 7/8″ long min.; size, 45/64″ O.D. x 7/16″ thick max. **HSA:** Leads spaced .484″ x 1.125″ long min.; size, .781″ sq. x .375″ thick max.

| For Collins Number | Net Each, Lots of | | | | |

## NEW PRINTED CIRCUIT TOROIDS

### MOLDED EPOXY TYPE PCT

All Collins new printed circuit toroids are built per MIL-T-27B, Grade 5, Class S. Molded in high temp. epoxy resin—allowing operation at −55° C to +130° C temperatures. Leads spaced 0.1″ x 1.50″ long min. **Size:** 0.660″ O.D. x 0.390″ thick max. Mounting is accomplished by soldering directly into place, eliminating the requirement for mounting hardware. **Inductance Tol:** ±1% unless otherwise noted.

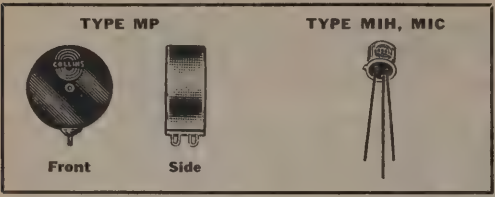
# COLLINS Molded Toroids, Inductors



## CORE TYPE 206 TOROIDS

Molded Type MP hi-temp resin package features excellent Q characteristics compatible with size and weight requirements of portable and airborne equipment. Normally used in 1 kHz to 20 kHz range. Temp. range, −55° C to +105° C. Tinned brass terminals 3/16" long. Tapped center mounting takes 6-32 screw. **Size:** 1 1/16" O.D. x 1/2" thick. **Hermetically sealed (Type HS) toroids available on request.**

## CORE TYPE 930 TOROIDS

In molded hi-temp resin case Type MP. Provides higher Q, power level and stability with only slight increase in weight and volume. Most useful in 500 Hz to 10 kHz range. Mounts with center 6-32 tapped screw hole. Temp. range, −55° C to +105° C. Tinned brass terminals 7/32" long. **Size:** 1 5/16" O.D. x 23/32" thick. **Hermetically sealed (Type HS) toroids available on request.**

## TYPE MIH MICRO INDUCTORS

Meet MIL-C-15305, Type LT7J. Hermetically sealed in nickel alloy TO-5 type cases. Permits machine insertion to printed circuit boards. High Q and miniature size for any use. Dielectric strength, 100 V rms. Insulation resistance 10,000 megs min. at 100 VDC. Temp. range, −55° C to +85° C, with inductance change ±2% over −20° C to +85° C range.

## TYPE MIC MICRO INDUCTORS

Meet MIL-T-27B Grade 4, Class S. Hermetically sealed in standard transistor cases. Permits automatic machine insertion. Combines high Q (more than 30 at 20 kHz, 120 at 200 kHz) with small size for nearly any use. Dielectric strength, 100 V rms. Insulation resistance 10,000 megs min. at 100 VDC. Temp. range, −55° C to +130° C, with inductance change ±2% over −20° C to +85° C range. Inductance tolerance ±5%.

## ★CHOKE COLOR CODING

MIL identifier is wide silver band (or large dot on small units) at one end of coil. Three narrow bands (or small dots) follow: When first or second is gold, it indicates a decimal point for values less than 10 µH; other bands are significant figures. Above 10 µH, first two bands are significant; third band, multiplier. Fourth band of silver indicates ±10% tol.

| Significant Figure Identification | | | | | | Multiplier Band | |
|---|---|---|---|---|---|---|---|
| Color | Sig. No. | Color | Sig. No. | Color | Sig. No. | Color | Multiplier |
| Black | 0 | Yellow | 4 | Gray | 8 | Black | 1 |
| Brown | 1 | Green | 5 | White | 9 | Brown | 10 |
| Red | 2 | Blue | 6 | | | Red | 100 |
| Orange | 3 | Violet | 7 | | | Orange | 1000 |

## SHIELDED SUBMINIATURE RF COILS

Minimum 2:1 inductance range with small Q change. Adjustable from top or bottom. Cup core magnetic shielding; metal electrostatic shield. Printed circuit terminals on base and shield. **Size:** ½″ sq. x ⅝″ high.

# J. W. Miller RF Chokes

## SUBMINIATURE RF CHOKES (FIG. A)

Versatile iron core RF chokes meet the industries' demand for high reliability, ultra-miniature components. Ideally suited to network and filter design, delay lines, and computer applications. Tolerance: 1 µH, ±20%; 1.1-15 µH, ±10%; over 15 µH, ±5%.

## CERAMIC FORM RF CHOKES (FIG. C)

High quality fixed coils wound on silicone impregnated steatite form. Coils are standoff type mounted by a single 6-32 screw. Primary application is in low power transmitters, etc., where relatively high current capacity and low distributed capacitance are important. Tolerance: ±5% at 1000 Hz. Form 11⁄16" dia. x 1 15⁄16" long.

## AXIAL LEAD RF CHOKES

Cover 0.1 µH to 10 mH in 5 decades with 8 coils per decade; inductance increases in steps of approx. 50%. Wound on low loss molded phenolic or powdered iron core forms; impregnated with a moisture and fungus resistant varnish. Powdered iron used permits operation at all frequencies up into the UHF region. Phenolic form 5⁄16" dia. x ¾" lg. Iron core form 7⁄32" dia. x ⅞" lg. Leads 1½" lg. Tolerance: 0.10-1 µH, ±20%; 1.1-10 µH, ±10%; 10 µH and up, ±5%.

## "N-CAP" ENCAPSULATED RF CHOKES

Reliable, encapsulated choke withstands extreme temperature, humidity, and impact shock without physical or electrical change. Provide maximum current carrying capacity for a given mold size at high ambient temperatures. Higher Q and self-resonant frequencies than previously available for same value and size. Exceed MIL-C-15305 requirements. Encapsulating compound is purest mica-filled epoxy resin available. Coil is wound with the finest copper wire to achieve desired inductance and maintain high ambient temperature resistance. Leads are firmly, positively welded to body; never notched or flattened during or after molding. **Size:** .375" lg. x .157" dia.; leads 1½" lg. **Inductance Tolerance:** ±20%, Nos. R1550-0 thru R1550-17; ±10%, all others.

## FERRITE BEAD CHOKES

Present no more impedance than ordinary bus wire at power supply and audio frequencies. Substantially constant AC resistance and impedance from 10 to above 300 MHz; useful for isolating high frequency signals from low frequencies. Low effective inductance is completely overcome by the AC resistance, eliminating undesired resonant effects. Made of individual high quality ferrite beads; number varies depending upon characteristics required. Tinned wire leads are an integral part of the choke, yielding maximum lead strength. Completely epoxy encapsulated. Dia., .200", R45-1 to R45-12; others .313". Leads 1½", AWG-20, R45-1 to R45-12; others AWG-22.

†Typical ratings.

## FERRITE CORE CHOKES

Relatively high "Q" values in small physical size; complete line includes 14 inductances from 150 µH to 10 mH in MIL-SPEC values. Temperature coefficient less than 550 ppm per degree C for small coils; less than 250 ppm per degree C for 1 mH and over. Axial leads facilitate mounting directly to terminals. Fungus-proof varnish impregnated per MIL-V-173A provides maximum protection against tropical conditions. For primary use in networks and filters from 50 kHz to 1500 kHz; can be used as resonant elements in IF or RF circuits. Size: ⅝" long; 9/16" max. dia. (7/32" min. dia.).

# NYTRONICS, INC.
## ESSEX ELECTRONICS DIV.

# INDUCTORS:
# FIXED, SHIELDE

### WEE DUCTORS

Subminiature shielded inductor. Provides special merits in high density circuit applications. Has great inductance-to-size ratio. Conforms to MIL-C-15305C, Grade 1, Class B specifications. **Inductance Tol.:** ±10% (.1 to 22 μH), ±5% (27 to 1000 μH), ±10% (1200 to 56,000 μH), ±20% (68,000 to 180,000 μH).

**Size:** .164″ dia. x .450″ lg. **Leads:** #24 AWG, 1.3″ lg. **Operating Temp.:** −55° C to 125° C.

### WEE-WEE DUCTORS

iniature shielded inductor, permits high density applications. inductance-to-size ratio. Color-coded per MIL-C-15305C. **ctance Tolerance:** ±10%. **Power Rating:** I max. based on tt dissipation. **Operating Temperature:** −55° C to +125° C. 0.133″ dia. x 0.335″ lg. **Leads:** #24 AWG, 1.3″ lg.

### SUPER WEE-WEE DUCTOR SERIES ALSO AVAILABLE

ielded miniature design provides greater inductance-to- e ratio in molded epoxy envelope. "T" lead construction values 15 to 10,000 μH for exceptional reliability. Meets IL-C-15305C, Grade 1, Class B specifications. **All values cked from 0.10 to 10,000 μH. Prices and Specifications request.**

### PEE-WEE DUCTORS
### ULTRA MINIATURE

Amazing Pee-Wee Ductors represent a 66% size reduction from the smallest magnetically-shielded, axial lead inductor series previously available anywhere. Furthermore, this size reduction was obtained with negligible loss of electrical performance by employing several unique concepts in RF coil design. **Inductance Tolerance:** ±10%. **Operating Temperature:** −20° C to +80° C. **Size:** .085″ dia. x .155″ lg. **Leads:** #26 AWG, 1.5″ lg.

# INDUCTORS: FIXED, UNSHIELDED, VARIABLE

## NEW PEE-DEE DUCTORS

Microminiature, axial-lead RF inductors meet MIL-C-15305, Grade 2, Class 5 specifications. **Inductance Tolerance:** ±10%. **Operating Temperature:** −55° C to +125° C. **Size:** .075″ dia. x .140″ lg. **Leads:** #26 AWG, 1.5″ lg.

## NEW ADJUSTOROID INDUCTORS

New development in the toroidal coil field; offers available toroid in one of three case sizes. Developed for PC and similar light weight applications. Meets MIL-C-15305A specifications. **Inductance Tuning Range:** ±5%. **Operating Temperature:** −55° C to +125° C. **Size:** ATE-11, ¾″ dia. x 1³⁄₁₆″ lg.; ATE-0, 1¹¹⁄₁₆″ dia. x 1″ lg.; ATE-4, 1⁵⁄₁₆″ dia. x 1³⁄₁₆″ lg. **Leads:** #20 TCW.

*Based on temperature rise not to exceed 35° C at 90° C ambient.

**SEE ILLUSTRATIONS ON A PREVIOUS PAGE**

## RFC-S, -M, AND -L INDUCTORS

Molded non-shielded inductors. Provides exceptional reliability in critical circuitry applications. Meets requirements of MIL-C-15305C, Grade 1, Class B. **Inductance Tol.:** ±10% (0.1 to 22 μH), ±5% (27 to 10,000 μH). **Power Rating:** ⅓ watt dissipation for **S** and **M** series and ½ watt dissipation for **L** series. **Size: S** type—0.188″ dia. x 0.44″ lg. **M** type—0.25″ x 0.60″, **L** type—0.31″ x 0.90″. **Leads:** #22 AWG for **S**, #21 for **M** and **L**; 1.3″ lg. **Operating Temp.:** −55° C to +125° C.

## VARIABLE VIV-VIH DUCTORS

Miniature type, encapsulated in epoxy resin for reliability. Meets requirements of MIL-C-15305A, Grade 1, Class B. **Inductance Tuning Range:** ±10% (0.1 µH), ±15% (0.15 to 0.22 µH), ±20% (0.33 to 4700 µH). **Size:** 0.40" dia. x 0.50" lg. (vertical style); .40" dia. x .5" wide (horizontal style). **Leads:** #22 AWG. **Operating Temp.:** −55° C to +125° C.

## WEE V-L DUCTORS

Subminiature shielded adjustable high Q value inductor. May be mounted vertically or horizontally. Meets MIL-C-15305C, Grade 1, Class B. **Inductance Tuning Range:** ±10%. **Working Voltage:** 300 VDC. **Size:** 0.30" dia. x 0.40" lg. **Leads:** #24 AWG. **Oper. Temp.:** −55° C to +125° C.

## LOW CURRENT "VERSATILE" CONTROL/RECTIFIER TRANSFORMERS

Primary 117 V, 50/60 Hz. Three isolated 12-volt secondaries (one with a center tap) provide many combinations of voltage and current with series or parallel connections. Ideal for pilot lamps, miniature relays, low current-low voltage power supplies, etc. Mounting type S.

ith lugs.

## PRINTED CIRCUIT POLYCHROMATRANS

nted circuit board transistor transformers. Test volts, 500 rms. Color-coded by application. Up to % reduction in distortion over other brands. Improved lower-end frequency response. Leads are fatigue stant gold-plated nickel-iron alloy, .020" dia., 5/16" long and have multiples of 0.1" grid spacing for application. Size .410" w. x .310" d. x .480" h.

## POWER TRANSFORMERS FOR CAPACITOR INPUT SYSTEMS

Primary 117 V, 60 Hz; PCC and PSC types may be operated at 50 Hz. Meets EIA requirements for electrical tolerances, dielectric strength, temperature rise and construction. Operating temperature 105° C max. All secondary AC voltages ±3%.

## PICO MINIATURE TRANSFORMERS—PM SERIES

**PM-M (Fig. A):** Epoxy molded finish; gold plated leads, 0.020″ x ¾″. Frequency response ±2 dB, 300 Hz to 100 kHz (PM3 and PM5, to 45 kHz). Power level given for 15% max. distortion, except PM35, 20% and PM37, 25%. Size, .410″ x .465″ x .310″ max. Wt., 0.1 oz. MIL type TF5RX—ZZ. **PM-F (Fig. B):** Open frame, resin impregnated, 4″ #30 plastic leads. Size, .250″ x .375″ x .406″ max. Wt., .05 oz. MIL type TF6RX—ZZ.

# MICROTRAN MINIATURIZED MILITARY AND INDUSTRIAL TRANSFORMERS

## MICRO-MINIATURE AUDIO AND TRANSISTOR TRANSFORMERS—MMT SERIES

**MM-M (Fig. J):** Molded, for plug-in printed circuit applications. Cast epoxy resin for high resistance to extremes of ambient temperature. MIL Type TF5RX—ZZ. Size, 7/8" x 25/32" x 17/32" with 5/32" pins, .020" dia. Weight, ½ oz. **MM-H (Fig. K):** Hermetically sealed with high compression glass terminals. Gray enamel finish. MIL Type TF4RX—YY. Size, 15/16" dia. x 11/16". Weight, ¾ oz.

**MM-FB (Fig. L):** Open frame with channel. Available with plug-in tab channel or without channel on special order. MIL Type TF6RX—ZZ. Size, 13/16" x 19/32" x 15/32", plus tabs. **MM-CM (Fig. M):** Contour molded on special order only; for mtg. on top of chassis. Size, 7/8" x 9/16" x 25/32". In 1–49 quantity, add **$12.50** lot set-up charge.

## SUBMINIATURE AUDIO AND TRANSISTOR TRANSFORMERS—SMT SERIES

**SM-AF (Fig. N):** MIL-T-27B-AF modified case; compression sealed ceramic terminals; gray enamel finish. MIL type TF4RX—YY. Size, ¾" x ¾" x 1⅛" max. with two 4-40NC-2 spade mtg. bolts. Wt., 1⅛ oz. **SM-H (Fig. K):** Hermetically sealed; high compression glass terminals; gray enamel finish. MIL type TF4RX—YY. Size, 15/16" dia. x 15/16" h. Weight, 1 oz.

**SM-FB (Fig. L):** Open frame with channel. With plug-in tab mounted channel or without channel on special order. MIL type TF6RX—ZZ. Size, 15/16" x 19/32" x ¾", plus tabs. Wt., 0.750 oz. **SM-M (Fig. O):** Molded, for plug-in PC applications. MIL type TF5RX—ZZ. Size, 1 5/32" x ⅞" x ¾" max. Wt., 1½ oz. **SM-CM (Fig. M):** Contour molded on special order.

## DC TO DC CONVERTER TRANSFORMERS—SWITCHING TYPE

Provide improved reliability and efficiency over vibrator and rotary power converters. Approximate repetition rate, 800 Hz. Full wave and CT loads may be simultaneously drawn, but total VA output should not be exceeded for continuous-duty operation. Transistors listed are for reference only; user must verify that max. ratings will not be exceeded.

## DC TO DC CONVERTER TRANSFORMERS—BLOCKING OSCILLATOR TYPE

Laminated series blocking oscillator type. Approximate repetition rate, 400 Hz. All are **Fig. L** except M8051, **Fig. Q.** DC output voltage for all but M8073 is given for transformer used in blocking oscillator circuit with single capacitor-input rectifier. DC input current, output current and output voltage of Model M8073 depend on load and bias; frequency varies from 100 to 2800 Hz. Fig. L types are open frame units meeting MIL designation TF6RX09ZZ; Fig. Q type is enclosed unit meeting MIL designation TF4RX09YY.

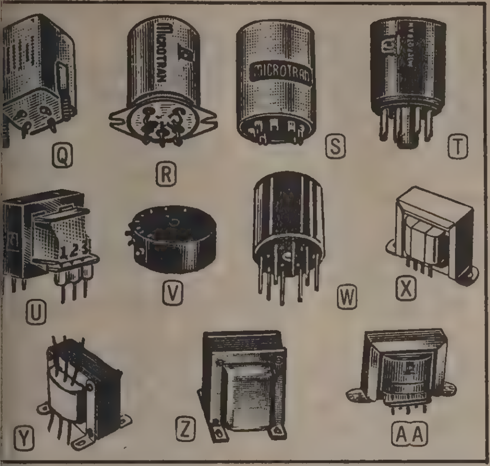
# MICROTRAN MINIATURIZED MILITARY AND INDUSTRIAL TRANSFORMERS



## MINIATURE TRANSISTOR AND AUDIO TRANSFORMERS— M AND MT SERIES

**M-M (Fig. O):** Molded, for plug-in printed circuit use. Cast epoxy resin provides highest resistance to temperature extremes. MIL Type TF5RX—ZZ (Insert MIL No. from table). Max. Size, 1 5/32″ x ⅞″ x ⅞″. Weight, 1¾ oz. **M-AG (Fig. Q):** Enclosed in modified MIL-T-27B AG case with compression sealed ceramic terminals. MIL Type TF4RX—YY. Max. Size, 1″ x 1″ x 1⅜″. Weight, 2⅜ oz. **M-H (Fig. R):** Hermetically sealed with high compression glass terminals, gray enamel finish. Available on special order with .120″ holes. MIL Type TF4RX—YY. Size, 15/16″ dia. x 1 7/16″ max. Weight, 1¼ oz. **M-A (Fig. S):** Aluminum case with 2-56 screws. MIL Type TF3RX—YY. Size, .875″ dia. x 1 3/16″. Weight, 1.25 oz. **M-FB (Fig. L):** Open frame with channel. Available with plug-in tab channel or without channel on special order. MIL Type TF6RX—ZZ. Size, 1 3/64″ x 13/16″ x 27/32″ max., plus tabs. Weight, 1.13 oz. **M-P (Fig. T):** Octal plug-in type in sealed plastic housing. MIL Type TF6RX—ZZ. Size, 1 3/32″ dia. x 1 15/32″. Wt., 2 oz. **M90 Shield (Fig. E):** 25 dB magnetic shield for Type M-A. Two clearance holes on 11/16″ centers. **M-PC (Fig. U):** Open frame PC with terminals molded into bobbin to maintain accurate dimensions for PC board. MIL Type TF6RX—ZZ. Size, ⅞″ x 1 1/32″ x 1″; terminals 3/16″ below bobbin. Wt., 1.2 oz. **M-CM (Fig. M):** Contour molded on special order only; for mtg. on top of chassis. Size, 1 5/32″ x ⅞″ x ⅞″.

## PLUG-IN PRINTED CIRCUIT POWER TRANSFORMERS

esigned for use in latest solid state circuitry for such applications power supplies, control equipment and instrumentation. Pro- de voltage step-down and isolation from power line at relatively w power levels. Power ratings range from 1.5 to 7.5 VA in 60 Hz ries, from .325 to 4 VA in 400 Hz series, yet units are small ough for optimum miniaturization. Precision spaced plug-in rminals provide fixed mounting centers, usually found only in expensive molded transformers. Constructed in accordance with MIL-T-27 Grade 6, class R; class S available on special order. Dual secondaries can be parallel connected to double the current rating or series connected to double the voltage rating of one winding; series connection also provides center tap. All models have 115 V primary. Series PC4300, PC4400 and PC6500 are **Fig. U;** Series PC6600 and PC6700 are **Fig. AA**

| Series | Approx. Watts | W. x D. x H. Max. | Wt., Oz. |

# MICROTRAN MINIATURIZED MILITARY AND INDUSTRIAL TRANSFORMERS

## POWER SUPPLY TRANSFORMERS (FIG. P)

For silicon rectifier circuitry and filament applications. Hermetically sealed. Primary, 105/115/125 V. Output voltage given for resistive or inductive loads, based on approx. 1 V drop per rectifier. MIL Type TF4RX01— (add MIL case type from table) per MIL-T-27B.

## 60 Hz CONTROL/POWER SUPPLY TRANSFORMERS

For low voltage, high current applications such as filament supplies, relays, silicon rectifiers, etc. Primary 105/115/125 VAC. Open frame construction. Color-coded leads.

DC output for resistive or inductive load, output volts based on 1 V approx., drop/rectifier. Full wave *CT; ‡bridge. §Series. #Sec. connected series, 24 V at 4 A; parallel, 12 V at 8 A.

## 400 Hz TOROIDAL POWER TRANSFORMERS (FIG. W)

Ideal for applications requiring minimum size and weight. Feature epoxy molded case and printed circuit pins which can be bent for chassis mounting. Toroidal cores provide greater efficiency and low phase shift. All have 115 V primary windings and center .170" clearance hole for #8 screw. MIL Type TF5SX01ZZ.

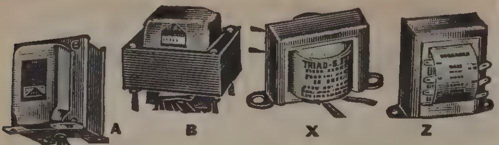
# Standard Series Transformers



## COMBINED PLATE AND FILAMENT

**Primary 115 Volts—60 Hz**

"Climatite" treated coils and cores for protection against moisture and for elimination of lamination chatter. Small in size, yet loss is at a minimum. Temperature rise design is 55° C. Copper foil static shields grounded to case and core.

# MIL-T-27B Sealed Transformers

HS & HSM

## HERMETICALLY SEALED IN MIL STANDARD CASES

All Series HS and HSM units are designed to meet MIL-T-27B specifications, and are cased in MIL-T-27B standard cases. Exceptions are those in GP cases, which may be classified as MIL-T-27B "YY" cases. All are "Climatite" treated, finished in gray enamel, and permanently marked with electrical and test data as specified in MIL-T-27B.

### LOW LEVEL AUDIO INPUT TRANSFORMERS

Static shield except HS-5.

| Triad No. | Impedance, Ohms Primary | Impedance, Ohms Secondary | Freq. Resp. Hz | Case Key• | Net Each* |

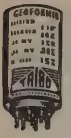
# Geoformers and Toroids

## GEOFORMERS



Designed to meet the peculiar conditions developed in geophysical recording equipment; approach linear response 5-2000 Hz with gradual attenuation above 2000 Hz. Inductances held within ±5% of standard. "Climatite" improved vacuum impregnation. GP-1 and AF-1 cases are min. and subminiature units.

# DIV. OF TRW TRANSFORMERS AND INDUCTORS

## DESIGNED, MANUFACTURED AND SUCCESSFULLY TESTED TO MIL-T-27C

### -T★ AND DI-T★ TRANSISTOR TRANSFORMERS

DO-T DI-T

Subminiature transistor transformers are designed, manufactured and tested to MIL-T-27C specifications. Leads are plastic insulated; withstand 10-lb. pull. Ideal for printed circuit use. High efficiency, low distortion and wide frequency range. Metal case. **Size:** 5/16" dia. x 13/32" lg., DO-T; 5/16" dia. x 1/4" lg., DI-T. U.S. Pat. No. 2,949,591; others pending.

### DO-T200★ TRANSISTOR TRANSFORMERS

Rugged, metal case construction uses the same unique winding techniques as that of DO-T above. Hermetically sealed, high efficiency, low distortion and excellent response. Straight 7/8" long leads, .016" d. Dumet wire, gold plated and may be either welded or soldered. Designed, manufactured and successfully tested to MIL-T-27C. **Size:** .350" dia. x 9/16" high. Weight, 1/8 oz. U. S. Pat. No. 2,949,591, others pending.

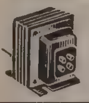
### SIGNALLING AND CONTROL TRANSFORMERS



High power transformers, suitable for operating relays, sirens, horns, etc. from 115 VAC, 50/60 Hz. Primary, 110–120 VAC. Secondary, 4, 8, 12, 16, 20, 24 V. Volt-ampere rating is based on the 24 volt secondary voltage, with corresponding reduction on lower voltages. Primary leads UL Approved. Screw-type binding posts on output.

| UTC Type | Rating, Watts | Size, Inches L. | Size, Inches W. | Size, Inches H. | Mtg. Size, Inches | Wt., Lbs. | Net Ea., 1-4 |

# DIV. OF TRW TRANSFORMERS AND INDUCTORS

## DESIGNED, MANUFACTURED AND SUCCESSFULLY TESTED TO MIL-T-27C

### FILAMENT, POWER, PLATE TRANSFORMERS

Primary 105/115/125 V, 54/66 Hz. Current ratings are for high voltage secondary DC, choke input filter. For condenser input, reduce by 70%. All units are MIL grade 4, ruggedized; equally usable where grade 1 is specified. Electrostatically shielded. Designed, manufactured and tested to MIL-T-27C specifications.

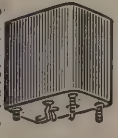
### SRC-10★ PRECISION SCOTT-T REFERENCE TRANSFORMER

Used in precise conversion of 3-wire synchro information to equivalent resolver information. Two outputs 90° apart can be utilized in analog and digital computer or coordinate transformation applications. **Input:** 90 V, 60/400 Hz. 3-phase with high impedance suitable for synchro output. **Output:** 2-Phase: Two 3 V at .25 mA. Magnitudes of output voltage matched within 0.25%; phase angle of output voltage is 90° (±.225°). Designed, manufactured and successfully tested to MIL-T-27C, TF4SX09AJ.



**UTC Type SRC-10**—Net Each, 1–4 .................... **$31-85**

**UTC HAS MORE TRANSFORMERS AND FILTERS LISTED ON THE QPL* THAN ALL OTHER MANUFACTURERS COMBINED!**

***(1) MIL-T-27, QPL-27-48; (2) MIL-F-18327, QPL-18327-20; (3) MIL-T-21038, QPL-21038-13.**

### PIL★ ULTRAMINIATURE AUDIO INDUCTORS

Smallest audio inductor available. Incorporating the DO-T and DI-T construction, these units are designed, manufactured and successfully tested to MIL-T-27C. All inductors are subjected to a 500 volts dielectric strength test instead of 100 volts, for higher safety and reliability. Size: ⁵⁄₁₆" dia. x ⁵⁄₁₆" h. Wt., 1/20 oz. U.S. Pat. No. 2,949,591; others pend.

### PIL★ AUDIO TRANSFORMERS

The smallest audio transformers available, employing DO-T typ construction to overcome inherently poor electrical characteristic usually found in miniature audio transformers. Subjected to 500-volt dielectric strength test (instead of the usual 100 volts), al units offer higher safety margins and reliability. Ruggedized design employs rigid cylindrical bobbin that eliminates wire movement and stress. Turns are circular for uniform wire lay. Leads ar rigidly anchored to coil wire in terminal board fashion without need for tape; and, brought out through strain relief. Termination is weldable and solderable, insulated gold-plated Dumet leads. Max. level, 100 mW. Frequency Range, ±3 dB, 800–250,000 H at 1 mW. Metal case ⁵⁄₁₆" dia. x ³⁄₁₆" h. to Grade 4. Wt., 1/20 oz. U.S. Pat. No. 2,949,591; others pending. Illus. same as PIL inductors. **Available to Class S on special order. See other UTC pages for additional Audio Transformers.**

## DESIGNED, MANUFACTURED AND SUCCESSFULLY TESTED TO MIL-T-27-C

### NEW PIP★ SERIES TRANSISTOR PULSE TRANSFORMERS TO MIL-T-20138B

Subminiature transistor-type pulse transformers are designed to give a maximum of component density in equipments. The configuration is especially compatible with transistors. Using the basic design of the UTC DO-T* and DI-T* series, units achieve exceptional reliability. Ratio 4:4:1, checked and adjusted in a transistor test circuit to give the required pulse width. Designed, manufactured and successfully tested to MIL-T-21038B by full environmental testing. All units are completely metal cased, MIL type TP6RX4410CZ. All units individually adjusted to parameters shown in table below. Size: 5/16" dia. x 5/16" h. Weight, 1/20 oz. U.S. Pat. No. 2,949,591; others pending.

### TRANSISTOR SUPPLY TRANSFORMERS

Transistor supply transformers with primary 115 VAC, 50/60 Hz (tapped on H-143 thru H-146 for dual secondary voltages). DC ratings are approximate and are based on silicon bridge rectifier (except H-141, H-142 also shown F.W. CT.). Choke input VDC is based on 10% voltage drop in choke. Condenser value, C(*), is in 1000 µF. H-141, H-142, H-147 under secondaries in parallel is single winding. MIL type TF4RX02.

### UNIV. TRANSISTOR SUPPLY TRANSFORMERS

UTC universal transistor supply transformers are ideal for use in low voltage DC supplies, telephone supplies, bias voltage supplies, battery chargers and plating rectifiers. Highly reliable units are encased in MIL cases, similar to TF4 type illus. above. Primary taps can modify nominal AC voltages by −6%, +6% and ±12%. Capacitor following rectifier affects the DC voltage. All units TF4RX02.

#### 50/60-Hz TYPES

Primary 115 VAC, 50/60 Hz. Nom. secondary, 8.25–40.5 V except H-965, 16.5–81 volts nom.

| UTC Type | MIL DC Range | | Indus. DC Range | | MIL Case | Each, 1-4 |
|---|---|---|---|---|---|---|
| | Volts | Amps | Volts | Amps | | |
| H-915 | 6–53 | .065–.02 | 6–53 | .085–.025 | AH | $19.71 |
| H-925 | 6–53 | .22–.07 | 6–53 | .28–.085 | AJ | 19.90 |
| H-935 | 6–53 | 1.2–.4 | 6–53 | 1.52–.48 | FA | 29.86 |
| H-94 | 6–53 | 3–1 | 6–53 | 3.8–1.2 | HA | 33.43 |
| H-95 | 6–53 | 7.5–2.5 | 6–53 | 9–3 | KA | 43.80 |
| H-96 | 6–53 | 18–6 | 6–53 | 23–7.5 | OA | 83.61 |
| H-965 | 12–106 | 1.5–.5 | 12–106 | 1.9–.6 | HA | 33.84 |

#### NEW 400-Hz MET★ TYPES

Primary 115 V, 400 Hz. Nom. sec., 8.25–40.5 V except MET-495, 16.5–81 volts nom.

| | | | | | | |
|---|---|---|---|---|---|---|
| MET-445 | 6–53 | .6–.2 | 6–53 | .75–.24 | AH | $19.10 |
| MET-455 | 6–53 | 1.2–.4 | 6–53 | 1.52–.48 | AJ | 25.89 |
| MET-465 | 6–53 | 3–1 | 6–53 | 3.8–1.2 | FA | 26.28 |
| MET-475 | 6–53 | 7.5–2.5 | 6–53 | 9–3 | HA | 33.43 |
| MET-495 | 12–106 | .6–.2 | 12–106 | .76–.24 | AJ | 27.06 |

#### 400-Hz MOLDED TYPES

Primary, 105/115 V, 380-1,000 Hz. Secondary, 6.3 V CT; 2,500 V rms test. Molded type TF5SX01ZZ is illustrated,

| UTC Type | Sec. Amps | Size, Inches | | | Wt., Lbs. | Net Ea., 1-4 |
|---|---|---|---|---|---|---|
| | | L. | W. | H. | | |
| H-101 | 3.5 | 1 25/32 | 1 21/32 | 2 | .3 | $22.69 |
| H-102 | 5.5 | 1 3/4 | 2 | 2 1/4 | .44 | 58.50 |
| H-103 | 10 | 2 5/16 | 2 1/8 | 2 1/2 | .8 | 29.86 |

### TRANSISTOR/FILAMENT SUPPLY TRANSFORMERS

Hermetically sealed units for transistor or filament supply use. **Primary:** 105/115/210/220 VAC, 50/60 Hz, except types H-119, H-130, H-137, H-138 (115 VAC) and H-131 (115/220 volts). Suited to 400/100 Hz service. **Size:** H-128, H-129; 6½" x 5½" x 7¾" h. Weight, H-128, 34 lbs.; H-129, 28 lbs. All ratings are MIL-T-27C except **Amps** (Industrial) ratings.

## ELECTRIC WAVE FILTERS DESIGNED, MANUFACTURED & SUCCESSFULLY TESTED TO MIL-F-18327C

### INTERSTAGE AND LINE FILTERS

Designed, manufactured and successfully tested to MIL-F-18327C in compact, shielded case. **Frequency:** Indicated by stock number, in Hz; example, HMI-200 has 200 Hz cut-off. **Size:** 1 3/16" x 1 11/16" x 1⅝" h. (Wt., 6 oz.) except BMI-30, BMI-50, HML's, HMI's, LMI-100 and LML's are 2½" h. (Wt., 9 oz.). **BMI Types:** Bandpass interstage; operate between tube plate (or 10K ohms) and a grid. Provide gain of 2 at center frequency. **BML Types:** Same, but 500/600 ohms and gain of 9. **BTI Types:** 10K ohms input and output. **Types:** High pass interstage units. **LMI Types:** Low pass stage. **HML Types:** High pass with input and output 500/600 . **LML Types:** Low pass with input and output 500/600 . **LLP Types:** Low frequency, 10 Hz low pass; loss more than B at 20 Hz source and load 100K ohms; size, 2 1/16" x 2 5/16" x (Wt., 1½ lbs.).

### MINIFILTERS★

BPM

de almost identical operational characteristics ndard units. Extremely miniaturized. Designed, ifactured and successfully tested to MIL-F- C. Cutoff frequency indicated by number suffix z). **Size:** BPH, BPM and LPM-6000 (and up), ¾" x 1⅛" h. (Wt., 1 oz.). HPM and LPM (thru , 1" x 1" x 1⅝" h. (Wt., 2¼ oz.). **BPM Types:** pass with gain 2:1. Attenuation, approx. 2 dB, from center freq.; 35 dB/octave. Input, 10K . Output to grid tapped for 10K ohms in transis- rcuitry. Used with tubes, continuity is on grid with transistors, continuity is on input side. **BPH Types:** pass units; attenuation less than 3 dB ±5% from center 40dB/octave. Source and load 500 ohms. **HPM Types:** High down less than 6 dB at cutoff freq.; more than 30 dB at .67 ; 40 dB at .6 cutoff. Input and output, 10K ohms. **LPM** s: Low pass units. Down less than 6 dB at cutoff freq.; more 30 dB at 1.5 cutoff; 40 dB at 1.65 cutoff. Input/output 10K.

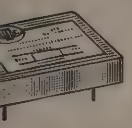
### FLATS★ FILTERS



Offer excellent attenuation characteristics in ruggedized package to Grade 4, MIL-F-18327C. Straight pin terminals for printed circuit use. Hermetically-sealed flat metal case is shielded to reduce hum pickup. Low pass filters, unless otherwise mentioned. Source and load, 600 ohms for FLL-Type; all others 10K ohms. **Other Frequencies For High Pass, Low Pass and Bandpass Available on Special Order.**

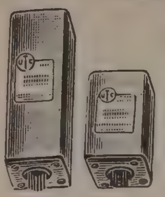
### TELEGRAPH TONE CHANNEL FILTERS



TGR TGT

Bandpass filters for multiplex transmitting and receiving. Units utilize a 7-terminal header, matching a 7-pin subminiature tube socket. **TGR** (receiving) and **TGT** (transmitting) filters are 600 ohms input and output. Down less than 3 dB at ±42.5 Hz from center freq. **TGR** units down more than 30dB at ±170 Hz. Attenuation, greater than 15 dB at adjacent channel crossover. **TGT** units down more than 16 dB at ±170 Hz. Attenuation, greater than 7.5dB at adjacent channel crossover. All units MIL Type FR4RX22YY1. **TGT Size:** 1½" x 1½" x 2½". Weight, 8 oz. Mtg. screws, 6-32. **TGR Size:** 1½" x 1½" x 4¼". Weight, 15 oz. Mtg. screws, 6-32.

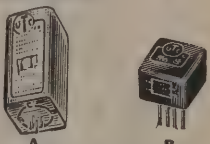
*Numerical suffix in UTC Type column is center freq. in Hz.

### TELEMETERING BANDPASS FILTERS



Both TMN and TMW types, designed for 100K ohms input and output impedance, with insertion loss of less than 6 dB. Four-pin hermetically sealed header matches small Winchester socket. **TMN Types (Fig. A):** Down less than 3 dB at ±7.5% of center freq.; down more than 18 dB at ±25% of center freq. Attenuation greater than 40 dB beyond 1.75 and .58 center freq. **TMW Types: (Fig. A):** Down less than 3 dB at ±15% of center frequency; down more than 20 dB at ±50% of center frequency. Attenuation, greater than 40 dB beyond 2.5 and .4 center frequency. **MNF, MWF Types (Fig. B):** (Tele-minifilter*) Provide same performance as TMN and TMW types except are extremely miniaturized for use in transistor circuitry. Pin terminals make use with printed circuits practical. **Size:** TMN-.4 thru -1.7, 11/16" x 1 9/32" x 2"h. Weight, 3.5 oz. TMN-2.3 thru TMW-70, 23/32" x 23/32" x 1⅜" h. Weight, 1.2 oz. MNF-.4 thru -5.4 (Minifilter), 1 3/16" x 1 3/16" x ½" h. Weight, 1 oz. MNF-7.35 thru MWF-70, 23/32" x 23/32" x ½" h. Weight, ⅛ oz.

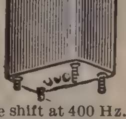
### 400 Hz 115 V LINE FILTERS



Intended for use on 115 V, 400 Hz line to eliminate harmonic distortion.

**UTC No. PLF-25**—Gives 150 V output into 500 ohm load within ±1 dB, 375–425 Hz. Will attenuate 800 Hz by 30 dB; 1200 Hz and higher by at least 50 dB. MIL type FR4RX11NB1. Designed, manufactured and successfully tested to MIL-F-18327C. Size, 4 5/16" w. x 5 1/16" d. x 5½" h. Wt., 10 lbs. Ea., 1–4..... **$98.57**

**UTC No. PLP-13**—Eliminates harmonic distortion, rejects 60 and 120 Hz, and gives zero phase shift at 400 Hz. Operating into 1000-ohm load, provides 115 V output at 400 Hz, within ±1 dB, 375–425 Hz. Attenuates 800 Hz by 15 dB; 1200 Hz by 45 dB; above 1200 Hz by at least 35dB; 120 Hz by 20 dB; and, 60 Hz by 30 dB. MIL type FR4RX22LB1; meets MIL-F-18327C specifications. Size, 3 11/16" w. x 4 5/16" d. x 4½" h. Weight, 6½ lbs. Net Each, 1–4.................................... **$103.50**

### LOW FREQUENCY FILTER

| Application | Source Kohms | Load Ohms | Terms. | | |
|---|---|---|---|---|---|
| | | | * | Com. | † |
| Band-pass | 10 | 10 K | 1 | 2 | 3 |
| Band-pass | 10 | 3.3 megs | 1 | 2 | 4 |
| Band Reject | 10 | 50 K | 4 | 1 | 3 |

*Input. †Output.

Has four terminals. Can be used as a bandpass filter or rejector. As a filter, within 3 dB at 9.6 and 10.4 Hz; Attenuation at 5 and 20 Hz is at least 30 dB with 10K ohms load and 35 dB with 3.3 megohms. As a band rejector filter, the unit attenuates 10 Hz by a min. of 30 dB and varies less than 3 dB from DC to 7 Hz, and from 14 Hz to 36 kHz. MIL type FR6RX22FB1. FB case. Weight, 1¼ lbs.

**UTC Type LBP-10**—Net Each, 1–4........................ **$89.58**

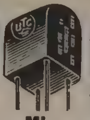
# DIV. OF TRW HIGH "Q" COILS AND INDUCTORS

## MINIDUCTORS★

**MH, MM**



**ML**

Ultraminiature high Q units designed, manufactured and successfully tested to MIL-T-27C, Grade 5; ideal for transistor and printed circuit use. ML types are in Hipermalloy shield case; others are molded permalloy dust toroids. Excellent temperature stability: 1%, −55° C to +100° C. Pin terminals. **Type MM:** Ultraminiature, epoxy molded, toroidal inductors. Max. Q at 30 kHz. Size, 7/16" dia. x 1/4". Wt., 0.7 oz. **Type MH:** Same, but max. Q at 100 kHz. **Type ML:** Ultraminiature, Hipermalloy cased inductors. Max. Q at 800–2,000 Hz, depending on inductance. Size, 7/16" x 31/64" x 9/16". Wt., 0.2 oz. **Type MO:** Miniature, molded type. Max. Q at 600–1500 Hz, depending on inductance. Size, 3/4" x 1 1/16". Wt., 1 oz. **Type MW:** Miniature, toroidal, epoxy molded. Max. Q, 5–10 kHz. Size, 23/32" dia. x 13/32". Wt., 0.25 oz.

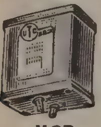
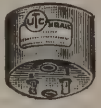
## HIGH "Q" TOROID INDUCTORS



**HQB**

**HQE**



**HQA and HQC**

Excelled only by the "M" series toroids. "HQ" coils are available for applications requiring coils for use in circuitry from 100 Hz to 100 kHz. Coils are adjusted to 1% and inductance is independent of frequency, temperature and vibration. Voltage stability is high and the shielding case assures coupling attenuation of 80 dB. All units are designed, manufactured and successfully tested to MIL-T-27C specifications under severe environmental conditions. All units are MIL Type TF4RX20YY. **Size:** HQA, HQC case, 1 13/16" dia. x 1 3/16" h.; HBQ case, 2 5/8" l. x 1 5/8" w. x 2 5/8" h.; HQE case, 1 1/16" l. x 1/2" w. x 1 7/32" h. Mounting screws 6-32 except HQE case, 4-40. **Cutout Size:** HQA, HQC cases, 9/16" x 1 3/16"; HBQ case, 9/16" x 1 1/8"; HQE case, 5/16" x 1/2". Weight, HQA, HQC cases, 5 oz.; HBQ case, 14 oz.; HQE case, 1.5 oz. *Millihenries.

## LOW FREQUENCY HIGH "Q" COILS

### TYPE MQL

Designed, manufactured and successfully tested to MIL-T-27C specifications, all units are MIL Type TF4RX20YY. Inductance values are lab. adjusted to 2% tolerance at 1 V, 60 Hz. Total inductance swing is less than 3.5% from −55° C to +85° C. Two windings brought to four terminals permit series, parallel, center-tapped, or transformer type connections. Case, 1 13/16" dia. x 2 1/2" h. Square mounting, 1 1/2" x 1 1/2", 6-32 screw. Cutout, 1 1/2" dia. Weight, 1 lb.

| UTC Type | H (0 DC) |  | Each, 1-4 | UTC Type | H (0 DC) |  | Each, 1-4 |

## HERMETIC "M" TYPE TOROIDS

Permalloy dust toroids provide maximum Q. Designed, manufactured and successfully tested to MIL-T-27C and laboratory adjusted to 1% tolerance; excellent voltage and temperature stability. Toroid plus magnetic case equals 80 dB shielding. **MQA Types:** Have Q of 40 at 500 Hz, 160 at 5 kHz, approx. 40 at 20 kHz. Size, 1 1/16" x 1 9/32" x 1 21/32" h., wt., 4 oz. **MQB Types:** Have Q of 40 at 250 Hz, 250 at 3 kHz, approx. 40 at 20 kHz. Size, 1 3/16" x 2 9/16" x 2 13/16" h.; wt., 14 oz. **MQD Types:** Have Q of 40 at 5 kHz, 185 at 50 kHz, approx. 40 at 300 kHz. Size, 1 1/16" x 1 9/32" x 1 21/32" h.; wt., 4 oz. **MQ Types:** Have Q of 20 at 600 Hz, 140 at 10 kHz, approx. 40 at 4 kHz. Size, 1/2" x 1 1/16" x 1 7/32" h.; wt., 1.5 oz. **TQA Types:** Cente tapped version of MQA types, see above for specifications.

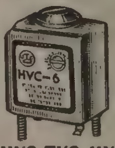
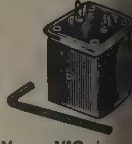
## VARIDUCTORS★



**HVC, TVC, HVV**



**VIC**

Ideally suited for use in tuning of oscillator circuits, tuned circuits, etc. **HVC Types:** Designed, manufactured and successfully tested to MIL-T-27C specifications and provide a wide inductance range with high Q in a compact unit. Units are usable over a wide frequency range and have high stability with temperature and voltage fluctuation. TVC inductors are the same as HVC units except they provide taps a 30% and 50% of total turns. Inductance range, −70% to +200 of the mean value through use of adjusting screw on top of cas **VIC Types:** Standard inductors that may be adjusted through us of a set-screw on the side of case. Inductance range, −45% t +85% of the value. **HVV Types:** For precise matching; vernie inductance variation ±10% of nominal value. Offer high Q over wide frequency range and high temperature stability. **Size:** HVC TVC and HVV types, 1 1/8" lg. x 25/32" w. x 1 9/32" h.; weight, 2 o VIC type, 1 11/32" lg. x 1 1/4" w. x 1 7/16" h.; weight, 5 1/2 oz. HVC an TVC, U.S. Pat. No. 2,879,489; HVV, Pat. pending.

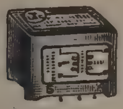
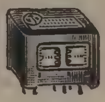
## SUBOUNCER★ AND SUB-SUBOUNCER★ HERMETICALLY SEALED TRANSISTOR AND TUBE TYPE AUDIO TRANSFORMERS

ML-70



SO- P



SSO- P

miniaturized components offer high efficiency and wide ency response. Special nickel-iron core materials and winding ods assure exceptional performance and reliability. These are vacuum molded to MIL Grade 5. Employ 40 mil, y anchored pin terminals ideally suited for printed circuit ransistor applications. Terminals are strong enough to support these light weight units.

## OUNCER★ AUDIO UNITS

### STANDARD AND PLUG-IN UNITS

-In Ouncer

UTC Ouncer components are fully impregnated and sealed against severe environmental conditions in a drawn aluminum housing. Only ⅞" in diameter, they are ideal for mounting opposite terminal boards. Ideal for use in portable radios, aircraft, etc. Wide-frequency range characteristics are provided, ±1 dB, 30–20,000 sponse except where indicated otherwise. "P" units are iden- in all respects except are housed in a Bakelite* case with octal in pins. UTC Type O-16 has heavy shielding (1¹⁄₁₆" dia.) 3 oz.; P-16 has 9-pin plug (1³⁄₁₆" dia.). Weight, 4 oz. Weight incers, 1 oz., max. *Bakelite Corp. trademark.

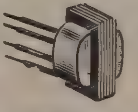
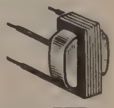
## SUB-SUBOUNCERS★ AND SUBOUNCERS★



SO



SSO

Miniature nickel-iron core units for use in vacuum tube and transistorized circuitry. Units are vacuum sealed for highest dependability. Windings are wound on high-quality nylon bobbins; plastic insulated leads, 4" l., color coded. No mounting facilities are provided. Units may be used for impedances other than those indicated, keeping in mind that the impedance ratio is constant. Units may be reversed, input to secondary. Subouncer units handle a higher level than Sub-Subouncers. Constructional details are identical. Available hermetically sealed on special order. **SSO Sub-Subouncers:** Approx. 2 dB, 140–10,000 Hz. Size: ⁷⁄₁₆" x ¾" x ⁴³⁄₆₄"; weight, .02 lb. **SO Subouncers:** Approx. 2 dB, 100–10,000 Hz. Size: ¹⁹⁄₃₂" x ²³⁄₃₂" x ⅞"; weight, .03 lb.

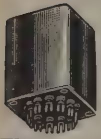
# UTC DIV. OF TRW HI-FI, BROADCASTING COMPONENTS

## HI-FI, AUDIO TRANSFORMERS

### ULTRA COMPACT★ HI-FI AUDIOS



Compact, rugged audio transformers, small in size and light in weight, for use in remote amplifier and similar compact equipment. High fidelity frequency response is obtainable in all units. Frequency response, ±2 dB, 20–20,000 Hz, except where noted. All units except those carrying DC in primary employ a hum-balancing coil structure, combined with a high conductivity outer shell, effecting good inductive shielding. Case is die-cast, mounts top or bottom. **Size:** 1½" x 1½" x 2" h. Weight, ½ lb.

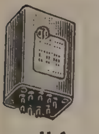
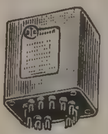
### HIPERMALLOY★ TRANSFORMERS



H-1



H-2

Hipermalloy audio and power transformers are designed specifically for use in portable and compact equipment. Neither dependability or wide-range response has been sacrificed. The frequency characteristic of Hipermalloy audio transformers is uniform 30–20,000 Hz, incorporation of a Hipermalloy-nickel iron core and hum balanced coil structure is responsible. Case is rugged, die-cast type of high conductivity alloy, finished in gray. Mounts with terminals up or down. DC in primary as shown is maximum, unbalanced. **Size:** H-1 Case, 2⅜" l. x 1¹⁵⁄₁₆" w. x 3⅛" h. H-2 Case, 3⁹⁄₁₆" l. x 2¹³⁄₁₆" w. x 3½" h. Mtg. screws, 6-32. Weight: H-1 case, 2 lbs.; H-2 case, 5 lbs.

### LINEAR STANDARD★ TRANSFORMERS

Frequency response, ±1 dB, 20–20,000 Hz; ±1 dB, 7–50,000 Hz on high level units. These transformers offer uniform frequency response of wide range and low distortion. High efficiency, dependability, and freedom from hum are provided by shielding. Mount from top or bottom. Die-cast case. Guaranteed frequency response.

#### LOW LEVEL TRANSFORMERS

Case Type LS-1. **Size:** 2⅝" x 3⅛" x 3¼" h. Suffix "X" indicates units that have multiple alloy shield. Weight, 3 lbs.

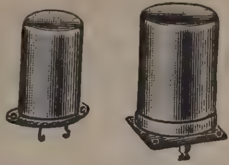
# DIV. OF TRW COMMERCIAL GRADE COMPONENTS

## COMMERCIAL GRADE COMPONENTS



ervative design and rug- construction assure de- ability under continuous ce. Cases are attractively ed in light gray enamel are intended for chassis ating. All items are poured a special sealing com- d plus vacuum impreg- n of coil structures to e operation under severe onmental conditions. All components are linear, dB. 40-10,000 Hz (no unbalanced DC), except CVL and units, 40-6,000 Hz. CG-134, -135, -136 are humbucking type sure low hum pickup. Parallel feed, low level interstage units, 0 ohms and .25 μF; 200 ohm windings on input transformers alanced and may be used for 150-250 ohm circuits. Case are given in the table below. **For CG type transistor/filament ly transformers see another UTC page.**

### SIZE, COMMERCIAL GRADE CASE "RC"

| e | Base Dim. (Sq.) | Mounting Dim. (Sq.) | Ht., + ⅛, − 1/16 | Cutout Dia. | Unit Wt. (Lbs.) |

## PLATE TRANSFORMERS

Primaries for 105, 115, 210, 220, 230 V, 50/60 Hz. For reduced power, secondary can be cut in half, using 220 V primary on 110 volts; may be used 25 to 43 Hz in this case. **Suffix W:** Indicates units designed for full wave center tap and full wave bridge applications. Center tap map be disconnected from ground.

# UTC DIV. OF TRW AMATEUR AND PA TRANSFORMERS

## SPECIAL SERIES★ TRANSFORMERS

UTC Special Series* transformers are designed specifically for amateur and popular priced PA service. Units are finished in a fine, commercial type light gray enamel. Recessed terminal strip is provided, permitting above-chassis wiring or breadboard type wiring setups in addition to standard chassis wiring. Case sizes are in table below.

G-1–G-4

G-5–G-12

| Case | W., In. | D., In. | H., In. | Wt., Lbs. | Case | W., In. | D., In. | H., In. | Wt., Lbs. |

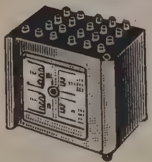
### LAB★ CIRCUIT DEVELOPMENT TRANSISTOR TRANSFORMERS



Aid the designer in selecting optimum impedances for best power and distortion results from his transistor circuit.

**UTC Type LAB-10**—20 Hz to 20 kHz, up to 1 watt continuous. Primary Impedance: 1900 to 14,400 ohms with 20:1 or 10:1 ratio to secondary; 925 to 7600 ohms with 10:1 or 5:1 ratio to secondary. Secondary Impedance: 19 to 36 ohms, and 37 to 76 ohms. Size, 3 1/8" x 2 5/8" x 3 1/4". Weight, 3 lbs. Net Each, 1–4 .................. **$126.00**

**UTC Type LAB-20**—20 Hz to 20 kHz, up to 50 watts, continuous. Primary Impedance: 6, 12, 24, 40, 54, 70 and 96 ohms. Secondary Impedance: 4, 8, 16 and 64 ohms. Size, 5 13/16" x 5" x 4 11/16". Wt., 15 lbs. Net Each, 1–4 .............................. **$225.00**

**UTC Type LAB-5**—20 Hz to 20 kHz, up to 50 mW, continuous. Humbucking balanced core and windings. High electrostatic shielding; multiple magnetic shielding. Primary Impedance: 125, 200 split, 500 split and 2000 split ohms. Secondary Impedance: Same as primary. Size, 3 1/8" x 2 5/8 x 3 1/4". Wt., 3 lbs. Net Each, 1–4 .................................. **$144.00**

## MILITARY DESIGNATIONS

### MIL-T-27C INDUCTORS AND TRANSFORMERS

| TF | 4 | R | X | 01 | FA |

|---|---|---|---|---|---|
| Ⓐ | Ⓑ | Ⓒ | Ⓓ | Ⓔ | Ⓙ |

### MIL-F-18327C FILTERS

| FR | 4 | R | X | 11 | YY | 1 |
|---|---|---|---|---|---|---|
| Ⓐ | Ⓑ | Ⓒ | Ⓓ | Ⓔ | Ⓙ | Ⓚ |

Ⓐ **Component:** TF indicates all MIL-T-27( ) transformers or inductors. TP indicates all MIL-T-21038B pulse transformers. FR indicates filters.

Ⓑ **Grade:** Refers to case material and environmental capability. MIL-T-27C, Grade 4 is metal-cased with max. reliability; resistant to shock, vibration and thermal shock. Grade 5 same as Grade 4 except encapsulated or molded. MIL-T-21038B, Grade 6 same as Grade 4, MIL-T-27C plus use at high altitudes if required. Grade 7 is encapsulated or molded version of Grade 6. MIL-F-18327C, Grade 4 is metal-cased for vibration frequency range 10 to 55 Hz. Grade 5 same as Grade 4 except encapsulated. Grade 6 is metal-cased for vibration frequency range 10 to 2000 Hz. Grade 7 is encapsulated version of Grade 6.

Ⓒ **Class:** Indicative of max. operating temperature (ambient plus temperature rise). R is 105° C. S is 130° C.

Ⓓ **Life Expectancy:** Designers estimate of mean anticipated life. X indicates 10,000 hours life estimated.

Ⓔ **Family:** Two-digit number code-listed in specification, representing each application or category of transformer and inductor. MIL-F-18327B or C, refers to application i.e., 11 is low pass, 22 is band pass and 33 is high pass.

Ⓕ **Case Size and Mounting:** Two-letter code listed in specifications. See table of sizes, below. YY is non-standard metal case. ZZ is encapsulated or molded.

Ⓖ **Turns Ratio:** Four-digit code indicates number of windings and their ratios; e.g., 1110 is 1:1:1.

Ⓗ **Case Style:** Single letter code for fixed case styles; i.e., A for radial leads and C for terminations at one end.

Ⓘ **Case Size:** Single letter code for fixed envelope dimension, as given in individual listings. Z indicates other sizes.

Ⓙ **Case or envelop size and mounting:** Two letters code as given in individual listing. YY indicates non standard metal case. ZZ indicates encapsulated or molded case.

Ⓚ **Composition:** 1 indicates LC, 2 indicates crystal and 3 indicates other electromechanical.

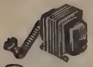
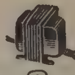
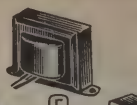
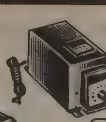
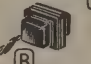
# REPLACEMENT TRANSFORMERS AND MIL INDUCTOR

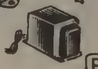












## REPLACEMENT TYPE COMPONENTS

All units vacuum sealed. Shells and brackets finished in high luster black enamel. A minimum number of transformers have been developed to cover any requirement in the replacement field.

### STEP-DOWN AUTO-TRANSFORMERS (FIG. A)

**220/240 to 110/120 VAC, 50/60 Hz**

With 6-ft. cord and female receptacle, except R-64.

| UTC Type | Rating | Size, Inches | | | Wt., Lbs. | Net Ea., 1-4 |
|---|---|---|---|---|---|---|
| | | L. | W. | H. | | |
| R-41 | 85 watt capacity | 3⁵⁄₁₆ | 2⅝ | 3⅛ | 4 | $ 15.92 |
| R-42 | 125 watt capacity | 3½ | 3 | 3½ | 5 | 20.92 |
| R-43 | 175 watt capacity | 3¾ | 3¼ | 3⅞ | 5½ | 19.71 |
| R-44 | 250 watt capacity | 4⅜ | 3¼ | 3⅞ | 6½ | 21.49 |
| R-45 | 500 watt capacity | 4⅝ | 3⅞ | 4⅝ | 12 | 30.48 |
| R-46 | 1200 watt capacity | 6⅞ | 3⅞ | 4⅝ | 18 | 57.33 |
| R-64 | 2500 watts, no cord | 10½ | 4¾ | 6¾ | 30 | 115.44 |

### DOUBLE SHELL POWER TRANSFORMERS (FIG. B)

Rectifier filaments 5 volts, 3 amps except R-101, 2 amps.

| UTC Type | High V | DC mA | Amplifier Filament | Overall Height | Wt., Lbs. | Net Ea., 1-4 |
|---|---|---|---|---|---|---|
| R-101 | 275-0-275 | 50 | 6.3 VCT-2.7A | 3" | 2½ | $17.12 |
| R-102 | 350-0-350 | 70 | 6.3 VCT-3A | 3⅝" | 3½ | 21.90 |
| R-103 | 350-0-350 | 90 | 6.3 VCT-3.5A | 3¹⁵⁄₁₆" | 4½ | 54.00 |
| R-104 | 350-0-350 | 120 | 6.3 VCT-5A | 3⅞" | 5½ | 54.00 |
| R-105 | 385-0-385 | 160 | 6.3 VCT-5A | 4⁵⁄₁₆" | 7 | 27.06 |

### VERTICAL SHELL POWER TRANSFORMERS (FIG. C)

Rectifier filaments 5 volts, 3 amps, except R-110, 2 amps.

| | | | | | | |
|---|---|---|---|---|---|---|
| R-110 | 300-0-300 | 50 | 6.3 VCT-2.7A | 3¼" | 2½ | $21.90 |
| R-111 | 350-0-350 | 70 | 6.3 VCT-3A | 3¼" | 3½ | 45.00 |
| R-112 | 350-0-350 | 120 | 6.3 VCT-5A | 4" | 5½ | 52.65 |
| R-113 | 400-0-400 | 200 | 6.3 VCT-6A | 4⅝" | 8 | 30.47 |

### EXPORT VOLTAGE ADAPTER (FIG. D)

Complete with cord plug and locking switch selecting operation from 105, 115, 125, 135, 150, 210, 230, 250, VAC, 42–60 Hz. Output voltage 115 VAC.

| UTC Type | Rating, Watts | Size, Inches | | | Mtg. Size, Inches | Wt., Lbs. | Net Ea., 1-4 |
|---|---|---|---|---|---|---|---|
| | | L. | W. | H. | | | |
| R-47 | 85 | 4⅝ | 3 | 3½ | 2¼ x 2¼ | 4½ | $28.87 |
| R-48 | 150 | 4¾ | 3¼ | 4 | 2½ x 2½ | 5½ | 29.45 |

### TV VOLTAGE REGULATOR (FIG. D)

With cord, plug and locking switching selecting 115 VAC, 50–60 Hz from 85, 90, 95, 100, 105, 110, 120, 125 VAC input.

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| R-49 | 350 | 5 | 3¼ | 4 | 2½ x 2¾ | 5 | $31.05 |

### CHANNEL FRAME FILTER REACTORS (FIG. E)

Inductance shown is at rated mADC. Test V rms, 1,500.

| UTC Type | Induct. H | Cur. mA | Res., Ohms | Size, Inches | | | | Wt., Lbs. | Each, 1-4 |
|---|---|---|---|---|---|---|---|---|---|
| | | | | W. | D. | H. | Mtg. | | |

*Millihenries.

### ISOLATION TRANSFORMERS (FIG. F)

Ideal for isolating line noise, AC-DC sets, etc. Excellent electrostatic shielding 1,500 volt breakdown test. Complete with 6′ cord and female receptacle, except UTC Type R-77. Primary, 110–120 VAC, 50/60 Hz. Secondary, 110–120 V, except UTC Type R-97, 220 VAC primary, 120 VAC secondary.

| UTC Type | Rating, Watts | Size, Inches | | | Mtg. Size, Inches | Wt., Lbs. | Net Ea., 1-4 |
|---|---|---|---|---|---|---|---|
| | | L. | W. | H. | | | |
| R-72 | 40 | 3⅛ | 2⅝ | 3⅛ | 2 x 1⅞ | 4 | $18.51 |
| R-73 | 100 | 3¾ | 3¼ | 3⅞ | 2¼ x 2⅜ | 6 | 21.90 |
| R-74 | 250 | 4⅞ | 3⅞ | 4⅝ | 3 x 3½ | 12 | 33.43 |
| R-75 | 600 | 7⅜ | 3⅞ | 4⅝ | 3 x 5⅞ | 20 | 61.72 |
| R-76 | 1200 | 8½ | 4½ | 6⅛ | 3⅝ x 6⅝ | 30 | 113.46 |
| R-77 | 2500 | 12 | 7 | 9 | 6 x 11 | 70 | 256.78 |
| R-97 | 250 | 4⅞ | 3⅞ | 4⅝ | 3 x 3½ | 12 | 31.65 |

### EXPERIMENTER/HOBBY CIRCUIT TRANSFORMERS

Hi-fi, low distortion, IC or transistor output to voice coil transformer. **Impedance:** Primary, 200/125 ohms CT; secondary, 4/3 ohms. **Frequency Response:** ±1 dB, 100 Hz to 10 kHz. **Max. Output:** 1 watt. **Size:** 2⅛″ w. x 1¼″ d. x 1¼″ h. Wt., .2 lb. **UTC Type HCA-308 Hobby Circuit Transformer**—Net Each, 1–4 .......................... **$10.76**

### LINE VOLTAGE ADJUSTERS WITH METER (FIG. G

Adjusts abnormal or fluctuating line voltages. Adjust switch that meter reads at red line and then the correct line voltage your equipment is provided. These units combine a tapped aut former, switch and meter in a rugged, compact assembly. Switc is nine-position type and adjusts for line voltages, 60–140 vo on 115 V output models and 160–240 V on 230 V output mod All units are designed for 50/60 Hz service and come compl with 6′ cord and plug and output receptacle.

| UTC Type | Primary Voltages | Second. Volts | Watts Rating | Size, Inches | | | Wt., Lbs. | Net Ea 1-4 |
|---|---|---|---|---|---|---|---|---|
| | | | | L. | W. | H. | | |
| R-78 | † | 115 | 150 | 7½ | 4¹⁄₁₆ | 4¾ | 6 | $51.7 |
| R-79 | † | 115 | 300 | 7½ | 4¹⁄₁₆ | 4¾ | 9 | 121.5 |
| R-80 | † | 115 | 600 | 10½ | 4¹⁄₁₆ | 4¾ | 13 | 70.4 |
| R-81 | † | 115 | 1200 | 10½ | 4¹⁄₁₆ | 4¾ | 21 | 95.5 |
| R-86 | ‡ | 230 | 1200 | 10½ | 4¹⁄₁₆ | 4¾ | 21 | 207.0 |

†60, 70, 80, 90, 100, 110, 120, 130, 140 volts. ‡160, 170, 180, 190 200, 210, 220, 230, 240 volts.

### PHOTOFLASH TRANSFORMERS

PF-6

Standard photoflash transformers that may be used with either standard Amglo type or Sylvania trigger type multiple flash tubes. Circuit details are included with the units.

**UTC Type PF-1**—Primary, 115 VAC, 50/60 Hz. Secondary, for power supply delivering 2,200 VDC to capacitor up to 100 μF. Units are compound-sealed in G-3 cases, 2⁵⁄₃₂″ x 2¾″ (3¾″ incl. flange) x 2½″ h. Weight, 2 lbs. Net Each, 1–4 ....... **$20.91**

**UTC Type PF-3**—Trigger transformer for use with above unit, 15 kV peak. Size: ⅞″ O.D. x 3″ lg. Weight, 2 oz Net Each, 1–4 .......................... **$12.54**

### TRANSISTOR PHOTOFLASH TRANSFORMERS

Miniaturized, lightweight units for use in transistorized photoflash circuits.

**UTC Type PF-5**—Primary, 115 VAC, 50/60 Hz or 4½ V battery switched by PF-6 inverter transformer. Output, 400 VDC when used in voltage doubler circuit to charge photoflash capacitor (40-watt-second rating). Case, G-1. Net Each, 1–4.... **$14.58**

**UTC Type PF-6**—Inverter transformer for use in transistor inverter circuit with PF-5 step-up transformer and 4.5 VDC battery. Size, ⅞″ dia. x 1³⁄₁₆″ l. Net Each, 1–4 ................ **$10.76**

**UTC Type PF-7**—Trigger transformer. Shorting .25 μF capacitor. (charged to approx. 225 VDC) across terminals 1-2 produces 6 kV pulse at terminal 3 for triggering flash tube. Size: ⅜″ dia. x ¹⁵⁄₁₆″ l. Weight, .5 oz. Net Each, 1–4 .......................... **$7.96**

### TUBE, TRANSISTOR FILTER INDUCTORS SUCCESSFULLY TESTED TO MIL-T-27C

The multiple ratings applied to "H" series of filter chokes and are also applicable to these units. Transistor supply units are swinging type to increase regulation. Terminals for H-79 are opposite mounting. Metal cased **TF4** Type, H-70 thru H-79, H-164 thru H-174. Lightweight molded type **MIL TF5SX04ZZ**, H-105 thru H-109. Type H-79 case, 7″ x 7″ x 8″.

# HMITE Variable Transformers

1, VT02,
VT3

VT4, VT8

VT02F

VT8-3

VT20

asic physical types meet most industrial requirements with maintenance-free life. Excellent regulation at any point n rated load; free from wave-form distortion. Direct-reading le (1 per side) dial supplied; CCW also available. The -saving low power types VT1, VT02 and VT3 have adjust- shaft independent of brush assembly, 3-way terminals, in- ly replaceable brush contacts and improved heat dissipation. **nting:** Easily replace other brands: VT2LN, VT1, VT02 and have ⅜-32 thd. bushing; VT8 and VT20, 4-hole bolt mount; 3-hole bolt mount convertible to 4-hole with adapter plate. **sed Types:** Gray hammertone cases. Units with suffix **B** have exposed terminal panel and mounting base; **E,** fixed type for table or panel mounting; **F,** portable with cord, outlet socket and fuse; **G,** deluxe portable with handle, circuit breaker and switch for overvoltage selection. Final suffix: **V** indicates with voltmeter; **VA,** volt/ammeter; **VW,** volt/wattmeter; all come with handle except VT8NF series. **Other Options:** All types except VT2LN offer shafts, extendable from brush or base side; ganged versions have thru-shaft with same flexibility. Final suffix **C** types come with 3-cond. cord and outlet, one cond. grounded to case. Most single cased and uncased VT4, VT8 and VT20 units for 120 volt operation are UL Recognized. Consult factory.

n.; may be used up to 1000 Hz. †Use also at 50 Hz if connected for no overvoltage output. ‡With 120 V input tap at which the . current output rating applies up to 120 volts, but reduces approx. 50% at max. output voltage shown. In tandem units, the use of voltage inputs would correspondingly derate current at higher output voltages. §User wires for desired output; dial normally cali- ed for overvoltage. #Factory-connected for overvoltage output; easily re-connected by user for no overvoltage. •Switch selects voltage or no overvoltage. ▲5¾" including handle. ■Case height only, excluding handle. ♦Depth behind panel; add 1" for knob kness for cased types VT8; ⅞" for VT1, VT02 or VT4; 1¼" for VT20. I9" including handle. ††Includes knob, dial and mtg. hardware.

# GENERAL ELECTRIC Variable Transformers

## GENERAL ELECTRIC VOLT-PAC® VARIABLE TRANSFORMERS

The GE Volt-Pac series of variable transformers includes many exclusive features for outstanding performance. Unique heat-sink ring, quick-transfer current collector and grain-oriented, carbon brush provide high current capacity and overload capability. Designed for operation at full rated load from −20° C to +40° C ambient, with very low voltage variation from no-load to full-load. Output voltage continuously variable from 0–100% of input voltage with line voltage connection, 0–117% of input voltage with overvoltage connection, with no waveform distortion. Simple, rugged construction, designed for easy installation on bench, floor or back-of-panel. Models available for manual, plug-in, motor or automatic operation, in a wide variety of voltage and current ratings, with or without cases. **Input Voltages:** 120, 240 or 480 volts. **Output Voltages:** 0–120/240 volts, 0–240/280 volts, and 0–480/560 volts. **Current Ratings:** Available from 2.5–360 amps. **Ordering Information:** Use GE Number shown to indicate uncased type with exposed terminals. Add suffix **G2** to GE Number to indicate cased type with exposed terminals; e.g., 9T92Y27**G2** is 120-volt input, manual single phase, cased with exposed terminals. Terminal enclosures kits available for cased models; full information and prices on request.

### ♦FRAME SIZES

Sizes listed are for uncased types; cased types slightly larger.

### NOTE ON VOLT-PAC MOTOR OPERATING TIME

Motor operating time refers to the number of seconds it takes for the motor to change voltage output of the variable transformer from 0 to 100%. Add appropriate suffix from table below to the GE Number.

Prices listed are for **-G51** (*) and **-G54** (*); others available on request.

| Operation Time, Sec | | Final Suffix | |
|---|---|---|---|
| 60 Hz | 50 Hz | Cased | Uncased |

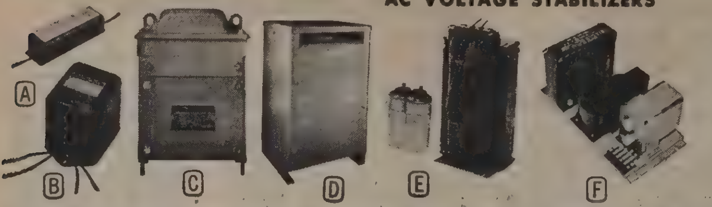
| 60.0 | 72.0 | -G61* | -G64* |

*Available **only** in GE types with star (*) in tables at left.

# GENERAL ELECTRIC AC Voltage Stabilizers

## AC VOLTAGE STABILIZERS



- Change Voltage Level Up or Down
- Low Maintenance • No Moving Part
- Completely Automatic
- Fast Response
- Isolate Line and Load
- Short Circuit Protection
- High Power Factor • Long Life
- Wide Input Voltage Range
- Small Size • Neat Appearance
- Easy to Install
- Choice of Many Standard Ratings an Construction Types

Static magnetic transformer-type products which provide voltage maintained within ±1% variation while input line voltage fluctuates ±15%. Operate by means of highly reliable, time-tested magnetic and capacitor circuitry, without moving parts. Units also isolate the line from the load, provide a voltage level other than line voltage, limit the cold filament starting current for large electronic tubes, and protect against major fault currents caused by load malfunctions. In addition, they help assure correct equipment performance, reduce operating losses, add to equipment life, and contribute to personnel safety.

Stabilizers are available in enclosed or open construction. **Enclose** models are completely metal-encased to provide for safe mountin within reach of unauthorized personnel; installation should b restricted to indoor environments. Integral wiring compartment included on units rated 250 VA and larger; lower rated model have insulated cable leads out of the enclosure for connection **Open-construction** models are lower priced, save space, and offe greater mounting flexibility. They are particularly suitable for us in enclosures with other electronic or electrical components.

# GENERAL ELECTRIC Voltage Control Devices

## AUTOMATIC VOLT-PAC® VOLTAGE REGULATORS

de closely regulated output voltages while input voltage, ency, load current, and other circuit conditions vary. Feature loop regulation, no waveform distortion, and solid state ack circuitry. The voltage regulator is governed auto-ally by a deadband-type voltage-sensitive control. TYPI- SPECIFICATIONS. **Regulation Accuracy:** ±1.0%. **Fre-y:** 60 Hz, except as indicated. **Load Range:** Zero to full **Efficiency:** Up to 99%. **Power Factor Range:** 0 to 100%. **Wave Form Distortion:** None. **Output Voltmeter:** Built in. **Ambient Temperature Operating Range:** −20° C to +40° C. **Protection:** Magnetic circuit breaker in power input line; control circuitry fused. Only cabinet-mounted dimensions are shown; rack-mounted dimensions are somewhat smaller.

**Ordering Information:** Use GE No. followed by suffix **G3** for rack-mounted model, no suffix for cabinet-mounted model.

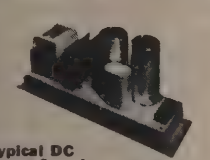
suffix **G3** to GE No. for rack-mounted model; no suffix for et-mounted model. *Specified input voltage range is appli- for nominal output voltage; when operating at any other t voltage within specified range, input voltage range changes rtionately with the change in output voltage level selected. l kVA based on nominal output voltage at midpoint in output range. ‡Can be used for 199–217 V output and 181–236 V input by changing connections; diagram included with instructions. §50/60 Hz. #Suitable for wider input voltage range, i.e., 190–270 V; connection diagram available on request. •Cabinet-mounted normally stocked only. *Larger quantities available on request.

## REGULATED DC POWER SUPPLIES



Typical DC Power Supply

Economically priced power supplies furnishing fixed DC output voltage within ±1% tolerance while input AC voltage fluctuates ±15%. Ideal for computers, process control equipment, measuring devices and similar applications requiring constant regulation of voltage. All units feature rugged magnetic and semiconductor circuitry, and are designed for chassis as well as standard 19″ rack mounting. For protection of supply and load equipment, short circuit current is limited to approximately 200% of rated value. Can be installed with either plus or minus grounded. **Input Range:** 97–130 VAC, 60 Hz, at 40° C ambient. **Output Ripple Level:** 1% rms max. **Efficiency:** 70% to 85% for normal output voltage levels; efficiency may decrease for unusually low output voltages or low power ratings.

ates approx. percent increase in output voltage due to decrease of load current from full load. †Plate has four mtg. slots on each wo outer slots on 7½″ ctrs., two inner slots on 3″ ctrs. ‡Model not suitable for rack mounting.

# General Radio Autotransformers

## VARIAC® MANUALLY OPERATED AUTOTRANSFORMERS

The General Radio Variac autotransformer is a continuously variable unit used to control AC voltage. Features the Duratrak® contact surface, a uniform silver-alloy coating to prevent injurious high-temperature oxidation and resultant brush-track deterioration—track will show no significant wear after 1,000,000 cycles of brush operation. Variac autotransformers are highly efficient, have high thermal capacity, can withstand very high short-term overloads, and do not affect waveform or power factor. Other features: Good regulation; smooth control; long life; linear output voltage; low maintenance; easy installation. All necessary mounting hardware is included with each unit. Portable types, indicated by T in Model No., have an overload protection reset switch, line switch, convenience outlet, and a 6-ft. two- or thre wire line cord. Manually operated and motor-driven Variacs a available in a wide variety of voltage and current ratings, wit or without cases. All except portable units can be equipped wit ball bearings at slightly higher prices; ball bearings, indicated b BB in Model No. of manually operated units, are included with 4 and 6-gang types at prices shown. **Angle of Rotation:** 320°. **Lin Frequency:** 50 and/or 60 Hz unless otherwise specified. **Inpu Voltages:** 120, 208, 240 or 280 volts. **Output Voltages:** 0–120/14 0–208, 0–240/280, 0–480 or 0–560 volts, continuously adjustable **Current Ratings:** 2 to 300 amps.

*kVA ratings—normal input line voltage times maximum current; maximum current ca be drawn at maximum voltage for line voltage connection only. †CSA Approved. ‡Mod U2 is interchangeable with competing models. Listed ratings are for metal panel mountin ratings in air, 2.0 and 2.5 amps respectively. §Listed under Re-examination Service of U #For 60 Hz only; no overvoltage connection supplied. •Series-connected windings; do n use with grounded load. ▴Parallel-connected windings; one or more W50-P1 chok required (see below). ■Also can be used at 120-volt input with 2x the output ratin shown. ♦Depth behind panel except cased types (excluding knobs).

### MODEL W50-P1 CHOKE FOR PARALLEL COMBINATIONS

When windings of identical Variacs are paralleled to obtain higher load ratings, it recommended to use one or more chokes to limit excessive circulating current in the eve that brushes accidentally get out of line. Use 1 choke for 2 Variacs in parallel; 3 chok for 3 Variacs; 4 chokes for 4 Variacs; 6 chokes for 6 Variacs. Parallel operation of uni smaller than Model W30 is not recommended since the next larger unit is more economic For W50 Series Variacs, the choke can be mounted directly on the terminal plates.

A ratings—normal input line voltage times maximum current; maximum current can awn at maximum voltage for line voltage connection only. †"Y"-circuit connected. 60 Hz only; no overvoltage connection. §Open-delta circuit connected. #Overvoltage ection not recommended. ▲See previous page for W50-P1 Choke for parallel combina- . ♦Depth behind panel except cased types (excluding knobs). ‡Also for single-phase volts input.

### SINGLE-PHASE PORTABLE VARIACS

able, metered, cased Variacs with 2-wire or 3-wire cord and receptacle, and convenient ing handle. Meter accuracy is 3% of full scale except 5% for ammetered Model HMT3A. Power switch disconnects both sides of line. Meters are switchable under Types MT and MT3 have overvoltage connections and corresponding dial scales; voltage connections and dial scales on special order.

#### 120-VOLT INPUT

nits have max. output voltage range of 0–140 volts except W5LMT3 which has 0–120 . Models W5MT and W10MT come in 2-wire version; all others in 3-wire version.

# General Radio AUTOTRANSFORMERS AND REGULATORS

## VARIAC® MANUAL AND MOTOR-DRIVEN AUTOTRANSFORMERS

### M-TYPE MANUAL VARIACS FOR 350-1200 Hz OPERATION

For use at line frequencies between 350 and 1200 Hz. Equivalent to their Type-W counterparts, but smaller and lighter, and provide better regulation at 400 Hz than 60 Hz models. Conform to most military specifications for shock, vibration, salt spray, tropicalization, altitude, humidity and temperature.

### SINGLE-PHASE 120-VOLT INPUT UNITS

Line voltage connection output, 0–120 volts; overvoltage connection output, 0–140 volts.

| Model No. | Output Amps | | kVA* | Description | Shpg. Wt., Lbs. | Net Each* |
|---|---|---|---|---|---|---|
| | Rated | Max. | | | | |

### MOTOR-DRIVEN VARIACS

All W- and M-type Variac autotransformers, both single and ganged, can be supplied with motor drives. Motors are fully enclosed, two-phase gear-reduction servo types having very low moments of inertia; the motor mounting plate is attached to the base end of the autotransformer by means of four heavy corner posts. Gear coupling is used to facilitate precise alignment, eliminate phase shift problems, and permit a number of drive speeds by simple change of gears. Three basic internal-geared motor speeds are available which, with a selection of standard coupling gears, makes possible the assembly of units having nominal full-traverse (320°) speeds of 2, 4, 8, 16, 32, 64 or 128 seconds at 60 Hz (approximately 20% slower at 50 Hz). The 2- and 4-second units are intended for high-speed servo applications; slower speed models are primarily for remote positioning. Cases are available for most models as indicated. **All motor-driven Variacs are furnished complete with ball bearings, a 120-volt phase-shift capacitor, and an adjustable microswitch for setting traverse limits.**

**HOW TO ORDER**

**W 5 H G 3 D 8 C K M**

Ⓐ Ⓑ Ⓒ

Ⓐ **Basic Unit Prefix:** Select from table below the desired basic Variac unit, as described elsewhere in these pages.

Ⓑ **Motor Indicator Suffix:** Add appropriate suffix for each Variac as indicated by an X in columns below. Suffix indicates seconds for 320° traverse.

Ⓒ **Case Suffix:** Add final Suffix **M** if case available and desired, and Price Adder from table. Case fully encloses both motor and Variac.

## MODEL 1591 1kVA VARIAC AUTOMATIC VOLTAGE REGULATOR

Low cost, small size model is mechanically rugged and withstands severe vibration and shock tests. Output voltage is controlled by a servo-driven Variac adjustable autotransformer so the regulator has the same ability to handle 1000% transient overloads as the Variac. True rms detection and no distortion. Power factor is 0 to 1, leading or lagging. **Operating Frequency:** 57 to 63 Hz. **Output Current:** 8.7 amps. **Input Voltage Range:** 100 to 130 volts. **Output Voltage Range:** Adjustable, 105 to 125 volts. **Max. Correction:** ±15 volts. **Correction Time (Cycles):** 6 cycles plus 1.5 c/V. **Accuracy:** ±0.2%. **Size:** Portable, 12¾" w. x 5⅜" d. x 9½" h.; rack, 19" w. x 6⅜" d. x 5¼" h. Shpg. Wt., portable, 25 lbs.; rack, 31 lbs.

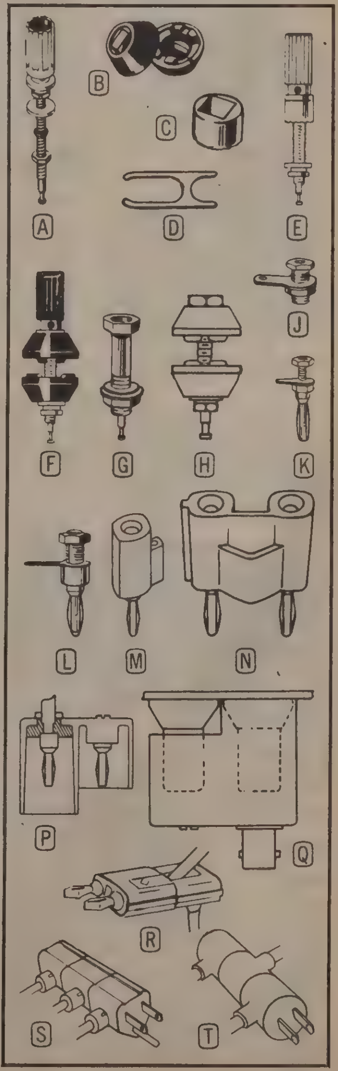
## BINDING POSTS, ASSEMBLIES

ng posts provide all properties needed for electronic instruments. Connects wires, lugs, alligator clips and 274 plugs. Available in two styles: Nickel-plated brass for my and gold-plated copper for high conductivity. Both styles available with either or insulated tops designed for easy hand-tightening or ⅜", 12-point wrenches can ed for more permanent connections. Can be mounted on metal or insulating panels 5/16" thick. Insulators are available in red or black color coding. **Ratings:** 30 amps 4 kV peak. **Breakdown Voltage:** 10 kV peak.



| ype | Fig. | Description | Net | Qty. |
|---|---|---|---|---|
| | A | Metal-top binding post, brass | $0.50 | $48.00 |
| | A | Black-top binding post, brass | .70 | 54.00 |
| | A | Red-top binding post, brass | .70 | 54.00 |
| | A | Metal-top binding post, gold-plated copper | 1.05 | 83.00 |

| VR | F | Assembly of 938-D, 938-BR | .90* | 7.00† |

## JACKS AND PLUGS

| | | | | |
|---|---|---|---|---|
| | G | Jack, fits type 274 plugs, has long unthreaded shank; mounts in types 938-BB, 938-BR, 938-BG insulators or type 938-F spacers | $0.55 | $42.00 |
| B | H | Jack assembly, black, consists of 938-J and 938-BB | .65* | 5.50† |
| R | H | Jack assembly, red, consists of 938-J and 938-BR | .65* | 5.50† |
| | J | Jack, nickel-plated brass, fits type 274 plugs | .15 | 12.00 |
| | K | Plug, nickel-plated brass stud and beryllium copper springs, fits types 274 and 938 jacks. | .25 | 18.50 |
| | L | Plug, same as above but bigger in size | .55 | 42.00 |
| B1 | M | Black styrene-insulated plug with a jack top. A set screw clamp is provided on the plug end | .75 | 6.00 |
| B2 | M | Same as above, except red color | .75 | 6.00 |

Each, 1–9; all others 1–99. †Quantity pack of 10; all others pack of 100.

**ype 274-MB Insulated Double Plug** N)—Completely insulated, molded e double-plug fits Type 938 binding or Type 274 jacks on std. ¾" spacing. top permits stacking. Formed side provides strain relief for cables up to .

ach, 1–9 . . **$1.15;** Pack of 10 . . **$8.50**

**ype 274-NK Shielded Double Plug** P)—Plug, in aluminum case for com- y shielded connections to Type 938 g posts. Accepts cable with .2" O.D. ed case permits the use of 938-L(G) ing link without interfering with r shielding. High terminal remains shielded. Can be locked to binding turning a screw expands one pin body of binding post. Terminates L, 776-A and 874-R34 patch cords.

ach, 1–9 . . **$3.00;** Pack of 10 . . **$24.00**

**ype 274-QBJ Adapter** (**Fig. Q**)— ed banana plugs in the adapter pro- onnection from std. ¾" spaced bind- sts to a type BNC plug. Locks on to inding posts providing semi-perma- daption to BNC.

ach, 1–9 . . **$4.50;** Pack of 10 . . **$36.00**

**ype 777-Q3 Adapter**—Provides fully ed connection from GR874® coaxial ctors to Type 938 binding posts with acing. Constructed like GR 274-NK, locked to binding posts by a turn of for semi-permanent conversion to 4.

ach, 1–9 . . **$8.90;** Pack of 10 . . **$71.00**

**GR Type 776-A Patch Cord**—3-ft., 50 ohms shielded cable fitted with a BNC male plug and a GR 274-NK shielded double plug.

Net Each, 1–9 . . **$8.90;** Pack of 10 . . **$71.00**

**GR Type 776-B Patch Cord**—3-ft., 50 ohms shielded cable fitted with a BNC male plug and a GR874 coaxial connector.

Net Ea., 1–9 . . **$11.25;** Pack of 10 . . **$90.00**

**GR Type 776-C Patch Cord**—3-ft., 50 ohms shielded cable has a BNC male plug on each end.

Net Each, 1–9 . . **$8.90;** Pack of 10 . . **$71.00**

**GR Type 274-NQ Double-Plug Patch Cord** (**Fig. R**)—3-ft. long cord has connectors in such a way that any double plug can be connected to any other.

Net Each, 1–9 . . **$6.00;** Pack of 10 . . **$48.00**

**GR Type CAP-35 2-Wire Power Cord** (**Fig. S**)—Made of plastic-covered #18 conductor. Plug and connector bodies are molded integrally with the cord and permit stacking. Type SVT cord rated by UL at 7 amps and 300 volts rms. Female connector fits either 2-wire or 3-wire plug. Cord 7 ft. lg.

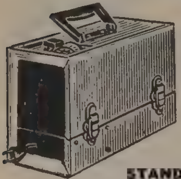
Net Each, 1–9 . . **$3.00;** Pack of 10 . . **$27.00**

**GR Type CAP-22 3-Wire Power Cord** (**Fig. T**)—Same as above, except 3-wire grounding type. Connectors designed for 125 volts operation conform to the Standard for Grounding Type Attachment Plug Caps and Receptacles, ANSI C73.11-1963. Cord length, 7 ft.

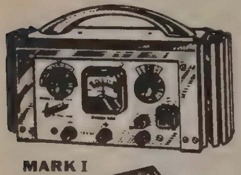
Net Each, 1–9 . . **$3.00;** Pack of 10 . . **$27.00**

# Inverters, Power Supplies

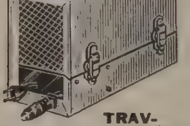
## TERADO CHARGER, INTERCEPTOR, VOLTAGE ADJUSTERS



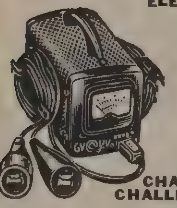
STANDBY ELECTRIC POWER



MARK I



TRAV-ELECTRIC



SUPER CHARGER, CHALLENGER

### INTERCEPTOR

### "STANDBY" ELECTRIC POWER

Automatically provides 117 VAC when power fails. Capacity up to 175 watts, 60 Hz, 117 VAC. Operates test equipment, monitors, recorders, lights, alarms, thermostats, electric tools, portable TV, electric cameras etc. Complete with rechargeable storage battery, high and low battery charger.
**Terado No. 50-168**—Net Each..... $\$117^{90}$

### INVERTER-BATTERY CHARGERS

### MARK I

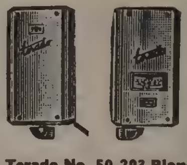
Solid state, transistorized unit changes battery voltage to 117 V or charges 12 V storage battery at 20 amps, 10 amps or trickle. AC capacity, 450 to 500 watts. Built-in charge meter. Copper baked enamel case. Size: 12½" w. x 6" d. x 6" h. Shipping Weight, 21 lbs.
**Terado No. 50-131 Mark I**—Net.... $\$108^{50}$

**Terado No. 50-132 Mark II**—As above but 275–300 watt capacity. Net Each........ **$89.50**

### TRAV-ELECTRIC

Changes battery current to 110 VAC, 60 Hz, ± ½ Hz, regardless of load; 50 Hz adaptable. Operates anything using 117 VAC, 60 Hz from 25 amps rechargeable wet storage battery enclosed. Capacity, 175 watts; 125 watts continuous. Frequency stable within ½ Hz with load change. Plugs into AC outlet or car cigarette lighter to recharge battery. Charger has automatic overcharge protection. Meter shows charge rate and hours of anticipated output. **Size:** 12" x 5½" x 8". **Wt.:** Net, 30 lbs. including battery; shpg., 36 lbs.
**Terado No. 50-160**—Net Each....... $\$78^{79}$

### VOLTAGE ADJUSTERS



For TV, hi-fi and AC motorized equipment. Change high or low voltage over range of 95–135 V to normal. Input: 110 VAC line. Size: 5½" x 3" x 2¼". **Terado No. 50-20 Polaris**—Cap., 300 W cont., 500 W int. Wt. 3 lbs.
Net Each.... $\$12^{24}$

**Terado No. 50-203 Planet**—Same as Polaris, but with 150 W cont., and 300 W int. Wt., 2 lbs. Net Each.............................. **$9.63**

**Terado No. 50-172 Saturn**—Same as Polaris, but with accurate AC voltmeter. Net Each. **$18.77**

**Terado No. 50-141 Appolio**—Similar to Polaris but 1200 W cont., 1500 W int. Increases voltage in 10 and 15 V steps. Size: 4" x 3½" x 6½". Wt. 8 lbs. Net Each...................... **$24.75**

### AUTOMATIC CROSSOVER CHARGER

Automatically operates vital equipment when power fails. Intercepts 117 VAC power failure. Instantly switches from failing line current to inverter. System may be installed in minutes. Automatic crossover charger comes with built-in 10 amps charger and handles 117 VAC equipment to 1200 watts. Operates with any standard inverter and prevents storage, battery overcharge. Features heavy-duty solenoid switches, solid state electronic circuitry. Operates clocks, timers, burglar alarms, closed circuit TV, cash registers, office equipment, exit lights and many other electronic equipments.
**Terado No. 50-143**—Net Each..... $\$155^{50}$

### BATTERY CHARGERS

**Taperite** has low position causing charge automatically to taper to zero; won't overcharge battery. **Challenger** has ventilated steel case and brackets for coiling wire. **Super Charger** similar but has color-coded meter to show battery condition and charge rate.

Charge rates listed in table are for both 6 and 12 volts.

| Terado Model | | Charge Rate | Charge Meter | Size, Inches | Wt., Lbs. | Net Each |
|---|---|---|---|---|---|---|
| **No.** | **Name** | | | | | |
| 50-186 | Dyn-A-Mite | 1 A | No | 1¾ x 1¾ x 3¼ | 1 | $ 7.19 |
| 50-192 | Taperite | 6 A | Yes | 4 x 5 x 6 | 7½ | 28.42 |
| 50-189 | Challenger | 6 A | Yes | 4 x 5 x 6 | 5 | 23.92 |
| 50-181 | Super Charger | 10 A | Yes | 4 x 5 x 6 | 7½ | 29.69 |

## ELECTRO PRODUCTS LABS DC POWER SUPPLIES

Reliable source of filtered DC voltage for commercial, industrial, research, educational and service applications. Smooth action controls and DC meters permit adjustment to exacting requirements. Silicon and selenium rectifiers patented conduction cooling to provide greater output. Special filters improve regulation and hold AC ripple to a minimum. All output ratings, as listed, are extremely conservative. All units equipped with on-off switch, primary fuse, 6 ft. rubber-covered power cord and plug.

# erado DC-AC Chargers, Inverters

**CHANGES BATTERY CURRENT TO 110 VAC, 60 HERTZ, ± ½ HERTZ, REGARDLESS OF LOAD***

**CAN BE ADAPTED FOR 50 Hz USE†**

## INVERTERS

### QUAD CONTINENTAL

**Transistorized, 1200 watts**

verts 12 VDC to 117 VAC, 60 Hz, 1100 to
watts. Frequency stable within ¼ Hz, not
cted by change in input or load. Filtered for
itive electronic equipment. Operates small
gerators, lights, tape recorders, video cam-
and recording tapes, electric tools, lab test
pment, televisions including color, and por-
hospital equipment. Adjustable output con-
and accurate AC output meter. Sophisticated
state design. Variable control head may be
lled from main unit with four optional plug-
tension cables. Size: 12″ w. x 12″ d. x 15″ h.
ping Weight, 140 lbs.
**do No. 50-110**—Net Each..... **$610.05**

### DUAL CONTINENTAL-3

**Transistorized, 600 watts**

a fine frequency stable inverter converts 12
to 110 VAC, 60 Hz, 550 to 600 watts. Fre-
cy variation within ¼ Hz with changing
t and load. Ideal for operation of fine or
cal video-tape equipment and instruments.
udes battery cables, remote control and vari-
AC output. Size: 10¾″ w. x 13″ d. x 6″ h.
ping Weight, 60 lbs.
**do No. 50-202-3**—Net Each.... **417.64**

### CONTINENTAL-3

**Transistorized, 300 watts**

e as DUAL CONTINENTAL-3 except: 275–
watts capacity. Size: 10¾″ w. x 6″ d. x 6″ h.
ping Weight, 30 lbs.
**do No. 50-191-3**—Net Each.... **$233.40**

### DUAL CONTINENTAL-24 VOLT

**Transistorized, 800 watts**

a fine frequency inverter converts 24 VDC
10 VAC, 60 Hz, 700 to 800 watts. Frequency
le within ¼ Hz with changing inupt and
. Designed for duty in aircraft or other 24
applications. Includes battery cables, re-
control and variable AC output. Size:
″ w. x 13″ d. x 7¼″ h. Shipping Weight,
os.
**do No. 50-152**—Net Each..... **$621.23**

### CONTINENTAL-24 VOLT

**Transistorized, 400 watts**

e as DUAL CONTINENTAL above, except:
-400 watts capacity. Size: 10¾″ w. x 6″ d. x
. Shipping Weight, 30 lbs.
**do No. 50-190**—Net Each..... **$305.35**

### DUAL CONTINENTAL*†

**Transistorized, 600 watts**

verts 12 VDC to 117 V, 60 hertz, 550 to 600
s. Filtered for tape recorders. Frequency
le within ¼ hertz with changing input volt-
load. Includes battery cables, remote control,
able AC output. Size: 10¾″ w. x 13″ d. x
. Shpg. Wt., 60 lbs.
**do No. 50-202**—Net Each..... **$327.74**

### CONTINENTAL*†

**Transistorized, 300 watts**

e as DUAL CONTINENTAL except: 275–
watts capacity. Size: 10¾″ w. x 6″ d. x 6″ h.
. Wt., 30 lbs.
**do No. 50-191**—Net Each..... **$158.40**

### ATLAS*†

**Transistorized, 200 watts**

e as DUAL CONTINENTAL except: 175–
watts capacity. Size: 10¾″ w. x 6″ d. x 6″ h.
. Wt., 20 lbs.
**do No. 50-200**—Net Each..... **$116.50**

### TITAN*†

**Transistorized, 175 watts**

e as DUAL CONTINENTAL except: less
ote control; 150–175 watts capacity; on-off
ch; AC receptacle. Size: 10¾″ w. x 6″ d. x
. Shpg. Wt., 20 lbs.
**do No. 50-201**—Net Each..... **$100.51**

### SUPREME*†

-transistorized. Converts 12 VDC to AC.
er output, 175–200 W, filtered. Remote con-
has variable AC output switch and signal
. Size: 10¾″ w. x 6″ d. x 6″ h. Shpg. Wt.,
os.
**do No. 50-153**—Net Each....... **$89.70**

### RECORDER*†

-175 watt version of SUPREME, less remote
rol. Plugs into cigarette lighter. Size: 10¾″
6″ d. x 6″ h. Shpg. Wt., 21 lbs.
**do No. 50-175**—Net Each....... **$78.00**

### AUTOMATIC*†

Operates automatically from 6 or 12 VDC without vibrator change or switching (6 V, 55–75 watts; 12 V, 85–110 watts). Easy installation into cigarette lighter. For dictation machines, radios, tape recorders, phonographs, heating pads, etc. Steel case. Seal brown baked enamel. Size: 3½″ w. x 6½″ d. x 4″ h. Shpg. Wt., 8 lbs.
**Terado No. 50-134**—Net Each....... **$50.52**

### SUPER*†

Single input version of AUTOMATIC at left. Size: 3½″ w. x 6½″ d. x 4″ h. Shpg. Wt., 8 lbs.

**Terado No. 50-126**—Input, 6 V; AC power output, 60–75 watts. Net Each.. **$42.90**

**Terado No. 50-127**—Input, 12 V; AC power output, 75–100 watts. Net Each......... **$42.90**

### MASTER*†

Voltage input, 12 V; AC power output, 60–75 watts. Size: 3½″ w. x 6½″ d. x 4″ h. Wt., 6 lbs.
**Terado No. 50-122**—
Net Each......................... **$39.90**

### CHIEF*†

Operates tape recorders, power tools, dictation machines, mixers, blenders, etc. Front AC receptacle connects direct to battery. Toggle switch output control. Ventilated steel case. Size: 3½″ w. x 6½″ d. x 4″ h. Shpg. Wt., 8 lbs.

**Terado No. 50-137**—Input, 6 V; AC power output, 75–100 watts. Net Ea... **$53.90**

**Terado No. 50-138**—Input, 12 V; AC power output, 100–125 watts. Net Each........ **$53.90**

### ELECTRAL*

Glove compartment size inverter, available in 12 volt input. Easy installation into cigarette lighter. Vinyl coated steel case with leatherette appearance. Size: 3″ w. x 2¼″ d. x 5½″ h. Shipping Weight, 3 lbs.

**Terado No. 50-167**—Voltage input, 12 V; AC power output, 42–52 watts. Net. **$21.30**

### SENIOR*

Operates radios, lights, phonographs and small tape recorders. Available in 6 V or 12 V input. Simple to install into cigarette lighter. Aluminum case. Seal brown baked enamel. Size: 2½″ w. x 4½″ d. x 2¼″ h. Shipping Weight, 3 lbs.

**Terado No. 50-115**—Voltage input, 6 V; AC power output, 35–40 watts. Net. **$20.16**

**Terado No. 50-116**—Voltage input, 12 V; AC power output, 40–50 watts. Net Ea... **$20.16**

### DYNAMO*

Permits operating AC radios and electric shavers on 12 VDC battery. Power output, 25–30 watts. Size: 2″ x 2″ x 3¾″. Shpg. Wt., 2 lbs.
**Terado No. 50-197**—Net Each....... **$16.47**

### AUTO SHAVER*

Operates all electric shavers. Available in 6 V (10–15 W) or 12 V (15–20 W) input. Plugs into cigarette lighter. Polyethylene non-breakable case. Size: 3⅝″ w. x 2¼″ d. x 4¼″ h. Shipping Weight, 2 lbs.

**Terado No. 50-102**—6 V. Net Each... **$11.85**

**Terado No. 50-103**—12 V. Net Each.. **11.85**

### GEMINI

Transistorized, 12 VDC to 110 VAC. Capacity, 450–500 watts. Frequency not stabilized. Size: 12½″ x 6″ x 6″. Shpg. Wt., 20 lbs.

**Terado No. 50-128**—Net Each........ **$97.17**

**Terado No. 50-128-3**—Same as above but with 750 watts int. capacity. Operates up to ½″ electric drill, drills pole crossarms with ease, hot tip knives, etc. Net Each................ **$124.50**

### FALCON

Same as Gemini above, but 275–300 watts.

**Terado No. 50-129**—Net Each........ **$78.15**

**Terado No. 50-130 Remote Control**—For Gemini or Falcon inverters. Net Each........ **$14.37**

### GALAXY

Transistorized 12 VDC to 110 VAC, 140–175 watts filtered. Adjustable voltage and frequency. Ideal where frequency is not critical. Size: 10¾″ w. x 6″ d. x 6″ h. Shpg. Wt., 9½ lbs.
**Terado No. 50-205**—Net Each....... **$51.50**

### TEMPEST

Transistorized 12 VDC to 110 VAC, 125–150 watts. Ideal where frequency is not important. Size: 10¾″ w. x 6″ d. x 6″ h. Shpg. Wt., 9½ lbs.
**Terado No. 50-170**—
Net Each......................... **$45.45**

# PARAFORMER™ REGULATORS

## PARAFORMER—A NEW CONCEPT IN AC POWER CONDITIONING

The Paraformer is a line voltage regulator and line power filter that prevents line voltage fluctuations (noise, distortion, etc.) from reaching the load. Provides voltage regulation and noise attenuation of over 50 dB, over frequency range of 0 to 1 MHz. Operates exclusively on the basis of parametric coupling, with flux coupling or mutual inductance equal to zero. Other passive devices (transformers and ferroresonant transformers) depend almost exclusively on the flux coupling term of the electromotive force equation below; the Paraformer transfers energy by the i dL/dt term of the equation. The comparison chart illustrates the advantages of the Paraformer over conventional regulation methods.

$$E=\frac{d}{dt}(Li)=\underbrace{L\frac{di}{dt}}_{\substack{\text{Flux}\\ \text{Coupling}\\ \text{Term}}}+\underbrace{i\frac{dL}{dt}}_{\substack{\text{Parametric}\\ \text{Coupling}\\ \text{Term}}}$$

**COMPARISON CHART**

| Function | Transformer | Ferroresonant Transformer | Paraformer |
|---|---|---|---|
| Line voltage regulation | None | ± 1% | ± ½% |
| Line filtering (noise) | No | Slight | Over 50 dB |
| Load filtering (noise) | No | Slight | Over 50 dB |
| Overload protection | No | Partial | Yes |
| Low line protection | None | None | Yes |

### HOW IT WORKS

As shown in Figure 1, the Paraformer consists only of a primary winding, a secondary winding, a magnetic core and an AC capacitor. No other components are used. Since the Paraformer is not a ferroresonant transformer, the mechanism for energy transfer is entirely different and most of its basic characteristics are entirely different.

The Paraformer geometry, as shown in Figure 2, is such that the primary flux does not link the secondary winding and the secondary flux does not link the primary winding. Accordingly, the classical flux coupling is zero. However, the primary flux does modulate the reluctance associated with the secondary flux; hence, the primary does modulate the inductance of the secondary. This modulation can be achieved only by transferring electrical power from the primary to the secondary. This power in turn sustains the secondary conditions and delivers power to the load. It is this unique parametric power transfer mechanism that makes the Paraformer a revolutionary new component.

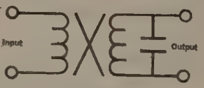

Figure 1

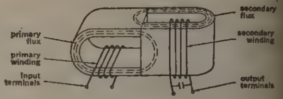

Figure 2

Ⓐ

## PARAX® AC VOLTAGE REGULATORS (FIG. A)

AC line regulators using Paraformer principle described above. For 60 Hz, in ratings from 60 VA to 1000 VA. **AC Input:** 115 VAC, ±10% (nominal), 60 Hz; 50–150 VAC permissible. **AC Output:** 117 VAC, 60 Hz, single-phase. **Regulation:** ±0.5% line, ±2.0% load.

**60 Hz PARAX REGULATORS**

| Wanlass Model | Power Rating | Size, Inches W. x D. x H. | Wt., Lbs. | Net Each, Lots of | | | |

## PARAX® PRECISION AC/DC POWER SUPPLY (FIG. B)

This test instrument combines a variable AC regulated power conditioner with a highly regulated variable DC power supply. Variable AC is a standard Parax circuit, while variable DC is a highly precise transistor series-regulator with Parax filtering advantages. Extensive capabilities include testing high line and low line limits, as well as providing a DC range of voltage for testing integrated circuits. **Input Voltage:** Fixed, 105–125 VAC, single phase nom.; variable, 50–150 VAC; variable, 50–150 VDC. **Output Voltage:** Fixed, 118 VAC; variable, 0–140 VAC; variable, 0–8 VDC. **Noise Attenuation:** 50 dB (up to 1 MHz) for AC. **Output Capacity:** Fixed and variable AC, 500 VA; 0–15 ADC. **Size:** 19″ w. x 19″ d. x 5¼″ h. Weight, 80 lbs.

**Wanlass Model P-5505 Parax Precision AC/DC Power Supply**—Net Each . . . **$875.00**

# CLIP-AC™ REGULATORS

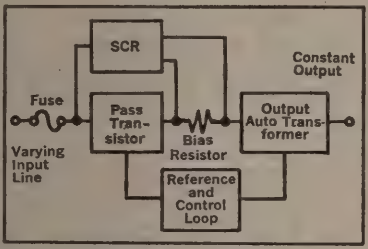
## THE CLIP-AC PRINCIPLE OF VOLTAGE REGULATION

AC type AC voltage regulators are the logical successors e ferroresonant transformer for the bulk of AC regulation rements, at up to 1 kVA. Regulation is achieved by sym- eally clipping (dissipating) the peaks of the incident sinus- waveform. Except for these peaks, the Clip-AC output form is identical to the input waveform. The comparison below illustrates the advantages over conventional regula- using the ferroresonant principle. The Clip-AC principle ed in both peak and rms AC regulation, and in regulated ower supplies.

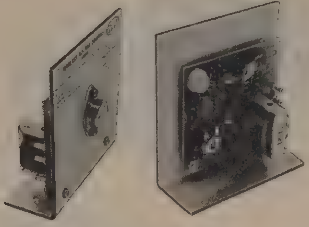
### COMPARISON CHART

| Function | Ferroresonant Principle | Clip-AC Principle |
|---|---|---|
| t frequency<br>e regulation | Single frequency<br>1–3% typical | 47–420 Hz typical<br>−0.1 to 1% typical |
| d regulation | 5–7% typical (no compensation) | 1% typical (compensation) |
| er factor<br>se shift<br>ponse time | Shifts output voltage<br>Appreciable<br>25,000 μsec typ. | No problem<br>None<br>10–50 μsec typical |
| t, size and eight | | Typically 50% less |

### HOW IT WORKS



k diagram above shows how regulation is achieved. Output ge is continuously monitored by a sensor, which uses a diode as reference. The associated control circuitry in adjusts the clipping level of the pass transistor, to maintain desired constant output. Economical design with floated ence and a diode bridge makes it possible for the same transistor to be used on both halves of the AC cycle. An is used to accommodate short duration surge currents, as those encountered in charging capacitors, starting motors, arting lamp loads. Under such conditions, the bias resistor ers the SCR and the excessive current surge is bypassed nd the pass transistor. Should these excessive conditions st, the input fuse would be blown, protecting the unit. er normal operating conditions, the SCR is inoperative.

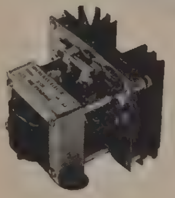


A

## MODEL CVR-120 PEAK REGULATOR (FIG. A)

Solid-state, economical AC voltage regulators, rated 120 VA, featuring fast response using the Clip-AC principle described at left. Lightweight and compact, an ideal replacement for ferroresonant-type regulators, offering response time of 10 to 50 μsec. Insensitive to frequency and power factor. Model CVR-120 provides peak regulation for DC power supplies or peak-sensitive devices. **Line Regulation:** ±1%. **Load Regulation:** ±1%. **Power Factor Regulation:** CVR-120, ±1%. **AC Input:** CVR-120, 100–130 VAC, 47–420 Hz, single-phase. **AC Output:** CVR-120, 135 VAC peak at 120 VA. **Ambient Operating Temperature:** 0° to 40° C; up to 71° C with proper derating. **Temperature Coefficient:** ±0.025%/° C. **Size:** 4″ w. x 2½″ d. x 4½″ h.

| Wanlass Model | Type | Net Each, Lots of | | | |
|---|---|---|---|---|---|
| | | 1-9 | 10-24 | 25-49 | 50-99 |
| CVR-120 | Peak | $26.50 | $25.00 | $24.00 | $21.75 |



B

C

## SERIES C-3000 TRUE RMS AC VOLTAGE REGULATORS (FIG. B)

AC rms line and load voltage regulators, using Clip-AC iple described above. Regulation is achieved through unique ing circuit which senses rms and clips output voltage at ed rms level. No phase shift. Ideal for photo-optical applica- where light intensity must be held constant, as well as other applications requiring regulated rms AC power. **AC Input:** 100–130 V, 47–420 Hz. **Line and Load Regulation:** ±0.5. **Power Factor Regulation:** ±0.5% from +0.7 to −0.7. **Response Time:** 10 to 50 μsec. **Ambient Operating Temperature:** 0° to 50° C.

| Wanlass Model | AC Input | Power Rating | Size, Inches W. x D. x H. | Wt., Lbs. | Net Each, Lots of | | | |
|---|---|---|---|---|---|---|---|---|
| | | | | | 1-9 | 10-24 | 25-49 | 50-99 |

WANLASS DIVISION OF AMBAC

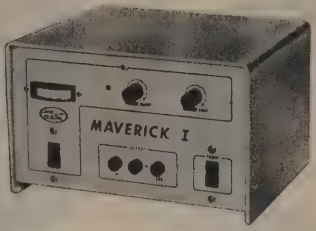
# Varax™ Regulators

## THE WANLASS VARAX VARIABLE INDUCTOR

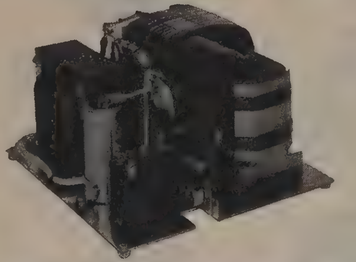
l-new magnetic component invented by Wanlass Electric. n electrically variable inductor which can be controlled over wide range of inductance, through the application of a small C control current. Similar in design to the Wanlass Paraformer, ith a basic core consisting of two C-cores rotated at 90° relative one another.

ffers many advantages over conventional saturable reactors, cluding: Smaller size, lighter weight, higher reliability, less aveform distortion, and lower cost. Limited waveform distoron is the result of the relatively linear variation of AC inducnce as a function of DC control current.

articularly well suited to AC line voltage regulation, by adding ly a sensor and control circuit plus a boost transformer or utotransformer (Models VVR-1500, VVR-1501 and VVR-1502, sted below, are for AC regulation).



A



B

### HOW IT WORKS

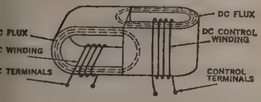


Figure 1

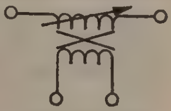

Varax Symbol

s shown in Figure 1 above, the AC inductor winding is wound n one of the core halves, and the DC control winding is on e other. AC flux does not link the control winding; DC flux oes not link the AC winding. AC power is highly decoupled om entering the DC control circuitry, making it possible to ercise control by means of a control winding consisting of a eat many turns carrying a relatively small current.

nce this decoupling is achieved without special care, the anlass Variable Inductor provides overall simplicity with high liability in many applications, including: Voltage regulation r photocopiers, regulation for locally-generated power in mote communication sites, as an electrically tunable variable ductor for remotely tuned automobile radios, as a regulation element for automatic battery chargers, and for general-purpose multi-frequency 0.5% line voltage regulators.

Application of DC current to control winding increases the effective reluctance associated with AC winding, decreasing the effective inductance of the AC winding. Maximum inductance occurs with zero control current and decreases with increasing control current, reaching a minimum at maximum control current.

## VARIABLE INDUCTOR STATIC AC VOLTAGE REGULATORS (FIG. B)

atic, frequency insensitive AC voltage regulators offer high liability, ideal for remote and unattended locations. Provides ne and load regulation; true rms regulation by rms sensor nd all silicon semiconductor closed-loop control circuit, with w power level. No silicon controlled rectifiers or other solid ate components are used in power circuits. Excellent source r high starting current loads such as motors, lamps or heaters; ombinations of high current loads; and all lagging power factor ads. Provides line transient suppression by inherent characeristics or series inductor in the line; produces no spikes or onducted RF interference. Makes a sensible replacement for ferroresonant constant-voltage transformers or silicon-controlled rectifier type AC regulators. Features include: Short circuit protection; suppression of 200 volt transients, protecting both the regulator and the load. **AC Input:** 105–130 VAC, 47–63 Hz, single-phase. **AC Output:** 120 V rms; 1500 or 2000 VA. **Load Regulation:** ±1% for 400 to 1500 watt load change (±1%, zero to full-load with optional BI-1500 ballast inductor). **Line Regulation:** ±1%. **Operating Temperature:** 0° to 55° C; up to 85° C with 200 cfm forced-air cooling. **Efficiency:** Over 90% at full load. **Size:** 9″ w. x 9.3″ d. x 4.8″ h. Weight, 32 lbs.

| Wanlass Model | Power Rating | Inductive Load Required | Motor Load, HP* | Net Each, Lots of | | | |
|---|---|---|---|---|---|---|---|
| | | | | 1-9 | 10-24 | 25-49 | 50-99 |
| **VVR-1500** | 1500 VA | 1.8 to 3.6 amps | 1/12 to ⅙ | **$172.50** | **$164.00** | **$155.25** | **$146.50** |

## MAVERICK I AND MAVERICK II VARIABLE REGULATED BENCH-TYPE DC POWER SUPPLIES (FIG. A)

esigned for integrated circuit, MOS and operational amplifier ads in lab and system equipment. Maverick I provides output 0 to 7 VDC at 0 to 5 amps; Maverick II provides dual output 0 to 18 VDC at 0 to 1.25 amps. Each protected by adjustable utomatic recovery current limiting for overloads and short cirits; circuit breaker for AC input protection. Remote sensing utomatically reverts to local sensing in the event of a broken r accidentally disconnected sense lead. Bench mount construcon, with clear anodized aluminum finish. **AC Input:** 105–125 AC, 60 Hz single phase. **Load and Line Regulation:** ±0.1% r ±5 mV. **Ripple:** Less than 1 mV rms. **Output Impedance:** Less han 10 milliohms, DC to 1 MHz. **Operating Temperature:** ° to 45° C; natural convection cooling. **Controls:** Voltage; Current Limit; Meter Switch; On-Off Switch; Dual Meter (0–7 V/0–7 amps DC). **Front Panel Terminals:** Positive and negative output; ground. **Rear Panel Terminals:** Positive and negative output; ground; remote sense. **Input Cord:** 5-ft. 3-wire utility cord with grounded 3-prong plug. **Size:** 8.50″ w. x 5.22″ h. x 7.50″ l. Weight, 9 lbs.

| Wanlass Model | DC Output Volts | Net Each, Lots of | | | |

*Regulation, ±2% for line; ripple, 2% maximum.

## "ELIMINATOR" ALL SILICON SOLID STATE 12 VDC POWER SUPPLY (FIG. D)

liminates need for 12-volt batteries to power DC devices. pecially protected against inadvertent overloads and dead short ircuits. Operates from 105/125 VAC, 1-phase, 60 Hz; ideal for riving all 12-volt devices including auto radios, stereos, tape ecks and cassettes. Regulated and filtered. Comes with UL Recognized 3-wire cord and grounded plug for AC input; output leads have alligator clips to DC load.

| Wanlass Model | DC Output | | Net Each, Lots of | | | |

## AIR COMPRESSOR (FIG. R)

Produces 1 cfm circulation at 5 psi. For 115 VAC, 60 Hz, single-phase. Size, 4″ high x 3″ wide x 6″ long. Weight, 3.5 lbs. maximum including cord, exhaust tube assembly and fitting.
**TRW/Globe Air Compressor**—Net Ea., Lots of 1–3 . . . . **$98.50***

TRW/Globe AC and DC motors are available with a wide variet of voltage requirements, speeds and ratings, within the price rang shown for each type. Write or call for complete specifications an quantity pricing on motors to meet your specific requirement Most types are also available with integral gearing (listed o following page).

## AC HYSTERESIS-SYNCHRONOUS AND INDUCTION MOTORS

### TYPE MC (FIG. A)

Miniature AC motor rated 0.9 oz.-in. maximum sync torque Voltage ratings up to 200 VAC; 2, 4 or 6 poles. Size, 1¼″ dia. x 2¼″ long. Weight, 6.5 oz.
**TRW/Globe Type MC**—Net, Lots 1–10 . . **$70.00 to $80.00***

### TYPE FC (FIG. B)

Small in size, rated 1.2 oz-in. maximum sync torque. Powered by up to 200 VAC; 2, 4 or 6 poles, Size, 1 11/16″ dia. x 2¼″ long Weight, 11.5 oz.
**TRW/Globe Type FC**—Net, Lots 1–10 . . **$70.00 to $80.00***

### TYPE SC (FIG. C)

Miniature AC motor rated 0.2 oz.-in. maximum sync torque Voltage ratings up to 200 VAC; 2, 4 or 6 poles. Size, 1 1/16″ dia. x 1 5/16″ long. Weight, 2.4 oz.
**TRW/Globe Type SC**—Net Each, Lots of 1–10 . . . . . . . **$70.00***

### TYPE CFC (FIG. D)

Small size motor rated 2.0 oz.-in. maximum sync torque. Voltage ratings up to 230 VAC; 2, 4 or 6 poles. Size, 1 19/32″ dia. x 2⅞″ long. Weight, 13 oz.
**TRW/Globe Type CFC**—Net Each, Lots of 1–10 . . . . . **$58.00***

### TYPE CMC (FIG. E)

Miniature 60 Hz commercial motor rated up to 0.75 oz.-in. maximum sync torque at 1800 or 3600 rpm. Voltage to 115 VAC, 2 or 4 poles. Size, 1 43/64″ dia. x 2 21/32″ long. Weight, 7.2 oz.
**TRW/Globe Type CMC**—Net Each, Lots of 1–10 . . . . **$52.00***

### TYPE UC (FIG. F)

Small size motor rated up to 6 oz.-in. maximum torque at 3000 rpm in long stack version. Induction or hysteresis synchronous types available. Powered by up to 230 VAC; 2, 4 or 6 poles. Size, 2 5/16″ dia. x 1⅞″, 2⅜″ or 3⅜″ long. Weight, up to 34.5 oz.
**TRW/Globe Type UC**—Net Each . . . . . . . **$56.00 to $74.00***

## PERMANENT MAGNET DC MOTORS

Produce very high starting torques; can provide characteristics tailored to your application. Integral or separate radio noise filters can be added.

### TYPES BD AND BL (FIG. G)

Rated .022 hp (Type BD) or .033 hp (Type BL) in 6,000 to 12,000 rpm range. Voltage ratings to 115 VDC. Size, 1½″ dia. x 2 15/16″ long maximum. Weight, 11.3 oz. maximum.
**TRW/Globe Type BD or BL—**
Net Each, Lots of 1–10 . . . . . . . . . . . . . . . **$80.00 to $130.00***

### TYPES MM AND LL (FIG. H)

**Type MM** rated .01 hp over 8,000 to 18,000 rpm range. Open or enclosed style. Voltage rating to 50 VDC. Size, 1¼″ dia. x 2 1/32″ long. Weight, 5 oz. **Type LL** rated .015 hp, 6,000 to 14,000 rpm. Available in open or enclosed style. Voltage rating to 75 VDC. Size, 1¼″ dia. x 2⅜″ long. Weight, 6.5 oz.
**TRW/Globe Type MM or LL—**
Net Each, Lots of 1–10 . . . . . . . . . . . . . . . . **$50.00 to $60.00***

### TYPE SS (FIG. J)

Subminiature motor rated .004 hp in the 8,000 to 18,000 rpm range. Voltage rating up to 50 VDC. Size, ⅞″ dia. x 1⅜″ long. Weight, 2 oz.
**TRW/Globe Type SS**—Net, Lots 1–10 . . . **$50.00 to $65.00***

### TYPE SD (FIG. K)

Subminiature motor rated .003 hp in the 8,000 to 18,000 rpm range. Voltage rating up to 50 VDC. Size, ¾″ dia. x 1⅜″ long. Weight, 1.75 oz.
**TRW/Globe Type SD**—Net, Lots 1–10 . . **$60.00 to $100.00***

### TYPE VS (FIG. L)

Compact flat motor rated .0025 hp in 8,000–17,000 rpm range. For up to 50 VDC. Size, ⅞″ x 7/16″ x 1⅞″. Weight, 1.7 oz.
**TRW/Globe Type VS**—Net, Lots 1–10 . . . **$60.00 to $68.00***

### TYPES CMM AND CLL (FIG. M)

Miniature commercial motors. **Type CMM** rated 1/100 hp continuous duty at 8,000–18,000 rpm. Voltage from 6 to 50 VDC. Size, 1.260″ dia. x 1¾″ long. Weight, 3.5 oz. **Type CLL** rated 1/75 hp continuous duty at 6,000–15,000 rpm. Voltage rating from 6 to 75 VDC. Size, 1.250″ dia. x 2 3/32″ long. Weight, 5.2 oz.
**TRW/Globe Type CMM or CLL—**
Net Each, Lots of 1–10 . . . . . . . . . . . . . . . **$38.00 to $40.00***

### TYPE JM (FIG. N)

Miniature motor rated .015 hp in the 6,000–12,000 rpm range. For up to 115 VDC. Size, 1¼″ dia. x 2 1/32″ long. Weight, 5 oz.
**TRW/Globe Type JM**—Net, Lots 1–10 . . **$80.00 to $100.00***

### TYPE GRP (FIG. P)

Small motor rated 0.1 hp in the 6,000–10,000 rpm range. Voltage to 115 VDC. Size, 2¼″ dia. x 3¾″ long. Weight, 40 oz.
**TRW/Globe Type GRP—**
Net Each, Lots 1–10 . . . . . . . . . . . . . . . . **$110.00 to $120.00***

## ★ORDERING INFORMATION AND QUANTITY PRICING

Space does not permit listing the wide variety of voltage ratings, motor speeds and specifications available within each TRW/Globe type. Prices shown indicate the price range for each series.

Write, call or wire for complete specifications and full quantity pricing information on specific models to meet your own motor requirements.

# TRW® GLOBE Motors and Blowers

## AC AND DC MOTORS WITH INTEGRAL GEARS

nsist of AC and DC motors listed on preceding page, with egral planetary or spur gearing. Available in a variety of voltage d speed ratings; write for full information and prices.

### TYPE MC PLANETARY (FIG. A)

ovides 83 even gear ratios, or 18 odd ratios, using Type MC 4" dia. AC motor. Maximum length, 4 3/16". Square flange tional. Max. continuous output torque, to 1000 oz.-in.
**W/Globe Type MC—**
t Each, Lots of 1–10..............**$114.00 to $166.00***

### TYPE FC PLANETARY (FIG. B)

ovides 18 odd and 83 even gear ratios using Type FC 1 11/16" a. AC motor. Maximum length, 4 3/32". Maximum continuous tput torque, to 1250 oz.-in.
**W/Globe Type FC—**
t Each, Lots of 1–10..............**$124.00 to $176.00***

### TYPE SC PLANETARY (FIG. C)

ovides 21 gear ratios, using Type SC 1 1/16" dia. AC motor. aximum length, 3 7/32". Maximum continuous output torque, 300 oz.-in.
**W/Globe Type SC**
et Each, Lots of 1–10..............**$134.00 to $178.00***

### TYPE CFC PLANETARY (FIG. D)

rovides 83 standard ratios for Type CFC motors. Standard ared speeds from 900 rpm down to 0.1 rpm; to 60 lb.-in. continuous torque.
**W/Globe Type CFC**—Net, Lots 1–10. .**$91.00 to $99.00***

### TYPES BD AND BL PLANETARY (FIG. E)

as 1⅞" flange; provides 18 ratios using Type BD or Type BL 2" dia. DC motor. Maximum length, 4 21/32". Maximum continuous output torque, to 100 lb.-in.
**RW/Globe Type BD or BL—**
et Each, Lots of 1–10..............**$220.00 to $322.00***

### TYPES MM AND LL PLANETARY (FIG. F)

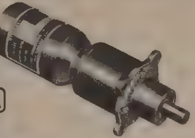
ovides 18 ratios using Type MM or LL 1¼" dia. DC motor. ax. length, 4 9/64". Square flange optional. Maximum continuous tput torque, to 1000 oz.-in.
**RW/Globe Type MM or LL—**
et Each, Lots of 1–10..............**$94.00 to $145.00***

### TYPE SS PLANETARY (FIG. G)

ovides 21 ratios using Type SS ⅞" dia. DC motor. Max. length, 1/64". Continuous output torque, to 300 oz.-in.
**RW/Globe Type SS—**
et Each, Lots of 1–10... ..........**$114.00 to $160.00***

### TYPE SD PLANETARY (FIG. H)

rovides 19 ratios using Type SD ¾" dia. DC motor. Maximum ntinuous output torque, to 300 oz.-in.
**RW/Globe Type SD—**
et Each, Lots of 1–10..............**$128.00 to $170.00***



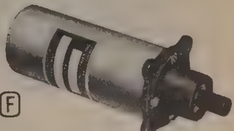
A

B

C

D

E



F

G

H

J

### TYPE VS SPUR (FIG. J)

Provides 62 ratios using Type VS 7/16" x ⅞" DC motor. Maximum length, 3¾". Maximum output torque, to 35 oz.-in. Side-by-side version is ⅞" x ⅞" x 2¼" long.
**TRW/Globe Type VS—**
Net Each, Lots of 1–10..............**$220.00 to $350.00***

## AC AND DC BLOWERS AND FANS

WR/Globe's extensive line of air moving devices for electronics oling applications include multi-stage, vaneaxial, tubeaxial, and ntrifugal blowers and fans for AC, DC or universal AC/DC peration. High altitude and high ambient temperature units are specialty; MIL specs are routine. Globe designs and produces s own motors, so we can provide prototype or production units ith optimum characteristics for your specific applications. Available with a variety of motors and ratings, within the price ranges own for each type. Write for full information and quantity ricing.

### OPEN TYPE FANS (FIG. K)

vailable with a variety of AC, DC or AC/DC motors, delivering p to 195 cfm at zero inches of water. Power requirements from to 120 VDC; or up to 200 VAC, 1-, 2-, or 3-phase, 60 or 400 Hz. eight, 2.3 oz. minimum.
**RW/Globe Open Type Fans—**
et Each, Lots 1–10......................**$57.00 to $97.00***

### TYPE PAX-3 PROPAXIAL FAN (FIG. L)

" fan delivers 120 cfm at zero inches water, using Type MCS -pole motor; or 62 cfm using Type MCS 4-pole motor. Power equirements up to 200 VAC, 3-phase, 400 Hz.
**RW/Globe Type PAX-3**—Net Each, Lots of 1–3....**$65.00***

### AXIAL BLOWERS (FIG. M)

eliver up to 62 cfm free air. Available with AC or DC motors. ower requirements from 4 to 70 VDC; or 27 to 200 VAC, 1-, 2-, r 3-phase. 60 or 400 Hz. Weight, 5 to 9½ oz.
**RW/Globe Axial Blowers—**
et Each, Lots of 1–10..................**$70.00 to $95.00***

### CENTRIFUGAL BLOWERS (FIG. N)

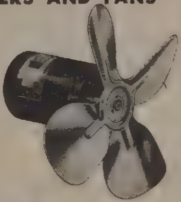
eft-hand or right-hand scroll blowers, for AC or DC power, ith round or rectangular outlet, in 1" to 2½" size. Produce up o 50 cfm free air. AC types powered by 115 to 200 VAC, 60 or 00 Hz. DC types powered by 27 VDC. Weight, 4–18 oz.
**RW/Globe Centrifugal Blowers—**
et Each, Lots of 1–10..................**$70.00 to $95.00***

### TYPE VAX-3 3" VANEAXIAL BLOWER (FIG. P)

vailable for AC, DC or universal AC/DC operation. AC blower elivers 105 cfm at 3.3" water; powered by 115 or 200 VAC, -phase, 400 Hz; weight, 14 oz. DC blower delivers 70 cfm at 1.5" ater; powered by 4 to 115 VDC; weight, 16 oz. AC/DC blower elivers 68 cfm at 1.5" water; powered by 115 VAC, single-phase, 0 Hz, or 115 VDC; weight, 16 oz.
**RW/Globe Type VAX-3—**
et Each, Lots of 1–10..................**$65.00 to $130.00***

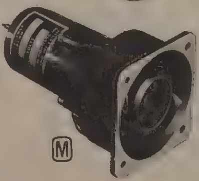
### TYPE VAX-1 VANEAXIAL 1⅛" BLOWERS (FIG. R)

C blower delivers 10 cfm at 0.6" water; powered by 26 VAC, ingle-phase, 400 Hz; weight, 1.5 oz. DC blower delivers 8.5 cfm t 0.5" water; powered by 26 VDC; weight, 1.4 oz.
**RW/Globe Type VAX-1—**
et Each, Lots of 1–10..................**$90.00 to $110.00***

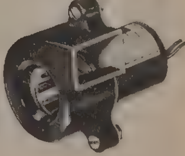


K

L



M



N

P

R

S

### TYPE VAX-2 VANEAXIAL 2" BLOWERS (FIG. S)

Available for AC or DC power. AC blower delivers 50 cfm at 2.1" water; powered by 115 VAC, 1- or 3-phase, 400 Hz; or by 200 VAC, 3-phase, 400 Hz; weight, 5 oz. DC blower delivers 37 cfm at 1.5" water; powered by 26 or 50 VDC. Weight, 5 oz.
**TRW/Globe Type VAX-2—**
Net Each, Lots of 1–10..................**$50.00 to $100.00***

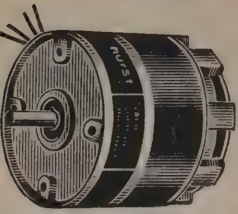
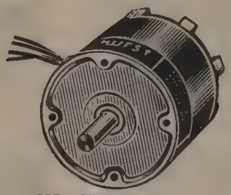
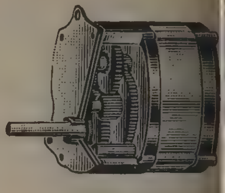
# hurst Synchronous Motors



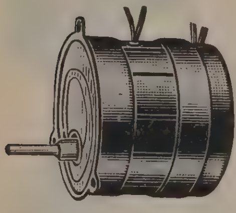
HB "Honey Bee"



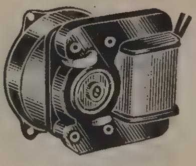
MB "Mini-Bee"



GA



CA



EA

DA, SM

AR-DA, AR-SM, PC-DA, PC-SM

## MODEL HB "HONEY BEE" 1/35 HP MOTOR

Heavy duty hysteresis synchronous motor for video recording, instrumentation, data handling, tape recording, telemetering and turntable applications. High torque rating in small size, with 1800 rpm speed and 1/35 hp power. Inverted rotor design for reduced flutter. Dynamically balanced rotor. Sealed ball bearings; lifetime lubrication. Reversible. **Starting Torque:** 23.5 oz.-in. **Pull-in Torque:** 16.8 oz.-in. **Pull-out Torque:** 17.0 oz.-in. **Temperature Rise:** 40° C full load. **Power Rating:** 1/35 hp. **Speed:** 1800 rpm. **Watts:** 70. **Power Required:** 115 VAC, 60 Hz. **Shaft:** 5/16" dia. x 1" stainless steel. **Leads:** 12" long. **Capacitor:** Included. **Size:** 3½" dia. x 3 9/16". Four 10-32-2B tapped mtg. holes on 2.625" dia. bolt circle.

## MODEL MB "MINI-BEE" 1/100 HP MOTOR

Smaller version of the Honey Bee, for digital cassette drives, video and audio recording, data handling, instrumentation, telemetering, turntables, and many other direct drive applications. Hysteresis synchronous reversible motor features inverted rotor design for superior angular velocity characteristics. The resulting "flywheel" effect greatly reduces flutter in magnetic tape applications. Sealed ball bearings. **Starting Torque:** 6 oz.-in. at 1800 rpm. **Pull-in Torque:** 5.25 oz.-in. **Pull-out Torque:** 5.50 oz.-in. **Temperature Rise:** 40° C full load. **Power Rating:** 1/100 hp. **Speed:** 1800 rpm. **Power Required:** 115 VAC, 60 Hz. **Shaft:** 5/16" dia. x 1" stainless steel. **Leads:** 12" long. **Capacitor:** 2.0 μF, 330 VAC (included). **Size:** 2 13/32" dia. x 2⅝". Four 8-32 UNC-2B tapped mtg. holes, equally spaced on 2.000" dia. bolt circle.

## SERIES GA 600 INCH-OUNCE REVERSIBLE

Hysteresis reversible synchronous motor with heavy-duty gearing. Shaft ¼" dia. x 1" lg. except 3600 rpm, ⅛" dia. **Capacitor:** 1.25 μF. **Torque:** 600 in.-oz. at 1 rpm. **Output Speeds:** (In rpm) 1, 2, 3, 4, 5, 6, 10, 18, 30, 60, 100, 120, 150, 180, 225, 300, 3600. **Case:** 2¾" dia. x 3" lg. Shipping Weight, 2 lbs. 4 oz.

## SERIES CA 100 INCH-OUNCE REVERSIBLE

Instantly reversible, using SPDT switch; accurate clockwise and counter-clockwise. **Capacitor:** 0.50 μF. **Torque:** 100 in.-oz. at 1 rpm. **Rotor Speed:** 1200 rpm. **Case:** 2½" dia. x 2⅛" d. Shipping Weight, 1 lb. 2 oz.

### OUTPUT SPEEDS (IN rpm)

| | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| ⅙ | 2 | 5 | 12 | 24 | 33⅓ | 60 | 120 | 240 | 1000 |
| ⅓ | 2½ | 6 | 15 | 25 | 40 | 64 | 150 | 400 | |
| 1 | 3 | 8 | 16 | 30 | 48 | 80 | 160 | 600 | |
| 1⅓ | 4 | 10 | 20 | 32 | 50 | 100 | 200 | 800 | |

## SERIES EA 150 INCH-OUNCE UNIDIRECTIONAL

Open frame, shaded pole for accurate clockwise rotation only. Extremely cool running. Output shaft, 3/32" dia. x 1" long for 3600 rpm only. **Torque:** 150 in.-oz. at 1 rpm. **Output Speed:** (In rpm) 1, 2, 4, 6, 8, 10, 12, 20, 30, 60, 120 (3600 direct drive). **Case:** 2⅝" w. x 3 5/16" lg. x 1⅝" h. Shipping Weight, 1 lb. 3 oz.

## SERIES DA 150 INCH-OUNCE REVERSIBLE

Instantly reversible, using SPDT switch; accurate both clockwise and counter-clockwise. **Capacitor:** 0.50 μF. **Torque:** 150 in-oz. at 1 rpm. **Output Speeds:** (In rpm) 1, 2, 4, 6, 8, 10, 12, 20, 30, 60, 120. **Case:** 2½" dia. x 1¾" d. Shpg. Wt., 1 lb. 1 oz.

## SERIES AR-DA AUTOMATIC RESET

Automatic reset type DA motor, 100 in.-oz. reversible, when return spring is attached to output shaft. Shaft free for manual or automatic reset when clutch is de-energized. For heavy duty applications up to full torque rating. Accurate within 1/5 second at 1 rpm; greater accuracy at higher speeds. Lubricated, enclosed clutch mechanism. **Max. Error:** (In seconds) .15625/rpm. **Output Speeds:** (In rpm) 1, 4, 6, 10, 30, 60. **Case:** 2½" dia. x 2" d.; clutch actuator, 1 3/16" w. x ⅞" h. Shipping Weight, 1 lb. 6 oz.

## SERIES PC-DA 120 INCH-OUNCE POSITIVE CLUTCH

Consists of basic type DA motor with positive clutch and instantaneous brake. Starts in 20 millisecs; stops 60 rpm shaft in 12°; 1 rpm in 1/5°. **Output Speeds:** (In rpm) 1, 2, 4, 6, 8, 10, 12, 20, 30, 60, 120. Shipping Weight, 1 lb. 5 oz.

## SERIES SM 40 INCH-OUNCE UNIDIRECTIONAL

Clockwise rotation only. Shaded pole. Instant start at full torque of 40 in.-oz. at 1 rpm. **Output Speeds:** (In rpm) ½, 1, 2, 3, 4, 5, 6, 10, 15, 30, 60. **Case:** 2½" dia. x 1¾" d. Shipping Weight, 1 lb.

## SERIES AR-SM AUTOMATIC RESET

Automatic reset type SM motor, 40 in.-oz. clockwise, when return spring is attached to output shaft. Other specifications and operation same as Series AR-DA.

## SERIES PC-SM POSITIVE CLUTCH

Consists of basic type SM motor with positive clutch and instantaneous brake. Starts in 20 millisecs; stops 60 rpm shaft in 12°, 1 rpm in 1/5°. **Output speeds:** (In rpm) ⅓, 1, 2, 3, 4, 5, 6, 10, 15, 30, 60. Shipping Weight, 1 lb. 4 oz.

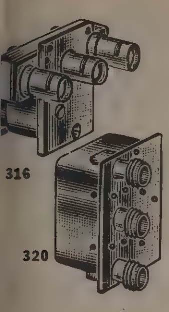
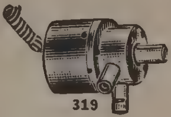
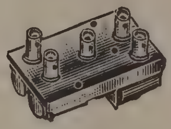
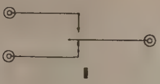
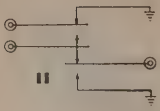
# UNKER RAMO AMPHENOL Coax Relay Switches

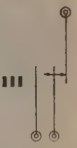


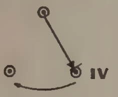


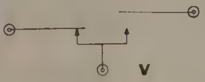


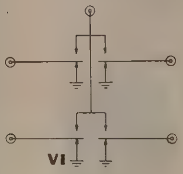


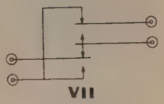












mphenol coaxial switches, manufactured to the highest quality andards; operate and release in a max. time of 20 msec. or faster. ontacts are gold over fine silver plate. Switches rated at 100 watts F power are supplied with ³⁄₃₂" dia. contacts; switches rated 500 watts use bifurcated contacts of ⅛" dia. Switches provide eak-before-make operation. Terminations are jack type RF nnectors of BNC, N, C, MB or UHF type. These DK coaxial switches meet applicable portions of MIL-S-3928B. Minimum expected life is 1,000,000 cycles at speeds of less than 10 cycles per second. Coils are vacuum impregnated to withstand high humidity and operate continuously over a temperature range of −65° C to +85° C. Coil input power at nominal voltage is as follows: DC operated 100 W RF switches, 2½ W; DC operated 500 W RF switches, 3¼ W; AC operated switches, all types, 6 VA.

---

**5 Series**—Small, compact, low cost switch with non-shorting rmination of the disengaged connector. Connectors and actuator e mounted on a common plate. For DC remote operation only.

**6 Series**—Rugged, two-position switch with a break-before-ake action. The disengaged connector is shorted to ground. pecifically designed for bulkhead mount with all three connectors the opposite side from actuator.

**7 Series**—Highly reliable switch with the disengaged connector ther resistor terminated or shorted to ground for better cross-lk. Designed for panel mount, the common or input connector on one side with the two outputs and actuator on the other.

**8 Series**—Supplied as standard with either shorting, non-short-g or resistor terminations. Two-position type. Designed for flat ount with all three connectors and actuator on the same side.

**9 Series**—Standard rotary type switch in manual and remote perated versions. Non-shorting contacts. The ¼" dia. turn shaft manual types bears a ⅛₄" mounting flat for control knob.

**0 Series**—High power (1 kW) switch utilizing twin contacts ith double make and break action in each position. Designed for anel or bulkhead mount. All three connectors are on the same side. andard unit is supplied with dust cover over actuator.

**1 Series**—Rugged, flat-mounting switch in manual or remote perated version. VSWR is low up to 100 MHz. Non-shorting con-cts offer less circuit isolation and more crosstalk than shorting pes.

**2 Series**—Small rotary switch for the inter-connection of the mmon output connector to any of four inputs. Manual opera-on with non-shorting contacts. Excellent crosstalk and VSWR.

**323 Series**—Individual actuator for each input. The actuator connects the associated input to the common output when energized. Any one or more inputs may be simultaneously connected to the common output, or any input may be connected to any other input through the common output. Supplied as standard with either shorting or non-shorting contacts, the former offering better crosstalk. Operating time, 10 msec.

**325 Series**—Compact monitoring switch. Energizing the actuator associated with each input connects this input to the common output. Any one or more inputs may be simultaneously connected to the common output, or any input may be connected to any other input through the common output. Crosstalk for non-shorting types averages about 20 dB. less than for shorting types. Operating time, 10 msec.

**326 Series**—Compact high density designed for complex switching. Four mounting studs allow flat mount. Shorting contacts. VSWR varies with position of inputs used with respect to common output. Operating time, 10 msec.

**327 Series**—Transfer or crossover switch for panel mount. Three connectors and actuator on one side, and the fourth connector on the opposite side. Circuits are connected through two isolated pairs. Energizing the actuator opens these circuits and provides a crossover to the opposite pairs.

**328 Series**—Transfer or crossover switch with all four connectors in the same plane for convenient panel mount. A dust cover protects balanced armature actuator. Circuits are connected through two isolated pairs. Energizing the actuator opens these circuits and provides a crossover to the opposite pairs.

| 30055-20 | 95c | 86c | 73c | 66c |

## GENERAL PURPOSE RELAYS

**SERIES AS**—Compact, medium power design for single hole mounting. Terminal board on front, contacts on top for easy inspection. Standard silver contacts. Hook type terminals, .078" x .107". One 6-32 NC-2B mtg. hole, 7/32" deep. Max. Size: 1 11/16" x 1" x 1 19/64". Max. Weight, 2 oz.

**SERIES TAT**—Subminiature relay offers the performance of a miniature combined with long life expectancy. Elongated terminal holes, .080" x .040". Four 4-48 NF-2B tapped mounting holes. Max. Size: -2C, 1 5/16" x 41/64" x 1 1/32"; -4C, 1 5/16" x 41/64" x 1 17/64". Max. Weight: -2C, 0.70 oz.; -4C, 0.75 oz.

**SERIES TF154**—No internal wiring, with contact arms extended to form combination solder and plug-in terminals. Elongated terminal holes, .080" x .040". Dust cover enclosure. Mount in Allied Series 30055 sockets. Socket Type: -2C, type 30055-1 socket; -4C, type 30055-2; -6C, type 30055-20. Max. Size: -2C, 1 3/16" x 47/64" x 15/16"; -4C, 1 3/16" x 47/64" x 1 11/64"; -6C, 1 3/16" x 47/64" x 1 3/8". Max. Weight: -2C, 0.80 oz.; -4C, 0.95 oz.; -6C, 1.0 oz.

**SERIES TFMDO**—Enclosed in transparent polycarbonate dust cover, rigidly secured to base. Mounts in any standard RETMA or EIA octal socket. Max. Size: 1 13/32" sq. x 2 31/64" h. overall. Max. Weight, 2.5 oz.

**TELEPHONE SERIES T154**—Same construction, size and features as Series TF154, but for telephone type service.

## POWER RELAYS

**SERIES BO**—Compact, rugged power relay meets many military and commercial requirements. Contacts and terminals mounted on top for easy accessibility. Four 6-32 elastic stop nuts for mounting. Tin dipped terminals with .096" dia. holes. Ambient Temperature: −55° C to +71.5° C. Max. Size: 1 5/8" x 1 1/2" x 1 15/16". Max. Weight, 5.5 oz.

**SERIES CNA**—Compact, heavy duty relay uses double break contact arrangement to eliminate pigtails. Coil terminals have 3/32" dia. holes; contact terminals are 10-32 screw type. Four 6-32 elastic stop nuts for mounting. Normally open contacts. Type CNA uses solid silver contacts; type CNAS uses silver tungsten contacts. Max. Size: 2 9/32" x 2 3/32" x 2 13/32". Max. Weight, 9.5 oz.

**SERIES PO**—Compact, inexpensive, multipole power relay uses standard silver contacts. Tin dipped hook terminals, .079" x .164". Four 6-32 tapped mtg. holes. Max. Size: PO-9, 1 23/32" x 2 9/32" x 1 29/32"; PO-12, 2 9/32" x 2 9/32" x 1 29/32". Max. Weight: PO-9, 7.5 oz.; PO-12, 8.0 oz.

**SERIES BOHR**—Hermetically sealed. Type BOHR uses three 8-32 NC-2A threaded mounting studs with solder terminals. Type BOHRO mounts in any standard RETMA or EIA octal socket. Vibration: 10–55 Hz at .062" double amplitude. Shock: 30 G operational. Ambient Temperature: −55° C to +71.5° C. Max. Size: BOHR, 1 51/64" x 1 43/64" x 2 11/16"; BOHRO, 1 51/64" x 1 43/64" x 2 5/8". Max. Weight, 9.5 oz.

# Allied Control Relays, Accessories

## MINIATURE HERMETICALLY SEALED RELAYS

**:RIES CH**—Hook type solder terminals with three 6-32 NC-2A thd. studs for mounting. bration: 20 G to 2000 Hz. Shock: 50 G operational. Operate Time: 15 msec. Release me: 10 msec. Temperature: −65° C to +125° C. Size: $1\frac{23}{32}$" x $1\frac{7}{16}$" x $1\frac{1}{2}$" max. less rminals. Max. Weight, 5 oz.

**:RIES MH**—Type -6D has two 0.125" dia. mounting holes. Types -12D and -18D use ree 6-32 NC-2A threaded studs. Vibration: 15 G to 1000 Hz. Shock: 50 G operational. perate Time: -6D, 8 msec; -12D and -18D, 10 msec. Release Time: 5 msec. Temperature: ries MH, −55° C to +85° C; MHB, −65° C to +125° C. Max. Size: Type -6D, $\frac{1}{16}$" x $1\frac{1}{16}$" x .712"; -12D, $1\frac{3}{4}$" x $1\frac{21}{32}$" x $1\frac{1}{8}$"; -18D, $1\frac{3}{4}$" x $1\frac{13}{16}$" x $1\frac{17}{64}$". Max. Weight: D, 2 oz.; -12D, 3 oz.; -18D, 4.2 oz.

**:RIES MHUO**—Same specifications as Series MH-12D, but mount in Allied Series 100 sockets. Mounting: -12D, two 0.144" dia. holes; -18D, two 0.144" dia. holes. Socket ype: -12D, 16188-1 No.; -18D, No. 16189-1. Max. Size: -12D, $1\frac{23}{32}$" x $1\frac{21}{32}$" x $1\frac{1}{8}$"; 8D, $1\frac{23}{32}$" x $1\frac{13}{16}$" x $1\frac{5}{16}$". Max. Weight: -12D, 3 oz.; -18D, 4.2 oz.

**:RIES MHY**—Similar in appearance to Series MH, but with solder lug terminals. wo 6-32 NC-2A thd. studs. Vibration: 20 G to 500 Hz: Shock: 50 G operational. Operate me: 10 msec. Release Time: 5 msec. Temperature: −65° C to +125° C. Max. Size: $1\frac{61}{64}$" $1\frac{13}{16}$" x $1\frac{17}{64}$". Max. Weight, 4.2 oz.

## WELDED SUBMINIATURE HERMETICALLY SEALED RELAYS

**ERIES WKJ**—Hook type solder terminals with two 0.120" dia. mounting holes. Type KJO (not illustrated) plugs into Armel type HRC-1 socket or equivalent. Vibration: G to 2000 Hz. Shock: 100 G operational. Operate Time: 5 msec. Release Time: 3 sec. Temperature: −65° C to +125° C. Max. Size, 1.320" x .400" x .875", less terminals. ax. Weight, 0.5 oz.

**ERIES WKY**—Hook type solder terminals with four 0.096" dia. mounting holes. Type KYO (not illustrated) mounts in Armel type HRK-1 socket or equivalent. Vibration: G to 2000 Hz. Shock: 50 G operational. Operate Time: 5 msec. Release Time: 3 sec. Temperature: −65° C to +125° C. Max. Size, .400" x $1\frac{11}{64}$" x .875", less terminals. ax. Weight, 0.5 oz.

## SENSITIVE AND PLATE CIRCUIT RELAYS

**ERIES WJS**—Hermetically sealed with welded construction; two .125" dia. mtg. holes. ype WJSO mounts in Armel type HRC-1 socket or equivalent; two .120" dia. mtg. holes. ibration: 15 G to 2000 Hz. Shock: 50 G operational. Operate Time: 15 msec. Release ime: 10 msec. Temperature: −65° C to +125° C. Max. Size: $1\frac{29}{64}$" w. x .400" d. x 1.281" . less terminals; WJSO same but 1.32" w. Max. Weight, 1.0 oz.

**ERIES TFMDO**—Enclosed in transparent polycarbonate dust cover, rigidly secured to ase. Mount in any standard RETMA or EIA octal socket. Max. Size: $2\frac{3}{64}$" x $1\frac{13}{32}$" x $\frac{13}{32}$". Max. Weight, 2.5 oz.

**ERIES TFT**—Subminiature, open relay with small size moving parts resulting in quick elease and exceptional contact rating. Mounts in four 4-48 NF-2B tapped holes on .375" trs. Terminals have elongated holes .080" x .040". Max. Size: $1\frac{5}{16}$" x $1\frac{1}{32}$" x $\frac{41}{64}$". Max. Veight, 0.7 oz.

**ERIES TS154**—Plastic case enclosed design features no internal wiring. Contact arms xtend to form combination solder and plug-in terminals (printed circuit type TSP-154 lso available); elongated terminal holes .080" x .040"; use with Allied Series 30055 ockets. Max. Size: $1\frac{3}{16}$" x $\frac{47}{64}$" x $\frac{15}{16}$", type -2C; $1\frac{3}{16}$" x $\frac{47}{64}$" x $1\frac{11}{64}$", -4C. Max. Weight: .8 oz. -2C; 0.95 oz., -4C.

## HG SERIES PLUG-IN MERCURY-WETTED CONTACT RELAYS

Type **HG** relays have SPDT make-before-break form D contacts rated 5 amps, 500 volt 250 VA maximum; operating time as short as 2 milliseconds. Type **HG2A** relays hav two switch capsules for DPDT operation, with operating time as short as 2¼ millisecond Type **HG3A** relays utilize three capsules for 3PDT operation, with operating time short as 2½ milliseconds. Type **HG4A** relays use four capsules for 4PDT, with operatin time as short as 3¾ milliseconds. Life expectancy, 22 x $10^9$ at specified ratings. Oct plug-in base, except HG4A relays which have 10-pin glass-to-metal plug and three 6-3 mounting studs. Size (not including pins): HG, 1.105" dia. x 2.636" high; HG2A an HG3A, 1$^{17}/_{32}$" dia. x 3$^{27}/_{64}$" high; HG4A, 1$^{11}/_{16}$" dia. x 3⅜" high.

## HGP SERIES OCTAL-BASED MERCURY-WETTED RELAYS

Similar to HG series, but with permanent magnets making a slight increase in height Single side stable, except as indicated. SPDT make-before-break contacts rated 5 amps 500 volts, 250 VA max. with operating time as short as 2 milliseconds. Life expectancy 22 x $10^9$ at specified ratings. Size, 1.105" dia. x 3.105" high (not incl. pins).

## HGS SERIES OCTAL-BASED MERCURY-WETTED RELAYS

Plug-in relays offering increased speed and reliability, with high sensitivity. **HGS-100** series have SPDT make-before-break contacts; **HGS-5000** series have SPDT break-before-make contacts. All contacts rated 2 amps, 500 volts, 100 VA maximum. Operate time as fast as 1 millisecond. Single element assemblies (Single side stable, except a indicated). Life expectancy, 22 x $10^9$ at specified ratings. Size, 1.312" max. dia. x 2.650" high (not including pins).

# MODULAR MERCURY-WETTED CONTACT RELAYS

## HGM SERIES MODULAR MERCURY-WETTED RELAYS

nsist of standard HG switch capsules in module form, with plated steel covers for ellent mechanical protection and magnetic shielding. Standard HG switch is not arity sensitive. SPDT make-before-break contacts rated 5 amps, 500 volts, 250 VA ximum. Life expectancy, 22 x 10⁹ at specified ratings. Size, ¾" x ¾" x 3¹³⁄₆₄".

## HGSM SERIES PRINTED CIRCUIT MODULE RELAYS

ercury-wetted relays for printed circuit board mounting. **HGSM-1000** series have DT make-before-break contacts; **HGSM-5000,** break-before-make. Contacts rated mps, 500 volts, 100 VA max. at rated load. Max. dissipation, 2 watts continuous at C. Temperature rise, 30° C per watt at 25° C ambient. Life expectancy, 22 x 10⁹. gle side stable, except as indicated. Size, ⅝" x ⅝" x 2¹⁄₁₆" max.

## SERIES PRB PICOREED® RELAYS

A state-of-the-art advancement in sealed contact reed relays; small in size, ultra-fast operation. Response time, physical size, sensitivity and reliability characteristics combi to provide complete electrical and packaging compatibility with integrated circuit devic Ideal for economical and reliable solid-state input-output isolation buffering applicatio High speed operation, with operate time as low as 500 µsec., including bounce, at norm coil power. Contacts rated 0.5 amp max., 100 volts max., 10 VA max.; 1.0 amp maximu carry load. Life expectancy: 100 million operations at low-level loads; 5 million operatio at 28 VDC, 0.125 amp. Series 3000 five-volt Picoreed relays are specially designed compatibility with standard 5-volt DTL and TTL logic families; have must opera voltage value of 3.75 volts at 25° C. PRB low profile Series have straight pin termina permits PC board mounting on .375″ centers. Suffix **H** indicates high sensitivity units th allow .500″ mtg. centers; others are low-profile types. All types are .800″ long (width a height shown in table).

## SERIES MRME MICRO-CLAREED RELAYS

Same high performance standards as regular Clareed relays (listed below), in only one fifth the size. Provide isolation between coil and contacts. Immune to false operation by the type of transients that affect solid state devices; insensitive to overload transients that would damage solid state devices. Offer switching speed as fast as 500 microseconds, fully compatible with other mechanics of process control. Designed for PC board use. Contacts are rated 15 VA max., ¾ amp max. In molded epoxy module.

## SERIES CRTN CLAREED RELAYS

Ultra-reliable reed relays for printed circuit board mounting. Reed contacts are sealed in an inert gas atmosphere, within a glass tube. Coils are wound on molded bobbins capable of accepting up to six Clareed switch capsules. Standard Clareed relays have 1, 2, 4 and 6 Form A contacts rated 15 VA maximum, non-inductive; 1 amp maximum, 250 volts maximum; with carry load of 5 amps maximum (not switched). Life expectancy, over 20 million operations at rated load. Insulation resistance, 500K megohms minimum. Breakdown voltage, 500 V rms, 60 Hz minimum. Available for 6, 12, 24 or 48 volts.

CLARE

# General Purpose Relays

## GP1 SERIES GENERAL PURPOSE RELAYS

niature 4PDT relays, complete with dust cover that meets U/L recognition. Contacts fine silver-gold flashed, rated 3 amps at 30 VDC or 120 VAC resistive. Life, over 100 llion operations (AC). Solder term. Size, 1.109″ x .859″ x 1.281″ max.

## GP2 AND GP3 GENERAL PURPOSE RELAYS

2 (open) and GP3 (Lexan* dust cover) relays are designed to meet UL bulletin 508 quirements. Rugged AC or DC relays are available in SPDT, DPDT and 3PDT con- urations. Contacts gold flashed silver cadmium oxide rated 10 amps at 28 VDC resistive 120/130 VAC, 0.8 power factor. GP2 and GP3 plain case models are available with atching molded nylon sockets for plug-in applications. GP3 bracket case model is avail- le for direct chassis mounting only. Mechanical life expectancy is 100 million operations; ectrical life is 100,000 operations minimum at rated load. The 0.187″ quick connect rminals are standard. Size, 2.20″ x 1.282″ x 1.468″, GP2; 1.531″ x 1.906″ x 1.406″, GP3 ain case. Many optional features available; complete data on request.

egistered General Electric trademark.

# HAMLIN INC.

# MAGNETIC REED SWITCHE

Form A (SPST-NO)

Form C (SPDT)

Hamlin Inc. has been the world leader in the design and manufacture of Magnetic Reed Switches since they first introduced them to the industry in 1957. HAMLIN switches have met every conceivable test in the broad range of environmental and electrical applications. As the pioneer in the development of Magnetic Reed Switches, Hamlin Inc. offers the finest selection of Magnetic Reed Switches in the world.

Hamlin switches may be actuated by either permanent or electromagnets. They are hermetically sealed for safe reliable use u any atmosphere, wet or dry, even under explosive conditi Sealed contacts insure against contact contamination. Ha switches are unaffected by extremely high or low temperature pressures. Their small size, high sensitivity, rapid cycling rate long life make these units ideal for position indicators, typewr keyboards, counting instruments, liquid level switches, bur alarms, computers, flow meters, limit switches and a wide vari of other applications. **A** refers to SPST-NO; **C** refers to SPDT

## CONSIDER THESE HAMLIN REED SWITCH ADVANTAGES:

**Reliability**—Hermetically-sealed contacts in a clean atmosphere are unaffected by dust, corrosion or oxidation; and, design allows no opportunity for sticking, binding or wearing of hinged joints.
**Long Life**—With proper circuitry, magnetic reed switches can offer a life span in excess of 100 million operations.
**Speed of Operation**—Although slower than transistorized logic, it is sufficiently faster than conventional relays to allow use in high speed switching applications.
**Packaging**—Provides package density which approaches that of its solid state counterpart, but is far greater than is available with conventional relays.
**Price Advantage**—When compared to transistorized logic, the necessary coupling circuitry between the logic and input and output devices is less complicated and less expensive.

Series 773

- IGH RELIABILITY
- XCELLENT SHOCK AND VIBRATION IMMUNITY
- ERO VOLTAGE-POINT SWITCHING
- EXCELLENT SURGE HANDLING CAPABILITY
- LONG LIFE—NO CONTACTS TO BOUNCE OR WEAR

s broad line of solid state AC controllers has been carefully neered by Hamlin Electronics, Inc. for switching resistive inductive loads up to 25 amps. The most complete selection C controllers available in the industry, it offers a Control-Pak every switching problem, regardless of its complexity. All s feature rapid response in a rugged, self-contained unit. izing basic triad circuitry, these controllers are adapted to -volt 3-phase, proportional temperature control; and, to lamp trollers in addition to all the options of on-off and zero-point switching. Small and rugged, these solid state devices are humidity resistant; designed to withstand any environment. For added convenience, they mount in any position. Connections for load circuit are rugged brass studs. **Inrush Capability:** Will withstand 80 amps, 1-cycle inrush currents. **Operate Time:** 1 msec typical. **Release Time:** No longer than ½ cycle. **Operating Temperature:** Up to 25° C without additional heat sink. **Life:** More than 100 million operations.

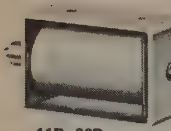
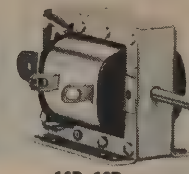
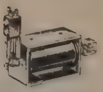
# GUARDIAN® Solenoids



11P, 28P



16P, 18P

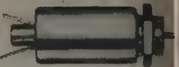


11S

24S

28S

Pull Type Tubular



Push Type Tubular

Intermittent types should not be energized for more than 5 consecutive minutes, or be permitted to rise more than 85° C above 24° C ambient without sufficient cooling time between operation cycles or periods of energization. Continuous type have high coil resistance and will not rise more than 85° C above 24° ambient temperature when operated within maximum lift an stroke ratings. **To Order, Specify:** Solenoid number; voltage an AC or DC; continuous or intermittent.

## PUSH TYPE AC AND DC SOLENOIDS

Push versions of popular solenoids. Types 11P and 28P are box frame design. 16P and 18P are laminated AC types. Push rods are equal to maximum stroke length. (I) indicates intermittent dut type, (C) indicates continuous duty.

## AC AND DC SOLENOID SWITCHES

Guardian Box-Frame solenoids 11 and 28 as well as U-Frame 24 have been functionally enhanced by the addition of a SPDT switch actuated by a push rod affixed to the plunger. Respective solenoid switches are 11S, 28S and 24S. All switches are rated 10 amps a 120 VAC. **To Order, Specify:** Solenoid switch number; voltag and AC or DC; continuous or intermittent.

# GUARDIAN® Solenoids

lenoids for intermittent or continuous duty. Intermittent types ould not be energized for over 5 consecutive minutes, or be rmitted to rise more than 85° C above 24° C ambient without fficient cooling time. Plunger has slotted end with ⅛" dia. hole · coupling. In charts, (I) indicates intermittent duty type, (C) indicates continuous duty. **To Order, Specify:** Solenoid number; voltage and AC or DC; continuous or intermittent (for intermittent give cycle of operation, length of time current will pass through coil, etc.); max. stroke and pull required.

## SERIES 240U AC AND 245U DC RELAYS

For contact ratings up to 15 amps. Compact, reliable and inexpensive AC and DC units are factory pretested and adjusted. Single-screw, center-hole mounting for quick assembly. Easily serviced, though servicing is seldom required. UL Recog. File #E-23524A. Silver contacts rated 15 amps; points ¼″ x 1/16″; 5-amp and 10-amp points available to 6PDT; other contact materials available to specifications. Phenolic insulation is tested at 1500 volts, 60 Hz. Solder lug terminals. AC coils rated 6 VA, 60 Hz; operate satisfactorily at −15% of rated voltage and will not overheat at +10% of rated voltage on continuous duty. DC coils operate at 1.5 watts min. or 3 watts max.; operate on values up to 10% above, or 20% below rated voltage. Size, 2 29/32″ x 1 3/32″ x 2 9/16″, 4PDT. Shpg. Wt., 4.5 oz.

*Suffix indicates voltage (i.e., **-6A** for 6 VAC; **-6D** for 6 VDC, etc.). †Normally open.

## SOLID STATE RELAYS

Universal control voltage; output and control circuits completely isolated. Pull-in voltage externally adjustable, 80–130 VAC/DC; close pull-in/drop-out differential for accurate voltage sensing. Control of inductive, resistive or high-inrush lamp loads maintained from 10 mA–3A. Internal filtering prevents random turn-on of "off" contacts. Rugged; no spark or contact bounce. **Series 6100:** Rated 1A; Shpg. Wt., 4 oz. **Series 6300:** Rated 3A; Wt., 8 oz.

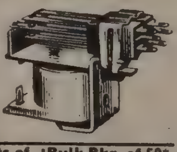
## SERIES 900 AND 910 10-AMP RELAYS

### UL AND CSA RECOGNIZED (FILE #E23524B)



**Series 900**—Low cost DPDT relay features a trouble-free design incorporating a minimum of parts. UL Recog. Contacts rated 10 amps, 120 VAC, resistive load. Molded switches; one-piece mounting clip and return spring; molded bobbin and coil cover. Keyed and locked lifters. Shpg. Wt., 6 oz. **Series 910**—Same, but with 3/16″ quick-disconnect terminals instead of solder terminals. Size, 2 11/16″ x 1 11/16″ x 1 25/32″.

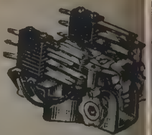
## SEQUENCE RELAYS—AC-DC



**Types 660, 665**—For switching operations in a desired repetitive sequence such as signs, motors, etc. Each electrical impulse moves the relay contacts to next position in sequence. Contacts rated up to 12½ amps, 120 V, 60 Hz, non-inductive load. Mounting, 4 holes 8-32 (NC-2B). Shipping Weight, 8 oz.

## SERIES 1240 AC AND 1245 DC 10-AMP RELAYS

### UL RECOGNIZED (FILE #E-17260A)

High efficiency, compact relays for communications, automation, remote control switching circuits and laboratory applications. Solder lug terminals are molded in phenolic panel block for coils as well as contacts. Barriers in panel block are raised to meet UL over-surface spacing; UL insulation throughout. Contacts rated 10 amps at 120 VAC, 60 Hz, non-inductive. Single 6-32 tapped mounting hole. Size, 1⅝″ x 1″ x 1¼″. Shpg. Wt., 2.5 oz.

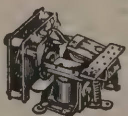
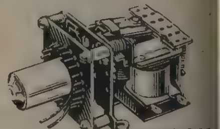
## TYPES MER AND MER-SOL ELECTRICAL RESET STEPPERS



MER



MER-SOL

**Type MER**—Direct drive (steps on energization) electrical reset stepper with positive mechanical reset interlock actuated by the reset magnet; unlocks on first energization of the step magnet. Assures positive reset on as short a pulse as 1/100 sec; or, even from its own selection contacts. Capable of counting in groups up to 21, then resetting automatically. By interconnecting two or more, count can be increased to any desired total counting by tens or any other convenient multiple. Can be used to control a sequence of operation and then automatically reset to initial or starting position. Maximum of 20 steps per second; 24 points; 22 active contacts. Coil operates satisfactorily at 15% below or 10% above voltage indicated. Size, 3 5/16″ w. x 2 3/16″ lg. x 2 3/16″ h. max. Shpg. Wt., 11½ oz.

**Type MER-SOL**—Same as Type MER, but with added solenoid for extra versatility. Energizing solenoid physically moves wiper(s) away from selector deck for advance or reset without contacting deck; increases contact capacity and electrical life. Power input to step magnet reduced from 35 VA to 20 VA. Solenoid and reset coil energized simultaneously to reduce friction during reset. Size, 3 5/16″ w. x 4⅜″ lg. x 2 3/16″ h. Shpg. Wt., 14 oz.

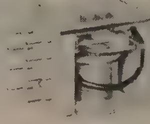
# GUARDIAN® Relays

## NEW LOW-COST AC-DC MINIATURE ENCLOSED DPDT PLUG-IN RELAYS

**Type 1330, 1335**



**Type 1330P, 1335P**

npact DPDT relays ideal for circuitry in business machines, tocopiers, computers, etc. Save space and cost. Plug-in conience. Lexan* cover; plug-in convenience with optional socket. oice of solder (no suffix) or PC (suffix P) termination. Contacts ed 5 amps, 30 VDC or 120 VAC resistive. Socket fits panels 1″–.062″ thick with cutout .759″ x .830″ with .025″ radii at all r corners. Relay Wt., ¾ oz. *Reg. GE TM.

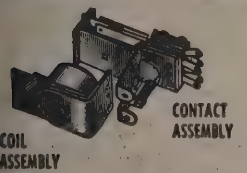
## ERIES 200 RELAY WITH COMPLETELY INTERHANGEABLE COIL AND CONTACT ASSEMBLIES



MIDGET CONTACT ASSEMBLY. Dotted line shows size of standard unit.

o basic parts—a coil assembly and a contact switch assembly—nprise this simple, yet versatile Guardian relay. The coil assem consists of the coil and field piece; the contact assembly cons of switch blades, armature, return spring and mounting cket. The Guardian Midget Contact Assembly is **interchange**e with the standard Series 200 coil assembly. Available with DT, DPDT or 4PDT contact switch assemblies, each **interangeable** with all AC or DC coils.

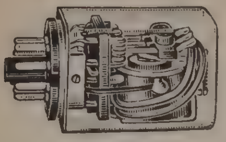
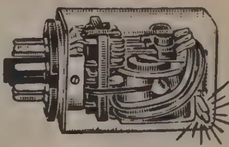
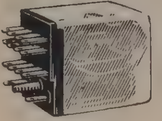
## ENCLOSED PLUG-IN AC-DC RELAYS



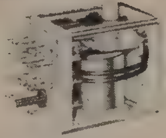
**Type 1210 and 1215**



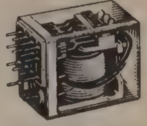
**Type 1210N**



**Type 1310, 1315**



**Type 1310B, 1315B**



**Type 1310P, 1315P**

In high-impact, transparent Lexan case for light weight and resistance to weather and temperatures up to 200° F. **Types 1210, -N, 1215**—With 8-pin octal plug for DPDT and 11-pin for 3PDT. Contacts rated 10 amps at 120 VAC, 60 Hz, non-inductive. Type 1210-N has miniature neon lamp connected across terminals. Lamp lights when coil is energized, goes out in case of circuit fault. Ideal substitute for circuit tester in relay banks, mass relay arrangements, or where relays are visibly located at intermediate switching points of the circuitry. Size, 2²³⁄₃₂″ x 1⅜″ x 1⅜″. Shpg. Wt., 3.5 oz. UL Recognized File #E-17260A (5 amp only). **Types 1310 and 1315**—Miniature plug-in relays with solder terminals (no suffix); PC terminals (suffix P); with miniature neon lamp connected across coil terminals to glow on coil energization or show circuit fault on failure to glow (suffix N); and, with insulated button for push-to-test without applying voltage to coil (suffix B). Long life (100 million operations) 4PDT contacts rated 5 amps, 30 VDC or 120 VAC. Size, 1¹⁷⁄₆₄″ x ⁵⁵⁄₆₄″ x 1⁷⁄₆₄″. Shpg. Wt., 1⅛ oz.

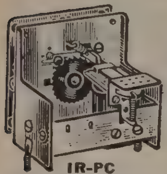
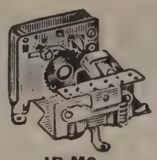
# GUARDIAN® Relays

## STEPPING RELAYS

### CONTINUOUS ROTATION



IR-PC

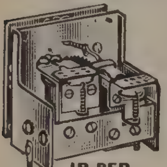


IR-MC

**Type IR-PC**—Micro-finished shaft and Oilite shaft bearing. Beryllium copper pawl control shutter. Selection contacts terminated on phenolic board; solder beaded. Mechanical life expectancy estimated 4,000,000 steps. Has 40-point ratchet with 40 active contacts, including zero position. Size, 3⅜″ lg. x 3⅜″ w. x 3½″ h. Shipping Weight, 17 oz.

**Type IR-MC**—A smaller, continuous operation stepper similar to above; has life expectancy of 2,000,000 steps. Has 24-point ratchet with 24 active contacts, including zero. Size, 3¼″ lg. x 3″ w. x 2³⁄₁₆″ h. Shipping Weight, 9½ oz.

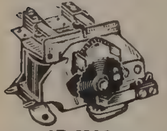
### ELECTRICAL RESET



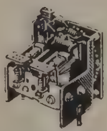
IR-PER

**Type IR-PER**—Micro-finished shaft and Oilite shaft bearing. Positive mechanical stops limit total number of steps in any single unit. Returns automatically to start position when reset coil is energized. Has 40-point ratchet with 36 active contacts including zero position. Size, 3″ lg. x 3⅜″ w. x 3⁹⁄₁₆″ h. Shipping Wt., 22 oz.

### ADD AND SUBTRACT



IR-MAS



IR-PAS

**Type IR-MAS**—Midget stepper with non-ferrous shutters controlling pawl motion. Steps one step at a time in either direction, depending on which of the two coils is energized. Has 30-point ratchet, with zero position switch opened at home position. Size, 3¼″ lg. x 3⅛″ w. x 1¹⁵⁄₁₆″ h. Shipping Weight, 11 oz.

**Type IR-PAS**—Similar in operation to IR-MAS, but larger. Has 40 points and 40 active contacts. Supplied with 45-amp, quick-connect terminals and Form "C" cam switch. Size, 3¼″ lg. x 3⅜″ w. x 3⁹⁄₁₆″ h. Shipping Weight, 22 oz.

### STEPPING RELAY DATA CHART

All units rated 120 VAC coil voltage; will operate satisfactorily at 15% below or 10% above. Auxiliary switches may be connected in series with the commutator of the selecting finger and added to the step and/or reset magnet to increase the normal contact rating of 1.5 A, 120 VAC 60 Hz resistive. Contact fingers insulated from shaft. All units are intermittent duty rated at 10% duty cycle (out of each hour); single period maximum energization, 5 minutes.

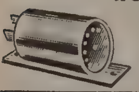
### ROTOMITE STEPPER—DC



Compact, completely metal cased. Continuous rotation on 12 positions up to 20 steps per second. Contact rating 3 amps resistive, 1 amp inductive (50% PF). DC coils are continuous duty. Over 1,000,000 operations. Size, 2″ x 1³⁄₁₆″ dia. Shipping Wt., 5 oz.

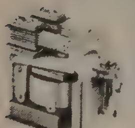
### NEW TYPE 840L ON/OFF SINGLE COIL MECHANICAL LATCHING RELAY STEPPER



Improved, compact design is impulse operated for positive on/off control of positioning devices, remote controls, lighting, etc. Impulses as short as 20 msec energizes coil to reverse position of switches. Holds last position of switch with coil de-energized. Contacts rated 10 amps, 120 VAC, 60 Hz non-inductive; requires 8.2 VA. Solder lug terminals for coils and contacts. Single hole mounting tapped 8-32NC-2B. Shpg. Wt., 5.2 oz.

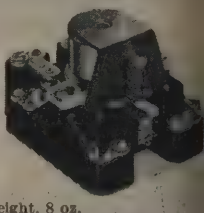
## POWER RELAYS

### SERIES 2600U AND 2605U DPDT—25 AMPS



Compact power relays with DPDT contacts rated 25 amps. Inverted coil construction protects armature and contacts from inadvertent mechanical damage or electrical shorting. Series 2600U relays are rated for continuous duty at 240 VAC with 75% power factor; requires 9.5 VA, 60 Hz. Screw terminals are easily accessible. (Quick-Connect Terminal Kit permits easy conversion to ¼″ AMP terminals). "Press-to-Test" armature lever for convenient manual circuit testing. Two .196″ dia. holes on 1⅞″ centers. Size, 3⁵⁄₁₆″ x 2½″ x 2¹⁄₁₆″. Shipping Weight, 8 oz.

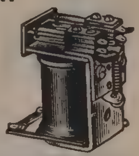
Normally open. †Suffix indicates coil voltage (i.e., **-6A** for 6 AC; **-6D** for 6 VDC, etc.).

### DC PLATE CIRCUIT RELAY



DPDT; constructed with extra long coil for greater sensitivity. Adaptable to voltage operation as well as sensitive plate circuit control installations. Coil impregnated for reliability and longer life. Average power requirement, 0.2 watt. Contacts, fine silver, rated 10 amps. Single 8-32 center mtg. hole. Size, 2⅛" x 2" x 1½". Shipping Weight, 5.5 oz.

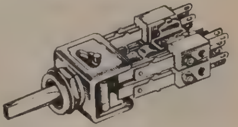
## GUARDIAN SWITCHES

### MULTICOLOR ILLUMINATED LEVER SWITCHES



Two of three operating positions marked by 28 V lamp shining through red and green insertable filters; center position is clear. Available in Locked-Off-Locked (**LOL**), Locked-Locked (**LL**) and Locked-Momentary (**LM**) configurations in 4 or 10 amps, 110 VAC resistive; cam kit permits easy conversion to LOL, MOM, LL, ML, LM, OF, LO, MOL and LOM configurations. Mounts vertically on 1⅜" centers and horizontally on ¾" centers, in panels up to 1⁄16" thick; behind panel size, 1.334" w. x 2.380" d. (max.) x .750" h. Terminals are .110" quick-connect type.

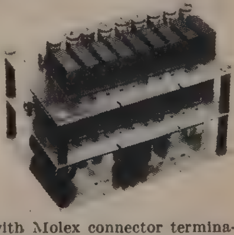
Net Each, Lots of 1–9 ......... **$1.70**; 10 Up ......... **$1.60**

**Guardian Color Filter/Lamp Kit**—28 V lamp, socket, retainer clip, 2 red filters and 2 green filters.
Net Each, Lots: 1–9 ......... **$1.10**; 10 Up ......... **$1.00**

## GUARDIAN OF CALIFORNIA

### SLS SOLID STATE LOGIC STEPPERS



The only power, solid state steppers to accept either high level or logic level inputs with high noise immunity. Output of each step is 120 VAC, 2½ amp switch. Modular design permits stacking for a variety of configurations. Choice of 10 or 20 steps from standard models; also available with pulsers for self-stepping use. May be cascaded or paralleled for complex switching or control functions. Practically unlimited life with mechanically noise-free operation under proper operation. **Input:** 120 VAC, 50/60 Hz or 400 Hz; and 24 VDC. **Terminals:** Come with Molex connector terminations (3 sets required for 10-step unit). **Step Advance:** Either mechanical switch closure or DC poles, all models with **A** (e.g., SLS110-2**A**111); all others, self-stepping. **Size:** 4" x 6" x 4.06".

# GUARDIAN® OF CALIFORNIA Reed Relays

## SERIES MDR MINI REED RELAYS

Compatible with dual-in-line integrated circuits. Terminals can be inserted into the same PC board as a 14-terminal dual-in-line IC. Operating sensitivity of the 5-volt DC coil makes it compatible with DTL and TTL logic families; has must-operate value of 3.75 volts at 25° C. **Contacts:** 1 Form A. **Contact Ratings:** 250 mA with 500 mA carry or maximum voltage of 28 VDC at 3 watts. **Contact Resistance:** 200 milliohms max. **Breakdown Voltage:** 200 VDC minimum. **Capacitance:** 0.25 pF typical. **Operate Time:** 0.350 msec typical, including bounce. **Release Time:** 0.025 msec typical. **Insulation Resistance:** $10^{10}$ ohms. **Temperature:** −55° to +85° C. **Size:** .790″ x .270″ x .250″; terminals spaced .100″.

## SERIES SRR STANDARD REED RELAYS

Epoxy-enclosed relays are widely used in all areas of switching. Provide long, trouble-free life with isolation between input and output, sealed contacts and high standard of quality. **Contacts:** 1 or 2 Form A. **Current:** 1.0 amp max. **Voltage:** 250 VAC max. **Power:** 15 watts max. **Contact Resistance:** 100 milliohms max. **Capacitance:** 1.2 pF typical. **Operate Time:** 3 msec typical, including bounce. **Release Time:** 0.5 msec. **Insulation Resistance:** $10^{9}$ ohms. **Temperature:** −55° to +85° C. **Size:** 2.700″ long x .655″ high; .625″ or .900″ wide. Pins .032″ dia., .125″ long.

## SOLID STATE AC-DC TIME DELAY RELAYS

**ries TD:** Most accurate and compact. High adjustment reso- tion with 15-turn potentiometer. Adjustable delays, 1–180 cs; 24 VDC or 120 VAC inputs. Accurate to 5% nom. setting er full temp. and voltage range. Repeatability, 2% after 50 sec line interruption. Delays on attract with 3PDT contacts ted 10 amps resistive. Size, 2.06″ x 2.62″ x 3.00″.

**pe TDO:** Many more expensive unit features. Contacts rated amps DPDT, 120 VAC; adjustable delay 0.5–30 secs on attract; -turn potentiometer. Repeatability within 5% after 100 msec. e interruption. Size, 2.06″ x 2.62″ x 3.00″.

**ries MET:** Replace many more expensive units with close tol- ance repeatability. On-operate, on-release; adjustable 0.5–300 c. Output, 10 amps resistive, 120 VAC, 50/60 Hz. Inputs of 120 24 VAC, 50/60 Hz, or 24 VDC polarity protected. Accuracy, 10% of nom. setting over voltage and temperature range, epeatability, 1% within fixed conditions. Single-turn poten- ometer. Time delays 0.5–100 and 100–300 secs. Temp. range, C to +55° C. Prefix MET-**O** indicates delay on operate; ET-**R**, delay on release. Size, 1.90″ x 2.40″ x 3.50″.

**ries BDT:** Unusual commercial design: Operation on high or low ne; replaceable electromechanical relay; repeatability, tempera- re stability and small size. All-silicon circuitry operates over 5–125 VAC, 50/60 Hz input; draws only 5 mA before time out; VDC also available. Standard relay housing with octal plug. perates in most severe industrial uses, immune to most transient oise from power lines. Takes up to 2500 volts peak without amage or malfunction. Life, 5 x $10^7$ operations under normal onditions. Size, 1.39″ x 1.45″ x 2.15″.

*Suffix indicates voltage: **24D** = 24 VDC; **24A** = 24 VAC; **120A** = 120 VAC.

## PROTECTIVE SENSOR DEVICES

olid state network designs, these sensors are bi-products of esigns for military uses. Relay is 3PDT rated 10 amps resistive ith either 24 VDC or 120 VAC available. Mount by socket, assis mount, or directly into a .110″ printed circuit. Temperature nge, 0° C to +50° C. Life, 100,000 operations min. Transient oltage protection to 600 V for 3-phase model; 2500 V, all others. ust cover provided on all but CT1 Series (a transfer molded art). Size: CT1 Series, 1.25″ x 1.87″ x 1.00″; all others, 1.70″ x 57″ x 3.00″.

**eries IR-CT1 and No. IR-CS1**—AC Current Sensors.

**eries IR-AV2**—3-Phase, 4-Wire Voltage Sensors. Detects from -phase, 95 VAC source when sufficient voltage is available or ss of any line or drop in average to 50 VAC. Use as warning lockout device protecting motors, etc. For pull-in or drop-out; ill repeat close values, allowing for unevenly loaded lines that an cause drastic rise and fall in other lines.

**eries IR-FS1 and IR-FS2**—Adjustable Frequency Sensor. Use s under- or over-frequency detector, AC generator speed detector, estructive frequency trip-out or AC power loss detector. IR-FS1 utput relay energizes as frequency rises to adjusted sense-point; e-energizes when frequency drops to approx. 1.5% of sense-point. R-FS2 output relay energizes at its low-voltage pull-in point, dependent of the control circuit; remains energized until fre- uency rises to the adjusted sense point. Sense point adjusts thru over: 45–66 Hz for units with 60 Hz input; 360–440 Hz for units ith 400 Hz input.

**eries IR-PR1**—4-Wire Phase Rotation Sensor. With ABC phase otation, output relay is energized by 75 VAC balanced phase nputs. Non-latching. Designed to monitor power input to 3-phase otors or systems.

**eries IR-VS1**—Over-Voltage Sensor. Output relay energizes as nput voltage rises to adjusted sense-point. De-energizes as input oltage drops approx. 2.5% below sense-point. Acts as under- or ver-voltage detector. Adjusts thru cover: 90–130 VAC range for 20 VAC units; 18–32 volts for 24-volt units.

**eries IR-VS2**—Under-Voltage Sensor. Output relay energizes at ow voltage pull-in point. Independent of control circuit; remains et until voltages rise to sense-point. Adjusts thru cover: 90–130 AC for 120 VAC units; 18–32 volts for 24-volt units.

**eries IR-VS3**—Close Differential Voltage Sensor. Output relay nergizes as input voltage rises to desired sense-point; de-energizes s input drops to adjusted differential release point. Non-latching utput; energizes when voltage returns to normal. Sense-point djusts thru cover top: 105–130 VAC for 120 VAC input units; 3–32 volts for 24-volt units. Differential also sets thru top: 2.5–15 AC for 120-volt input units; 1–5 volts for 24-volt input units.

## VOLTAGE LEVEL DETECTORS

Inexpensive voltage level detectors with unusual operating characteristics. Molded module design. Circuits are silicon semiconductor devices forming a peak detecting voltage differential amplifier, signal amplifier, and a solid state output switch to drive various Guardian relays. Sense level is adjustable (fixed or variable) 85–135 VAC, 20–30 or 180–250 VAC (all 50/60 Hz) plus 20–30 VDC by external resistance. This broad adjustment permits use as an under or over level detector. Two units can form bandpass or pedestal level sensing. Used with Guardian TMT or TMP timing modules, they can provide inexpensive time delayed voltage detection systems that can ignore normal line fluctuation. Transient suppressed, they will withstand 2500 V peak (short duration) without damage or malfunction; 600 V on DC units. Size: LDT, 2.00″ sq. x 6.3″; LDP, 1.50″ sq. x 1.00″.

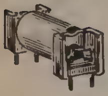
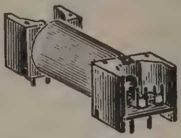
# *Magnecraft*® DRY REED AND NEW DIP REED RELAYS

## DRY REED RELAYS

### CLASS 101MPC AND CLASS 102MPC LOW-COST REED RELAYS



**Class 101MPC**



**Class 102MPC**

Low-cost reed relays provide optimum reliability, fast operation and low profile printed circuit mounting. One-piece, rugged reed support terminal pin is rigidly fastened to terminal board and soldered stress-free to the switch leads; assure performance and adjustment will not be affected by external stresses. **Miniature Class 101MPC:** SPST-NO (1 Form A) contacts rated 10 VA at 0.5 amp or 200 VDC max. non-inductive. Life, 5 million cycles at full load; 20 million at ½ load. Nominal power, 500 mW. Size, 1⅛″ x ⅜″ x ⅜″. Weight, approx. 1 oz.

**Standard Class 102MPC:** SPST-NO (1 Form A) contacts rated 15 VA at 1.0 amp or 250 VDC max. non-inductive. Life, 20 million cycles at full load; 100 million at ½ load. Nominal Power, 500 mW. Size, 2⅝″ x ⅝″ x 23/32″. Weight, approx. 1 oz.

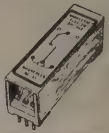
### IC COMPATIBLE REED RELAYS

**Class 101M (1 Form A)**

**Class 104M (1 Form C)**



**Class 101MPC (1 Form A)**

**Class 104MPC (1 Form C)**

Provide the small size, low profile, printed circuit mounting and low operating power required for IC compatibility, typically 40 mW. Two package configurations available: Inline axial leads or PC mounting. **Life:** 5 million operations at rated load; longer at reduced load. **Size:** Inline axial-lead units, 1″ x 7/16″ x ½″. Printed circuit mounting types, 1⅛″ x ⅜″ x 13/32″.

**Class 101M** (Inline Axial Leads) **and 101MPC** (PC Mtg.): SPST-NO (1 Form A) contacts rated 10 VA at 0.5 amp or 100 VDC max. resistive.

**Class 104M** (Inline Axial Leads) **and 104MPC** (PC Mtg.): SPDT (1 Form C) contacts rated 3 VA at 0.25 amp or 28 VAC max. resistive.

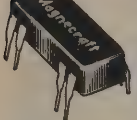
## NEW LOW COST DUAL-INLINE REED RELAYS



Epoxy-molded DIP (dual-inline package) 8-pin reed relays offer high quality at low cost, compatible with the standard packaging developed for integrated circuitry. Unique design provides the optimum in automated insertion and other economical installation techniques associated with printed circuit applications. Ideal for use in circuits where high density packaging is essential. The 5 VDC IC-compatible versions will operate directly from TTL or DTL circuits; also available in standard coil voltages of 6, 12 or 24 VDC. Class 107 and 118 relays are available with or without an internal clamping diode. **Size:** W107, .750″ x .187″ x .250″; W117 and W118, .750″ x .210″ x .260″.

**Class 107DIP:** SPST-NO (1 Form A) contacts rated 3 VA at 0.5 amp max. or 28 VDC resistive, max. Operate time, 200 μsec typ. Dielectric strength, 200 VDC minimum between contacts. Contact resistance, 200 milliohms average. Life, 10 million operations typical; longer life at reduced loads.

**Class 117DIP:** DPST-NO (2 Form A) contacts rated 3 VA at 0.5 amp max. or 28 VDC resistive, max. Operate time, 200 μsec typical. Dielectric strength, 200 VDC minimum between contacts. Contact resistance, 200 milliohms average. Life, 10 million operations typical; longer life at reduced loads.

**Class 118DIP:** SPDT (1 Form C) contacts rated 6 VA at 0.250 amp resistive, maximum. Operate time, 500 μsec typical. Dielectric strength, 200 VDC minimum between contacts. Contact resistance, 150 milliohms average. Life, 5 million operations at rated load; longer at reduced load; rating to 0.5 amp at reduced life.

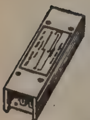
## NEW MINIATURE MERCURY WETTED REED RELAYS

### CLASS 137MPC AND 137M



In-line axial lead (or PC mounting) mercury wetted reed relay offers low cost and bounce-free design (using a diode across the coil) with stable contact resistance of 100 milliohms over a long life. Non-position sensitive; can be mounted in any position. Provides over 20 million bounce-free operations. Available for PC mounting (W137MPC) or with axial leads (W137M).

### SPECIFICATIONS

**Contact Configuration:** SPST-NO (1 Form A). **Contact Load Rating:** 1 VA max. at 0.1 amp or 10 VDC resistive, maximum. **Nominal Coil Power:** 500 mW. **Operate Time:** 0.5 msec average. **Release Time:** 0.5 msec average. **Contact Bounce:** None, using diode suppressed coil. **Dielectric Strength:** 500 VDC between contacts; 500 VAC rms between contacts and coil. **Contact Resistance:** 100 milliohms average. **Life:** 20 million operations at rated load; longer at reduced loads.

| Magnecraft Number | Contacts | Max. Pick-up VDC | Coil Data* | | | Mounting | Net Each, Lots of | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|

***COIL DATA:** Voltage shown is nominal. Pull-in at 80% of nominal or less for DC relays; 85% of nominal for AC relays at 25° C. Resistance shown is ±10% at 25° C.

# Magnecraft® MERCURY-WETTED REED, HIGH VOLTAGE & LATCHING RELAYS

## MODULAR PACKAGED MERCURY WETTED STANDARD SIZE RELAYS

dular units feature nylon bobbin and integral base, epoxy resin ninal board, one piece tinned terminal supports and pins riveted mortised position, steel cover and hermetically switch mech- m. High performance from mercury-wetted contacts: avoids tact erosion, welding, bounce and chatter. Capillary action in pressure hydrogen atmosphere maintains mercury film on coil ated contacts. Less than 10% variation of 50 milliohms maxi- n resistance for life; life exceeds one billion cycles. Operates ght, no more than 30° from vertical. No adjustments, no de- oration. Switches from 50 VA to extremely minute current and age. **Contacts:** Series 132, SPST-NO (Form A); Series 133, DT (Form C) Single Side Stable. **Rating:** Series 132, 50 VA at nps max. or 400V max. noninductive; Series 133, same, but 2 ps max. **Power Requirements:** 0.5W nominal, 0.15W minimum, maximum. **Temperature Range:** −38°F to +200°F. **Average ne:** Operate and release, 2 msec. **Dimensions:** 41/64" h. x ¾" w. ⅝" lg. Weight, 3 oz.

## ENCAPSULATED MERCURY-WETTED MINIATURE RELAYS

all, printed circuit relays. Plug-in terminal pins extending from xy mounting board, are soldered to rigid terminal posts; leads n capsule are soldered with capsule and coil in place to eliminate akage, contact distortion and protect coil. Environment-proof sing provides protection from atmospheric conditions. Com- e unit mounts quickly to circuit boards. No contact bounce or sion. Operates upright, no more than 30° from vertical. **Con- ts:** Series W131PCX8 thru 11, SPST-NO (Form A); Series 31PCX12 thru 15, DPST-NO (2 Form A). **Power Require- nts:** Series W131PCX8 thru 11, 0.6W nominal; Series 31PCX12 thru 15, 0.9W nominal. **Temperature Range:** −37°F +200°F. **Average Time:** Operate and release, 1 msec. **Life:** One ndred million cycles at rated load. **Dimensions:** Series 31PCX8 thru 11, ½" h. x 9/16" w. x 1½" lg. (Wt., 2 oz.); Series 31PCX12 thru 15, 9/16" h. x 11/16" w. x 1½" lg. (Wt., 3 oz.).

## MINIATURE MODULAR, PRINTED CIRCUIT MERCURY-WETTED REED RELAYS

dular design for printed circuit applications. Integral nylon bin and base for maximum electrical insulation. Steel cover full mechanical protection and magnetic shielding. No con- t bounce. Terminal pins spaced 0.1" for rapid assembly to boards. Upright operating position, not more than 30° from tical. **Contacts:** W131MPCX-2 thru -5, SPST-NO (1 Form A); thru -9 DPST-NO (2 Form A). Rated 28 VA max. at 1.0 A x. or 100 VAC max. resistive. **Coil Power:** 500 mW nom., ST types; 700 mW nom., DPST. **Capacitance:** 1.2 pF avg. oss contacts. **Life:** 25 million operations typical; longer at uced load. **Size:** W131MPCX-2 thru -5, 13/32" w. x 1⅛" lg. x h.; -6 thru -9, 39/64" w. x 1⅛" lg. x ⅜" h.

## HIGH VOLTAGE DRY REED RELAYS

**Contacts:** SPST-NO (Form A), 50 VA at 3 A max. **Size:** 4½" x 1 5/16" x ⅞". Wt., 3 oz.

**Class 102V**—5000 V in modular package. Contact and coil leads soldered to rigid terminal posts; widely spaced. Internally insulated. Operates in any position. **Rating:** 5 KVDC max. or 5 KVAC peak resistive. **Time:** Operate, 3.0 msec avg.; release, 0.5 msec. **Life:** 20 million cycles typical.

**Class 102HV**—10,000 V. Specially insulated. Contact and coil leads soldered to rigid terminal posts; widely spaced. Shock proof material. **Rating:** 10,000 V at 1 mA resistive. **Time:** Operate, 25 msec typical including bounce. **Life:** One million cycles typ.

**Class 102UHV**—20,000 V. Outside leads for coils. Specially insulated. **Rating:** 20,000 V peak at 1 mA resistive. **Time:** Operate, 25 msec typ. in. bounce. **Life:** One million cycles typical.

## MINIATURE 1000-VOLT REED RELAYS

Switches up to 1000 volts, in miniature package with reed relay reliability. Class 101VM has in-line design with reed leads fastened to molded bobbin for stress relief. The nylon bobbin has rugged coil terminal inserts to eliminate shorts. Class 101VMPC has reed leads spaced 0.3" from coil leads for high dielectric strength, elimination of shorts. **Contacts:** SPST-NO, Form A. **Rating:** 1000 VDC at .001 amp max., resistive. **Coil Power:** W101VM, 600 mW nominal; W101VMPC, 700 mW. **Average Time:** Operate, 1 msec.; release, 0.5 msec. **Life:** Greater than 1 million operations. **Size:** W101VM, 2¼" x ½" x 7/16"; W101VMPC, 1⅛" x ⅜" x 39/64".

## MAGNETIC LATCHING MERCURY-WETTED REED RELAYS

stable relay requires no coil current to hold either of two hing positions. Armature contact remains in last operated ition until coil polarity is reversed. Ideal for printed circuit mory applications, with stress-free mounting, rigid positioning l mechanical protection. With single-wound coils, switching is ieved by reversing coil polarity; double-wound coils have arate polarized windings, switched by two separate inputs. **ntacts:** SPDT (1 Form C) break-before-make, bi-stable. **Rat-** : 50 VA at 2 amps max. or 400 VDC max., resistive. **Power:** mW nominal. **Average Time:** 2 msec., operate and release. : 25 million operations, typical; longer at reduced load. : 2⅝" x ¾" x 41/64".

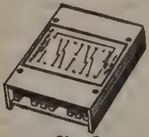
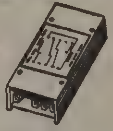
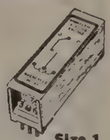
## MODULAR-PACKAGED DRY REED RELAYS



Size 3



Size 2



Size 1

Modular-packaged dry reed relays ideal for printed circuit applications. Switching mechanism is hermetically sealed in glass with inert gas fill. Precious metal contacts. Unique mounting design prevents damaging stresses on reed elements. Nylon bobbin and integral mounting base mortised and rigidly riveted to epoxy resin terminal board. Snap-on metal cover provides magnetic shielding and mechanical protection. Fast acting: 2 or 3 μsec, operating; 1 msec, release time. Long life: 20 million cycles at max. load; 100 million at low load. Available Form A or Form C: Form A rated 15 VA at 1 amp or 250 VAC max.; Form C rated 10 VA at ½ amp or 250 VAC max. Choice of three case sizes: **Size 1,** single Form A or C; 41/64″ h. x ¾″ w. x 2⅝″ lg.; requires 0.5 W DC power. **Size 2,** three Form A or two Form C; 41/64″ h. x 1 1/16″ w. x 2⅝″ lg.; requires 0.75 W DC power. **Size 3,** six Form A or four Form C; 41/64″ h. x 1 31/64″ w. x 2⅝″ lg.; requires 1.5 W DC power.

| 50-74 | −15% | .85 | 100-499 | −30% | .70 |

## MAGNEREED (DRY REED) RELAYS

Stabilized contact resistance, high speed positive switching and sensitive operation; adaptable to complex logic circuits. All models have molded epoxy resin encapsulation. Pre-adjusted precious metal contacts in inert gas environment are actuated by coil around capsule. **Series W101:** 10 VA at .5 amp max. or 200 VDC max. resistive. Life, 5 million cycles at max. load; 20 million, ½-load. Cap., 1.0 pF between contacts. Size: W101EP, 1″ x 7/16″ dia. (Wt., 1 oz.); W101PC, SPST-NO, 1½″ x ½″ x 9/16″ (Wt., 2 oz.); W101PC, DPST-NO, 1½″ x 11/16″ x 9/16″ (Wt., 3 oz.). **Series W102:** 15 VA at 1 A max., or 250 VAC max. non-inductive. Life, 20 million cycles at max. load; 100 million ½-load. Cap., SPST, 1 pF; DPST, 1.2 pF. Size: W102PC, SPST-NO, 2¼″ x 21/32″ x ⅝″ (Wt., 3 oz.); W102PC, DPST-NO, 2¼″ x 1¼″ x ¾″ (Wt., 4 oz.). **Series W103:** 10 VA at ½ A, or 250 VAC max. non-inductive. Life, 25 million cycles at max. load; 50 million, ½-load. Cap., SPDT, 3 pF; DPDT 3.5 pF. Operation, SPDT break before make, single side stable. Size: W103PC, SPDT, 2¼″ x 21/32″ x ⅝″ (Wt., 3 oz.); W103PC, DPDT, 2¼″ x 1¼″ x ¾″ (Wt., 4 oz.). **Series W103CP:** Plug-in mounting type with non-metallic dust cover; has W103 relays with common operating coil. DPDT units are 8-pin; 3PDT units, 11-pin. Size, 1⅜″ x 1⅜″ x 2⅛″ (Wt., 5 oz.). **Series W104:** 3 VA at .25 A max., or 28 V max. non-inductive. Life, 10 million cycles at rated load. No bias magnet. Size: W104EP, 1″ x 7/16″ dia. (Wt., 1 oz.); W104PC, SPDT, 1½″ x ½″ x 9/16″ (Wt., 2 oz.); W104PC, DPDT, 1½″ x 11/16″ x 9/16″ (Wt., 2 oz.). **Series W105:** 0.1 VA at 10 mA. Life, 10 million cycles at rated load. Size, 7/16″ x ¼″ dia. (Wt., ½ oz.).

## 3 AMP SPST-NO POWER DRY REED RELAYS

Low profile, printed circuit mounted relay with contact rating formerly available only in general purpose or telephone type relays. Housed in molded nylon bobbin with snap-on, steel cover for mechanical and magnetic shielding. Switch mechanism in hermetically-sealed glass capsule. **Contacts:** SPST-NO (Form A). **Rating:** 100 VA at 3 A or 250 V max. **Power:** 0.5 W nominal; 2 watts max. **Size:** 2⅝″ x 41/64″ x ¾″. Wt., 3 oz.

### *COIL DATA

Current shown is pull-in at specified value or less. Voltage shown is nominal. Pull-in at 80% of nominal or less for DC relays; 85% of nominal for AC relays at 25° C. Resistance shown is ±10% at 25° C.

# Magnecraft® Dry Reed Relays

## MINIATURE PC DRY REED RELAYS

odular, printed circuit dry reed relays are fast, reliable and mpact. Hermetically sealed in glass capsule filled with inert gas. ed support terminals rigidly anchored to molded nylon bobbin; lded to switch leads for maximum insulation. Terminal pins aced for .1" grid centers. Magnetically shielded and mechanically otected by snap-on steel cover. **Contact Resistance:** 150 millims avg. **Life:** W101, 5 million cycles at rated load; W104, 10 llion cycles. **Rating:** W101, 10 VA, 500 mA max. or 200 VDC max., n-inductive; W104, 3 VA, 250 mA max. or 28 V max., nonluctive. **Size 1:** Single Form A or C, ⅜" h. x 13/16" w. x 1⅛" lg.; quires 500 mWDC power. Weight, 1 oz. **Size 2:** Three form A or o Form C, ⅜" h. x 39/64" w. x 1⅛" lg.; requires 700 mWDC wer. Weight, 1 oz.

## OPEN STYLE AXIAL LEAD DRY REED RELAYS

w cost reed relays give optimum reliability and fast operation. nned leads are specially fastened to a molded nylon bobbin stress relief on glass capsule during soldering. Rugged coil minal inserts eliminate possibility of shorts. Contacts hertically sealed with inert gas in glass capsule; free from dust ntamination, moisture or tampering. Tinned terminals for cuit mounting. No. 16-265-6 clip available for clip mounting. oice of 2 sizes; 2 contact arrangements. **Series W101MX:** niature; SPST-NO (1 Form A) contacts rated 10 VA x. at .5 A max. or 200 VDC max. resistive. Coil 600 mW minal. Cap., 0.3 pF avg. between contacts. Life, 5 million erations typical. Size, 2¼" lg. x ½" w. x 7/16" h., including ds. **Series W102MX:** Standard size; SPST-NO (1 Form A) ntacts rated 15 VA max. at 1 A max. or 250 VAC max. resise. Coil, 300 mW nominal. Cap., 0.9 pF avg. between contacts. e, 20 million operations typ. Size, 3¼" lg. (incl. leads) x " w. x ½" h. **Series W103MX:** Standard size; SPDT (1 Form contacts rated 10 VA max. at 0.5 A max. or 250 VAC max. istive. Coil, 300 mW nominal. Cap., 3.0 pF avg. between ntacts. Life, 25 million operations typ. Size, 3 7/16" lg. (incl. ds) x 19/32" w. x ½" h. **Series W104MX:** Miniature; SPDT Form C) contacts rated 3 VA max. at 0.25 A max. or 28 VAC x. resistive. Coil, 600 mW nominal. Cap., 1.3 pF avg. across ntacts. Life, 10 million operations typ. Size, 1" x 7/16" x ½" ot incl. leads).

## CLASS W103LMPC MAGNETIC LATCHING (BI-STABLE) DRY REED RELAYS

Biased permanent magnet holds either contact position; no coil current required. Ideal for memory applications. Coil current polarity reversed for single wound coils; separate polarized windings on double-wound coils have individual input terminals. Modular construction and printed circuit terminals for rugged, dependable use. **Contacts:** SPDT (Form C, Bi-Stable) break-before-make. **Rating:** 10 VA, 200 V maximum or 0.2 amp maximum non-inductive. **Power:** 0.15 W nominal and 2 W max., single wound; 0.2 W nominal and 2 W max., double wound. **Average Time:** 2 msec operate and release. **Life:** Twenty-five million cycles at rated load. **Size:** 2⅝" x 41/64" x ¾". Weight, 1 oz.

# *Magnecraft*® SOLID STATE RELAYS

## NEW SOLID STATE (HYBRID) TIME DELAY RELAYS

Class 211M

Class 214CP

Class 502PCSO (1 Form A)
Class 503PCSO (1 Form C)

Class 502PCSR (1 Form A)
Class 503PCSR (1 Form C)

### CLASS 211M SOLID STATE (HYBRID) TIME DELAY RELAYS

Designed for heavy-duty service, this time delay relay combines solid state circuitry for the timing function; an electro-mechanical relay provides 10-amp DPDT output switching. Molded, high impact plastic enclosure gives space saving surface mounting. Molded-in terminal strip has screw terminals for easy installation; adapts well to multi-modular applications. Knob-adjustable timing for operate delay or release delay. **Timing Repeatability:** ±5% at nominal voltage at 25° C. **Size:** 4½" x 1½" x 4$\frac{1}{32}$".

#### OPERATE TIMING TYPES

### CLASS 502 AND 503 PC TIME DELAYS

#### SLOW OPERATE PC TIME DELAYS

Hybrid circuitry combines monolythic silicon structure for timing function and dry reed relay for isolated circuit switching. Encapsulated, fully-protected construction has low profile for printed circuit mounting. Polarity protection is standard. **Repeatability:** ±5% accurate. **Size:** 2¼" x 1¼" x ¾". Wt., approx. 2 oz.

**Class 502PCSO:** SPST-NO (Form A) contacts rated 1 amp at 15 VA or 250 VAC max. resistive.

| Magnecraft Number | Coil V* | Timing Range | Net Each, Lots of 1-9 | 10-24 | 25-49 | 50-99* |
|---|---|---|---|---|---|---|
| W502PCSOX-2 | 12 | 100 msec to 100 sec† | $18.96 | $18.01 | $17.06 | $15.17 |

| W502PCSOX-6 | 24 | | 21.30 | 20.23 | 19.17 | 17.04 |

**Class 503PCSO:** SPDT (Form C) contacts rated 0.5 amp at 10 VA or 250 VAC max. resistive.

| Magnecraft Number | Coil V* | Timing Range | Net Each, Lots of 1-9 | 10-24 | 25-49 | 50-99* |
|---|---|---|---|---|---|---|
| W503PCSOX-2 | 12 | 100 msec to 100 sec† | $20.82 | $19.78 | $18.74 | $16.66 |
| W503PCSOX-3 | 24 | | 20.82 | 19.78 | 18.74 | 16.66 |
| W503PCSOX-5 | 12 | 3 sec to 5 min.‡ | 22.31 | 21.19 | 20.08 | 17.85 |
| W503PCSOX-6 | 24 | | 22.31 | 21.19 | 20.08 | 17.85 |

External adjustment: †60K ohms/sec; ‡10K ohms/sec.

#### SLOW RELEASE PC TIME DELAYS

Makes use of hybrid circuitry: Monolythic silicon structure for timing function; dry reed relay performs isolated circuit switching with ±2% repeatability. Low profile design for printed circuit mounting is fully protected by encapsulation. **Size:** 2¼" x 1¼" x ¾". Wt., approx. 2 oz.

**Class 502PCSR:** SPST-NO (Form A) contacts rated 1 amp at 15 VA or 250 VAC max. resistive.

| Magnecraft Number | Coil V* | Timing Range | Net Each, Lots of 1-9 | 10-24 | 25-49 | 50-99* |
|---|---|---|---|---|---|---|
| W502PCSRX-2 | 12 | 200 msec to 100 sec† | $26.73 | $25.39 | $24.06 | $21.38 |
| W502PCSRX-3 | 24 | | 26.73 | 25.39 | 24.06 | 21.38 |
| W502PCSRX-5 | 12 | 1 sec to 5 min.‡ | 29.84 | 28.35 | 26.86 | 25.36 |
| W502PCSRX-6 | 24 | | 29.84 | 28.35 | 26.86 | 25.36 |

**Class 503PCSR:** SPDT (Form C) contacts rated 0.5 amp at 10 VA or 250 VAC resistive.

| Magnecraft Number | Coil V* | Timing Range | Net Each, Lots of 1-9 | 10-24 | 25-49 | 50-99* |
|---|---|---|---|---|---|---|
| W503PCSRX-2 | 12 | 200 msec to 100 sec† | $28.59 | $27.16 | $25.73 | $22.87 |

| W503PCSRX-6 | 24 | | 31.70 | 30.12 | 28.53 | 25.36 |

External adjustment: †25K ohms/sec; ‡6.5K ohms/sec.

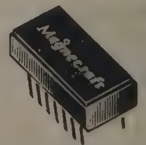
★LARGER QUANTITY PRICES ON REQUEST

***COIL DATA**

Voltage shown is nominal. Pull-in at 80% of nominal or less for DC relays; 85% of nominal for AC relays at 25° C. Resistance shown is ±10% at 25° C.

## NEW CLASS 505QIC DUAL-INLINE ALL SOLID STATE RELAY

Dual-inline 14-pin solid state relay offers built-in function versatility. Provides three functions in one (with only a slight external adaptation)—switching, latching and timing. **Contact Configuration:** DPDT (2 Form C). **Contact Load Rating:** 1 amp at 30 VDC at 25° C case temperature, maximum with any type of load. **Sensitive Input Impedance:** 50K ohms. **Operate Time:** 50 μsec maximum. **Release Time:** 50 μsec maximum. **Transfer Time:** 20 to 35 μsec. **Isolation Resistance:** 30 megohms, minimum. **Contact Resistance:** 700 milliohms, maximum. **Typical Life:** Greater than 1 billion operations at rated load. **Rating Increase:** To increase rating of W505QICX-3 to 1 amp at 30 VAC, merely connect in parallel a zener diode to pins 7 and 4, and connect a series limiting resistor to the power supply.



3 RELAYS IN ONE—
SWITCHING, LATCHING
AND TIMING

| Magnecraft Number | Must Operate VDC | Must Release VDC | Driver Supply VDC at mA | Contact Rating† at 30 VDC | Net Each, Lots of 1-9 | 10-24 | 25-49 | 50-99 | 100-249 |
|---|---|---|---|---|---|---|---|---|---|
| W505QICX-1 | 2.5 | 1.1 | 3.6 at 45 | 1 amp | $25.68 | $24.45 | $23.21 | $20.74 | $19.51 |
| W505QICX-3 | 9.0 | 4.5 | 12 at 45 | 750 mA | 25.68 | 24.45 | 23.21 | 20.74 | 19.51 |

†Pins 4 and 11 must be connected on the printed circuit, providing switching on the low noise negative ground bus.

# Magnecraft® TIME DELAY RELAYS

## CLASS 211CP SOLID STATE PLUG-IN TIME DELAY RELAYS

ombines solid state circuitry for timing function, with Class 88 electromechanical relay DPDT 10-amp output switching. Nylon dust cover, plug-in mounting. DC models e reverse polarity protected. Transient protection for twice the nominal input voltage, a period not to exceed 8 msec. **Contacts:** DPDT, rated 10 amps. **Temperature Range:** erate, −10° to +55° C; storage, −55° to +85° C. **Timing Repeatability:** ±5% of tting at nominal voltage at 25° C. **Size:** 1¾" x 2⅜" x 2⅞" h. (not including knob). **ug:** Operate types, 8-pin; release types, 11-pin.

## CLASS 212M PRECISION SOLID STATE TIME DELAY RELAYS

ecision time delay relays with 1% repeatability (typical). Uses hybrid circuitry (solid ate for timing, plus Class 88 10-amp output relay). Molded, high-impact enclosure for ace-saving surface mounting. Knob-adjustable timing, with dial calibrated in seconds. ansient protection against 1000 volts. Barrier screw terminals. Jumper wires can be ded for additional functions. Size, 4½" x 1½" x 4⅓₂".

| Magnecraft Number | Operation | Coil Volts* | Delay, Seconds | Net Each, Lots of | | | |
|---|---|---|---|---|---|---|---|
| | | | | 1-9 | 10-24 | 25-49 | 50-99* |

## CLASS 112 AIR DASHPOT TIME DELAY RELAYS

ectrically actuated, with rugged enclosure and few moving parts. Solenoid assembly ded to air dashpot/snap switch combination initiates time switching function. Mechani- timing function unaffected by voltage variations. Time delay adjustable, 1–150 conds, with knob or capped Allen screw. Time repeat accuracy, ±10%. Release delay thout standby power. DPDT contacts rated 10 amps. Enclosure has grommet for feed-ru wires (internally wired by user to .187" quick-connect terminals). Mounting by two " dia. holes on 3" centers. Size, 1¾" x 3³⁄₁₆" x 4³⁄₁₆". Weight, 20 oz.

**ass 112M** (W112MASOX-1 to W112MASRX-2): Same as above, but in molded, high-pact plastic enclosure with built-in screw type terminals. Flange mounting, with six " holes spaced ½" on 4⅛" centers. Factory wired. Size, 1½" x 4½" x 4⅓₂". Wt., 14 oz.

| Magnecraft Number | "Slow" Function | Coil* | | Adjust-ment | Net Each, Lots of | | | |

## CLASS 113C MANUALLY ACTIVATED TIME DELAY SWITCHES

nsists of Class 113 air dashpot time delay switch built with a non-aging, low-friction aphite, precision ground tempered glass air dashpot timer. Pushing the button instantly ansfers the SPDT switch; releasing initiates the timing cycle. At the end of timing riod, snap contacts are instantly reset. Knob-adjustable timing range, 1–180 seconds. etal parts are corrosion-resistant. SPDT contacts rated 10 amps up to 32 VDC or 250 C resistive. Size, 2¹⁄₁₆" x 1⁵⁄₃₂" x 3⅝". Mounts in single panel hole. Wt., 8 oz

| agnecraft Number | Con-tact | Timing Range | But-ton Dia. | Net Each, Lots of | | | | |
|---|---|---|---|---|---|---|---|---|
| | | | | 1-9 | 10-24 | 25-49 | 50-99 | 100-249* |

## CLASS 110 10-AMP DPDT TIME DELAY RELAYS

### OPERATE TIME DELAY—ADJUSTABLE FROM 0.2 TO 45 SECONDS

oven high reliability relay contacts and switching mechanism with precision-built r Dashpot Timer of inert, non-aging, low friction materials. Positive switching action otects contacts from chattering and fritting. Timing repeat accuracy, ±10%.

**en type with solder terminals.** Six mounting holes: Two holes 6-32 thread located gonally, spaced 1³⁄₁₆" x 2⅛"; two holes .156" dia. located diagonally, spaced 1³⁄₁₆" x "; two holes .156" dia. spaced 1³⁄₁₆". Size, 3¹³⁄₁₆" lg., 1¹⁵⁄₁₆" h., 1⁷⁄₁₆" w. Weight, 6 oz.

## CLASS 88KD LOW-COST AC AND DC OPERATED 50-AMP POWER RELAYS

eral purpose relays offer heavy duty silver alloy, gold flashed contacts for power ching. Contacts are SPST-NO, Form X, double-make; rated 50 amps at 115 VAC 8 VDC resistive. Stationary contacts assembled to glass melamine insulated ter- al board. Movable contacts and armature assembly on molded phenolic blade for llent wipe, high reliability. Terminals can be soldered or accept AMP Faston 250 es receptacles on contacts, 110 Series on coil. One 6-32 mtg. hole, locating boss. , 1¹⁵⁄₁₆" lg. x 1½" h. x 1¹⁄₁₆" w., overall. Wt., 3 oz.

## LASS 88L AC AND DC OPERATED 10-AMP LATCH-IN RELAYS

Class 88 relays with interlocking latch-in levers mounted on a common base. Each ature latches when pulled in. Energizing one armature releases (resets) the other. h relay is complete with independent operating coil. Contacts silver alloy rated 10 s. Relay coils designed for intermittent duty. Size, 3" lg. x 1¾" w. x 1¹⁵⁄₁₆" h., max. ght, 6½ oz.

## CLASS 88K LOW COST AC AND DC OPERATED 15-AMP POWER RELAYS

vy duty, silver cadmium oxide SPDT contacts are gold flashed and rated 15 amps at VAC or 28 VDC resistive for power switching at low cost. Contacts assembled to melamine insulated terminal board for high dielectric strength. Flexible moving arm s excellent contact wipe. Terminals can be solder connected or will accept AMP on (or equivalent) 250 Series receptacles on contacts, 110 Series on coil. Supplied on nting base with base/chassis insulator. Contacts are 1 Form C, standard. Size, lg. x 1³⁄₁₆" w. x 1¼" h., overall.

## CLASS CP2 AND CP4 PLUG-IN RELAY ENCLOSURES

Tough see-through dust cover enclosures of crackproof polycarbonate resin with high impact strength and dimensionally stable characteristics. Available in two sizes, with 8-pin or 11-pin plugs. Plug keyways oriented toward side of enclosure. Suitable for electronic assemblies. Mates with Amphenol 77-MIP-8 or -11 socket or equiv. **Size:** CP2, 1⅜" sq. x 2⅛" above socket; CP4, 1¾" x 2⅜" x 3½" above socket. Weight: CP2, 2 oz.; CP4, 4 oz.

| Magne-craft No. | Pins | Net Each, Lots of* | | | |

## CLASS 22T 4-AMP TWIN CONTACT DC-OPERATED RELAYS

Miniature long form relay with accuracy, reliability and long life equal to, or sometim
superior to, larger relays. Unique pin-type armature hinge of heavy duty design a
precision construction assures stabilized adjustment through millions of operatio
Twin palladium contacts with long, flexible bifurcated contact springs assures highe
reliability. Contacts rated 4 amps. All mounting and wiring at heel end. Tinned sold
terminals with easy-to-wire spacing. Two 6-32 mounting holes on ¾" centers. Si
21/16" x 13/32" x 1¾" maximum. Weight, 5 oz.

| W33FX23 | SPDT | 110 VDC | 6500 | 1.5 W | 4.69 | 4.22 | 3.99 | 3.7 |

## CLASS 77CS LOW COST, 4PDT
## TELEPHONE TYPE RELAYS AND SOCKETS

Miniature 5-amp relay provides greater contact pressure without increasing coil operati
power. No internal wiring, solder connections or pigtails. Precision hinge-pin armatu
bearings have oversize surfaces for lowest friction and maximum contact effectivene
gives stabilized adjustment over long life. Molded, insulated snap-on dust cover prote
against shorts. Molded nylon bobbin and rugged coil terminal inserts. High dielect
strength essentially unaffected by humidity or temperature change. **Contacts:** 4PD
(4 Form C) rated 5 amps max. at 28 VDC or 115 VAC resistive. Material is silver all
gold flashed. **Dielectric Strength:** 750 VAC rms standard. **Size:** 17/64" w. x 55/64" d. x 19/32"
excluding solder terminals. **Mounting:** Plug-in or chassis mounted.

| Magnecraft Number | Con-tacts | Coil Data* |  | Nom. Power | Net Each, Lots of |  |  |  |

## ASS 11HS HERMETICALLY-SEALED 5-AMP DC-OPERATED RELAYS

ass 11 miniature relay hermetically sealed; high compression, glass insulated solder minal header. Silver alloy contacts rated 5 amps. Three 6-32 NC-2 threaded mtg. studs. eight, 6 oz. **4PDT Types:** In 40-102 enclosure, 1 5/8″ x 1 7/16″ x 2 1/16″ h. With 14-pin ternal header. Mtg. centers, 15/16″ x 1 3/16″. **6PDT Types:** In 40-188 enclosure, 1 15/64″ x 1 47/64″ x ″ h. With 20-pin terminal header. Mtg. centers, 1/2″ x 1 13/32″.

## CLASS 44 MICRO-MINIATURE ROTARY RELAYS

ovides high reliability in crystal can size relay. Frame and header assembly is rugged dge construction; resists distortion from shock, vibration or temperature; meets litary specifications. Balanced armature minimizes effects of gravity, shock and vibran. Oversize hinge design has instrument type bearings at both ends; minimizes friction increased sensitivity and contact pressure. High temperature insulation. Hermetically aled in inert gas. DPDT contacts rated 2 amps at 28 VDC or 115 VAC, non-inductive. erating time, 5 msec., max. with nom. voltage; release time, 5 msec., max. Size, .875″ x 7″ x .359″. Choice of four enclosure styles.

**pe 40-227 Plug-In Header Enclosure.**

# Magnecraft® SPECIAL PURPOSE RELAYS

## CLASS 99 HEAVY DUTY POWER RELAYS

### UL LISTED FOR HEAVY DUTY INDUSTRIAL CONTROL

Relays illustrated with UL emblem are listed by Underwriters Laboratories under Motor Controller, Magnetic, Across The Line Starter: Open (File No. E43641). The only exception is W99AX-7, DPDT, 440 VAC relay, indicated by †.

SPDT

Rugged, precision-built hinge pin armature bearings for extra long life. Lowest friction and maximum contact effectiveness. Dimensionally interchangeable with other power relays of the clapper type. Heavy duty plastic base and molded contact barrier mounted to armature for high insulation resistance. Positive contact wiping action. Heavy duty screw terminals. Molded coil bobbin. **Contacts:** Silver alloy, 5/16″ dia., gold flashed. Choice of SPDT, DPDT, DPST-NO and SPST-NO double break. **Size:** SPDT 25-amp, 2 3/16″ sq. x 2½″ h.; DPDT 25-amp, 3 3/16″ w. x 2½″ d. x 2⅜″ h.; DPST-NO 25-amp, 2½″ sq. x 2⅜″ h.; SPST-NO-DM 50-amp, 2½″ sq. x 2 3/16″ h.

## CLASS 128 COAXIAL RELAYS FOR RF SWITCHING

Compact relays combine a heavy duty coaxial relay with Class 88 relay structure. Precision-built, hinge-pin armature bearings assure consistent pull-in power with maximum reliability over long life. Coaxial contact structure is enclosed in a heavy duty, precision machined brass cavity with removable plug for convenient inspection of contacts. SPDT RF switching contacts are silver alloy, gold flashed; rated 100 watts RF. VSWR, 1.25:1 maximum, 0–500 MHz. Matches 50-ohm cable using standard UHF connectors. Operate time, 25 msec maximum. Release time, 25 msec maximum. Size, 2⅝″ x 2⅞″ x 1 7/16″.

### STANDARD CLASS 128 SPDT COAXIAL RELAYS

| Magnecraft Number | Coil Data* | | Net Each, Lots of | | | | |

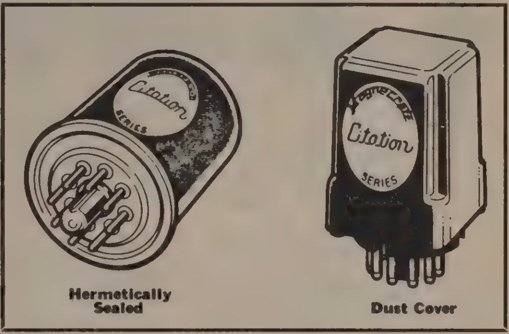
## CLASS 88 GENERAL PURPOSE RELAYS

**BACKED BY AN UNCONDITIONAL 12-MONTH WARRANTY**



**Hermetically Sealed**

**Dust Cover**

- **PLUG-IN OCTAL STYLE WITH 8 OR 11 PINS**
- **10-AMP CONTACT RATING**
- **DPDT OR 3PDT CONTACTS**
- **AC OR DC OPERATION**
- **HERMETICALLY SEALED OR DUST COVERED**

ie Citation Series general purpose relay has evolved from an er-increasing demand for premium features by discriminating ay users. Citation relays are designed to incorporate all those atures which will provide the ultimate in reliability to meet the ost exacting requirements All Citation relays are offered with e unconditional warranty described below.

### 12-MONTH WARRANTY

**e Citation Series Relay will be replaced** with an identical odel **at no charge,** if for any reason it fails to perform satis-ctorily **for 12 months from date of purchase.** Relay must be companied by receipt and returned to point of purchase. ability limited to replacement only.

### CITATION FEATURES

**e-Cycling**—Each relay in the Citation Series is pre-cycled prior final inspection in order to stabilize operating characteristics d achieve an unprecedented level of quality control.

**nge-Pin Design**—Each relay has rugged, precision-built hinge-armature bearings with oversized bearing surfaces. This is e same construction used in the finest telephone type relays for nimum friction and maximum contact effectiveness, resulting stabilized adjustment over a long life.

**tegrated Bobbin Construction**—Molded nylon bobbins with ggedized coil terminal inserts eliminate all possibility of shorts.

**ass Melamine Insulation**—Contact insulating member is made glass Melamine for high dielectric strength, essentially un-ected by changes in temperature and humidity.

**perior Contact Design**—High contact pressure and built-in ping action. Riveted contacts further enhance Citation reli-ility through longer life.

### SPECIFICATIONS

**Nominal Coil Voltage:** 12 or 24 VDC, or 115 VAC standard (see tables below). **Contact Form:** DPDT or 3PDT standard. **Contact Construction and Rating:** Code 120, silver alloy, gold flash, .187″ dia. standard; rated 10 amps at 115 VAC or 28 VDC resistive. **DC Coil Dissipation Capability:** 3.0 watts maximum continuous (see tables below for nominal operating power values). **Dielectric Withstanding Voltage:** 750 VAC rms between mutually insulated conductive elements. **Mounting:** Standard 8-pin or 11-pin octal-style plug. **Size:** Hermetically sealed, 1$\frac{11}{16}$″ dia. x 2$\frac{1}{32}$″ high above socket; dust cover type, 1$\frac{3}{8}$″ sq. x 2$\frac{1}{8}$″ high above socket.

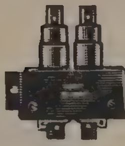
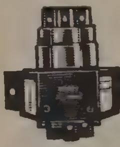
# Relays and Switches

## MAGNECRAFT MERCURY PLUNGER RELAYS

A

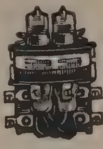


B

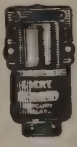


C

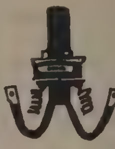
D



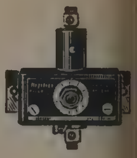
E



F



G



H

Silent, mercury-to-mercury action for power control applications. Front terminals for easy access. Contacts rated 550 VAC. **Contacts:** Single pole normally open, single pole normally closed, double pole (both contacts normally open), or triple pole (all contacts normally open).

### EPOXY ENCASED METAL TUBE RELAYS

Epoxy encased metal tube withstands physical shock. **Series WA:** Miniature type, rated 25 amps at 115 VAC. **Series WB:** Standard type, rated 50 amps at 115 VAC. **Series WH:** Heavy duty type, rated 100 amps at 115 VAC.

| Magnecraft No. | Fig. | Contacts | Rating, Amps | Size, Inches W. x D. x H. | Net Each, Lots of 1-9 | Net Each, Lots of 10-49 |

|---|---|---|---|---|---|---|
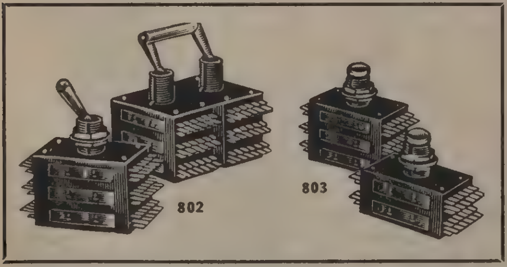
| **W100-1** | G | SP, NO | 100 | 3½ x 3⅜ x 7 | $43.10 | $37.70 |

## T-BAR®, INC. SWITCHES



Multi-pole switches rated 5 amps at 115 VAC, employ stacked-up enclosed contact wafers. Silver plated terminals fit Model 88601 T-Bar connector, or may be soldered. Temperature rating, −55° to +85° C. Dielectric strength, 1,000 V rms, terminal to terminal. Suffix **A** in part number indicates normally open types.

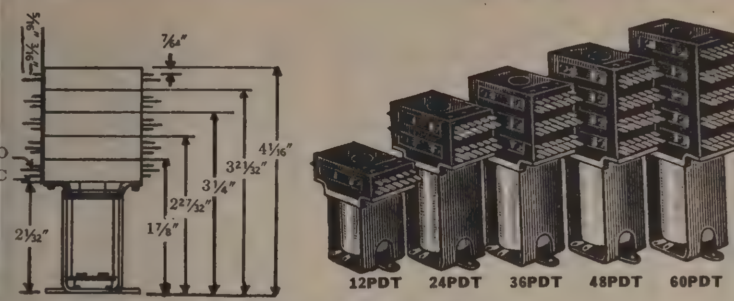
# T-Bar® and Tiny-T® Relays



SERIES 801 (Non-Latching)
SERIES 805 (Magnetic Latching)

tiny-T relay

SERIES 401/404
FLATPACK RELAY

## SERIES 801/805 T-BAR® RELAYS

noid actuated relays feature unique design employing stacked enclosed contact wafers for up to 60-pole switching. Ultra-pact; reliable. Gold plated silver contacts rated 500 watts tive (5 amps), make or break 3 amps. Operate and release , less than 30 milliseconds. Minimum life, 20 million mechani-operations. Dielectric strength, 1,000 VAC, terminal to case. Temperature range, −55° to +85° C. Terminals mate with Model 88601 T-Bar connector (see description below) which simply push onto contact wafers for quick, easy wiring; or, solder connections may be made. Contact assemblies in dust-tight plastic enclosures 1 1⁄32" w. x 2 3⁄8" lg.; height, 13⁄32" per 12-pole wafer.

### T-BAR CONNECTORS AND TOOLS

**Model 88601 T-Bar Connector**—For use in connecting wires to T-Bar terminals or switches. Wires are first crimped to snap-in terminal using Model 8601-51 crimping tool (see below); nylon terminal block pushes onto wafer terminals. Each connector handles 6 poles, single or double throw (18 terminals); consists of 1 connector block, 20 crimp contacts, 2 labels and 1 retaining cup. Net Each, Lots of 1–99. . . .**$1.35**; Lots of 100–499. . . .**$1.25**

**Model 8601-51 Crimping Tool**—For use with above connectors. Crimps wire and insulation to snap-in terminals. Net. . **$59.75**

## SERIES 401 AND 404 TINY-T® FLATPACK RELAYS

profile, non-reed relays with .360" off-the-board height ted circuit terminals, spaced on .100" x .100" grid. Contacts gold-plated over silver base metal. **Series 401** 4-pole, single-w; contact rating 3 amps at 24 VDC resistive load. **Series 404,** double-pole, single-throw designed to control low level signals. Letter **A** in part number indicates normally open; letter **B** in part number indicates normally closed.

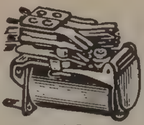
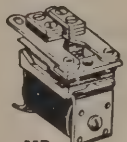
## TELEPHONE TYPE RELAYS

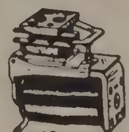


LS

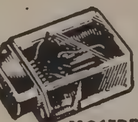
LSP



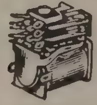
MB



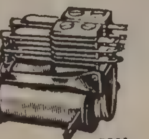
MC



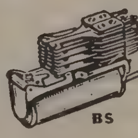
MG17DP



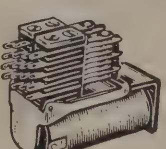
MG



MH



BS



ML

The size, sensitivity, wide variety of coils and ability to carry a large number of poles make them ideal for automation, computers, and similar applications.

**LS Series:** Short springs, light weight armature for fast action with reliability, long life. Stainless steel hinge bearing gives 100 million operations. Twin palladium contacts rated 4 amps. Tinned pierced solder terminals. Two 6-32 mtg. holes on ¾″ ctrs. 2⅜″ x 1⅛″ x 1 11/16″. Wt., 4 oz.

**LSP Series:** Identical to LS Series, but enclosed in plastic cover and has rectangular socket with combination taper tab or solder terminations. Plugs in. LSP17D types have 16-pin socket; size, 1 23/32″ x 1 25/64″ x 2 33/64″ seated; wt., 4 oz. LSP23D types have 28-pin socket; size, 2 7/64″ x 1 25/64″ x 2 33/64″ seated; wt., 4½ oz.

**MB Series:** Miniature DC contactor for very high current uses. Heavy brass arms with silver contacts rated 60 amps; solder terminals. Four 3-48 mtg. holes on ⅜″ centers. Size, 1 21/32″ x ⅞″ x 1 7/16″. Wt., 2 oz.

**MC Series:** Low loss at high frequency using ceramic spacers; intercontact capacitance, 1.5 pF. Palladium contacts rated 1 amp. Tinned pierced solder terminals. Four 3-48 mtg. holes on ⅜″ centers. Size, 1 17/32″ x ¾″ x 1 25/32″. Weight, 2 oz.

**MG Series:** Subminiature relay for ai craft, computer, etc.; has good shock an vibration resistance. Open, enclosed i nylon dust cover or hermetically seale Silver contacts rated at 2 amps. Mounting: Open, four 3-48 holes on ⅜″ ctrs. dust cover, plug-in header to fit Ampheno receptacle No. 57-20140; sealed, three 4-4 studs on 1″ x ½″ ctrs. Size: 1 1/16″ x 11/16″ 1¼″ max.; sealed, 1 47/64″ x 13/16″ x 2 7/64″; dus cover, 1 23/64″ x 63/64″ x 1 19/32″. Weight: Open 1.2 oz.; sealed, 2.75 oz.; dust cover, 2.0 o

**MH Series:** Fast acting, long life miniature. Gold-flashed silver contacts rated amps for MH11L and LM; 5 amps for al others. Hooked solder terminals on seale models. Mounting: Open, MH11L, 6-3 stud 11/32″ long with locating boss; othe open models have four 3-48 holes on ⅜ centers. Sealed, AMR, -LM and -DM three 6-32 NC-2 studs on 1¼″ x ½″ ctrs. -DD, -D, three 6-32 studs on 1 3/16″ x 15/ ctrs. Size, 1 21/32″ x 1 17/32″ x ¾″. Weight Open, 2½ oz. max.; sealed, 5 oz. maximum

**ML Series:** Small relay with excellent sensitivity and outstanding switching capability for transistorized networks, etc Single contact arms ⅛″ dia. gold-flashed silver contacts rated 3 amps for 100,00 operations. Pierced solder terminals. Fou 3-48 mtg. holes on ⅜″ centers. Size, ¾″ 1 31/32″ x 1 19/32″. Weight, 2½ oz.

### BS SERIES LONG COIL RELAYS

Long coil, telephone type for high sensitivity, simplified maintenance and long life. Suited for computer and automatic test equipment applications requiring large numbers of poles. Tinned solder terminals for rear panel wiring. Twin palladium contacts rated 4 amps. Two 8-32 NC-2B mounting holes on ¾″ centers. Size, 3⅞″ x 1 55/64″ x 1 1/16″ max. Weight, 9 oz.
**Dust Covers for BS Relays: See another P & B page for listings.**

**KR3-H Series:** Small size, heavy-duty relay. Open only, SPST-NO-DB contacts. Movable carrier has twin $\frac{1}{4}$" dia. silver-cadmium oxide contacts rated 20 A, 120 VAC 60 Hz resis. or 28 VDC; 1 hp at 120/240 V 60 Hz. Terminals: $\frac{1}{4}$" quick connect or solder for contacts; coil, solder only. One 6-32 mtg. stud on $\frac{7}{16}$" ctr. Size, $1\frac{39}{64}$" x $1\frac{43}{64}$" x $1\frac{33}{64}$"; seated, $1\frac{7}{32}$" h. Weight, 2 oz.

**KRP3-H Series:** Same electrical specifications as KR3-H, but enclosed in clear, high-impact plastic dust cover with octal plug-in base. Size, $1\frac{17}{32}$" x $1\frac{7}{16}$" x $2\frac{9}{32}$" h. above plug. Weight, approx. 3 oz.

**KRP Series:** Versatile, multi-contact arrangements in clear plastic dust cover. Mounts by standard octal 8-pin plug on KRP5 and KRP11 models; 11-pin on KRP14. Gold-flashed silver contacts rated 5 amps. Size, $1\frac{13}{32}$" x $1\frac{13}{32}$" x 2" above plug. Wt., 3 oz. Suffix **G** means silver-cadmium oxide contacts on movables, rated 10 amps.

**KRP-N Indicator Lamp Relay:** General purpose, incorporating a lamp to indicate current or voltage in power circuit. Clear plastic dust cover. Standard octal plug. Silver cadmium-oxide contacts, rated at 10 amps. Size, $1\frac{13}{32}$" x $1\frac{13}{32}$" x 2". Wt., 3 oz.

**KUP-15 Series:** Reliable 10-amp relay for industrial control applications. Has .187" quick connect/solder-type terminals. Enclosed in clear, high-impact plastic dust cover. Silver cadmium-oxide contacts assure long life. Continuous operation. Max. size, 1.531" x 1.406" x 1.906" h. seated; terminals, .316" lg. **Type 9KU1 to 9KU5 sockets and 9KU3 hold-down spring are available for use with KUP-15 Series relays. See another P & B page for listings.**

**KUP-55 Series:** Same as KUP-15 Series above, but has slotted-flange case for direct-to-chassis mounting. Identical electrically and mechanically, except not suitable for socket mounting. Rated at 10 amps. Has .187" quick connect/solder-type terminals; .156" wide slots are on 2.90" max. mounting centers. Wt., 3 oz. UL Component Recognition.

**KUR Direct Action Impulse Relay:** For applications requiring on-off operation or alternate energizing of two loads. Solid state flip-flop circuit precedes permanent memory electromagnetic latching relay; allows relay to remain latched during complete power loss. Requires 25 msec min. pulse width; up to 1200 pulses per minute repetition rate. Gold-flashed fine silver contacts rated 5 amps at 28 VDC resistive or 120 VAC, 80% power factor. Terminals are .187" quick-connect/solder type and fit standard KU sockets. Yellow plastic cover. Size, 1.531" x 1.406" x 2.126". Weight, 3½ oz.

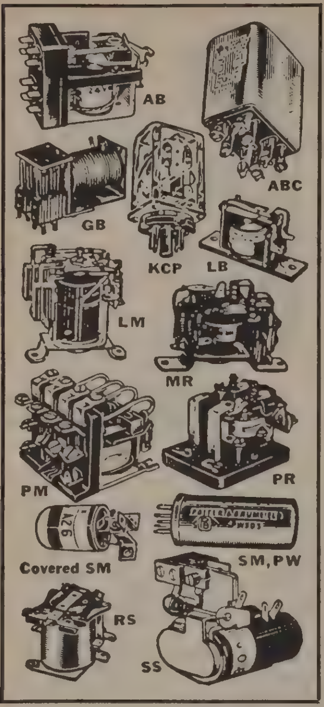
# AMF | POTTER & BRUMFIELD Relays



## SENSITIVE RELAYS

**PW Series:** Precision, lightweight, hermetically sealed relay for aircraft, missile applications. Withstand 10G vibration to 500 Hz. Rated 2 amps. Sensitivity, 180 mW for voltage actuated, 40 mW for current actuated models. Standard 7-pin miniature tube base mounting. Size, 1 11/16″ x .765″ dia. Weight, 1 oz.

**RS Series:** Small, low cost, sensitive relay for radio-sonde, light dimmer and model uses. Voltage and current actuated (60 mW sensitivity) models. Two 4-40 mtg. holes on ¾″ x ⅝″ diagonal centers. Bar palladium contacts rated 2 amps. Size, 1″ x 1 11/64″ x 15/16″. Weight, 1½ oz.

**SM Series:** Medium cost, lightweight relay for light contact load applications. Reed armature for extra long mechanical life. Hermetically sealed and dust covere models. Voltage and current actuated (7 mW sensitivity) models. Stationary, silve movable, rhodium contacts rated 0.25 am Min. 7-pin tube socket mount on seale model; two 3/32″ dia. holes on 17/32″ cente on dust cover model. Size, 1 11/16″ x .76 dia., sealed; 1⅝″ x 35/32″ x ⅞″, dust covered Weight, 1 oz.

**SS Series:** Ultra-sensitive, precision rel has dual series-connected coils with ba anced armature on needle-point bearing for low energy circuits. May be used as differential relay by connecting the tw coils in separate circuits. Sensitivity 1 mW. Silver contacts rated 2 amps. Tw 6-32 mtg. holes on 23/32″ centers. Size, 1 x 1¾″ x 1 11/16″. Weight, 3½ oz.

The following sensitive relays are for use in photoelectric, counting bridges and simila control applications.

**GB Series:** Medium cost high quality relay. Silver contacts rated 5 amps. Sensitivit 115 mW for SP, 125 mW for DP, 275 mW for 4P models. Non-adjustable pick-up. Moun by 8-32 tapped core and locating boss. Size, 2 15/16″ x 1 23/32″ x 1 1/16″. Weight, 5 oz.

**KCP Series:** Low cost relay in clear plastic case. Has ⅛″ gold-flashed silver contact rated 2 amps. Sensitivity 125 mW for SP, 250 mW for DP and 375 mW for 3P model Standard octal plug-in mount: 8-pin for KCP5 and KCP11; 11-pin for KCP14. Siz 1 13/32″ x 1 13/32″ x 2″. Weight, 3 oz.

**LB Series:** Top performance, long life at low cost. Factory adjusted coil for minimu current. Silver contacts rated 5 amps. Two 3/16″ mtg. holes on 2 7/32″ centers. Size, 1¼″ 2 21/32″ x 1⅜″. Weight, 2 oz.

**LM Series:** Medium cost but high quality. Sensitivity 100 mW for SP, 200 mW for D models. Tall spring adjusting screw for pull-in. Gold-flash silver contacts rated 5 amp Two 6-32 mtg. holes on 1 13/16″ centers. Size, 2 3/16″ x 2 9/16″ x 2¼″. Weight, 5 oz.

## POWER TYPE RELAYS

Used in automation, motor starting, clutch operation, signaling, etc., wherever a power rating from 5 to 25 amps, 120 VAC, non-inductive must be handled.

**AB Series:** For appliance and general purpose usage where rugged construction, long life and quiet operation are required. All AC models carry U/L and CSA labels. Silver contacts rated 10 amps. Two 8-32 mtg. holes on 1¼″ ctrs. Size, 1 15/16″ x 3″ x 1 13/32″. Weight, 5 oz.

**ABC Series:** Medium duty relay. With dust cover; terminals fit snap-on connectors or may be used in printed circuits using dip soldering; snap-on screw adapters are supplied. AC models carry U/L and CSA labels. Silver contacts rated 10 amps. One 8-32 mtg. stud, ⅜″ lg. and locating tab on 9/16″ centers. Size, 1 15/32″ x 2 25/32″ x 2 3/32″, less terminals. Weight, 7 oz.

**MR Series:** Medium duty relay handles small motors, transmitters, etc. Silver contacts rated 8 amps, except SPST-NO-DB models rated 10 amps. Two 5/32″ dia. holes on 2¼″ ctrs. for MR3 and MR11; on 2⅝″ ctrs. for MR5 and MR14. Size, 2 31/32″ x 2″ x 2 3/16″. Weight, 4 oz.

**PR Series:** Heavy-duty relay. Heavy-duty screw terminals. All models except PR11AL5 have silver contacts rated 25 amps; PR11AL5 has DPDT silver contacts rated 25 amps and SPDT auxiliary contacts rated 5 amps. All models except PR11AL5 carry U/L and CSA labels. Mtg., two 3/16″ holes on 1⅞″ ctrs. Size, 2½″ x 2½″ x 3⅜″. Weight, 11 oz., max.

**PM Series:** Compact, heavy duty 4PDT type for long, dependable polyphase and heavy switching use. Screw terminals staked to phenolic front section. Silver cadmium-oxide contacts rated 25 amps at 240 VAC, 50/60 Hz resistive; 1 hp per movable arm at 120 or 240 VAC, single phase. Life, 100,000 cycles at rated load. U/L and CSA listed except 480 V. Fro key-hole and 2 rear-channel slots for 8-3 screws on 2″ x 2½″ triangular ctrs. Siz 2 21/32″ x 3 23/64″ x 2 23/32″. Weight, 14 o

**PM/PR Cover—see listing on anoth P & B page.**

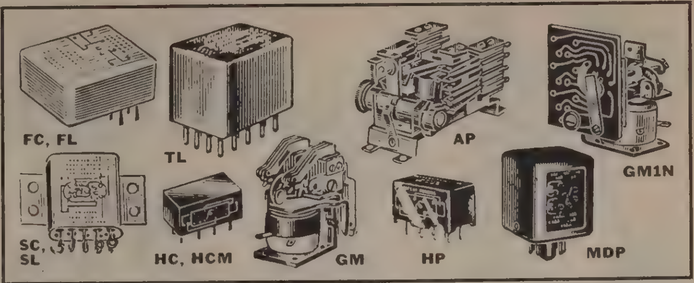
# ΛMF | POTTER & BRUMFIELD Relays



## HIGH-RELIABILITY MINIATURE RELAYS

perature Range, −65° C to +125° C.

**Series:** Conventional, miniature relay flat on printed circuit board. Takes G shock, 400G linear acceleration, and vibration to 2000 Hz. Hermetically ed; bifurcated contacts. Plug-in termi- on 0.2" grid. Meets MIL-R-5757E, also MSFC-SPEC-339. Ambient temp. ge, −65° C to +125° C. Size, 1.1" x " x .485" h. Contacts, 3 amps. Weight, oz.

**Series:** Dual coil, miniature latching e. Same as above except in operation. h coil pulses alternately (per polarity), from a reversing (polarized) source necting the coils in series. Stays latched hout coil power to reduce drain.

**Series:** Miniature permanent magnet y has high shock and vibration resist- e. Features single coil action and con- ns to standard min. coil operation ex- t polarized connections because of mag- c circuit. Positive terminal marked n red dot. Contacts rated at 2 amps. e, .795" x .359" x 1.1". Mounting: —D, g-in terminals for printed circuit or eptacle; —DA shoulder flanges with .104" x .136" holes on 1.062" ctrs.; DB, welded bracket with four .125" es on 1.062" x .281" ctrs.; —DC, two NC-2A threaded studs on .488" x .220" gonal ctrs.; —DD, plain case. All ex- t —D have hook-end solder terminal ders. SCG11D has plug-in terminals on grid. Wt., ¾ oz.

**Series:** Dual coil, miniature magnetic ching relay for low power, high shock vibration resistance. Requires connec- ns to both coils; may be connected in es for polar operation, reverse polarity to reset. Operates on 1 watt, 3 msec pulse to either coil. Size, .795" x .4" x .9". Mounting type and dimensions same as SC Series. Contacts rated at 2 amps. Weight, 2 oz.

**TL Series:** 4PDT latching relay for severe environments. Hermetically sealed case. Strong PM keeps contacts locked at coil de-energized. Transfer Time: .5 ms approx. Temperature Range: −65° to +125° C. Meets or exceeds MIL-R-5757E and also MSFC-SPEC-339. Size, .730" x 1.040" x .76", body only. Wt., 1¼ oz. Mountings: "D", plain case, plug-in header; "DA", shoulder bracket .300" from base, hook-end solder; "DB", flat plate, .593" w. x 1.60" lg., four .125" dia. holes on .281" x 1.30" centers, hook-end solder. Contacts, 3 amps. Coil Resist., 600 ohms.

**HC Series:** Miniature, non-polarized, non-latching relay hermetically sealed in half-size crystal case. High-torque motor structure and bifurcated, gold-plated silver DPDT contacts offer positive performance in low-level applications. Contacts rated dry circuit to 2 amps at 28 VDC resistive. Meets or exceeds applicable sections of MIL-R-5757E, and complies with MSFC-SPEC-339. HC11D has plug-in, plain case; HC11DA has hook-end solder terminals and shoulder brackets; HC11DB has hook-end solder terminals and flat mounting plate with two holes. Temp. range, −65° C to +125° C. Size (plain case), 0.8" x 0.4" sq., seated. Wt., ¼ oz.

**HCM Series:** Military version of HC Series. Meets or exceeds appropriate sections of MIL-R-5757E. Designed for hostile environments found in aircraft applications and for ground support equipment. Straight pins or hook solder terminals. Wt., ½ oz. without bracket.

**HP Series:** Non-polarized, non-latching half-size relay. Same structure, contact material as HC Series but enclosed in high impact dust cover. Terminals on .200" grid for plug-in or PC board. Ideal for TV cameras, desk-top computers, dictating, etc. DPDT contacts rated low level to 2 amps. Continuous duty coils rated 5 msec operate, 3 msec release max. Size, .49" x .88" x .48" max.

**HPS Series:** Hermetically sealed version of HP; uses standard HP socket. For reliable performance in logic circuit applications or where prolonged submersion of PC boards in cleaning solvents may be required. Size, .810" x .410" x .410". Wt., ¼ oz.

## SPECIAL PURPOSE RELAYS

**AP Series:** Ratchet, impulse relay for reliability in on-off or reversing action for alternate operations of the control lead. Positive ratchet at all speeds on impulses as short as 60 milliseconds. Intermittent operation only. Silver contacts rated 5 amps. Three ⁵⁄₃₂" mtg. holes on 3⅜" x ⅞" triangular ctrs.; 2⁵⁄₁₆" x 3¾" x 2¼"; 7 oz.

**GM Series:** Versatile impulse/sequencing relay for single-coil latching applications. The 2 Form C contact arrangement is switched alternately by cams. Positive switching is by indirect action during drop-out of the armature. Can also be furnished with additional 2 Form C auxiliary contacts, suffix "L", operated directly by the armature. Contacts rated at 3 amps. Available with AC or DC coils. AC version operates on a 50% coil duty cycle (5 min. max.). Mounting: 8-32 tapped core with a locating boss. Size, 1.437" x 2.03" x 2.07" max. Wt., with aux contacts, 4¾ oz.; without, 4 oz.

**GM1N Series:** Relays employing basic structure of GM Series with unidirectional printed circuit boards in choice of 10 or 12 steps. Board is attached to ratchet shaft extension. Movable contact arm advances one position each time armature drops out. Contacts rated at .25 amp. Size, 1.875" x 2" x 2.312". Wt., approx. 4 oz.

**See another P & B page for accessories.**

## MDP SERIES SMALL POLARIZED RELAYS

all size, ultra-sensitivity and high speed switching combine th efficient. bounce-free contact action. Operation depends on th magnitude and direction of coil current. Temp., −60° C to 85° C. Size, 1½" sq. x 1¹³⁄₁₆" h. (seated); wt., 4¼ oz. Plastic st cover; 8-pin or 12-pin plugs.

### BI-STABLE TYPES (1 FORM C)

mature remains in its last energized position on coil de-energize. ngsten and Paliney contacts rated .01–1 amp resistive with table arc suppression, 25–150 V.

## SPECIAL PURPOSE RELAYS

**KB (Open) and KBP (Enclosed) Series:** Latching relay with release and trip coils at same voltage. One sets the latch and the other releases. Operates on momentary impulse to either coil. Silver contacts are rated 5 amps; suffix "G" indicates silver-cadmium contacts on movables rated at 10 amps. AC open relays with 5 amp contacts are UL and CSA Listed. **Type KB** are open relays with two 5/32" holes on 1 3/8" mtg. ctrs.; size, 1 13/16" x 3 7/32" x 2 1/8". **Type KBP** have dust cover and 20-pin octal plug for Amphenol 77M1P-20 or similar socket; size, 1.781" x 2 13/32" x 3.56" max. seated. (Not UL or CSA Listed.)

**KDP Series:** Compact relay in dust cover provides 8 Form C (8PDT) switching with bifurcated contacts for simultaneous switching of 8 isolated outputs. Designed for dense packaging applications in electrical control systems. Operate speed 15 msec at 24 VDC nom. and 25° C. Contacts rated 1 amp at 30 VDC resistive or 0.5 amp at 120 VAC. Size, 1.19" x .56" x 1.54" max. Weight, 1 1/3 oz. without socket.

**KL Series:** High dielectric phenolic insulation for extra versatility. Gold-flashed silver contacts rated 5 amps at 120 VAC, 50/60 Hz. Two 6-32 mtg. holes on 1 7/16" centers. Size, 1 23/32" x 1 59/64" x 2 1/32". Weight, 5 oz.

**KLT Series:** Continuous duty coils, 6 W at +25° C. Contacts rated 3 A at 120 VAC, 50/60 Hz res. Two 6-32 holes on 1 7/16" ctrs. Size, 1 59/64" x 1 15/16" x 1 53/64". Wt., 4 oz.

**KM Series:** Subminiature relay for use where size and weight are critical factors. Silver contacts rated 2 amps. Solder lug terminals. Has 2-56 tapped hole and locating half-punch for mtg. Size, 11/16" x 1 1/8" x 53/64". Weight, .58 oz.

**KT Series:** Antenna switching relay has glass base insulation for minimum RF loss to switch 300-ohm line. Gold-flashed silver contacts rated 5 amps. Single 6-32 mtg. stud. Size, 1 15/16" x 1 5/16" x 1 11/16". Wt., 1 1/2 oz.

**KUL Series:** Commercial magnetic latching relay uses permanent magnet in parallel with normal magnetic circuit. Good memory stability; for continuous duty. Clear, high impact plastic case. Contacts rated 5 or 10 amps at 28 VDC resistive or 120 VAC, 80%, PF. Size, 1.406" x 1.531" x 2.156" max. Wt., 3 1/2 oz. See KUP sockets.

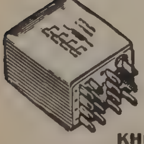
**PC Series:** Single coil impulse latching relay for on-off and current reversal switching on alternate pulses. Gold-flashed silver cadmium oxide contacts rated 7.5 amps. Two 5/32" mtg. holes on 2 5/8" centers. Size, 2 5/64" x 2 1/16" x 2 31/32". Weight, 5 oz.

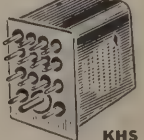
**SA Series:** Stepping switch, 12-position relay with printed circuit strips for currents up to 250 mA. Armature-driven pawl and ratchet wheel driving movable contact in 30° steps. Two 6-32 holes, 1 13/16" ctrs.; 2 17/32" x 2 15/32" x 1 25/32". Weight, 4 oz.

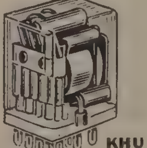
## BUZZER

**BU Series Buzzer:** AC operated coil with spring steel armature; buzzes when coil is energized. UL component recognized. Mounting, 6-32 tapped core. Size, 1 1/32" x 1 1/32" x 1 3/8". Weight, 1 5/8 oz.

## GENERAL PURPOSE TELEPHONE RELAYS







### SERIES KHP, KHS (SEALED) AND KHU (ENCLOSED) TYPES

Small, rugged 4PDT, AC or DC relays. KHU, clear polycarbonate and KHP has nylon dust cover; KHS is hermetically sealed in metal enclosure. For data processing and computer applications. Contacts available: Suffix **11** denotes gold-flashed silver rated 3 amps, 30 VDC or 120 VAC, resistive; suffix **12** denotes silver-cadmium oxide rated 3 amps; suffix **13** gold alloy contacts for low level to 2 amp applications; suffix **16** gold overlay on silver, bifurcated contacts rated 1 amp at 30 VDC, resistive, or 120 VAC. Mount by solder terminals and 3-48 stud 5/16" lg. Adaptable to sockets (listed on another page). Type KHU carries UL component recognition.

## GP SERIES "PIC & BUILD" KITS

flexibility permitted using separate coils and switches for
combinations of up to 20 types of relays. Permits easy, rapid
ging of coils for different sensitivities; switches for variable
ct arrangements. Silver contacts rated 5 amps. Mounts with
tapped core and locating half-punch. Weight, 4 oz. average.

## KNP GENERAL PURPOSE RELAYS

Small relays for general purpose applications where chassis space is limited. Enclosed in a clear, polycarbonate dust cover and recommended for AC or DC control applications. Relays have silver-cadmium oxide contacts for SPDT, DPDT or 3PDT switching. Relays are UL Recognized under Component Program for 1/10 HP at 120 VAC; 3 A at 32 VDC resistive; or 3 A at 240 VAC, 80% P.F. Relays have .110" quick-connect solder type terminals for easy connections. Can be mounted with No. 3-48 stud, or snap-in sockets with solder or printed circuit terminals. Size, .980" x 1.00" x 1.415" max. Weight, 1.4 oz. without socket.

**BS Dust Cover:** Sheet metal enclosure. Small unit for BS relays up to 6 Form C (6PDT, BS23); size, 1¼" x 2 3/16" x 3 27/32" plus ⅝" knob; wt., 6.5 oz.

**"P" Cases:** Clear, high-impact plastic case for mounting rectifiers, capacitors, resistors, etc. Octal-type plug with 8 or 11 pins, four screws. **9PM1 Adapter:** For mounting PM on PR holes. Box of 10.

**MS/MR Dust Cover:** For MS or MR Series relays; snaps onto metal base; relay mounts on pre-drilled base. **PM and PR Dust Covers:** Sheet metal base; aluminum cover, gray hammertone finish. Four ½" conduit knockouts; 3 #10 holes, 1⅞" x 4⅛" centers. **9PM2** is plastic cover.

**9KR15 Hold-Down Spring:** Fits KCP or KRP plug-in relays. Stainless steel. Two 5/32" holes on 1 5/16" ctrs.

**9KR31 8-Pin Socket:** For KRP, KAP, KCP and MDP plug-in relays. Screw terminals. Molded Lexan® frame.

**9KR32 11-Pin Socket:** For KRP, KAP, and KCP plug-in relays. Screw terminals. Molded Lexan frame.

**9KU3 Hold-Down Spring:** For KUP Series relays. Fits both pierced solder and printed circuit sockets.

**9KA1 Hold-Down Spring:** For KAP Series.

**9KD2 Socket:** For KDP Series. Solder terminals.

**9KD3 Hold-Down Spring:** For KDP Series.

**9KH1 Socket and Retainer:** Solder terminal sockets and retainers for KHU and KHP relays.

**9KH2 Socket:** Printed circuit terminal sockets for KHU and KHP relays.

**9KH3 Hold-Down Spring:** For KHU and KHP relays.

**9KN1 Socket:** Solder terminal sockets 27E118, with grounding lug for KNP relays.

**9KN2 Socket:** Printed circuit terminal sockets 27E119, with grounding lug for KNP relays.

**9KN3 Hold-Down Spring:** 20C246 spring, for KNP relays.

**9HP1 Socket:** For HP relays. Solder terminals; with retainer.

®Reg. General Electric TM.

**9KU1 Socket and Retainer:** For KHP plain case relays. Molded nylon, pierced solder terminals and retainers. Rated at 10 amps. Two .165" mtg. holes. **9KU2 Socket:** For KUP plain case relays. Molded nylon, printed circuit type. Rated 10 amps. Two .165" mtg. holes. **9KU5 Socket:** For KUP relays. Quick-connect .187" terminals. Two .165" mtg. holes. **9KU6 Socket:** For KUP relays. Molded Lexan frame; screw terminals.

**9KUL21 Hold-Down Spring:** For KUL relays.

## KUA AMPLIFIER-DRIVEN KUP RELAY

Driven relay is KUP general purpose type. Solid state hybrid relay is designed for low power signals typical of IC's. Continuous duty operation at 24 VDC nominal control voltage; features built-in polarity protection. Control circuit sensitivity, 60 μW; requires approx. 1.2 W in activated state. Control signal between 2.4 VDC and 30 VDC will operate KUA provided specified supply voltage is applied. Contacts are gold-flashed fine silver rated 1/10 hp at 120 VAC, 60 Hz; ⅓ hp at 240 VAC, 60 Hz; 5 A at 28 VDC. Enclosed in a plain, clear polycarbonate case with .187″ quick-connect/solder type terminals that fit standard KU series sockets. Size, 1.406″ x 1.531″ x 1.906″ max. Weight, approx. 3½ oz.

| P & B No. | Contacts | Nominal Voltage | Net Each, Lots of* | | | |
|---|---|---|---|---|---|---|
| | | | 1-24 | 25-50 | 51-99 | 100-249 |

| KUA11G11 | DPDT | 24 VDC | 14.14 | 13.44 | 12.74 | 9.91 |

## JDA AMPLIFIER-DRIVEN JDT RELAY

Sensitive reed relay features same .275″ low profile, dual in-line design as JDT reed relay series. Control signal is amplified by solid state driver circuit with 100 μW sensitivity. Control signals between 2.4 VDC and 30 VDC will operate JDA when specified supply voltage is applied. Releases when control signal is reduced to .5 VDC or less. Designed for control voltage change rate exceeding 1 V/msec. Contacts rated 10 watts max. resistive per contact, 50 VDC or .5 amp max. Terminals spaced on .1″ grid centers. Approximate weight, .4 oz.

| P & B No. | Contacts | Nominal Voltage | Net Each, Lots of* | | | |
|---|---|---|---|---|---|---|
| | | | 1-9 | 10-24 | 25-99 | 100-249 |
| JDA7GB1 | DPDT-NO | 24 VDC | $15.25 | $11.38 | $9.68 | $8.77 |

## JDB SERIES SOLID STATE/REED AC SWITCH

Solid state hybrid relay designed for interfacing from DC control circuits to such 120 VAC, 60 Hz loads as fractional hp motors, solenoids and contactors. Expected life exceeds 10 million operations for a specified load current and ambient temperature combination. SPST-NO solid state "contact" is designed to carry max. load of 1.7 A rms, 60 Hz at 25° C ambient, or 1.0 A rms, 60 Hz at 55° C ambient. Operate time is 1 msec max. at nominal coil voltage at 25° C; release time, 10 msec max. Dual in-line package design has .1″ grid centers for terminals. Weight, .6 oz.

| P & B No. | Nominal Voltage | Net Each, Lots of* | | | |
|---|---|---|---|---|---|
| | | 1-9 | 10-24 | 25-99 | 100-249 |

| JDB1DD22 | 24 VDC | 14.40 | 10.74 | 9.14 | 8.28 |

## EBT SERIES SOLID STATE HYBRID RELAYS

Combines the input/output isolation of a reed relay with the inrush switching capabilities and long life of a solid state switch. EBT relays switch 7 A, 60 Hz at 55° ambient temperature with nominal load voltage of 120 V. Rated 5 A rms, 60 Hz at 55° C ambient. Min. operating current, 200 mA, 60 Hz. Expected life, greater than 10 million bounce-free operations. Operate time, 2 msec max.; release time; 10 msec max. Typical "closed contact" voltage drop, 1.1 V. Reed-triggered triac is potted in KAP-style plastic dust cover; octal terminals for standard 8-pin socket. Weight, approximately 5.5 oz.

| P & B No. | Nominal Voltage | Net Each, Lots of* | | | |

| | | 1-9 | 10-24 | 25-49 | 50 Up |
| EBT1DA52 | 6, 12, 24 VDC | $16.60 | $15.77 | $14.94 | $13.28 |

## EBA SOLID STATE HYBRID RELAY

Has all the output switching characteristics, package and moun ing of EBT, but includes a control signal amplifier. Designed operate from current source output mode of DTL and TTL log circuits; 60 μW signal will switch a 7 A load. Must operate voltag 2.4 VDC at approx. 25 μA with 24 VDC supply. Max. input, VDC or 1 mA; releases when voltage is reduced to .5 VDC less. Control voltage change rate must exceed 1 V/msec. Polari protection provided for control input and supply voltage terminal

## CPF SOLID STATE FREQUENCY SENSOR

De-energizes output relay when frequency of AC input reache upper or lower limit of adjustable bandpass that brackets 60 H e.g., 62 or 58 Hz. Relay contacts rated 10 A at 120 VAC rm 60 Hz; will drop out to stop a process, sound alarm or perfor other desired functions. Bandpass is continuously adjustable fro 56–64 Hz to 59–61 Hz. Tripping point tolerance, ±1% of ban pass limits; operates on 120 VAC, ±10%. Operating temperatur −10° C to +55° C. Solid state sensor circuit and general purpos relay are enclosed in 38-style nylon dust cover equipped wit standard 8-pin plug for socket mounting. Approx. weight, 8 o

| CPF38-70001 | SPDT | $82.80 | $78.66 | $74.52 | $66.24 |

## CPS THREE-PHASE SEQUENCE SENSOR

Solid state sensor is designed to detect reverse phase sequence an provide positive control of conventional three-phase four-wire 6 Hz circuits. Output relay de-energizes on loss of one or more phase or when phase reversal causes a combination other than the norma A-B-C relationship. Rugged, long-life general purpose relay ha silver/cadmium oxide contacts rated 10 A at 120 VAC rms, 60 H resistive. Solid state sensor circuits and general purpose relay ar enclosed in 38-style nylon dust cover. Coil designed for continuou duty in 120/208 VAC, 60 Hz, three-phase, four-wire system Operating temperature, −10° C to +55° C. Provided with stand ard 8-pin plug for socket mounting. Weight, approximately 8 o

| CPS38-90001 | SPDT | $35.50 | $33.73 | $31.95 | $28.40 |

## CPV THREE-PHASE VOLTAGE SENSOR

Provides undervoltage protection. Responds to lower than norm voltage by de-energizing output relay when average input volta drops below a predetermined level, thus activating an alarm de-energizing a process under its control. Pickup and dropou levels are designed to prevent triggering on fractional volta variations. Solid state sensor circuits and general purpose relay a enclosed in 38-style nylon dust cover. Silver/cadmium oxide te minals are rated 10 A at 120 VAC rms, 60 Hz, resistive. Coil d signed for continuous duty operation in 120/208 VAC, 60 H three-phase four-wire systems. Operating temperature, −10° C +55° C. Provided with standard 8-pin plug for socket mountin Weight, approximately 8 oz.

## DC OPERATED RELAYS

**Series:** Dependable and versatile, a fine choice for switching is from dry circuit to 5 amps. Sensitivities to 20 mW/pole ilable. Operating temp., −55° C to +72° C. Transparent losure. Three styles of contacts available: UL File No. E42810. pe R10-**E1** has solder terminals, stud or plug-in mtg. (sockets ional, see below); R10-**E2** has PC terminals, no stud mounting al suffix signifies coil ohms.

**Series Slimline® 4PDT Relays:** For PC boards; allows .6″ rd mtg. centers. Many contacts available with wide range of voltages; only .43″ thick for low profile designs. Switching ge from true dry circuit to 5 A; pull-in power, 720 mW. Size, ″ x 1.40″ x .43″. Final suffix signifies coil ohms. Type R40-**E1** solder terminals or plug-in socket mtg.; R40-**E2** has PC pins vertical mtg. less socket; R40-**E3** has PC pins for flat mtg. socket.

**R12 Series Variable Time Delay Relays:** Small size DPDT with 5 amp contacts and silicon transistor circuitry. Delay time .1 to 120 seconds in three ranges; no false operation. Critical timing capacitor meets military specifications; high resolution 15-turn potentiometer. Size, 1.580″ x .735″ x 1.187″.

### CU SERIES LOW-COST RELAYS

Designed for delay on operate applications in machine tool controls, copiers, office equipment, coin-operated machines, etc. Available in two types: fixed time delay (Outline Drawing G); or adjustable with external resistor (Outline Drawing H). All models have internal DPDT relay rated 10 amps at 120 VAC. Type CU-41 has plain case, 1.531" x 1.406" x 1.096" high; mounts in same sockets as KUP Series relays. See another P & B page for listings. Type CU-42 has slotted flange case. Weight, 3½ oz.

*Value of external resistor required for maximum delay time.

### CD SERIES GENERAL PURPOSE TYPES

Economically priced, solid state relays are dependable and accurate, available with a wide variety of operational configurations. Offer accurate time delay, fast reset time and excellent repeatability. Series includes models for both 120 VAC and 24 VDC operation, and choice of two models of timing: knob-adjustable, with internal relay (CD-38) or for use with external relay (CD-21 and CD-45); or adjustable with an external resistor (CD-31). Accuracy over temperature and voltage range, ±5% of nominal. Repeatability, ±1%. Fast reset time, 60 msec. Dial setting, time-calibrated ±5% of full-scale. Operating temperature, –40° C to +55° C. Continuous duty. Rugged plastic enclosures. All relays listed provide time delay "on operate" except CDB-38-70012 and CDD-38-30012, which have delayed release when control circuit is de-energized (supply circuit must be energized continuously; see Outline Drawing C). Size: **CD-38,** 1.781" x 2.375" x 3.562" h.; wt., 8¼ oz. **CD-21,** 1.406" sq. x 2.562" h.; wt., 4¼ oz. **CD-31,** .859" x 1.109" x 1.28" h.; wt., 2 oz, **CD-45,** 2.5" x 3" x 2.75" h.; wt., 6 oz.

### CH SERIES LOW-COST TYPES

Engineered for a wide range of industrial applications where not-too-critical performance suffices and where economy is more important than precision timing accuracy. Enclosed in a molded white nylon dust cover, CH units are knob-adjustable (except CHA-38-70001, fixed delay) and have plug-in octal terminals and an internally mounted, quality P & B DPDT relay. Accuracy, ±10% of nominal. Repeatability, ±2%. Reset time, 100 msec. Operating temperature, –10° C to +55° C. Dial setting, reference scale. Polarity reversal protection on DC. Size, 1.781" x 2.375" x 3.562" high, maximum. Weight, 4 oz.

| P & B Number | Out-line Dwg. | Time Delay, Seconds | Input Voltage | Notes | Net Each 1-9* |

### CK SERIES

Available in three types: Fixed, resistor adjustable and knob adjustable for delay on operate applications. Similar to CH Series with internally mounted 10 amps DPDT relay. Enclosed in white nylon dust cover for compact and convenient assembly. Does not false operate and will time as low as 0.1 sec. For AC or DC applications where false operation cannot be tolerated. CK units are knob adjustable except CKA and CKC, fixed delay. Reset time, 60 msec. Equipped with plug-in octal type terminals. Size, 2.375" x 1.781" x 3.562" h. max. (with knob). Weight, 4 oz.

| P & B Number | Out-line Dwg. | Time Delay Seconds | Input Voltage | Notes | Net Each 1-9* |
|---|---|---|---|---|---|
| CKA-38-70010 | A | 10 | 120 VAC | a | $21.90 |
| CKC-38-30010 | A | 10 | 24 VDC | a | 20.90 |
| CKF-38-70010 | J | .1 to 10 | 120 VAC | a | 22.05 |
| CKH-38-30010 | I | .1 to 10 | 24 VDC | a | 21.05 |
| CKB-38-30010 | A | .1 to 10 | 24 VAC | a | 22.95 |

| CKB-38-70120 | A | 1.2 to 120 | 120 VAC | a | 22.95 |

**Notes: a,** Has internal relay with DPDT contacts rated at 10 amps, 120 VAC. **b,** Use with P & B Type KRP5AG, KRP11AG or KRP14AG, 120 VAC relays. **c,** Use with P & B Type KRP5DG, KRP11DG or KRP14DG, 24 VDC relays. **d,** Use with P & B Type KHP17D11, 24 VDC relay. **e,** As supplied, unit has fixed time delay of 180 secs; adjustable to 1.8 sec, with external resistor (not furnished). **f,** Use with P & B Type PR11AY, 120 VAC relay. **g,** Provides delay on release; all other types have delay on operate.

**★QUANTITY PRICES AVAILABLE ON REQUEST**

## SOLID STATE FIXED AND ADJUSTABLE TIME DELAY RELAYS

### CL SERIES FIXED AND ADJUSTABLE RELAYS

r applications where false operation cannot be tolerated. Designed delay on operate. Similar to CU Series except do not false erate when timing interval is interrupted. Includes internally unted DPDT 10-amp relay enclosed in yellow polycarbonate st cover. Available in fixed, resistor-adjustable or knob-adjust- e types. Reset time 150 msec. Plug-in type terminals and rious enclosure styles available. Types CLA and CLC, fixed; pes CLF and CLH, resistor adjustable; Type CLB, adjustable ob with reference scale. Size, 1.531″ x 1.406″ x 1.906″ max. ept CLB style, 1.531″ x 1.406″ x 2.782″ max. including knob. eight, 3.5 oz.

| P & B Number | Out-Line Dwg. | Time Delay, Seconds | Input Voltage | Ext. Resis. Ohms* | Net Each 1-9* |

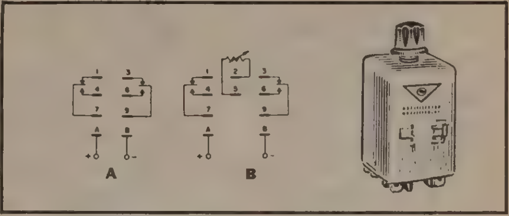
alue of external resistor required for maximum delay time.

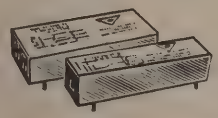


### CUB SERIES KNOB-ADJUSTABLE RELAYS

Designed for delay on operate, DPDT relay and solid state delay circuit are assembled in a slightly taller case than other CU types. Timing intervals adjustable over 1 to 10 and 1 to 120 seconds. Repeatability ±3%. For 120 VAC operation. Size, 1.531″ x 1.406″ x 2.782″ max. including knob. Weight, 3.5 oz.

| P & B Number | Out-line Dwg. | Time Delay, Seconds | Input Voltage | Net Each 1-9* |
|---|---|---|---|---|
| CUB51-70010 | A | 1 to 10 | 120 VAC | $16.30 |
| CUB51-70120 | A | 1 to 120 | 120 VAC | 17.85 |

## SOLID STATE CJ SERIES DRY REED TIME DELAY RELAYS



Series time delay dry reed relays combine the basic timing aracteristics of time delay relays with the long life and per- rmance of miniature dry reed relays. Two CJ Series types are ailable: **CJC** fixed time delay on operate with internal relay ntacts rated at 10 VA, and **CJH** external resistor-adjustable lay on operate. Pin terminations are for PC board mounting. **me Delay Periods:** Choice of 3 sec, 0.1 to 10 sec, or 1 to 120 c, adjustable to ±10% at nominal voltage at 25° C ambient mperature. **Operating Temperature:** −10° C to +55° C. **ntact Forms:** Up to 1C (A+B) in three cavities. **Size:** 2.718″ ax. x 0.688″ to 1.094″ x 0.710″. Weight, 1½ oz. approx.

| P & B Number | Time Delay, Seconds | Input Voltage | External Resistor Ohms* | Net Each 1-9* |
|---|---|---|---|---|
| CJC01-20003 | 3 | 12 VDC | None | $19.30 |
| CJC01-30003 | 3 | 24 VDC | None | 19.30 |

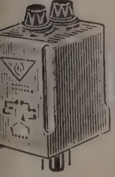
| CJH03-30010 | 0.1 to 10 | 24 VDC | 750K | 21.70 |
| CJH03-30120 | 1 to 120 | 24 VDC | 1.8 megs | 24.45 |

*Value of external resistor required for maximum delay time.

## SOLID STATE CS SERIES VOLTAGE SENSORS



Economical solid state units for critical voltage sensing applications, including generator controls, battery chargers, high/low voltage indicators. Available in two types: adjustable pick-up and drop-out, or adjustable drop-out and fixed pick-up. Nylon dust cover, with octal plug. DC types have polarity protection. Sensing current drain, 3 mA maximum. Maximum current drain, 30 mA after sensing. Set point accuracy, 1%. Range tolerance, ±5%. Operating temperature, −10° C to +55° C. Load switching relay contacts: 2 Form C DPDT rated 3 amps at 28 VDC resistive, 120 VAC resistive. Size, 1.75″ x 2.375″ x 3.593″ high max. Weight, 8 oz.

| P & B Number | Pick-up Range, Volts | Drop-Out Range, Volts | Nom. Voltage | Net Each 1-9* |

## JR AND JRM SERIES DRY REED RELAYS

Quality-made dry reed relays featuring fast response, excellent sensitivity, reliable performance, and choice of JR standard or JRM miniature sizes. Ideal for data processing, computer equipment, logic circuitry, voltage or current sensing applications, and various other types of sophisticated control circuits. Two basic types of glass dry reed switches are utilized singly or in groups to form a wide selection of operational configurations; either reed switch may be magnetically biased. Each series is offered in five package sizes of from one to five capsules in a nylon bobbin placed inside an operating coil. All relay assemblies are furnished in protective metal covers; terminal pins are welded to the reed terminations and extend as printed terminals. The recently introduced JRM miniatures, only 1.125″ w. x 0.468″ h., are designed for applications where contact ratings do not exceed 10 watts.

Both JR and JRM relays employ dry reed glass capsules with two basic types of contact arrangements: Form A (SPST-NO) and Form C (SPDT). With permanent magnet biasing Form A becomes Form B (SPST-NC), an arrangement requiring that coil polarity be observed and which uses a two-cavity bobbin. By combining one Form A with one Form B, a single Form C (SPDT) break-before-make arrangement can be furnished; it uses a three-cavity bobbin. A true Form C (SPDT; in tables below, footnote indicates six P & B types available) uses a reed switch with two stationary and one movable contact. The movable contact is normally closed until the coil is energized, causing a true Form C (SPDT) break-before-make; it uses a single-cavity bobbin.

**Insulating Materials:** Glass-supported nylon, acetate film and glass. **Pick-Up:** 75% of nominal at 25° C. **Operate Time:** JR Series, 3 msec and JRM Series, 1 msec (including bounce) at nominal coil voltage at 25° C. **Release Time:** JR Series, 0.5 msec and JRM Series, 0.05 msec at 25° C. **Coil Power:** (Applies to all coil voltages and is based upon nominal voltage and resistance.) JR Series—one capsule, 240 mW; two capsules, 360 mW; three capsules, 720 mW; four capsules, 960 mW; five capsules, 1.5 watts. JRM Series—one capsule, 180 mW; two capsules, 275 mW; three capsules, 420 mW; four capsules, 540 mW; five capsules, 720 mW. **Size:** JR Series, 2.715″ w. x 0.656″ h. max.; JRM Series, 1.125″ w. x 0.468″ h. max. (See diagrams below for weights and other dimensions.)

## JRA SERIES DRY REED RELAYS

For applications where stray magnetic fields and interaction of coils will not interfere with their operation. Employs a dry reed glass capsule with 1 Form A (SPST-NO) contact arrangement. **Operate Time:** 1.5 msec at nom. voltage at 25° C. **Coil Power:** (Based on nom. voltage and resistance) 550 mW. **Contact Rating:** 25 VA (2 amps or 250 V max.). **Size:** 1.95″ x .70″ x .82″ min.

| P & B No. | Nominal Coil Voltage | Coil Resistance ±10% at 25° C | Net Each, Lots of | |
|---|---|---|---|---|
| | | | 1-76 | 77 Up |
| JRA1006 | 6 VDC | 74 ohms | $1.50 | $0.77 |
| JRA1012 | 12 VDC | 290 ohms | 1.50 | .77 |
| JRA1024 | 24 VDC | 1200 ohms | 1.50 | .77 |

## JRL SERIES LATCHING DRY REED RELAYS

Reliabe bi-stable relays designed for memory work. Single-wound coils switch contacts on polarity reversal. Needs no coil current to maintain contact in either position. Can be mounted on PC boards in any position; not position sensitive. **Contact Arrangement:** 1 Form A and 2 Form A rated 15 watts; resistive available. **Operate Time:** 2.0 msec at 25° C including bounce. **Size:** 2.718″ x .890″ x .656″ max. Weight, 2½ oz.

JMS 5040 62

Reservoir of mercury and contact assembly are hermetically sealed under high pressure hydrogen atmosphere to do away with contact chatter and bounce. Make or break is positive every time. Capsule used in JMF, JMF2 (2 capsules) and JML relays has a SPDT, break-before-make (Form C), nonbridging contact arrangement. Each capsule used in JM1–JM4, JMD, JMP and JMS relays has a SPDT, make-before-break (Form D), bridging contact arrangement. JMF, JMF2, JML, JMP and JMS series achieve a high rate of sensitivity by factory-adjusted magnet biasing. Upright mounting required, but deviation from upright up to 30° causes only minor ation in operating characteristics. **Contact Ratings:** JMF, F2, JML and JMS 500 volts max. and 2 amps max., 100 VA . with contact protection unless in a low level circuit. Details simple protection circuit consisting of resistor and capacitor series are included with each relay. JM1 thru JM4, JMD JMP 500 volts max. and 5 amps max., 250 VA max. Octal e mounting except Fig. 41, 14-pin miniature plug; JMD, F, JMF2 and JMS are designed for printed circuit board inting on 0.200" grid spacing. Sizes given are overall.

| P & B apsule | Size, Inches Dia. x H. | P & B Capsule | Size, Inches W. x D. x H. |
|---|---|---|---|
| M1 | 1.105 x 3.196 | JMD | 0.750 x 0.750 x 3.190 |
| M2, JM3 | 1.531 x 3.937 | JMF | 0.625 x 0.625 x 2.062 |
| M4 | 1.687 x 3.562 | JMF2 | 1.120 x 0.78 x 2.07 |
| ML | 1.234 x 3.218 | JMS | 0.625 x 0.625 x 2.062 |

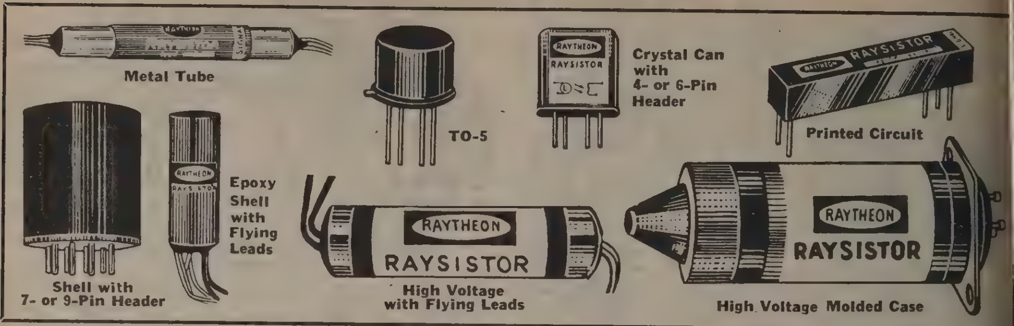
# RAYTHEON Raysistor® OPTOELECTRONIC DEVICES



Metal Tube
TO-5
Crystal Can with 4- or 6-Pin Header
Printed Circuit
Shell with 7- or 9-Pin Header
Epoxy Shell with Flying Leads
High Voltage with Flying Leads
High Voltage Molded Case
RAYTHEON
RAYSISTOR

The Raysistor® is a four-terminal optoelectronic device which performs a variety of control functions. It provides noise-free control of AC or DC signals over a wide dynamic range without transients or contact (or wiper) chatter. Since there are no moving parts, Raysistors are exceptionally rugged and have inherently long life in such typical applications as variable resistors, solid state switches, relays, and voltage or signal isolators. These units operate on the principle of controlled light acting on a photoresistive element. No electrical or mechanical connection exists between the control and signal circuits. Available in the ten case styles described at right.

®Registered Raytheon Company trademark.

### CASE STYLES AND SIZES

Metal tube 2.25″ lg. nom. (example, Model CK1101); standard TO-5 case 0.370″ dia. max. x 0.260″ h. max. with flexible leads 1.5″ lg. min. (Model CK1114); crystal can 0.735″ w. x 0.350″ th. x 0.745″ h. with pins 0.310″ lg. (Model CK1121); printed circuit type in case 1.94″ w. x 0.375″ th. x 0.42″ h. with PC mounting tab (Model CK1101P); shell 0.730″ dia. x 1.150″ h. with 7-pin header (Model CK2033); epoxy shell 0.900″ dia. x 1.150″ h. with 9-pin header (Model CK2042); epoxy shell 0.438″ dia. x 1.125″ lg. with flying leads (Model CK2034); high-voltage type in case 0.635″ dia. x 2.715″ lg. nom. with flying leads (Model CK2029); crystal can 0.735″ w. x 0.625″ th. x 0.745″ h. with 6-pin header (Model CK2020); high-voltage type in 1.28″ dia. x 3.65″ lg. molded case with pins 0.44″ lg. (Model CK1105).

*Nominal On resistance = typical photocell resistance when nominal voltage is applied at control terminals, measured at 25° C; won't exceed max. value indicated. †Has negative temperature coefficient; typical values: 100 megohms at +25° C, 20 megs at +65° C and 1000 megs at −55° C measured with 50-volt signal. ‡Time required for voltage across photocell to fall to 10% of initial value, measured from instant that max. rated control voltage is applied to lamp. §Time required for voltage across photocell to rise to 90% of final value from instant that max. rated control voltage is removed from lamp. #Test conditions: Signal voltage, 50 volts; signal circuit load, 100,000 ohms. •DC or peak voltage; current-limiting resistor must be used in series with control lamp (typical value, 20,000 ohms; 100,000 ohms for CK1124). ▲Control current is linear with voltage over stated range, but light source may be operated below lower limit. ■Observe correct polarity to realize specified performance. ♦Tracking. ⌶Letter N indicates gas-discharge type light source; I, incandescent type. ⧗100 mW rating applies only to room ambient temperatures and below; max. dissipation, 25 mW at 65° C. **Depends upon rate of successive firing of lamp; initial switch-on time may vary up to 100 msec; specified values apply when control circuit is energized at 2 Hz or faster rate. ††Epoxy shell. ‡‡With socket.

## AC GENERAL PURPOSE RELAYS

rate in any position. Coils are for 60 Hz operation. Ratings d are continuous unless noted otherwise. **Breakdown Voltage:** V rms, 60 Hz, opposite polarity or to ground; 1000 V rms, Hz, open contacts same polarity. **Electrical Life:** 100,000 ations at rated load.

**Type 84**—Totally enclosed type with silver alloy contacts rated at 125/250 VAC. Models 84-922–928 rated 3 amps at VAC or 1.5 amps at 250 VAC pilot duty. All others: SPNO— mps, resistive; 8 amps (25 amps inrush) inductive. SPDT—8 s resistive; 8 amps (18 amps inrush) inductive. Models 01–908 have screw terminals; models 84-912–928 have ¼" terminals. **Size:** 2⅜" x 1⅝" x 1½" overall. Mounting hard- e included in boxed quantity only.

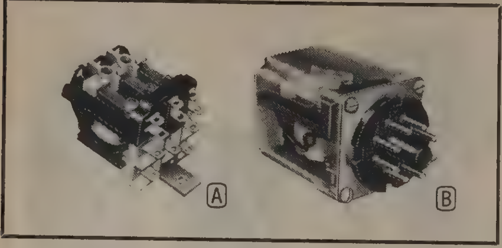
# AC-DC Relays



## AC-DC GENERAL PURPOSE RELAYS

**Contact Rating:** Button: Fine silver contacts rated ⅙ hp, inductive, 10 amps, resistive at 120 VAC; ⅓ hp, inductive, 5 amps resistive at 240 VAC. Crossbar: Gold alloy contacts rated 1/10 hp, inductive, 5 amps, resistive at 120 VAC; ⅙ hp, inductive, 3 amps, resistive, at 240 VAC. Both types rated 5 amps resistive at 28 VDC. **Breakdown Voltage:** 1500 V rms, 60 Hz, opposite polarity or to ground; 1000 V rms, 60 Hz, open contacts with same polarity. **Coil Rating:** 1.5 watts DC; 3.0 watts nominal AC (4 watts maximum, 4.5 watts inrush). **Pick-Up:** 75% DC, 85% AC. **Maximum Temperature:** 160° F ambient. **Electrical Life:** 100,000 operations at rated load. **Mechanical Life:** 10 million operations, no load (60 per minute).

## OPEN TYPE SOLDER TERMINALS (FIG. A)

Designed for front mounting. Suitable also for single-hole screw or stud rear mounting. All terminals out front. One-piece molded bobbin and terminal board construction. Highly resistant to arc tracking. **Size:** 1¹⁵⁄₁₆" x 1⁵⁄₁₆" x 1⁵⁄₁₆".

## OPEN TYPE PRINTED CIRCUIT RELAYS

With 5-amp crossbar contacts. Similar in appearance to solder terminal type (Fig. A) but with printed circuit terminals. May be controlled by SCR, providing firing angle is no more than 10°. **Size:** 1¹⁵⁄₁₆" x 1⁵⁄₁₆" x 1⁵⁄₁₆".

## AC-DC GENERAL PURPOSE RELAYS (CONT'D)

### CLOSED TYPE QUICK-CONNECT TERMINALS (FIG. A)

closed relay designed for front mounting, or polarized mount-
in Type 93-153-1 socket (listed below). Quick-connect .20" x
7" terminals. Hi-impact case. **Size:** 2⅛" x 1⁷⁄₁₆" x 1⁹⁄₁₆".

## AC TIME DELAY RELAYS

Available in thermal, rectifier/capacitor and adjustable types, delay after energization or de-energization. Fixed timing cycle with non-instantaneous reset. Operate in any position. Quick-connect wiring terminals included for all types.

B **Type 59 Thermal Time Delay Relay**—Ambient compensated. **Time Delay After Energization:** Fixed; 15–45 seconds to close. **Reset Time:** Approximately 60 sec. Fine silver contact rated 3 amps, 125/250 VAC, pilot duty. **Electrical Life:** 100,000 operations, at rated load. **Breakdown Voltage:** 1500 V rms, opposite polarity or to ground: 1000 V rms, open contacts same polarity. **Size:** 3⅜" x 2⅛" x ⅞" overall. Two holes for #8 screw. Resilient mounting.

| Part No. | Operating Volts | W | Net Each, Lots of 1-24 | 25-49 | 50-99 | 100-249 | 250-499 | 500-999 |
|---|---|---|---|---|---|---|---|---|

| 59-903 | 230/240 | 10.0 | 4.23 | 3.81 | 3.38 | 2.96 | 2.96 | 2.83 |

C **Type 84T Rectifier/Capacitor Time Delay Relay**—Totally enclosed. SPDT contacts rated 3 amps, 125 VAC; 1.5 amps, 250 VAC, inductive. Available in two actions: Delay after coil de-energized (Part No. with **D**) and delay after coil energized (Part No. with **E**). **Delay Time:** 2 sec, ±25%. **Reset Time:** Approximately 4 seconds. Life and breakdown voltage same as Type 59. **Size:** 2⅝" x 2¼" x 1½" overall. Two holes for 6-32NC-2 on 2.188" ctr.

| Part No. | Coil Volts | Net Each, Lots of 1-24 | 25-49 | 50-99 | 100-249 | 250-499 | 500-999 |

D **Type 187 Solid-State Field-Adjustable Time Delay Relay**—Totally enclosed in metal case with flat bracket; quick-connect terminals. SPNO contacts rated 1 amp, 120 VAC inductive. Hidden trimming resistor for tamper-proof field timing adjustment. Can use types 93, 84, 91, 92, 129, 143 or 75 as slave relay. **Time Delay:** 0.5 to 90 seconds on pick-up. **Repeat:** ±2% at 25° C and nominal voltage. **Reset Time:** 100 msec. **Size:** 3" x 1¾" x 2¼".

## MINIATURE DC SENSITIVE RELAYS

Isolated gold alloy, crossbar contacts at 2 A, non-inductive, 28 VDC, 115 VAC. Molded combination coil bobbin and terminal block for minimum moisture absorption. Protective covers. Open and plug-in types. **Breakdown Voltage:** 1000 V rms, 60 Hz. **Operating Ambient:** −55° to +85° C. **Electrical Life:** 1,000,000 operations at 0.5 amp; 300,000 at 1.0 amp; 100,000 at 2.0 amps, all at non-inductive load. **Mechanical Life:** 100,000,000 at 180 operations/min., no load. **Operate Time:** 20 msec including bounce. **Vibration:** 2G, 10–55 cycles. **Shock:** 2G, operate; 10G, non-operate.

### SINGLE POLE DOUBLE THROW

**Coil Power:** 40 mW, min.; 1.5 W, max. **Overall Size:** 1⁵⁄₁₆″ x 1½″ x 1⁷⁄₁₆″, open type; 2″ x 1⅜″ x 1⅜″, plug-in type. MS25 has clearance for two #5 screws.

## DC POWER CONTACTORS

F **Type 70**—Solenoid actuated DC power contactors feature drawn steel dust-proof enclosure, copper stud power and coil terminals, double break rotating disc movable contact, isolated coil terminals. **Magnet Coil Rating:** 9 watts. **Breakdown Voltage:** 500 V rms, 60 Hz. **Terminals:** SPDT has six; 70-913 to 70-920, three; 70-901 to 70-908, four. **Size:** 2½″ x 3½″ x 2½″ (SPDT, 3⅜″ x 3⁹⁄₁₆″ x 2½″). Mtg. holes on 2.109″ ctrs. Hardware included.

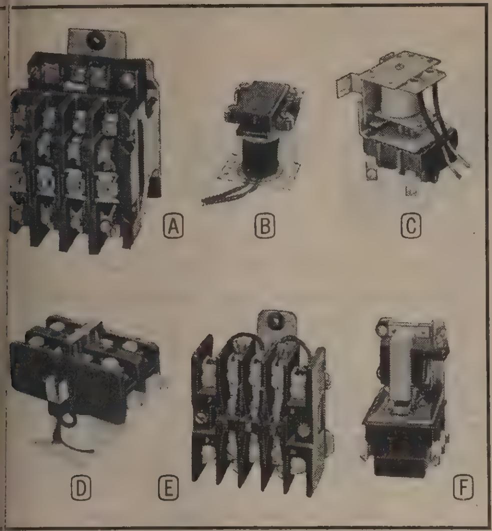
# AC Power Contactors



## AC POWER CONTACTORS

**Type 75**—DPNO; screw power terminals, #8 solid wire max. Quick connect or 13″ lead coil termination. Protective contact er. Hardware included. **Size:** 2½″ x 2⅛″ x 2¼″ overall.

**Type 80**—DPNO; screw power terminals, #8 solid wire max., 9″ coil lead wire termination. Hi-dielectric insulation; double ak contacts. **Size:** 3⅛″ x 2⅝″ x 2⅞″ overall.

**Type 143**—DPNO; screw power terminals, #10 solid wire max. Auxiliary quick-connect terminals; straight-thru wiring; ible break contacts. Hardware included in boxed quantity only. e: 3¼″ x 2⅜″ x 2½″.

**Type 85**—3PNO; screw terminals, #8 solid wire max. Double break contacts; ¼″ auxiliary wiring terminals. Straight-u wiring. Hi-dielectric insulation. Resilient mounting. **Size:** ″ x 3⅛″ x 2⅝″ overall.

**Type S30**—3PNO; solenoid actuated type. Screw power terminals, #8 solid wire max. Enclosed contacts. Double break o-Kiss'' contact action. Cast aluminum base. Laminated "C" gnet and self-aligning "T" armature. High dielectric arc resisnt molded contact block and carrier. Epoxy-clad magnet coil. silient mounting. **Size:** 3⅞″ x 2⅜″ x 2½″ overall.
**pe S40**—3PNO; similar to above except pressure connector wer terminals, #6 solid wire max. **Size:** 3⅞″ x 2¾″ x 2½″ overall.

Quick-connect tab terminals; 75-901 to 75-903, 13″ leads.

## AC INDUSTRIAL CONTACTORS

Ⓐ Unique design permits common base, coil and magnet for contactor ratings of 10 amps (type C10), 15 amps (type C15 and CR15), 30 amps (type C30 and CR30) and 50 amps (type C50R). Double break contact action. Epoxy sealed molded magnet coil housing. Replaceable contacts and coil. Laminated corrosion resistant E-type magnet and self-aligning armature. Hi-dielectric arc resistant molded contact block and carrier. Magnet coil 50/60 Hz. Resilient mounting. All 10 and 15 A contacts can be converted to NC with screwdriver. Pressure type power terminals; #10 solid wire used on C10, C15 and CR15; #8 solid wire on C30; #6 stranded wire on types CR30 and C50R. Types CR15 and CR30 are suitable for motor reversing and transformer tap changing industrial applications; consist of two type C contactors mounted side-by-side on common steel base; hardened steel mechanical interlock prevents simultaneous closing of both contactors; no cross phase wiring. **Size:** 3⅝″ x 2¾″ x 3⅜″ overall; dual contactors (types CR15 and CR30), 3⅝″ x 5⁹⁄₁₆″ x 3⅜″ overall.

## REED RELAYS

### IES 191 FORM A: SPST, DPST; FORM C: SPDT

dard 14 pin, dual in-line packaged reed relays feature fast onse, reliable performance, high sensitivity and isolation tance. Best suited for test and computer peripheral equipt. **Operating Time:** 1.0 msec max. at rated voltage. **Isolation tance:** $10^9$ ohms min. Internal diode, coil suppression, romagnetic and electrostatic shielding optional.

## REED SWITCHES

Highly adaptable devices for control of low-power electric circuits. Faster than mechanically operated miniature snap-acting switches and less costly than solid-state switches. Highly sensitive and immune to contamination of contacts. Patented General Reed form C switch is not magnetically biased as other form C's on the market. It is a "true form C". **Min. Gap Breakdown Voltage:** 200 VDC. **Initial Contact Resistance:** 0.10 ohm max.

### FORM A—SPST

## AC SYNCHRONOUS MOTORS

Bidirectional, heavy duty motors have extremely efficient magnetic circuit for increased torque. Outperform other motors of same frame size. Static detent torque present when unenergized. Speed of motor is 72 rpm at 120 VAC, 60 Hz. Size of unit is given by first four digits of Sigma Number; e.g., 2223 = 2.2″ x 2.3″ (dia. x length).

| Sigma No. | Torque Oz-In. | Resis., per Phase Ohms | Current Nom. | Net Each |

### SERIES 55 DPDT, 3PDT, 4PDT AC AND DC RELAYS

Rugged, reliable relay for continuous heavy-duty, multipole switching of resistive loads to 15 amps at 230 VAC. Handles 60-amp inrush current without contact welding. Mechanical life at least 5 million operations. Temperature range, +14° to +158° F. Contact rating: Resistive, 15 A at 230 VAC, 10 A at 28 VDC; inductive, 7.5 A at 230 VAC, 5 A at 28 VDC. All unenclosed; screw mounted, **55F2:** 1 17/32" w. x 1 29/32" d. x 2 1/32" h. **55F23:** 2 13/64" w. x 2 3/32" d. x 2 3/32" h. **55F3:** 1 15/16" sq. x 2 7/32" h. **55F33:** 2 23/64" w. x 2 7/64" d. x 2 9/32" h. **55F4:** 2 13/32" w. x 1 15/16" d. x 2 21/64" h. **55F43:** 2 21/32" w. x 2 7/64" d. x 2 13/32" h. ### SERIES 57 SPDT, DPDT, 3PDT AC AND DC RELAYS

Snap-switch power relay for single or multiple switching of 10-to-15 ampere industrial loads as fractional horsepower motors, solenoids. Contact assembly is totally enclosed; snap-action precision switch featuring positive response to slowly-changing signals, isolation permitting reliable 3-phase switching of 5-to-15 amperes. All unenclosed, screw-mounted, screw terminals. **Load Rating:** Resistive, 15 amps at 230 VAC, 10 amps at 28 VDC; inductive (at 0.6 power factor), 7.5 amps at 230 VAC, 5 amps at 28 VDC. **Temperature Range:** +14° to +158° F. **Size:** 2 1/32" x 2 31/64" max. x 2 13/16" max. h. Weight, 6 to 11 oz.

## SENSITIVE RELAYS

### SERIES 48 SPDT LOW COST DC RELAYS

Excellent, low cost, sensitive relay for use in burglary, fire or police alarm systems requiring operation from 10 mW minimum input signal. Bridge-type contact structure. Solid contacts. Compliant armature for good contact wipe. Contact rating (at 28 VDC/115 VAC resistive): 2 amps. Temperature range, −4° to +158° F. **48F:** Unenclosed, screw mounting, solder terminals. Size, 1 17/64" w. x 2 9/32" d. x 1 7/16" h. Weight, 3 oz. **48RO:** Plastic dust cover, 8-pin octal plug. Size, 1 13/64" sq. x 2 7/64" h. Weight, 4 oz.

## GENERAL PURPOSE RELAYS

### SERIES 70 DPDT, 4PDT, 6PDT DC RELAYS AND SOCKETS

Miniature industrial relay for low-level to 5-amp multiple circuit switching. Choice of solder or printed circuit terminal sockets for fast, easy connection. UL and CSA approved. Interchangeable with similar commercial relays in communications, data processing, process control equipment and recording devices. Choice of voltage adjusted (standard or bifurcated contacts) or current sensitive adjusted. Voltage adjusted with bifurcated contacts rated at 50 million operations. Sensitive current-adjusted pick up from signals as low as 85 mW. Mechanical life of both types is 100 million operations. **Temperature Range:** +14° to +158° F.

**2-AMP STANDARD CONTACTS**

## GENERAL PURPOSE RELAYS

### ERIES 11 SPDT SMALL, LOW-COST RELAYS

ted for 1-amp switching at 28 VDC/115 VAC resistive. DC ration from sliding-current or on-off 50 mW signals; AC opera- from .3 VA on-off signals. Good environmental capability. nperature range, −40° to +122° F. U/L and CSA Listed. enclosed. **Type 11FZ and 11F:** Screw mounting; 5 solder ter- nals. Size, $1\frac{7}{32}$" w. x $1\frac{3}{16}$" d. x $1\frac{1}{16}$" h. **Type 11F2:** Same, with ulated base. Size, $1\frac{7}{32}$" w. x $1\frac{17}{32}$" d. x $1\frac{3}{16}$" h. **Type 11FP:** oulder lug mounting; printed circuit terminals. Size, $1\frac{7}{32}$" sq. x " h. Weight, 1.2 oz. max.

### SERIES 59 SPDT SNAP-SWITCH DC RELAYS

ependable, low-cost relay for commercial applications where onomy and size determine choice. Snap-switch contact assembly ovides positive operation from on-off or slowly changing signals. ntact rating, 2 amps at 28 VDC/115 VAC resistive. Mechanical e, 1 million operations. Temperature range, +14° to +158° F. L and CSA Listed. **Type 59F1D:** Unenclosed, screw mounting, der terminals. Size, $1\frac{1}{8}$" w. x $\frac{29}{32}$" d. x $1\frac{3}{64}$" h. Weight, .8 oz. **pe 59AO1D:** Metal dust cover, 8-pin octal plug. Size, $1\frac{5}{16}$" . x $1\frac{19}{32}$" h. Weight, 1.5 oz.

| 59AO1D-24DC | 24 | 1,800 | 4.20 |

### SERIES 65 SPDT COMMERCIAL DC RELAYS

nall, low-cost commercial relay offering positive response to v-power signals. Excellent adjustment stability, sturdy con- ruction, 5-million operation mechanical life. Typical applica- ns: Remote TV channel selectors, vending machines, semi-auto- atic home slide projectors, automatic toys and games. Contact ting, 3 amp at 28 VDC/115 VAC resistive. Nominal power, 90 W. Temperature range, +14° to +158° F. All unenclosed, screw ounting. **65F1A:** Solder terminals. Size, $1\frac{1}{16}$" w. x $1\frac{3}{16}$" d. x $\frac{63}{64}$" h. **FP1A:** Printed-circuit terminals. Size, $1\frac{1}{16}$" w. x $1\frac{3}{16}$" d. x $1\frac{1}{4}$" h. eight, 1 oz.

### SERIES 50 SPDT, DPDT, 3PDT AC AND DC RELAYS

Highly efficient, compact, low-cost relay for switching of industrial loads of 5 amps to activate small solenoids or other relays. Mechanical life, 10 million operations. 50ROL types have indicating lamp which lights when coil is energized. U/L and CSA Listed. Temperature range: 50F, +14° to +158° F; 50RO and 50ROL, to +131° F. **50F:** Unenclosed, screw mounting, solder terminals. Size, $1\frac{11}{64}$" sq. x $1\frac{15}{16}$" h. Weight, 2 oz. **50RO and 50ROL:** Plastic dust cover. Size, $1\frac{3}{8}$" sq. x $2\frac{3}{32}$" h. **50RO1 and 50RO2:** 8-pin octal plug; **50RO3**, standard 11-pin plug. Weight, 3 oz. **Note:** Silver-cadmium-oxide contacts, rated 10 amps at 28 VDC/115 VAC resistive, are available on all relays listed below. To order, add suffix **SCO** to number (e.g., 50F1-6AC-**SCO**); add **10c** to prices shown for SPDT types; **15c** to DPDT; **20c** to 3PDT.

### SERIES 67 4PDT MINIATURE AC AND DC RELAYS

Miniature, rugged relays. Solder or printed-circuit terminal sockets for fast chassis top mounting and easy wiring. Relay and sockets interchangeable with comparable types. Plastic dust cover, stud mounting, 14-pin plug. **Contact Rating:** 3 amps at 28 VDC/115 VAC resistive. **Temperature Range:** −4° to +140° F. **Operations at Rated Load:** 100,000 min.; 100 million mechanical DC types; 50 million AC types. U/L and CSA Listed. **Size:** $1\frac{7}{64}$" w. x $\frac{55}{64}$" d. x $1\frac{19}{64}$" h. Weight, $1\frac{1}{4}$ oz.

# SIGMA Relays INDUSTRIAL, COMMERCIAL, MILITARY

## GENERAL PURPOSE RELAYS

### SERIES 62 DPDT, 4PDT, 6PDT UNIVERSAL-MOUNTING DC RELAYS...PLUS SOCKETS

Economical, low-level to 5-amp multiple circuit switching. Sockets designed for fast, easy connection. Interchangeable with similar commercial relays in communications, data processing, process control equipment. One million operations at max. load; 100 million mechanical. **Terminals:** DPDT type has 8-pin plug; 4PDT, 14-pin plug; 6PDT, 20-pin plug. **Temperature Range:** +14° to +158° F. Plastic dust cover, stud mounting. **Size:** All types: 1 17/64" h. x 49/64" d.; **62R2**, 61/64" w.; **62R4**, 1 3/16" w.; **62R6**, 1 25/64" w. Weight, 1 oz.

#### 2-AMP STANDARD CONTACTS

Power rating, 2 amps at 28 VDC and 115 VAC resistive.

### SERIES 68 SPDT, DPDT, 3PDT UNIVERSAL-MOUNTING AC AND DC RELAYS, PLUS SOCKETS

Versatile, low cost and high efficiency for production-line switching of light to medium power loads. Fast installation; .187" terminals may be soldered, quick-connected, or plugged into standard sockets. Life, 1 million operations at 28 VDC; ½ million at 115 VAC. Mechanical life, 10 million operations. U/L Listed. **Contacts:** Rated 10 amps. SPDT has 5 terminals; DPDT, 8 terminals; 3PDT, 11 terminals. **Temperature Range:** AC types SPDT and DPDT, −49° F to +131° F; 3PDT to +113° F; DC types to +158° F. **Size:** 1.531" w. x 1.406" d. x 1.906" h. in polycarbonate dust cover. Wt., 2.9 oz. max.

### SERIES 63 DPDT, 4PDT TELEPHONE-TYPE DC RELAYS

Compact, telephone-type relay for reliable, minimum-distortion switching of low-level audio signals and use in logic circuitry. Good sensitivity, low and stable contact resistance; 10-million operation life. Contact ratings: 2 amps at 115 VAC; 1 amp at 28 VDC; .6 amp at 48 VDC. Nominal power: 720 mW. Temperature range, +14° to +158° F. **63RO2:** Plastic dust cover; 8-pin octal plug. Size, 1 13/32" w. x 1 19/32" d. x 2¼" h. Weight, 4 oz. **63RO4:** Plastic dust cover; 20-pin plug (must be used with socket AD35). Size, 1 13/32" w. x 1 13/16" d. x 2¼" h. Weight, 4 oz.

## SENSITIVE RELAYS

### RIES 5 SPDT HIGH-SENSITIVITY DC RELAYS

xceptionally versatile, rugged relay; highly sensitive, precise, e. Unusually high contact forces at inputs as low as 1 mW stment SS; 5 mW, S), gradually changing or on-off. Useful verload-underload detection. Reacts without amplification to te variations from normal. Withstands heavy voltage or nt 30-to-1 overloads. Contact ratings, S, 1 amp; SS, .25 amp; 28 VDC/115 VAC resistive. All types are U/L Listed se in burglary protection equipment. Temperature range: S, to +158° F; SS, +50° to +140° F. **5F:** Unenclosed, screw nting, solder terminals. Size, 1⅜″ w. x 1¾″ d. x 1½″ h. ht, 4¼ oz. **5JO:** Hermetically sealed; 8-pin plug. Size, sq. x 2⅝″ h. Weight, 7¼ oz. **5R:** Dust cover; 5-pin plug, 8-pin. Size, 1 9/16″ sq. x 2 9/32″ h. Weight, 5¾ oz.

### IES 41 SPDT INDUSTRIAL AC AND DC RELAYS

ged, versatile industrial relay. One-billion-operation me-ical life. Balanced design for coil overload capacity 4-6 times d input; long contact life. Operates from on-off AC or DC als, gradually changing DC signals. Pickup power: Adjust-t S: 40 mW; ACS: .2 VA; ACG: .4 VA. Contact rating: ACG, nps at 28 VDC/115 VAC; S, ACS: 2 amps. Temperature e, −67° to +185° F except plastic covers, to +158° F. All and dust-covered types are U/L and CSA Listed. **41F, Z:** Unenclosed, screw mounting, solder terminals. Size, 1 17/64″ 2 9/32″ d. x 1 7/16″ h. **41RO, 41ROZ:** Dust cover, 8-pin octal plug. , 1 21/64″ sq. x 2 1/16″ h. **41RO6:** Plastic dust cover, 8-pin octal . Size, 1 23/64″ sq. x 2 7/64″ h. **41JOZ:** Hermetically sealed, 8-pin l plug. Size, 1⅝″ sq. x 2⅝″ h. **41R, 41RZ:** Dust cover, 5-pin . Size, 41R-1 15/16″ sq. x 1 17/32″ h.; 41RZ-1 17/32″ sq. x 1 15/16″ h. ghts: Enclosed, 5¼ oz. max.; unenclosed, 2½ oz.

### SERIES 4 SPDT PLATE CIRCUIT DC RELAYS

Stable, precise, low cost. For vacuum tube and transistor drives, applications requiring high dropout or narrow differential, and operation from gradually changing or on-off signals. Ideal for circuits where energizing current does not drop to zero. Pickup power, 20 mW. Contact rating, 2 amps at 28 VDC/115 VAC resistive. Temperature range, +32° to +122° F. **4F:** Unenclosed, screw mounting, solder terminals. Size, 1¾″ w. x 1½″ d. x 1 15/32″ h. Weight, 2¼ oz. **4R:** U/L Listed for use in burglary protection equipment. Dust cover, 5-pin plug. Size, 1 9/16″ sq. x 2 19/32″ h. Weight, 3¾ oz.

### SERIES 42 DPDT AC AND DC RELAYS

For general-purpose applications from alarm and control systems to demand meters and timing circuits. Combines sensitivity from 100 mW with rugged design for 1 billion operation mechanical life (1 million under load). Low power minimizes coil load in circuits with limited load-handling ability. Excellent stability, high circuit isolation; coil overload capacity 4 to 6 times rated input. High release for use in circuits with high idle current. Pickup power: Adjustment S: 100 mW; G: 200 mW; ACS: .3 VA; ACG; .5 VA. Contact ratings (at 28 VDC/115 VAC resistive): ACG, G: 5 A; ACS, S: 2 A. Dust-covered and open types U/L and CSA Listed. Temperature range, −67° to +185° F except plastic covers, to +158° F. **42RO, 42ROZ:** Plastic dust cover, 8-pin octal plug. Size, 1 23/64″ sq. x 2 7/64″ h. **42RO6, 42RO6Z:** Differ in wiring only. **42JOZ:** Hermetically sealed, 8-pin plug. Size, 1⅝″ sq. x 2⅝″ h. **42F:** Unenclosed, stud mounting, solder terminals. 1 1/16″ w. x 1 19/32″ d. x 1 13/32″ h. Weight, 2½ to 5¼ oz.

## SERIES 8 PHOTOCONTROL SYSTEMS

Low cost, compact systems for light-beam control of moving objects. Range from 12 in. to 25 ft.; speeds up to 1200 operations per minute. Integral and remote systems. Replaceable incandescent lamps operate at low voltage for maximum life.

### INTEGRAL 2-PART SYSTEMS—SPDT AND DPDT

### 12-FT. RANGE—115 VAC—60 Hz

**Receivers 8P8, 8P9, 8P10 High Speed Types and 8P3, 8P5, 8P6 General Purpose Types:** Temperature range, +32° F to +112° F. Housing, NEMA Types 1 and 12. Mounting: 8P3, 8P8: Bracket, ½″ conduit, AWG #18 leads 19″ max.; 8P6 and 8P10: Bracket and 5-pin plug; 8P5 and 8P9: Bracket and 8-pin octal plug. Size, 1²⁹⁄₃₂″ w. x 3⁷⁄₁₆″ d. x 2½″ h. Weight: 8P3, 8P8, 13 oz.; others, 9 oz.

**Receivers 8R Miniature, Low-Cost Plug-In Types:** Temperature range, −40° to +140° F. Housing, NEMA Types 1 and 12. Mounting, 5-pin plug. Min. Operations: Electrical, 1 million; mechanical, 1 billion. Requires 5 ft-candle to operate; 8RCO1A releases at 0.1 ft-candle, 8RCO2A at 0.5 ft-candle. 8RCO1A U/L and CSA Listed, 8RCO2A for high ambient light conditions. Size, 1⁹⁄₁₆″ sq. x 2⁹⁄₃₂″ h. Wt., 3 oz.

**Light Source 8L3:** Used with all types. Lamp life, 10,000 hours. Mounting, bracket, ½″ conduit, AWG #18 leads 19″ max. Size, 1²⁹⁄₃₂″ w. x 3⁷⁄₁₆″ d. x 2½″ h. Weight, 13 oz.

*Source voltage 115 VAC, except **-230** types (230 VAC). †DPDT; all others SPDT.

### REMOTE 3-PART SYSTEMS—DPDT

**Subminiature Receiver 8P7 and Light Source 8L7:** Smallest units available. Range, 12″; 600 operations per minute. Lamp life, 4,000 hours. Polycarbonate housing. Mounting: Bracket, leads #22 AWG 10″ min. Size, ⁵⁄₁₆″ dia. x 1½″ l. Weight: 8P7, .32 oz., 8L7, .26 oz.

**Miniature Receiver 8P4 and Light Source 8L4:** Adjustable focus light source. Operates 25 feet from 5.5 V amplifier terminal with 4,000-hr. lamp life; 15 feet from 4.5 V amplifier terminal with 40,000-hr. lamp life. Operations per minute, 600. Black anodized aluminum housing. Mounting: Bracket, ⅜″ conduit, leads #18 AWG 10″ min. Size: 8P4, 1″ dia. x 2⁷⁄₁₆″ l.; 8L4, 1″ dia. x 2¹¹⁄₁₆″ l. Weight: 8P4, 2.9 oz.; 8L4, 2.7 oz.

**Amplifiers 8A and 8A3:** For use with 8P7–8L7 and 8P4–8L4. Solid state circuitry. DPDT output contacts. Temperature range, +32° F to +122° F. Weight, 2 lbs. **No. 8A** amplifier has plug-in replaceable relay rated for 10 million mechanical operations; contact rating, 5 amps at 28 VDC or 115/230 VAC. **No. 8A3** time delay amplifier has variable delay, 50 milliseconds to 20 seconds with ±10% repeatability; contact rating, 10 amps at 28 VDC or 115 VAC, 5 amps at 230 VAC.

**Housing AT373-1:** For use with 8A or 8A3 amplifier. JIC, oil-tight, weatherproof. Size, 10¹⁵⁄₁₆″ w. x 4¼″ d. x 11½″ h. Weight, 9¼ lbs.

## OPTO-ELECTRONIC SWITCHING DEVICES, DIGITAL DISPLAY

### SIGMA 7 MODEL 321

### DIGITAL TRANSLATOR-DISPLAY

Provides both code translation and numeric display in a si low-cost, opto-electronic module. No need for high-volt switching transistors and separate supply. Photocondu matrix, coupled optically to incandescent lamps controlled binary-coded-decimal input circuits, generates decimal out Reads 0 thru 9 on integral 7-bar neon display, lighted dire from 120 VAC, 60 Hz. Photocell-lamp combinations are Dat opto-electronic switching devices. **Temperature Range:** −40 to +50° C. **Custom readouts for temperature, pressure, volu etc. available on special order.**

### DATACEL® SERIES 301 SWITCHING DEVICE

### 1-, 2-, 4-POLE

Solid state switching for data processing input-output, autom test and machine control equipment; electronic instrumentat telephone switching; digital circuitry. Switching functions: Is tion interface, logic, data sampling, noiseless potentiometer, signal level, automatic feedback. Input-output circuit isolat Miniature lamp coupled optically to 1, 2 or 4 photoconduc cells, each functioning as bilateral switch. Input and output el AC or DC. Off or dark resistance 10 megohms min.; steady s low as 200 ohms; switching ratios in order of $10^5$. Printed cir mounting. Socket conversion to solder terminals. **Output Rat** 250 V each cell. **Temperature Range:** −40° to +50° C. S ½″ sq. x 1″ l. Weight, ¼ oz.

| 301R4-24 | 24 | 40 | 500 ohms | 75 | 6. |

*6, 12 and 24 V are incandescent; 150 V, neon (requires 150 V or AC peak to fire, and resistor in series with neon lamp to l current to 2 mA). 120 V input is neon, particularly suited 100–130 VAC line, use 47K external series resistors.

**GENERAL TIME**
A Talley Industries Company

# Solid State Timers

## INDUSTRIAL CONTROLS DIVISION

**Rear Mount Type**

**Plug-in Type**

tile standard timers meet the broadest range of applications. in or Rear Mount types; solid state timers for delay, interval, O.D. (delay on de-energization) timing modes. **Features:** otional repeat accuracy; transient protection; eleven time s; isolated outputs; AC or DC input; relay or solid state h; low operating temperature and no first cycle effect. UL CSA recognized. **Repeat Accuracy:** ±2% of set point under ant voltage and temperature; under 1 second, a constant of msec applies. **Temperature Range:** +10° C to +55° C ent. **Size:** Plug-in, 2.50″ w. x 1.875″ d. x 4.505″ h. (including h. knob and .580″ plug length) max.; Rear Mount, 3⁷⁄₁₆″ w. x d. (plus knob, .625″) x 4⅜″ h.

### TERMINATION

**-in Type:** 8-pin plug; except Series 2112 w/relay 11-pin plug. **Mount Type:** 8 terminals, delay mode w/relay; 10 terminals, val or D.O.D. w/relay; 4 terminals, delay mode solid state at; 6 terminals, interval or D.O.D. solid state output.

### HOW TO ORDER

**SPECIFY SERIES:**
**Series 2111 Plug-in Type or Series 2211 Rear Mount Type:** DELAY Mode Timer. Delay period starts on application of voltage. At end of set delay, integral relay or solid state switch energizes. When input voltage is removed, the output relay or switch de-energizes and timer resets.

**Series 2112 Plug-in Type or Series 2212 Rear Mount Type:** INTERVAL or D.O.D. Mode Timer. For these modes, input voltage is supplied to timer always with interval mode, on closure of a momentary or sustained switch, integral relay or solid state switch energizes the load for time period selected; at the end of timing period, the relay or switch de-energizes and load is removed from line. In D.O.D. mode, on closure of a control switch, the output relay or solid state switch energizes; timing period begins when control switch is opened; at end of timed interval, the relay or switch de-energizes.

**ADD INPUT SUFFIX:** Suffix **-1P** for 117 volts AC/DC, 50/60 Hz and 3.5 watts max.; e.g., 2111-**1P.** Suffix **-1C** for 24 volts AC/DC, 50/60 Hz and 3.5 watts max.; e.g., 2212-**1C.**

**ADD OUTPUT SUFFIX:** e.g., 2112-1P-**F.**

| Suffix | Type | Volts | Amps & Load | Contacts |

INDUSTRIAL CONTROLS DIVISION

## SERIES DA TIME-DELAY TIMERS

### REAR MOUNTING

**Type DA11:** Manually adjustable by knob. Apply wherever delay, interval or repeat cycle timing functions are required (repeat cycle requires two units). Internal clutch engages and disengages when motor is energized and de-energized. Resets to start position when power is removed. SPDT switch rated 20 amps at 125 or 250 VAC resistive; solder lug terminals. Min. setting, 0 sec. Repeat accuracy, ±¾ of 1% of total time range. Timing motor rated 5 watts max. at 120 VAC, 60 Hz. UL Recognized. Size, 3⅜" w. x 2¹³⁄₁₆" d. x 3⅛" h. Weight, 1 lb.

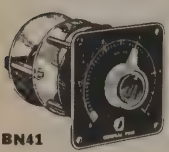
**Type DA21:** Same as DA11 but with locknut adjustment to eliminate tampering. UL Recognized.

**When ordering, specify model number, voltage, and frequency.**

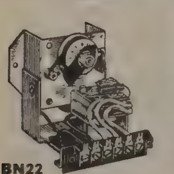
| Model Number | | Max. Time Setting | Max. Reset Time |
|---|---|---|---|
| Manual Adj. | Locknut Adj. | | |
| DA11-036 | ............... | 5.7 sec | .25 sec |
| DA11-031 | DA21-001 | 14 sec | 1.0 sec |
| DA11-032 | DA21-002 | 57 sec | 1.5 sec |
| DA11-035 | DA21-005 | 114 sec | 9.0 sec |
| DA11-033 | DA21-003 | 4.5 min | 15 sec |
| DA11-034 | DA21-004 | 9.5 min | 120 sec |

| Net Each, Lots of | | | | | | |
|---|---|---|---|---|---|---|
| 1-4 | 5-9 | 10-24 | 25-49 | 50-99 | 100-249 | 250 Up |
| $18.47 | $17.55 | $16.62 | $15.70 | $14.77 | $13.85 | $12.93 |

## SERIES BN ADJUSTABLE RESET TIMERS



**BN41**



**BN22**

Panel or rear mounting; interval or delay timing. Built-in relay, adjustable time range. Apply to machine tools, production and processing equipment or other operations requiring a compact, dependable unit for direct control of electrical loads.

**BN41 (Interval) and BN42 (Delay) Panel Mount**—Dial and setting knob with readout of elapsed time by pointer in center of knob. SPDT relay rated 10 amps at 125 or 250 VAC. Timing motor rated 5 watts max. at 120 VAC, 60 Hz. Repeat accuracy, ±¾ of 1% of total time range. Screw terminal block. Size, 3⁵⁄₁₆" sq. x 4⅜" deep, behind panel. Requires 3³⁄₁₆" dia. mounting hole.

**BN25 (Interval) and BN22 (Delay) Rear Mount**—Same specifications as BN41 and BN42 except have chassis or back panel mount. Locknut setting adjustment, where only occasional time period changes are required. UL Recognized. Size, 3.375" w. x 4.202" h. x 3.750" d.

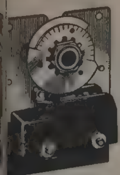
## INDUSTRIAL CONTROLS DIVISION

### SERIES RG21 REPEAT-CYCLE TIMERS



Cam-actuated, single switch timers for rear mounting. Run continuously, repeating a set cycle of make-break switching operations as long as motor is energized. Also operates a single time cycle. Cam adjustable from 7° min. to 169° max. (±3%). SPDT switch rated 20 amps resistive. Timing motor rated 3.7 watts max. at 120 VAC, 60 Hz. Solder lug terminals. 6″ leads. UL Recognized. Size, 2⁵⁄₁₆″ w. x 2½″ d. x 3⅛″ h. Weight, 1 lb.

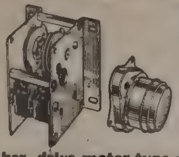
egisters minutes and tenths.

**240 VAC ELECTROMECHANICAL TIMERS AVAILABLE, PRICES ON REQUEST.**

### SERIES RE62 REPEAT CYCLE MULTI-CAM TIMERS



Same specifications as RG21, except 2 to 6 switches may be actuated during cycle. Run continuously, repeating set cycles of multiple switching operations as long as motor is energized. Complete unit requires one motor and one or more switch stacks. Spanner wrench included to adjust cams. Two-switch unit size, 2⁵⁄₁₆″ h. x 3⁵⁄₃₂″ w. x 3⁹⁄₁₆″ d.; add ¹¹⁄₁₆″ to depth for each additional switch. UL Recognized. **When ordering, specify switch stack model number, drive motor type number, voltage, and frequency.**

## NEW TYPE 472 BRACKET MOUNT RESET TIMER

External clutch reset timers provide interval or delay timing with choice of momentary or sustained contact control. Individual load, motor and instantaneous switches allow wiring flexibility; unique differential clutch assures reliable, long-life operation. **Model 472A-E**—Eight-place terminal strip; incorporates one load, one motor and one instantaneous switch. **Model 472A-A**—Five-place terminal switch with one load and one motor switch only. **Full-Scale Reset:** Within ½ sec. **Load Switches:** SPDT, rated 10 amps resistive at 125/250 VAC. **Power Input:** 115 VAC, 60 Hz. **Size:** $3\frac{21}{32}$″ w. x $2\frac{7}{8}$″ d. x $3\frac{27}{32}$″ h. UL Recognized.

| Model | Cramer No. | Time Range | Cramer No. | Time Range | Cramer No. | Time Range |

## NEW TYPE 474 PANEL MOUNT RESET TIMER

External clutch reset timers provide interval or delay timing with choice of momentary or sustained contact control. Individual load, motor and instantaneous switches allow wiring flexibility; unique differential clutch assures reliable, long-life operation. **Model 474A-AE**—Nine-place terminal block; incorporates one load, one motor and one instantaneous switch. With pilot light. **Model 474A-A**—One load and one motor switch only. **Full-Scale Reset:** Within ½ sec. **Load Switches:** SPDT, rated 10 amps resistive at 125/250 VAC. **Power Input:** 115 VAC, 60 Hz. **Size:** Mounts in $3\frac{5}{16}$″ dia. panel cutout. UL Recognized.

| | | | | | | |

| 474A-A | 10043 | 60 sec | 10045 | 15 min | 10047 | 60 min |

## TYPE 3800 SOLID STATE RESET TIMER

Compact, adjustable solid state timer plugs into standard octal socket; can be connected for either interval or delay timing as required. All solid state timing circuit activates DPDT relay contacts at end of set time and resets when control power is removed. **Repeat Accuracy:** When used under constant conditions of nominal voltage, normal room temperature and time between operations, second and subsequent operations will be within 2% of each other. **Recycle Time:** 150 msec nom. **Contact Rating:** DPDT, 10 amps with resistive load. **Power Input:** 115 VAC, 60 Hz.

## TYPE 527 SINGLE POLE CYCLE TIMER

For on-off control of load in continuously repeating cycle. Compact, low cost units are complete with SPDT switch, adjustable cam and highly accurate synchronous motor. Cam adjustable over 3% to 97% of total cycle. **Load Switch Rating:** 20 amps non-inductive at 125/250/480 VAC. **Power Input:** 115 VAC, 60 Hz. **Size:** $2\frac{11}{16}$″ w. x $2\frac{11}{32}$″ d. x 3″ h. UL Recognized.

## TYPE 524 SINGLE POLE CYCLE TIMER

Complete timer consists of chassis incorporating baseplate, cam and switch plus motor and gear rack; selection of 16 gear racks and 12 motor speeds available. Cam is adjustable for operation from 2% to 98% of time cycle. **Repeat Accuracy:** ±0.9°. **Switch:** SPDT, rated 20 amps non-inductive at 125/250/480 VAC. **Power Input:** 115 VAC, 60 Hz. **Size:** $2\frac{3}{4}$″ w. x $3\frac{5}{16}$″ d. x $2\frac{17}{32}$″ h. UL Recognized.

## TYPE 540 MULTIPOLE CYCLE TIMER

Controls 2 to 10 independent circuits; cams are individually adjustable over approximately 2% to 98% of total cycle and can provide any desired sequence or program. Complete timer consists of chassis, motor and gear rack. Chassis incorporates baseplate, cams and switches. **Repeat Accuracy:** ±1.8°. **Load Switches:** SPDT, rated 15 amps non-inductive at 115 VAC. **Power Input:** 115 VAC, 60 Hz. UL Recognized.

## TYPE 400 PLUG-IN RESET TIMER WITH PILOT LIGHT

General purpose, motor-driven timer plugs in for instant interchangeability and simplified maintenance. Easily adjusted, instantly read, provides accurate, adjustable interval or timing delay between the operation of a control circuit and the closing of load circuits. Choice of 6 full scale time ranges. Two load and instantaneous switches for wide wiring flexibility. **Accuracy:** Within ±0.5% of full scale. **Motor Voltages:** 115 VAC, 60 Hz. **Power Input:** 2.7 watts, motor; 5 watts, clutch at rated voltage, 60 Hz. **Switches:** Load switches are snap-action SPDT, rated 10 amps resistive and ⅓ hp at 125/250 VAC; ½ amp at 250 VDC; ¼ amp at 250 VDC. Instantaneous switches are open blade, rated 10 amps resistive and ⅓ hp at 125/250 VAC; ½ amp at 250 VDC. **Terminals:** Spring-loaded connectors with #6–32 binding head screws to meet UL spacing. **Size:** 3⅞″ sq. x 4$\frac{5}{32}$″ d. behind panel.

## TYPE 241 INTERVAL TIMER

Automatic reset, interval timer has pushbutton start for operating mixers, ovens, copy machines and similar equipment. Easy, rapid accurate setting with friction coupled set knob; full view, protected dial; handy timing progress pointer has automatic return. **Repeat Accuracy:** ±0.25% of full scale on timers with ranges of 60 seconds or longer; ±0.5% full scale on timers of shorter ranges. **Power Required:** For 115 VAC operation only at 60 Hz; input is 4.75 VA at rated voltage, 60 Hz. **Contacts:** Rated 15 amps at 125 volts; 10 amps at 250 volts, non-inductive load. SPDT snap action type made of silver-cadmium oxide. **Terminals:** Screw lugs, side or rear connected. **Size:** 3¼″ dia. x 3⅛″ d. behind panel. Mounts 3 6-32 screws on 1.687″ radius.

## TYPE 3810 SOLID STATE TIME DELAY RELAY

Low cost, industrial design is interchangeable with several commonly-used electromechanical timers. Choice of 5 time ranges. Bracket mounting. Sustained control signal initiates time; contacts transfer at end of time delay and timer resets upon removal of control voltage. **Repeat Accuracy:** Within 4% under normal conditions. **Recycle Time:** 150 msec nominal. **Contacts:** SPDT rated 10 amps, resistive. **Temperature Range:** +10° C to +50° C. **Power Input:** 115 VAC, 50/60 Hz. **Size:** 3.312″ w. x 2.750″ d. x 2.125″ h., overall. Six mounting holes $\frac{3}{16}$″ dia. spaced 1.125″ x 1.125″ (inline) x 2.750″.

## TYPES 635 AND 636 ELAPSED TIME INDICATORS

**Type 635**—Compact, non-resettable indicators available in five case styles. Large 1″ dia. number wheels provide excellent readability. Quick start and stop induction motor gives higher accuracy than hysteresis motors at no extra cost; four time ranges available on six-digit register. **Mounting Size:** 3½″ units mount in 2.82″ dia. panel cutout; 2½″ models mount in 2.22″ dia. panel cutout. **Total Count:** 99,999.9 minutes, 999,999 minutes, 99,999.9 hrs. or 999,999 hrs. **Power Input:** 115 VAC, 60 Hz. **Type 636**—Similar to above, but not available in case style **G**; has unique pushbutton reset without danger of overshoot; five-digit count register. **Total Count**—9,999.9 sec, 999.99 min., 9,999.9 min. or 9,999.9 hrs. Both types UL Recognized.

| Cramer No. | Type and Case Style* | Total Count | Cramer No. | Type and Case Style* | Total Count |
|---|---|---|---|---|---|
| 10052 | 635E | 999,999 min | 10070 | 635G | 999,999 hrs |

| 10069 | 635G | 99,999.9 min | 10087 | 636S | 9,999.9 hrs |

*Suffix **X** indicates 2½″ round bezel, **G** utility type 2½″ round bezel (different type of bezel and sealing arrangement); **Y**, 2½″ square bezel; **E**, 3½″ round bezel; **S**, 3½″ square bezel.

## TYPE 620H MIL ELAPSED TIME INDICATOR

Unit is listed on MIL Q.P.L.; meets MIL-M-28053-5, MIL-M-7793 and MIL-E-5757. **Power Input:** 115 VAC, 400 Hz. **Registration:** 9,999.9 hours. **Size:** 1.709″ sq. bezel x 1.546″ d. Four mounting holes on 1.312″ centers.

## TYPE 767E MINIATURE ELECTRONIC COUNTER

High speed, non-reset, panel mounted impulse counter operates on minimum input power and with low temperature rise. Ideal for use in modern high density equipment; banks of counters can be installed in small panel space and conveniently wired to monitor any desired number of check points. Five-digit register provides for total count to 99,999 at rates up to 600 counts per minute. **Operating Voltage:** 24 VDC. **Size:** Body, $\frac{27}{32}$″ sq. x 3$\frac{29}{32}$″ d.; bezel, 1$\frac{3}{16}$″ x 1$\frac{15}{32}$″. Weight, 5½ oz.

## TYPE 691 ELECTRIC STOP CLOCK

Precision time totalizer measures elapsed time to .01 sec accuracy. Built-in pushbutton or remote control 1/10-sec reset. **Reset Solenoid Duty Cycle:** 20% on, 80% off; max. 5 sec on. **Power Input:** 115 VAC, 60 Hz.

# ALCOSWITCH® MINIATURE PUSHBUTTON AND TOGGLE SWITCHES

## MST MINIATURE TOGGLE SWITCHES

Slim, bat handle toggle switches for miniature applications with limited back-of-panel clearance. Terminals and contacts are solid silver (center terminal, copper with silver plate). Case material, black phenolic resin; ¼-40 threaded bushing. Rated 5 amps at 115 VAC. Offering high capacity for small size, SPDT and DPDT types have life cycle of over 80,000 on-off operations; 3PDT and 4PDT, over 20,000 on-off operations. High voltage barriers between terminals and contacts; one piece body. Suffix **49** indicates miniature flat handle type.

## MCT MINIATURE TOGGLE SWITCHES

New design cylindrical case for positive feel and reliability in smallest size possible. All metal with high impact terminal insulator for use in all environmental conditions. Rated 10 A at 125 VAC. Contact material is silver on copper; internal contact resistance, under 20 milliohms; life, 40,000 on-off operations. UL Approved types available on special order.

| | | | | | | |

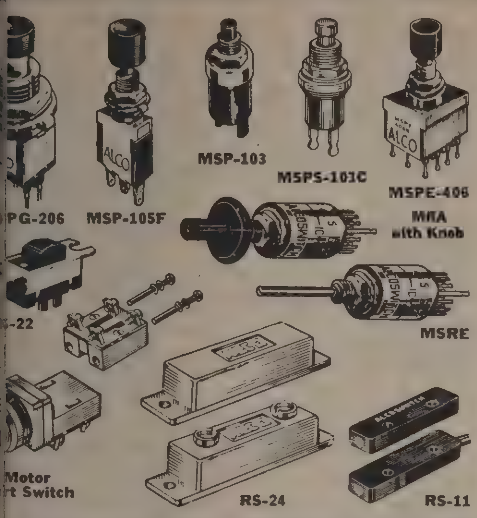
# LCOSWITCH® ROTARY, SLIDE, PUSHBUTTON, PROXIMITY & FOOT SWITCHES



## P SERIES MINIATURE PUSHBUTTON SWITCHES

-105, MSP-205—Rated 5 A at 115 VAC. Solid silver contacts
terminals; black phenolic resin case; bushing size, ¼-40 with
vay. Life cycle, over 20,000 on-off operations. **MSPE**—Water-
version of above. Rated 6 A resistive and 2 A inductive at
VAC; 4 A resistive and 2 A inductive at 30 VDC. Has "O"
waterseals between handle and bushing, and between bushing
e and mounting panel; turret terminals. Bushing size, ¼-40;
nts in D-hole. **MSP-103**—Rated 3 A at 125 VAC; silver plated
s contacts and terminals. Dia., .472″; depth behind panel,
; plunger travel, .098″. One-piece ¼-40 mounting bushing.
**S-103C**—Similar to MSP-103, but rated 0.5 A at 125 VAC
.310″ dia.

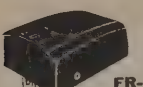
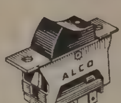
# ALCOSWITCH® RELAYS, TERMINAL STRIPS, SWITCHES AND ACCESSORIES



FR-103



MSL-203N

## ISOLATION RELAYS

Ideal for remote control applications, eliminating shock hazards. Combines isolated step-down transformer and sensitive low voltage relay in a single laminated core. Low voltage circuit can be run through ordinary surface wiring with low current drain. Max. load, 7 amps at 117 VAC, 60 Hz, except types with suffix **-230**, 3.5 amps at 230 VAC, 60 Hz.

**Alcoswitch No. FR-102**—SPDT basic. Net Each........**$4.45**

**Alcoswitch No. FR-102-230**—230-V version of above. Net. **4.85**

**Alcoswitch No. FRE-103**—Plug-in outlet combined with SPDT relay (same as FR-102). Provides actuating voltage to an alarm or remote accessory. Has 3-way receptacle to select NO or NC circuit. Side jack serves as plug-in for remote sensor unit. Net Each........................................**$4.95**

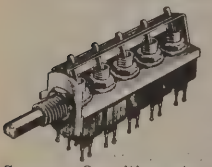
**Alcoswitch No. FRP-104**—Same as FR-102, but plug-in octal base relay enclosed in plastic dust cover. Net Each..........**$5.45**

**Alcoswitch No. FR-105**—Similar to FR-102, but more compact. Black plastic case is contoured to save space; 6″ leads. Net Each........................................**$3.85**

**Alcoswitch No. FR-105-230**—230-V version of above. Net. **4.25**

## ALCOSWITCH ACCESSORIES

### CONVERSION UNIT FOR ROTARY OPERATION



Incorporates unique method of ganging miniature toggle switches to control multiple circuits simultaneously. Operating as a 2 or 3-position rotary switch, unit can gang up to five toggle switches. Consumes minimum of behind-panel space. Also offers advantages of completely enclosed contacts and heavier current capabilities. Accommodates most miniature bat handle switches having ¼″ bushings, and any number of pole configurations. Serves as 3-position rotary switch when used with center-off or on-on-on toggles, or as 2-position rotary when used with single or double-throw toggles.

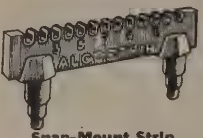
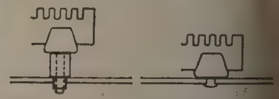
## ALCOSTRIP CERAMIC TERMINAL STRIPS



Snap-Mount Strip

Mounting Suggestions



Elevated    Flush (Cut & Fuse)

Ceramic-base terminal strips with copper plate inserts that are silver-plated and tinned to facilitate soldering of components and leads without harm to terminal strip. Features permanent bond between metal and ceramic. Ceramic strips withstand extremely high temperatures. Available in thread or snap mounting. Standard 2-56 threaded studs are extra long for cutting to any required dimension. Board ht. 0.590″ (above studs); board depth, 0.119″ at top, sloping to 0.276″ at bottom. Depth of slots, 0.197″. **Dielectric Strength:** More than 10 seconds at 1500 VDC between terminals. **Insulated Resistance:** Over 1000 megohms at 500 VDC megger. **Dip Solder Test:** No exfoliation at 250° C for 5 seconds. **Materials:** Terminal Strip, steatite; bushing, polypropolyne.

### THREAD MOUNT TYPES

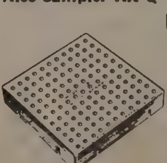
### DESIGN BOARDS



Plug-in termnial strips are ideal for breadboarding which may be quickly inserted or removed as desired to simplify circuit design. A matching circuit board (5″ x 6″) is provided to form a base for experimental design work.

**Alco Model CB-1 Board**—Net Each..**95c**

**Alco Kit CB-2**—Includes 16 strips in 8 different sizes and one board. Net Each......................**$10.95**

# LCOSWITCH® KEYBOARD SWITCHES

## REED SWITCH OPERATED KEYBOARD BANKS

ned for high reliability in data processing equipment. Short s provide smooth operation of switch plunger, resulting in the finest keyboard actions available; also suitable for test ment, communications gear, etc. All details designed for pressure (5 oz.), operator convenience and positive input of with long life under conditions of heavy office usage. Highly nt single pole open circuit reed switches assure reliability xtremely long life; square light gray keys (19/32″) have industry ard 0–9 marking and format. All switch positions have a tive lockout" between sections and rows, which prevents than one position from operating at the same time. Up to 12 hes may be installed in the basic module in any combination, ling momentary or lockout design. Contacts are normally Rated 100 mA at 48 V. Mechanical life, 1 million cycles; switch life, 10 million cycles. Full stroke travel, 7/32″; travel ntact, 5/32″. Symbols, 3/16″ high, black; keys, gray. Size, w. x 3.62″ d. x 2.25″ h. (1⅝″ below or behind panel).

h printed circuit connectors.

## MOMENTARY MODULAR SECTIONS

le concept allows design engineer to create his own custom button layouts. Highly efficient single pole, normally open switches used throughout for reliability and extremely long Light pressure (5 oz.) and short strokes result in optimum tor convenience and positive data input. Basic module allows f one to three switches in either momentary or alternate n-on push-off" action. Stacking allows any number of switch ons to be used in a group by themselves or with matching oard assemblies SB-032 to SB-035 (above). Standard size h keys are available separately, either as single or extended which span two or three switch positions; use of wider keys es possible 2- or 3-pole switch functions. Rated 100 mA at ; normally open. Life, 1 million cycles. Full travel, 7/32″; travel ntact, 5/32″. Depth required, 1⅝″. Supplied less keys; see g below to order.

## MAGNETIC REPULSION PUSHBUTTON SWITCHES

SPST momentary keyboard switches designed for data entry in modern electronic equipment; ceramic magnets eliminate springs and allow an unusual light and snappy touch with little change in pressure over very long periods of service. Contacts are glass-encapsulated reeds for long life; plunger is keyed and non-rotating; metal case withstands abuse and serves as a shield. Rated 100 mA at 50 VDC; resistance, 100 milliohms. Contact bounce, 1 msec; plunger travel, 5/64″. Operating force, under 2 oz. Life, 10 million cycles.

## BASE MOUNTED KEYBOARD PUSHBUTTON SWITCH

Reed-actuated, low profile single-pole normally open unit provides the low operating force (1.2 oz.) and high reliability required in keyboards; suitable for 0.75″ matrix, free from interaction between units. Hamlin reed switch is molded in high quality glass-filled nylon and metal resin; actuated by permanent magnet. Rated 10 watts, 500 mA at 50 V. Contact resistance, 150 milliohms. Life, 10 million operations. Total stroke, 0.140″; minimum pre-travel, 0.060″; minimum overtravel, 0.030″; minimum travel after release, 0.032″.

# MIL and JAN Toggle Switches

## HEAVY DUTY TOGGLE SWITCHES SINGLE, DOUBLE AND 4-POLE

ıse in DC circuits; or, AC circuits in frequencies up to 1600 Rugged. positive action. Built for extra long life to meet nment, industrial and commercial requirements for high ility. Metal top eliminates spring holes; encloses switch d panel. **Features:** Aircraft lubricant for operation in temper- s −85° F to +185° F. Withstand high humidity. Meets our salt-spray test QQ-M-151a. No momentary make or or mechanical damage under stringent shake tests and 75 G test. Tested to make and break at 50% overload for brief ds due to size, solid coin silver contacts and rocker arms. act resistance, under 0.005 ohm. Dielectric exceeds 1,000 V 30 Hz at sea level. Screw terminals and solder lugs withstand pull test. **Series MS35058, MS35059:** With lever seal for dust and 15 ft. water submersion tests. Screw terminals; rable finish. Meets MIL-S-3950A specifications. **Series ST40, 0, 52:** Heavy-duty type; solder and screw terminals. Meet S-23 specifications. **Series MS25068:** Extra heavy duty nals, 4-pole construction for single hole mounting. Silicone er bushing seals. Surpass rigorous electrical endurance re- ments. Molded, hi-arc resistant bodies. MIL-S-3950A for ls with suffix -21 or higher.
**inal Ratings:** 20 amps at 125 VAC; 10 amps at 250 VAC. **ch Movement:** Opposite to that of the lever. **Finish:** Dull nickel-plating to government specifications. **Hardware:** Two nuts, one internal-tooth lockwasher and locking ring (not ied in bulk shipments).

## MEDIUM DUTY TOGGLE SWITCHES (INCLUDING MS25098 AND MS25100)

e-hole, flush-mounting switches for DC or AC circuits up to Hz. Molded bodies fully enclosed. Rugged, positive action for extra long life. **Features:** Aircraft lubricant to withstand eratures −85° F to +185° F. Withstand tropical humidity. 100-hour salt-spray test QQ-M-151a. No momentary make eak or mechanical damage during shake tests or 75 G drop Silver-plated stationary contacts; phosphor-bronze movable cts; meet 50% overload for brief periods. Dielectric exceeds V rms, 60 Hz at sea level. Contact resistance well under ohm military requirement. Terminals withstand 5-lb. pull. **nal Ratings:** 6 amps at 125 VAC; 3 amps at 250 VAC. **h Movement:** Same direction as that of the lever. **Finish:** nickel-plate. **Hardware:** Two hex nuts, one internal tooth asher and locking ring (not supplied in bulk shipments). **MS25098 and MS25100:** Unique internal design results in ssing MIL-S-3950A endurance tests. Sand and dust bushing case to terminal seal. Bushing, 15⁄32″ lg. **Series ST12 thru** Meet JAN-S-23 specs. Double-grip, self-wiping contacts; ded bushings, 15⁄32″ or ¼″ lg.; rear or side solder terminals.

| Red | 10C | Green | 10H |
| Black | 10D | Violet | 10I |
| Brown | 10E | Gray | 10J |

## SERIES JMT SUBMINIATURE TOGGLE SWITCHES

Combine drastic reduction in size and weight with trouble-free construction. Ideal for manus controlled, low current, solid state devices and miniaturized circuitry. Used in computers, aircr electronic instruments, geophysical and portable equipment of all kinds. Mount in single hole ¼"-40NS-2A bushing .352" lg. with keyway. Solder terminals firmly staked to withstand repea soldering; electrical continuity of terminal is to opposite throw of lever. Distinctive green phen body. Bat handle .400" lg. **Series JMT-100:** SPDT action. Body .500" x .260" x .505" deep behind p (including terminals). Wt., 0.19 oz. **Series JMT-200:** DPDT action. Body .500" x .450" x .505" d behind panel (incl. terminals). Wt., 0.23 oz. **Series JMT-300:** 3PDT action. Body .652" x .500" x . deep behind panel (including terminals). Wt., 0.28 oz. **Series JMT-400:** 4PDT action. Body .84 .500" x .571" deep behind panel (including terminals). Wt., 0.32 oz.

### SPECIFICATIONS

**Electrical Characteristics:** Rated 5 amps nom. resistive, 125 VAC and 24 VDC. Initial contact r tance, 5 milliohms max., at 3 VDC, 100 mA. Insulation resistance, 10,000 megohms min. Dielec strength, 1 kV rms at sea level. Life, 100,000 make-and-break, min. for suffix -23 models; all ot 60,000, under load. **Physical Characteristics:** Coin silver switching contacts and rockers. Bri chrome-plated brass bat handle. Phenolic case and cradle. Bushing, locking ring (1 supplied) and nuts (2 supplied) are nickel-plated brass. Clamp and internal-tooth lockwasher chromate treate stainless steel. **Circuitry:** As indicated in table, below. However, they may also be used as (single throw) by wiring only to applicable terminals. Example: JMT-123 connects as an On switch by using center terminals and terminals on one end only.

## VARIATIONS OF SERIES JMT SUBMINIATURE TOGGLE SWITCHES*

**Series LFH—with Flat Handle:** Identical to JMT series above, except for flat handle (paddle) lever, permanently pinned for proper alignment in operating plane. Handle is satin chrome finish with matching dress nut construction and ratings same as JMT series. Available in all circuit configurations of JMT series, including 3PDT and 4PDT, and with MPC type printed circuit terminals.

| Positions | SPDT Series LFH-100 Flat Handle | | | | | DPDT Series LFH-200 Flat Handle | | | | |

LFH

**Series LL—with Locking Lever:** Identical to JMT series, but with self-locking levers that cannot be accidentally shifted. Spring-loaded locking mechanism must be released by pulling out the top of the lever against spring tension. Construction and ratings same as JMT series. Supplied with natural aluminum caps; also available with colored caps. Available thru 4 poles.

| | SPDT Series LL-100 Locking | | | | | DPDT Series LL-200 Locking | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| On-Off-On | LL-121 | $4.20 | $3.70 | $3.30 | $2.59 | LL-221 | $4.85 | $4.35 | $3.90 | $3.04 |

MPC

**Series PB—Pushbutton Switches:** SPDT pushbutton-actuated subminiature switches with 100,000 cycles average life under load—5 amps at 125 VAC. Coin silver contacts and rocker; silver plated center terminal. Bushing and plunger are nickel-plated brass. High-strength plastic body with anodized natural aluminum knob (anodized colored knobs available). Mount in ¼" D-hole.

| | Series PB-100 Maintained Action | | | | | Series PB-100 Momentary Action | | | | |
|---|---|---|---|---|---|---|---|---|---|---|

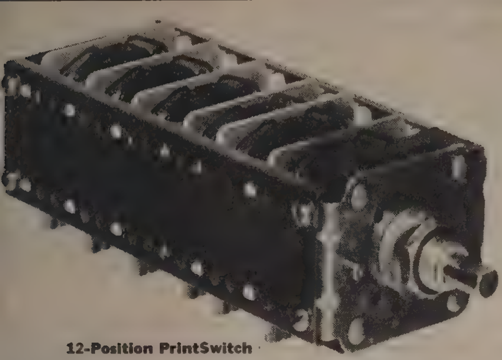
PB

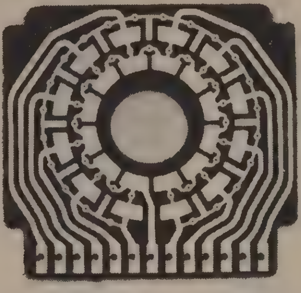
*Prices given are for typical models within each series. Each series (except PB) is available in every circuit configuration of the JMT series, above, and with other variations. **Write for prices on all unlisted types.** †Momentary position (spring return).

# &K Rotary PrintSwitches, Kit

## 12 POSITION ROTARY PRINTSWITCH



12-Position PrintSwitch



Stator Board

K now offers 12-position Rotary PrintSwitches with printed it wafers. The new "Universal Pattern" wafer allows custom ned rotary switches to be delivered quickly at stock prices. the only general purpose switch permitting shorting and shorting circuits in combination with the same contact. ting contacts can be made to lead or lag, relative to each other fferent poles. Indexing mechanism consists of an outer mold-vith an index profile on its inner edge and a shaft-driven inner ing containing two opposed index rollers which are spring-ed against the index. Rotor assembly gold-clad contacts napped into the appropriate position in the plastic rotor. sion positioning between stator board and rotor contacts nates alignment problems commonly associated with wafer hes. True wiping action reduces electrical noise and avoids act bounce. Stator board consists of an inner common track an outer array of stator contacts and intercontact pads. The between each pad has been designed to allow the rotor contact idge smoothly from one to the next, and yet be sufficiently to maintain high insulation resistance throughout life. **tive Contact Rating:** 5 VA DC at 300 volts max. or 1 amp ; 10 VA AC at 300 volts max. or 1 amp max. for 20,000 s at 100° C. **Contact Resistance:** 60 milliohms max. initial. **ctric Strength:** 1000 VDC. **Insulation Resistance:** 500 meg-s min. **No. of Positions:** 12 (30° indexing) stops as required. **Strength:** 15 in.-lb. **Operating Torque per Board:** ½ in.-oz. ontact per board. **Size:** 1.77″ x 1.5″ x 1.10″ long, single board nbly. Add 0.2″ to length for each additional wafer. **Termina-:** On 0.100″ centers. Complete with 1 hex nut, 1 locking ring 1 lock washer.

### ROTARY PrintSwitch PRICING

| . of Wafers* | Net Each, Lots of | | | |

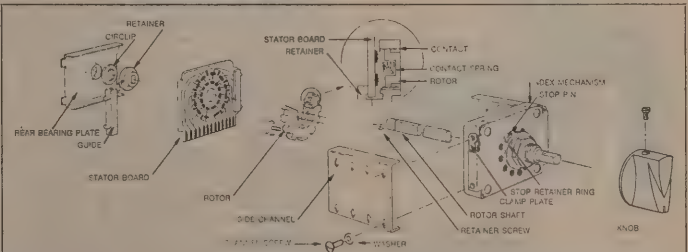
*Includes off in first position.

Ⓔ Specify **N** for non-shorting or **S** for shorting.

Ⓕ **Spindles:** 0.250″ dia. **A,** flatted (0.219″ flat, 0.710″ length from bushing flange); **B,** round (0.710″ length from bushing flange); **C,** long round (2.0″ length from bushing flange).

Ⓖ **Torque (Index Mechanism): L,** light, 20/40 in.-oz., **M** medium 40/60 in.-oz.; **H,** heavy 60/100 in.-oz.

## ROTARY PRINTSWITCH KIT



ry PrintSwitch kit contains everything needed to custom de-and custom build complete switches to fill every special de-pment and prototype requirements. Ideal way to try-before-buy in production quantities. Kit switches differ only in method ssembly from production switches as they have the same rical and mechanical properties. Switching circuits are pro-d by removing unwanted interconnections from stator boards, ing an almost unlimited scope to circuit designers. Kit ches can be easily disassembled and revised stator boards rted as your prototype requirements change. Additional stator boards are available on request. Each kit contains sufficient components to make three different 12-position switches. Kit Contents: Ten stator boards, three index mechanisms, rotor assembly materials and all necessary channels, screws, knobs, etc. A small drill and screwdriver are also included. Switches are made by simply using the tools supplied to remove unwanted interconnections on the stator boards. Components are then assembled. No soldering is required.

**C & K Rotary PrintSwitch Kit**—Net Each . . . , . . . . . . . **$30.00**

# C&K MOMENTARY PUSHBUTTON SWITCHES

## SUBMINIATURE BUTT CONTACT

## SPST MOMENTARY PUSHBUTTON SWITCHES

8531, 8533

8532, 8534

SPST momentary contact switches available NO and NC with and without overtravel and pretravel. **Model 8531:** NO with 0.020 min. overtravel; total travel, 0.110; actuation force, 8 oz. ±4. **Model 8532:** NO; total travel, 0.060; actuation force, 10 oz. ±4. **Model 8533:** NC with 0.020 min. pretravel; total travel, 0.055; actuation force, 8 oz. ±4. **Model 8534:** NC; total travel, 0.040; actuation force, 8.5 oz. ±4. **Contact Ratings:** Coin silver contacts rated 1 amp resistive load at 115 VAC or 28 VDC or 0.5 amp at 250 VAC. Optional brass contacts with gold plate over nickel rated 0.4 volt-amp max. at 20 VAC/VDC max. **Insulation Resistance:** 10,000 megohms min. **Dielectric Strength:** 1,000 V rms at sea level. **Electric Life:** One million make-and-break cycles. **Initial Contact Resistance:** 10 milliohms max. **Materials and Finishes:** Red phenolic base with black phenolic pushbutton; red pushbutton available, specify. Coin silver solder terminals. Brass cadmium plated bushing; brass nickel plated hex nut and nickel plated CRS internal tooth lockwasher normally supplied. Dress nuts available on request. **Size:** Models 8531 and 8533, 0.375″ dia. x 1.047″ h. overall; Models 8532 and 8534, 0.375″ dia. x 0.935″ h. overall. Require ¼″ dia. mounting hole. **NOTE:** Button caps soon to be available for 8500 Series pushbutton switches.

| C & K Model | Net Each, Lots of | | | | | | |

## MICROMINIATURE BUTT CONTACT

## SPST MOMENTARY PUSHBUTTON SWITCHES

8631

8632, 8633

SPST momentary contact pushbutton switches available NO with or without overtravel and NC. **Model 8631:** NO; total travel, 0.040 ±0.015; actuation force, 5 oz. ±3. Coin silver contacts rated ½ amp resistive load at 115 VAC or 28 VDC; ¼ amp at 250 VAC. Electric life, one million make-and-break cycles. Size, 0.251″ dia. x 0.635″ h. overall. **Model 8632:** NO with .015 min. overtravel; total travel, 0.080 ±0.025; actuation force, 5 oz. ±3. Coin silver contacts rated ½ amp resistive load at 115 VAC or 28 VDC; ¼ amp at 250 VAC. Electric life, 100,000 make-and-break cycles. Size, 0.251″ dia. x 0.755″ h. overall. **Model 8633:** NC; total travel, 0.040 ±0.015; actuation force, 5 oz. ±3. Coin silver contacts rated ¼ amp resistive load at 115 VAC or 28 VDC; ⅛ amp at 250 VAC. Electric life, 250,000 make-and-break cycles. Size, 0.251″ dia. x 0.745″ h. overall. **Insulation Resistance:** 10,000 megohms min. **Dielectric Strength:** 500 V rms at sea level. **Initial Contact Resistance:** 10 milliohms max. **Materials and Finishes:** Red phenolic base with black phenolic pushbutton (red pushbutton available, specify). Coin silver solder terminals. Brass cadmium plated mounting bushing; brass nickel plated hex nut supplied. Require ¹¹⁄₆₄″ dia. mounting hole. **NOTE:** Button caps soon to be available for 8600 Series pushbutton switches.

| C & K Model | Net Each, Lots of | | | | | | |

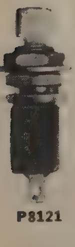
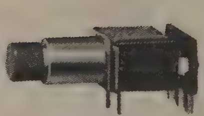
| ...... | Specify red plunger | No Charge | |

## MINIATURE MOMENTARY PUSHBUTTON SWITCHES



P8121



P8121R

Double-throw, momentary pushbutton switches available in a choice of one, two, three or four poles. Single pole switch available as right angle mounting; has PC mounting terminal support of half-hard brass electrotin plated; PC board is G10 epoxy with 1 oz. electrotin plated copper; projecting fingers, only have copper both sides; circuit on PC board has copper outside only. Gold contact surfaces on copper alloy terminals with epoxy sealed terminals. Designed for use in dry (very low energy) circuits. Stainless steel housing on red phenolic case for good appearance and rugged, long lasting construction. **Contact Rating:** 1 amp resistive load at 115 VAC or 28 VDC. **Insulation Resistance:** 1,000 megohms min. **Dielectric Strength:** 1,000 V rms at sea level. **Electric Life:** 60,000 cycles min. at full load. **Mechanical Life:** 100,000 make-and-break cycles min. **Plunger Force:** 10 lbs. max. allowable. **Mounting Bushing:** Cadmium plated with clear chromate over brass; high torque to withstand 12 in.-lb. with no distortion or loosening of parts. **Pushbutton:** White nylon. White nylon press fit cap 0.200″ dia. x 0.155″ h. normally supplied. If specified, 0.200″ dia. x 0.155″ h. or 0.375″ dia. x 0.250″ h. press fit caps in black, red, orange, yellow, green, blue, brown or gray available at no extra cost. **Standard Hardware:** Complete with 2 hex mounting nuts, 1 internal tooth lockwasher and 1 locking ring. Dress nuts available on request. **Size:** P8121 SPDT, 0.500″ w. x 0.270″ d. x 1³⁄₃₂″ h. overall; P8121R SPDT, 0.500″ w. x 0.284″ h. x 1.046″ lg. overall; P8221 DPDT, 0.500″ w. x 0.450″ d. x 1³⁄₃₂″ h. overall; P8321 3PDT, 0.500″ w. x 0.650″ d. x 1⁵⁄₃₂″ h. overall; P8421 4PDT, 0.500″ w. x 0.850″ d. x 1⁵⁄₃₂″ h. overall.

# SUBMINIATURE TOGGLE, ROCKER AND PADDLE HANDLE SWITCHES

niniature toggle, rocker and paddle handle switches combine maximum performance minimum size. Stainless steel housing on general purpose red phenolic case. Basic els available with UL Listing. **Contact Ratings:** Coin silver contacts rated 5 amps tive load at 115 VAC or 28 VDC; 2 amps at 250 VAC. Brass contacts plated with millionths gold over nickel rated 0.4 volt-amp at 20 volts max. AC/DC. Coin silver ed with 100 millionths gold over nickel rated at 0.4 VA at 20 volts max. AC/DC or ps resistive load at 115 VAC or 28 VDC; 2 amps at 250 VAC. **Electric Life:** 100,000 e-and-break cycles minimum on all models ending in 01 only; all other models 40,000 es. **Initial Contact Resistance For Silver:** 10 milliohms max. at 2–4 VDC, 1 amp. **lation Resistance:** 1,000 megohms min. **Dielectric Strength:** 1,000 V rms at sea level. **nting Bushing:** Cadmium plated with clear chromate over brass. **Operating Lever:** ht chrome plated brass. **Standard Hardware:** Complete with 2 hex mounting nuts; ernal tooth lockwasher and 1 locking ring. Dress nuts available on request. Available long or standard vinyl color caps at no extra cost. Specify length, standard or long; , black, brown, red, orange, yellow, green, blue, gray or white. **Size:** SPDT, 0.500″ w. 270″ d. x 1.265″ h. overall; DPDT, 0.500″ w. x 0.450″ d. x 1.265″ h. overall; 3PDT, )″ w. x 0.650″ d. x 1.331″ h. overall; 4PDT, 0.500″ w. x 0.850″ d. x 1.331″ h. overall. ning ¼-40NS-2A-THD; keyway 0.040″ w.

**V TO ORDER:** Specify toggle switch Part No.; add option suffixes required. Options vn at extra cost are in lots of 1–999; 1,000 Up on request; add to toggle switch price.

**Seal: E**, epoxy terminal seal; **I**, epoxy potted base. **E**, add **10c** per pole; **I**, add **25c** per pole to basic price.

nfiguration of special printed ckt. terminals **WG** and **WQ** is same as **W**. See Item 5.

CIAL CONFIGURATION OPTIONS: Following are available as listed. **shproof: CKW** prefix; special "O" ring sealing around toggle and bushing for tight l seal. **Right Angle Mounting: A** (horizontal) or **AV** (vertical). For printed circuit inals **R** (horizontal) or **VW** (vertical) mounting. Terminal support is half-hard brass rotin plated. Contacts and terminal supplied are brass with 100 millionths gold plate. -threaded bushing is standard; available with toggle and bushing options except and **Y1**. Printed circuit **R** and **VW** only: PC board is G10 epoxy with 1 oz. electrotin ed copper: Projecting fingers only have copper both sides. Circuit on PC board has per outside only. ¹⁵⁄₃₂″ **Bushing with Large Toggle: T**, bright chrome plated toggle. **r Lock: K**, all models except 08. Supplied with natural aluminum cap; anodized red, or black available on request. **Rocker Switches: J1** rocker switch; **J3** large rocker ch and **J10** special large rocker. **Paddle Handles: J2** paddle handle and **J4** large dle handle. Unless otherwise specified, black nylon rocker and paddle is supplied. er rocker and paddle colors available at no extra charge. Specify red, blue, white, n, orange or yellow. Special colors molded to order also available on request at additional cost. **Bezel:** For **J1** rocker switch and **J2** paddle handles. Accommodates panel knesses from .062″ to .125″. **Add** appropriate price below to desired toggle switch and prefix or suffix to number.

# McGill Manufacturing Co. FORMERLY HI-TEK CORP. SUBMINIATURE SNAP-ACTION SWITCHES

## MODEL 21 SUBMINIATURE BASIC SWITCHES

SPDT contacts rated 5 amps silver, 1 amp solid gold, 10 amps silver alloy. **Operating Temperature:** −65° F to +185° F except No. 772-19510, −65° F to +250° F. **Minimum Life:** 50,000 operations at rated load, 10,000,000 operations at no load. **Operating Force:** 3 oz. to 5 oz. except No. 872-19001 low force type, 3 oz. max. **Release Force:** 1 oz. min. **Pretravel:** .030″ max. **Overtravel:** .005″ min. **Movement Differential:** .004″ max. except Nos. 872-19002 and 872-19003, .001″ max. **Silver Contact Ratings:** UL, 5 amps at 125 or 250 VAC. At 30 VDC: 3 amps inductive at sea level, 2.5 amps inductive at 50,000 ft.; 5 amps resistive at sea level or at 50,000 ft. Nos. 872-19002 and -19003 rated 5 amps at 125 or 250 VAC. Nos. 772-16910 and 772-16920 UL rated 10 amps or ¼ hp at 125 or 250 VAC. **Gold Contact Ratings:** 0.5 amp inductive, 1 amp resistive at 30 VDC; UL rated 1 amp at 125 VAC. Bifurcated contact Nos. 872-19005, -19006 and -19007 are not UL rated. **Mounting:** Accept .087″ max. dia. pins or screws on .375″ centers. **Size:** .250″ w. x .786″ d. x .356″ h.

### 5 AMP UL APPROVED TYPES WITH SILVER CONTACTS

| Hi-Tek Number | Terminals | Net Each, Lots of 1-24 | 25-99 | 100-499 | 500-999 | 1000-2499 |
|---|---|---|---|---|---|---|
| 772-15510 | Single turret | $1.15 | $0.90 | $0.79 | $0.75 | $0.70 |

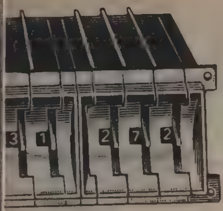
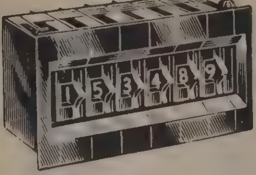
# IMLEC THUMBWHEEL SWITCHES AND ACCESSORIES

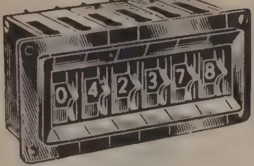
## THUMBWHEEL SWITCHES



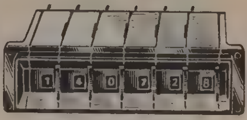
S and SE



IF



IR



E

cially designed printed circuit switches are made of high ility materials to ensure long operational life for use in instru- ts, process control and other equipment. Available in five erent types with a selection of both binary and decimal out- s. Extended boards are available for mounting of resistors or diodes. Internal illumination of switch is available from an optional lamp. **Current Rating:** 0.5 amp maximum per switch. **Working Voltage:** 200 VAC or DC max. **Power Rating:** 24 watts maximum per switch. **Insulation Resistance:** 1000 megohms. **Contact Resistance:** 0.1 ohm.

### STANDARD RANGE "TYPE S"

r-mounted black switch with black thumbwheel, white char- ers on black background. Illumination optional from a small p soldered to the case of switch. Lamps available in 6 or 12 s. **Life:** 100,000 cycles through 360°. **Outputs:** Decimal, D 1248 or BCD 1248 with complements. **Temperature:** 0° to C, suitable for normal industrial and commercial environ- nts. **Size:** 2.81" d. x 2.28" h. (each switch .5" wide).

### STANDARD ECONOMY RANGE "TYPE SE"

mb wheel switch for maximum economy. Replaces rotary type tches to give finger tip control. Dark gray in color, rear panel nting and solder pad connections. Optional illumination by 12-volt lamp. **Life:** 250,000 operations min. **Stops:** Any posi- . **Output:** 0–9 decimal. **Temperature:** 0° to 55° C, suitable normal industrial and commercial environments. **Size:** Same tandard range.

### INTERMEDIATE RANGE "TYPE IF"

Edge operated, front mounting type thumbwheel switch has large character read-out. Switches molded from black polycarbonate, glossy or matte finish. Illumination of characters can be provided by a sub-miniature lamp replaceable from top of switch; available in 6 or 12 volts. **Life:** 1 million operations min. **Stops:** Any position. **Outputs:** Decimal, BCD 1248 or BCD 1248 with complements. **Size:** 2.28" d. (.60" for ext. board extra) x 2.125" h. (.5" wide each switch). Switch bank mounted with clips; no screws required.

### INTERMEDIATE RANGE "TYPE IR"

Same as above, except rear mounting type. **Size:** Same as front mounting type except 1.875" h.

### MINIATURE RANGE "TYPE E"

Molded from black ABS plastic with black wheels and white characters. Illumination optional with rear-mounted, miniature, flange-base lamp. **Life:** 100,000 cycles through 360°. **Outputs:** Decimal, BCD 1248, BCD 1248 with complements. **Size:** Character, .188" h.; switch, 1.67" d. x 1.125" h. (each switch .5" wide).

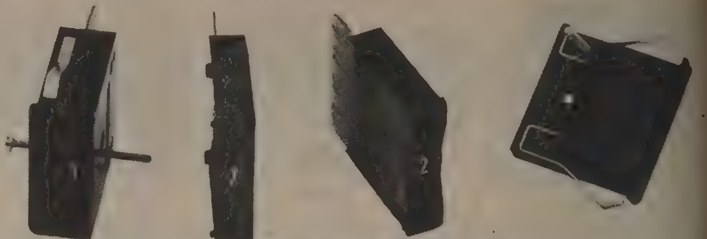
# THUMBWHEEL SWITCHES AND ACCESSORIES

## THUMBWHEEL SWITCHES

Complete Assembly



Modules and End Plates

- **SMALLEST PANEL AREA**
- **SIMPLEST MOUNTING**
- **SNAPS INTO RECTANGULAR CUTOUT**
- **HIGHLY LEGIBLE READOUT**
- **FEATHERWEIGHT ACTION**
- **WIDEST RANGE OF CODES, STYLES AND OPTIONS**

Unique modern design provides dependable operation and unequalled stability of the switch electrical characteristics. Small size (Type M is the thinnest switch module available); highly legible readout; featherweight action; smooth transition and positive detent make the feel of these switches so easy and fast that many engineers call them the only "finger wheel" switches. For use in computers, machine tools, data handling and test equipment. "Snap-in" mounting into a rectangular cutout in the panel requires no separate mounting hardware. Switch assembly consists of two end plates with cam spring retention and the number of switch modules desired. High strength plastic housing and end plates have integrated bezel for enhanced appearance with natural finger stop. Positive indexing; binary coded decimal or decimal output are standard stock items. **Current Capacity:** 1 amp max. **Contact Rating:** 0.1 amp resistive. **Working Voltage:** 0.5 to 50 VAC or DC max. **Contact Resistance:** .07 ohm, including PC board. **Temperature Rating:** −40° to +85° C. **Terminals:** Solder or edge connector. **Operating Life:** 1 million or more operations. **Size:** Type M, 1.5″ d. x 1.3″ h. x 5/16″ (8 mm) w.; Type H, 1.5″ d. x 1.3″ h. x 3/8″ (10 mm) w.; Type B, 2.7″ d. x 2.3″ h. x 1/2″ (12.5 mm) w.

*Long PC board for insertion of diodes, etc. between switch outputs and terminals.

## CONNECTORS

Designed especially for the Type M and Type H thumbwheel switches. Available in printed circuit board mounting, conventional solder lugs or wire-wrap terminals. Features a low contact resistance made of beryllium copper in tuning-fork style. Capable of withstanding 500 insertions and withdrawal cycles. Contacts are gold plated. The body is of polycarbonate thermosetting plastic. **Working Voltage:** 50 VAC/DC max. **Current Rating:** 1 amp. **Contact Resistance:** .15 ohm.

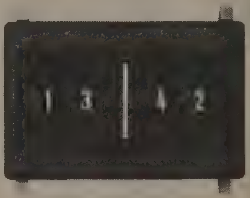
| Interswitch Number | Description | Net Ea. 1-249 |
|---|---|---|
| **CU400215U*** | Solder lugs, with mtg. ears | $1.00 |
| **CU400216U*** | Wire wrap, with mtg. ears | 1.00 |
| **CU400217U** | Solder lugs, without mtg. ears | 1.00 |
| **CU400218U*** | Wire wrap, without mtg. ears | 1.00 |
| **CU400354U** | Printed circuit leads | 1.00 |

*Allow an extra week for delivery; others available from stock immediately.

## OPTIONS AND ACCESSORIES

Apart from the ability to stack switches side by side in unlimited combinations up to a maximum of 60 units; standard auxiliary modules are available to implement your requirements for special functions and arrays.

| Suffix | Description | Net Ea. 1-299 |
|---|---|---|
| ......... | **Spacers:** Without inscription is standard. Spacers with white line or decimal point are popular. Custom marking also available. Width of spacer is same as of switch module. | See table above |
| ......... | **Division Plates:** For segregating digit-groups, includes retaining springs. Each pair equals the width of one switch module. | See table above |
| /A | **Dial Stops:** Factory-adjustable to any position. Indicated by a suffix to switch module part number. | $0.50 |
| /D | **Decimal Point:** Hot stamped on switch housing. | .25 |
| /G | **Illuminated Decimal Point:** Plastic rod light conductor. | .50 |
| /1 | **Green Colored Thumbwheel** | .50 |
| /2 | **Yellow Colored Thumbwheel** | .50 |
| /3 | **Red Colored Thumbwheel** | .50 |
| /4 | **Blue Colored Thumbwheel** | .50 |
| /5 | **White Colored Thumbwheel** | .50 |
| /M | **Special Wheel Markings:** Set up charge $10 per order. | .50 |
| /H | **Provision for Illuminating Dial:** By pilot lamp not supplied with above module. | .75 |
| /B | **Blind Slave Modules:** Ganged switches without thumbwheels. | Same as Switch Module |



Typical Assembly of
Type M Thumbwheel Switches

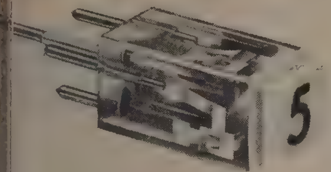
**Other Special Order Options:** Selection of over 230 binary codes.

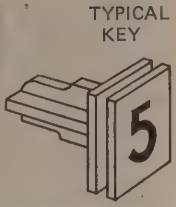
| Description | Net Ea. |
|---|---|
| **Make-Before-Break Contacts** | Write for full information and pricing |
| **Dial-Only Modules:** Ten-position (0–9) only. | |
| **Double Characters:** Same height as single characters. | |
| **Seven Characters per Position (Type R):** Double width housing for multi-characters. | |
| **Special Colored Characters:** Thermally-bonded colored ink characters. | |

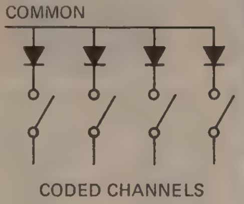
**NTERSWITCH**

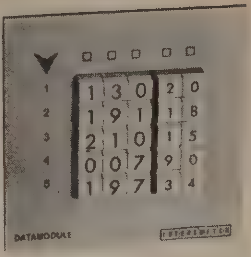
# DATA MODULES AND MATRIX BOARDS

## DATA MODULES









input device compared to thumbwheel switches or matrix ls that make it a very versatile device for test equipment, ine tool controls and other programming applications. In- sive and miniature coding device uses binary coding tech- s. Data module consists of four miniature contact switches, silicon diodes and a plastic housing. The programming keys te the switches when inserted in the data module body. Keys numerals 0 to 15 are available; i.e., a #3 key closes the 1 and 2 a #14 key closes the 2, 4 and 8 lines. Numerical characters andard in 7mm (.276″) height to offer a large numeric readout e smallest possible area. Each switch has four output ter- s and common. Data programming module is a lowest- on denominator panel element for data entry. Wiping action p during key insertion ensures contact reliability. For quick, -free programming of many characters at once, flexible- c program-storing templates enable a complete set of keys inserted or removed simultaneously. Switch body is available or without four internally mounted 1N4148 silicon diodes. modules are designed to mount on a printed circuit board protrude through a rectangular cutout in the front panel.

**Working Current:** 1 amp max. **Working Voltage:** 50 VAC/DC max. **Contact Resistance:** 50 milliohms. **Temperature Rating:** −20° to +70° C. **Operating Life:** 10,000 switching cycles min. **Keys:** White plastic with black numerals. Other colors and inscriptions also available on special order. **Codes:** 8-4-2-1; Excess 3; Aiken 2-4-2-1 or virtually any 4-bit binary code. **Body Size:** 12mm (0.469″) square x 22mm (.844″) (not including terminals).

| Interswitch Number | Description | Net Each, Lots of 1-9 | 10-49 | 50-99 | 100-249 |
|---|---|---|---|---|---|
| 675-022-131 | With 4 silicon diodes | $4.50 | $4.25 | $4.05 | $3.80 |
| 675-022-100 | Without diodes | 3.00 | 2.85 | 2.70 | 2.55 |
| 675-043-190* | Keys | .18 | .17 | .16 | .15 |
| 42-00023 | Keys, set of 10 (0–9) | 1.80 | 1.70 | 1.60 | 1.50 |
| 42-00024 | Keys, set of 6 (10–15) | 1.08 | 1.02 | .96 | .90 |

*Add to part number the key number (0–15) desired, e.g., 675-043-190-**02** for number **2** marked on the face of the key.

### MATRIX PROGRAM BOARDS

t advanced, reliable and convenient device that is fundamental e programming of thousands of different kinds of instruments, puters, machines and control systems. Important application ntages are design simplicity, programming ease and flexi- , high area and volumetric density, visual presentation of it linkages. Standard matrix boards are an array of X and Y linates that locate circuit intersections. The horizontal con- bars, "rows", are mounted directly behind the panel and are ified by letters; the vertical contact bars, "columns", are nted beneath the horizontal bars and are identified by numbers. Each contact bar has a solder terminal at the rear of the matrix. Board features gold plated beryllium contact strips, gold-plated terminals and an imprinted panel. The front panel is a laminated board, composed of multiple layers of paper and phenolic resin. The top layer, covering the imprinted paper foil, is a transparent melamine resin. **Current Rating (per contact bar):** 10 amps for 6mm spacing; 5 amps for 3mm or 4.5mm spacing. **Working Voltage:** 220 VAC/DC max. **Contact Resistance:** 7 milliohms with short circuit pins. **Terminals:** Solder lug.

ws x columns x spacing (in mm) between centers of holes. †Alpha numeric printing embedded in the light gray panel surface.

### PROGRAMMING PINS

dard elements for use with matrix program boards. **Shorting** : For direct connection between horizontal and vertical con- bars. Stocked in black and red colored handles. Also available shorter handles in brown, yellow, green, blue, gray or white 's on special order. **Diode Pins:** Have a 1N4148 fast switching n diode to control current direction and prevent sneak paths een rows and columns when inserted in any hole. Stocked in k and red colored handles with the diodes soldered anode-to- naking the polarity from column (+) to row (−). Diode pins ng opposite current direction, other color handles (specified e) or different diodes also available on special order. CUSTOM ESSORIES: **Dummy Plugs:** Insulated plugs used to connect dden intersections. **Plug-In-Lamps:** Available in 6mm spac- only. Connect 12-volt lamp between line and column when ted in any hole. Available in red, green and white colors and ate which equipment or circuit is on, even from a distance. **Cable Plugs:** One sided or two sided; convert the matrix board into a diagnostic center by converting each hole into a test point, permitting connection of that intersection to external trouble-shooting equipment from the front of panel. **Dual and Triple-Segment Shorting Pins. Programming Templates.**

**Write for pricing information on Custom Accessories.**

**Also available in Type 08 heavy duty 22.5 amp version. Write for information and prices.**

## TYPE 23 HIGH CAPACITY SWITCHES

**Type 23**—High capacity, single-break switch provides excellent mechanical and electrical life. "Heat dam" slot eliminates flow of solder and flux into switch body. Available with screw or taper tab terminals also. Integral type roller and straight lever actuators offered. Rated 15 amps, 125/250 VAC; 8 amps resistive, 6 amps inductive, 30 VDC. Size, 1.344″ x .625″ x .410″; .875″ mounting centers. UL Listed and CSA Approved.

## TYPE 25 MINIATURE THIN SWITCHES

**Type 25**—Miniature, snap action thin switch employs coil spring mechanism similar to that of the exclusive Licon Butterfly® double break switches. Provides extremely long life with 12.0-amp rating. Excellent contact wiping action, low contact resistance, high shock and vibration resistance are additional features of this Form C switch. Designed for commercial applications which require reliability at low cost. Ideal f coin and vending machines, timers and counters. Off-cent plunger versions allow for extremely light operating force to grams max. Rated 6 amps resistive, 3 amps inductive, 125/2 VAC. Tested to 20 million operations. Size, 1½″ x .825″ x .283″, center version; 1½″ x 53/64″ x 9/32″, off-center version. 1″ m centers. Solder terminals. UL Listed.

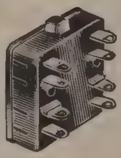
## TYPE 26 DOUBLE POLE SUBMINIATURE SWITCHES



**Type 26**—Subminiature double pole switch utilizes two Licon Butterfly® double-break mechanisms. Simultaneity of operation of both poles insured by special linkage between mechanisms. Switch eliminates need for dual components and actuating mechanism; requires less space than two single pole miniature switches. Type 76 actuators fit type 26 switches. Pushbutton and toggle actuators fit 26-800 switch series only. Rated 8 amps, 125/250 VAC; 10 amps resistive, 5 amps inductive, 28 VDC. Size, 25⁄32″ x .761″ x 1⁄4″. UL Listed.

| Licon Number | Description | List Price* |
|---|---|---|
| 26-801 | DPST-NC-DB, end solder terminals | $6.05 |
| 26-802 | DPST-NO-DB, end solder terminals | 6.05 |
| 26-804 | DPDT-DB, end solder terminals | 6.05 |

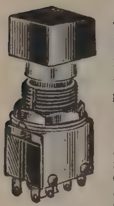
# LICON Switches

## TYPE 01 LIGHTED PUSHBUTTON SWITCH WITH SINGLE LAMP INDICATOR

### (DISCOUNT SCHEDULE "B")



**Type 01** pushbutton switch combines single bulb panel indicator with multi-pole pushbutton switch. For original equipment or replacement of toggles with color-lit or legend-coded button. Provides a visual reminder that a circuit is on or off at a glance. Available in red, white, yellow, green, or blue pushbutton, ⅝" and ¾" round or square, and 1⅛" diameter round lens caps; solid or projected color illumination. **Order lens cap separately.** Available in one and two-pole form C or form Z contact arrangement. Switch rated at 10 amps, 250 VAC or 30 VDC. Momentary, maintained, solenoid held and indicator models. One hole mounting with choice of 15/32" or ⅝" bushing. Uses T-1¾ lamp with screw or flange base (not included in price). Overall size: 1 29/32" x ⅝" x 25/32". UL Listed.

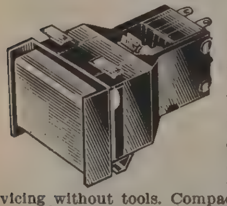
## TYPE 01-800 SNAP-IN ILLUMINATED MATRIX MOUNTING SWITCH—WITH SINGLE LAMP INDICATOR

### (DISCOUNT SCHEDULE "B")



Type 01-800 single-lamp lighted pushbutton switch offers time-saving snap-in front mounting on panels. Combination bezel-barrier eliminates misguided actuation. Choice of screen colors with solid or projected illumination. Choice of momentary or maintained contact types in Form C (SPDT) and Form Z (SPDT, double break); or, indicator-only units. Switch rated 10 amps, 125/250 VAC; UL Listed. Uses T-1¾ flange bulbs (not included in price); simple front-panel lamp servicing without tools. Compact 1⅛" x ⅞" lens cap gives ample space for engraving or hot stamping.

## TYPE 70-700 PROXIMITY SWITCH
### (DISCOUNT SCHEDULE "C")

Ultra compact switch for precision control without physical contact. Consists of a control module (2.53" x 3.75" x 1.35") which contains a 10 amp DPDT relay, plug-in terminal block (2.19" x 2.66" x .84"), potted sensor with 20′ cable, and potentiometer for sensitivity control. Senses both ferrous and non-ferrous metals. Up to 1000 operations per minute possible. Sensing range for .665" dia. sensor is .110" to .261"; for .440" dia. sensor, .048" to .148" (sensing ranges based on .235" dia. stainless steel target).

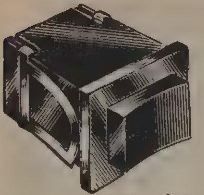
# waldom / molex LIGHTED PUSHBUTTON SWITCHES



Series 1175

Series 1820

## 1175 SERIES

Compact design has precision molded, durable phenolic housing; size 7/8″ w. x 1¼″ d. behind panel (excluding terminals). Terminals are standard ¼″ male tab and use Waldom female Q-D terminal SS-1090. Chrome-plated bezel, 1¼″ lg. x 1 5/64″ w. Available illuminated pushbutton switches and as indicator lights.

These sturdy, well-designed, illuminated pushbutton switches offe a wide choice of features plus limitless design possibilities. Available in alternate Push On–Push Off, Momentary Normally Ope Momentary Normally Closed actions. Mar-resistant nylon bu tons available in standard colors white, red, green and ambe Blue and yellow available on special order.

Mechanical life minimum 25,000 cycles. Both models easily sna mount into place. Price includes permanently installed lamp plu female quick disconnects that accommodate the switch's mal tabs. Tabs also have hole for soldering wire lead if desired.

## 1820 SERIES

Attractive and versatile—long lasting, highest quality molde nylon housing; size 31/32″ w. x 2 19/64″ d. behind panel (excludin terminals.) Terminals are standard 3/16″ male tabs and use Waldo female Q-D terminal SS-1187. Nylon bezel, 1 9/32″ lg. x 35/64″ Button size, 1 3/16″ lg. x 7/16″ w.

**Indicator lights, non-switched version of Series 1175 Pushbutto Switches also available. Write for pricing and full informatio**

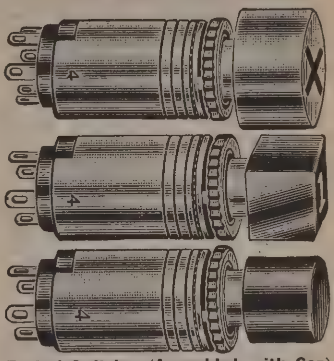
# DIALIGHT LIGHTED PUSHBUTTON SWITCHES & INDICATOR LIGHTS DIALCO®

## SINGLE-HOLE MOUNTING PUSHBUTTON SWITCHES AND MATCHING INDICATOR LIGHTS

venient, modular design allows assembly of an illuminated switch to meet your ticular requirement. **Three Switch Assemblies:** Choice of NO, NC or 2-Circuit ingements in two styles: One to accommodate screw-in type caps; another for friction-aps. Switch contacts rated 3 amps resistive at 125 VAC or 30 VDC. **Caps:** Choice of w-in or friction fit (rotatable or keyed) styles in ½″ or ¾″ sizes, round or square pe, and a choice of colors. **Matching Indicator Lights:** Available in two sizes to ch your indicating switches. Simply select the indicator base assembly size desired, add the cap of your choice (the same caps used with switches).



Typical Switches (Assembled, with Cap)

### SWITCH BASE ASSEMBLIES

gle-hole mounting; fit panels up to 3⁄16″ thick. Size, .650″ dia. x 115⁄32″ lg.

| witch ircuit | For Friction-Fit Caps Either ½″ or ¾″ Cap Size | For Screw-In Caps Only |  | Net Each, Lots of |  |  |
|---|---|---|---|---|---|---|

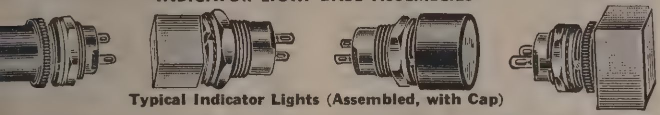
e circuit NO, one circuit NC.

### INDICATOR LIGHT BASE ASSEMBLIES



Typical Indicator Lights (Assembled, with Cap)

ommodate T-1¾ incandescent lamp from 1.35 to 28 V. Accept friction-fit caps, ed or rotatable, ½″ or ¾″ size. Length, 27⁄32″ max.

| Dialco Number | Description | Net Each, Lots of 1-9 | 10-24 | 25-99* |
|---|---|---|---|---|
| -9730-14-602 | For 15⁄32″ hole, front mounting (.549″ dia.) | $1.16 | $1.03 | $0.96 |
| -9830-14-604 | For ½″ hole, front or rear mount (.560″ dia.) | 1.16 | 1.03 | .96 |

**COLOR OF LENS FACE**

Indicated by last figure in Dialco number. For simplicity, all numbers listed use suffix "1" to indicate the lens face is **Red.** When a color other than red is required, change the last figure per following list:

| Last Figure in No. | Lens Face Color |
|---|---|
| 1 | Red (as listed) |
| 2 | Green |
| 3 | Amber (yellow) |
| 4 | Blue |
| 5 | White (translucent) |
| 6 | Light yellow |
| 8 | Ivory |

**Examples:** 183-1472 (Green)
300-1874 (Blue)

### CAPS FOR SWITCH BASE ASSEMBLIES OR INDICATOR LIGHT

ction-fit caps are available in round or square shapes; choice of keyed (non-rotatable) rotatable style; ½″ or ¾″ size. Screw-in caps fit only the switch base assemblies ignated for them; come only in ½″ round configuration. **Colors:** All items listed are as indicated by **1**, the last digit in the ordering number (e.g., 183-1471). **For other ors, see color table;** same prices. Legends may be hot-stamped or engraved; pricing request.

### ½″ FRICTION-FIT AND SCREW-IN CAPS

| Description | Shape | Friction Fit Caps Rotatable Number | Friction Fit Caps Keyed Number (Non-Rotatable) | Screw-In Cap Number | Net Each, Lots of 1-9 | 10-24 | 25-99* |

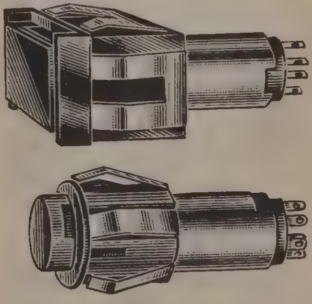
## NEW SNAP-IN MOUNTING PUSHBUTTON SWITCHES AND MATCHING INDICATOR LIGHTS

### SWITCH BASE ASSEMBLIES

p-in mounting for panels up to 3⁄16″ thick. Includes bezel, clip and spanner ring. mentary non-snap action switches have contacts rated 3 amps resistive at 125 VAC 0 VDC. Life at rated load, 100,000 operations. Suffix **001** in Dialco number indicates k bezel; to specify gray bezel, change 001 to **002** (e.g., 513-0106-**002**). Other bezel rs available on special order. Rectangular bezel units interchangeable with most mp displays.



Typical Snap-In Switches (Assembled, with Cap)

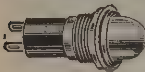
# DIALIGHT PILOT LIGHT ASSEMBLIES DIALCO®

## NEON SERIES 95-, 52-0408

**Now also available with new High Brightness NE-51H Neon Glow Lamp. Have Patented Built-in Resistor.**



**Series 95-0408**—Two types available: Series 95-0408 enclosed neon indicator light has 56K-ohm, ⅓-watt resistor built-in for use with the regular NE-51 neon lamp on 105–125 volt circuit. Series 95-0463 has built-in 22K-ohm resistor for use with new NE-51H high brightness neon lamp on 110–125 VAC circuits. Rugged design; resistor fully insulated in molded phenolic. Plastic head gives 180° light spread. Mounting bushing is black nickel plated. Solder terminals. Size: 2¹⁄₁₆″ long, ¹⁵⁄₁₆″ O.D.; mounts in ¹¹⁄₁₆″ hole in panels up to ⅜″ thick. UL and CSA Listed. Meets requirements of MIL-L-3661A. **Series 52-0408** same, but with internally fluted stovepipe lens. Shpg. Wt., 3 oz. Less lamp. **For high brightness version:** Change **08** in number to **63** (e.g., 95-0463) and final suffix to **-0211** (e.g., 95-0463-0931-**0211**) for 22K-ohm resistor.
Net Each, 1–9. .**$1.45**; 10–24. .**$1.29**

| Dialco No. 95- | Color | Dialco No. 52- |
|---|---|---|
| 0408-0931-241 | Red | 0408-0991-241 |
| 0408-0933-241 | Amber | 0408-0993-241 |

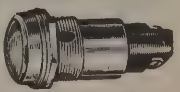
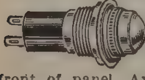
## DIALCO NEON SERIES 32-0914



Enclosed assemblies for use with NE-45 neon glow lamps with candelabra screw base for 105–125 volts. Replaceable from front of panel. Convex lens in choice of colors has friction-fit, polished chrome lens holder. Nickel plated mounting bushing. Iridite coated, cadmium plated steel hex nut, split lockwasher. Binding screw terminals. Size, 2½″ long, 1³⁄₁₆″ O.D.; mounts in 1″ hole. UL and CSA Listed. Shpg. Wt., 4 oz. Less lamp. **Dialco Nos. 32-0914-0111-302** (Red), **32-0914-0113-302** (Amber) or **32-0914-0117-302** (Clear)—Net, 1–9 **$1.97**; 10–24 **$1.77**

## INCANDESCENT SERIES 81-0410
## SERIES 95-0410, 52-0410



**Series 81-0410**—For use with T-3¼ bulb, miniature bayonet base incandescent, for 2–55 V circuits. Replaceable from front of panel. Aviation type assembly with socket shell encased in molded phenolic. Smooth face lenses in ½″ brass lens holder. Holder and mounting bushing black nickel plated. Solder terminals. Size: 2¼″ lg., ¹⁵⁄₁₆″ O.D.; mounts in ¹¹⁄₁₆″ hole in panels up to ⅜″ thick. UL and CSA Listed. Meets MIL-L-3661A requirements.
Net Each, 1–9. .**$1.45**; 10–24. .**$1.28**
**Series 95-0410, 52-0410**—Same as 81-0410 but ⅝″ plastic stovepipe lens. 52-0410 lens is internally fluted. Wt., 3 oz. Less lamp.
Net Each, 1–9. .**$1.23**; 10–24. .**$1.09**

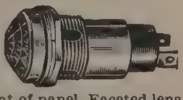
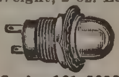
## ENCLOSED ASSEMBLIES
## ONE-INCH SERIES 32-4001



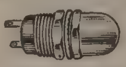
Series for use with S-6 incandescent bulbs with candelabra screw base for 6-125 volt circuits. Lamp replaceable from front of panel. Faceted lens in choice of colors with friction-fit lens holder of polished chrome; white nickel plated mounting bushing. Iridite coated, cadmium plated steel hex nut and split lockwasher. Solder terminals. Size, 2²⁵⁄₃₂″ long, 1³⁄₁₆″ O.D.; mounts in 1″ hole. UL and CSA Listed. Shpg. Wt., 4 oz. Less lamp. **Dialco Nos. 32-4001-0431-302** (Red), **32-4001-0432-302** (Green), **32-4001-0433-302** (Amber) or **32-4001-0437-302** (Clear)—Net Each, 1–9. .**$1.66**; 10–24. .**$1.45**

## SUBMINIATURE SERIES

For use with T-1¾ bulbs for 1.35–28 V. Bulb replaceable from front of panel. Military grade phenolic assures permanent isolation from ground. Fully insulated. Black nickel finish. Lockwasher and nut supplied. Size: 1⅜″ long; ¾″ O.D. Shipping Weight, 2 oz. Less lamp.



**Series 101-5030**



**Series 101-3830**

## TWO-TERMINAL PLASTIC DOME TYPES

Series 101-5030 Front Mount and Series 101-3830 Back Mount: Front mounting units mount in ¹⁷⁄₃₂″ hole; back mounting units, in ¹⁵⁄₃₂″ hole. Solder terminals.
Net Each, 1–9. .**$1.45**; 10–24. .**$1.27**

## DIALCO DATALITES•

**Ultra-Miniature Indicator Lights Computers, Data Processing Equipme Automation, etc. Mount in ⅜″ h**
"Datalites" are made in two basic sty With Dialco's lamp cartridges, which replaceable; and with built-in neon lan which are permanent, not replaceable.
• Reg. T.

### SINGLE LAMP HOLDER

Use with Dialco's lamp cartridge, removable from front. Size, 1¹³⁄₁₆″ long, ½″ O.D., less cartridge; mounts in ⅜″ hole. Two insulated terminals offset for correct polarity when replacing cartridges in DC circuits. Conform to applicable MIL specs. Collar, flange ring and mounting bushing are of aluminum with black anodized finish. With mounting hardware, less cartridge. Shpg. Wt., 2 oz.

## 507 SERIES DATALAMP CARTRIDGES WITH SOLID STATE DIODE-LITES

Light source is a solid state lamp that provides the advantages of low power with extremely long life and reliability. IC compatible; interchangeable with standard incandescent cartridges. Oper. temperature, −55° to +60° C. For operation directly from RTL, DTL or TTL logic, the 10 mA cartridge is recommended; for optimum brightness, the 20 mA cartridge is recommended. Unique lens design features an internal fresnel ring to assure maximum distribution of light output. Polarity is marked on housing; terminal base is keyed. Housing is black anodized aluminum for high contrast; connections are stainless steel pins mounted in nylon insulated header, offset for polarization; lens is high strength plastic, permanently attached. Cartridge may be mounted with Datalamp Holder or cartridge connector with speed clip (listed below). Size, .284" dia. x 1.140" max. overall (including .203" terminals).

## DIALIGHT DIODE-LITES™ GALLIUM ARSENIDE PHOSPHIDE SOLID STATE LAMPS

Offer high luminous intensity (2.0 mcd at 20 mA for 521-
1.0 mcd for 521-9167 and 521-9168) and low power consum
at low cost. For applications requiring direct mounting thr
a panel. IC compatible; vibration and shock resistant; wide
ing angle. Solid state reliability, with life measured in y
Consist of a gallium arsenide phosphide semiconductor c
completely encapsulated, with red or clear diffusion.
source for Nos. 521-9167 and 521-9168 is contained
black case, giving excellent contrast when "On", yet ap
ing black when "Off". The 521-9165 base has a flat on
side which gives the device an antirotation feature as we
indicating which lead is the cathode. Leads are flexible en
for bending and rigid enough for direct mounting to a PC b
**Forward Voltage:** 1.8 volts typical at 50 mA, 2.3 volts
**Forward DC Current:** 50 mA max. **Reverse Voltage:** 3 volts
**Reverse Breakdown Voltage:** 3.0 volts minimum at 10 µA
volts typical. **Power Dissipation:** 100 mW (derate 1.3 mW
above 25° C. **Storage/Operating Temperature:** −40° to +10
**Relative Humidity:** 98% at 65° C. **Solder Temperature:** 25

thicknesses; .250" mounting hole.

## 249 SERIES ULTRAMINIATURE INDICATO LIGHTS WITH DIODE-LITES (LED)

Complete solid state indicator package consisting of light s
housing and lens, ready for permanent panel mounting.
source is a solid state (LED) lamp that provides the advan
of low power with extremely long life measured in years.
patible with IC's (can be driven directly by RTL, DTL and
logic). Unique lens design uses an internal fresnel ring to
maximum distribution of the light output. Positive termi
marked "+" for proper installation. Mounting bushing and
ring are black anodized aluminum; terminals are low carbon
solder plated; lens is high strength plastic. Size: ⅞" behind
(including 3/16" terminals); ⅜"-32 threaded body with ½" he
fits panels to 5/16" thick. Lens, 9/32" dia. x 3/16".

## INCANDESCENT READOUT INDICATORS

**MS-4000B**—Seven-segment readout has bright, single plane display allowing wide angle view. Character size, .325″ x .600″. Case size, .552″ w. x 1.18″ d. x 1.18″ h.; one-piece black metal matte. Uses long-life #683 T-1 lamps (listed elsewhere) separately lit with external decoder/driver. Current drain, 420 mA max. (numeral "8"). Power, .24 watt min., 2.1 watts max. Order socket separately. **MS-4100B**—Same as above, but with decimal point and slightly smaller figures (0–9). **MS-4100S**—Symbol indicator with +, –, 1 and decimal to match MS-4000B or MS-4100B. **MS-250A**. —Smaller version of above readouts. Supplied with socket and plastic housing. Uses 2.5 V lamps at 20 mA/segment; current drain, 40 mA min. Power consumption, 160 mA min., 400 mA max.

*Add either suffix **R** for red filter or **C** for clear filter.

## DECODER/DRIVERS, ACCESSORIES AND POWER SUPPLY

**MSDD-720 Series**—Hybrid BCD-to-seven-segment decoder/drivers with active low outputs to drive Elfin cathodes to display 0–9. Supply voltage, 7 V. Input, 5.0 V. Plastic/epoxy dual inline package. **MSDD-320 Series**—Hybrid BCD-to-seven segment decoder/drivers for 120 mA/segment readouts; designed to drive MS-4000B, MS-4100B, MS-250A, MS-6, MS-14, MSM-5A and other devices requiring low voltages, high current-sinking capabilities. Circuits are TTL and DTL compatible and have uncommitted collector outputs. **MSDD-700 Series**—Monolithic BCD-to-seven-segment decoder/drivers in 16-lead dual inline packages to drive incandescent displays. MSDD-700 and MSDD-701 are for use with MS-250A; MSDD-702 and MSDD-703 are for use with MS-4000B, MS-4100B, MS-6 and MSM-5A. **Plug-In Decoder/Driver Modules**—Packaged module includes decoder/driver and plugs directly into mating readout. DDM-702 is for MS-4100B and DDM-703 is for MS-4000B; MTX-4000 is for MS-4000B and MTX-250 is for MS-250A. All are completely assembled and come with color-coded leads. **MS-4FB Panel Mounting Accessories**—For MS-4000 or MS-4100 readouts; up to 5 modular digits. Bezel has top and bottom aluminum extrusion; assembly comes with red filter; for use with clear readouts. **PS-51-117 Logic Power Supply**—Low 5 V section is compatible with MSDD-700 Series decoder/drivers; high 200 VDC section will fire Elfin neon displays.

# ALCOLiTE PILOT LIGHTS AND LAMPS

BNE Series

BNF Series

BND Series

MNE-4SL

PL-105

MC-680

## NEON PILOT LIGHT ASSEMBLIES

**BNE Series**—Compact lens assembly protrudes slightly above panel; mounts with single 5/16"-32 nut. Operates from 75 VDC without resistor, 115 VAC with resistor (150K for standard intensity, 33K for high intensity); resistor not supplied unless otherwise indicated. Temperature range, −10° C to +70° C. **BNF Series**—Similar to BNE, but with long lens assembly extending further beyond panel for brighter illumination. **BND Series**—Similar to above series, but with square lens assembly; mounts in ⅜" hole. Specify red, amber, clear or white for all models.

| Alco No. | | | Description | Net Each, Lots of | | | |
|---|---|---|---|---|---|---|---|
| BNE- | BNF- | BND- | | 1-24 | 25-99 | 100-499 | 500-999 |

## BRITE GLO® NEON LAMPS

Extremely small size lamp, equivalent to T-1⅜. Bullseye appearance gives the largest glow where needed on the top. Rounded top places the illuminated area closer to the viewing point. Metal base increases light output and protects lamp from damage.

| Alco No. | Description | Net Each, Lots of 1-24 | 25-99 | 100-499 | 500-999 |
|---|---|---|---|---|---|
| MNE-4A | With short bare leads | $0.49 | $0.33 | $0.29 | $0.24 |
| MNE-4LA | With 10" insulated leads | .53 | .35 | .31 | .26 |
| MNE-4SLA | Same but with metal base | .59 | .39 | .35 | .29 |

## BRITE GLO® INCANDESCENT LAMPS

Ultraminiaturized series mounts in a 3/16" hole. Available with 5 V at 60 mA rated lamps having 100,000 hours life. Model ME-680 can be used for PC boards. Specify red, white, green, blue or yellow (amber for MC Series). With #683 T-1 lamp and mounting rings.

| | | | | | |
|---|---|---|---|---|---|
| ME-680 | With pin contacts | $0.89 | $0.59 | $0.54 | $0.45 |
| ME-680L* | With long leads | .89 | .59 | .54 | .45 |

| MC-680L* | With long leads | .99 | .67 | .60 | .49 |

*Solder tin dipped, hi-temp leads, 24 AWG wire.

## PANEL MOUNTED ASSEMBLIES

Model PLN-100 incorporates the crater electrode T-1⅜ MNE-4L in a black phenolic case. Model PL-105 is ultraminiature in size, a mate to PLN-100. With 10" insulated leads, mt. in ¼" hole.

| | | | | | |
|---|---|---|---|---|---|
| PLN-100A | Neon lamp | $0.89 | $0.59 | $0.54 | $0.45 |
| PLN-100B | Neon lamp | .89 | .59 | .54 | .45 |
| PL-105 | Incandescent lamp | .79 | .53 | .48 | .40 |

## LVN-ML-5V MINIATURE NEON LOGILITE

Provides neon glow presentation from low voltage source; self-contained solid state generator provides high voltage necessary for excitation; flat cylinder lens has internal fresnel ring. **Operating Parameters:** 6 V at 36 mA max., 4 V at 21 mA min.; 5 V at 30 mA normal. **Size:** ⅜" bushing length x ⅝" dia. x 1⅜" behind panel (less terminals); mounts in ⅜" hole. Specify red or clear lens.

| | | | | | |
|---|---|---|---|---|---|
| LVN-ML-5V | Low V neon indicator | $4.85 | $3.30 | $2.91 | $2.43 |

## EXTRA LONG NEON LAMP

Replaces readout tubes in "overrange" position of digital voltmeters; also usable as "+" or "−" display or where a longer light source than a conventional NE-2 is needed. Lighted electrode is designed to mate with MG-17 and MG-19 Elfin® tube or other comparable neon readout. Bare leads. **Breakdown:** 90 VDC. **Maintained Voltage:** 65 VDC. **Design Current:** 1.3 mA. **Life:** 2,000–8,000 hours.

| | | | | | |
|---|---|---|---|---|---|
| NE-211 | 11 mm glow | $0.39 | $0.27 | $0.24 | $0.20 |

## SERIES BIM 110-V NEON INDICATORS

General purpose panel indicators have eight lens styles for great versatility; NE-2H high intensity lamp has built-in series resistor for 110-V operation. Indicator housing is white polypropylene with acrylic lens; mounts in 5/16" dia. hole; flexible black 6" leads are solid tinned #22 AWG wire. Supplied with plastic retainer for snug fit in minimum space on front or back of panel. **BIM-A** types are similar to BIM, but with shorter body, solder lugs and limited lens selection. **BIM-R** metal retainer available optionally at extra cost. **Lenses**—See illustrations and specify red, amber or clear.

| | | | | | |
|---|---|---|---|---|---|
| BIM-1 | With lens 1 | $0.59 | $0.39 | $0.35 | $0.29 |
| BIM-A-1 | Lens 1, less resistor | .69 | .46 | .41 | .35 |
| BIM-2 | With lens 2 | .59 | .39 | .35 | .29 |

## CML SERIES TRI-A-LITES

que indicator device that appears white in the off position rns red, green, or yellow when an input voltage is applied of the color coded lead wires. Uses type T-¾ lamps rated .115A/lamp, 15,000 hours average life. Unit mounts in a learance hole with 10380 mounting clip (supplied). Housed r anodized aluminum with translucent polycarbonate cap. nates in 24 AWG stranded wire, color coded, end stripped CML 9501-RGY has flush style white cap; CML 9601-RGY short cylindrical style white cap. Optional features are other combinations, different lead length, hot stamped legends, ack anodized housings.

| CML Number CML- | Net Each, Lots of* | | | | | |
|---|---|---|---|---|---|---|
| | 1-9 | 10-24 | 25-99 | 100-249 | 250-499 | 500-999 |
| or 9601-RGY | $7.06 | $6.48 | $6.02 | $5.33 | $4.83 | $4.28 |

## CM22 SERIES PEANUT-LITES

tile, low-cost indicator assemblies with incandescent or neon . Ideal for stereo amplifiers, mobile equipment, instrumen-, computer and display panels, etc. Incandescent types have emperature polycarbonate shells with T-1¾ lamps and 6″ eads, permanently potted in place for strain relief. Available o cap styles, macrodome (Type CM22-1) or short cylindrical CM22-2). Type CM22-1000 Peanut-Lites include T-2 neon which snap into place in butyrate shells, All types include clips for mounting.

**TO ORDER:** Insert two digits in CML number, replacing o indicate cap color: **01**, clear transparent; **02**, red trans-t; **03**, amber transparent; **04**, green transparent (incandes- types only); or **05**, white translucent. CM22-1000-01-A1A 2) has clear transparent short cylindrical cap with NE-2 lamp.

### WITH T-1¾ INCANDESCENT LAMP

.340″ dia. x .800″ long; #24 AWG wire leads, 6″ long. Type B insulation per MIL-W-16878. Semi-resilient thermosetting encapsulant. Numbers shown are for macrodome cap; for cylindrical cap, change **1** in CML number to **2**; e.g., 2-2-XX-15; prices are the same.

How To Order information above and insert two digits in L no. as indicated. †At 5 volts.

## CM20 SERIES SUBMINIATURE LENS END-LITES

Subminiature end-lites produce axially centered spots for minimal adjustment problems and easy lamp replacement. Ideal for close proximity use with photo sensors, where an intense spot of luminous and infrared energy is required. Typical applications include encoders, tape sensors, card readers and optical scanners. Types CM20-1, -2, -17 and -19 have clear anodized aluminum cartridge body; stainless steel terminals (CM20-19 #24 AWG stranded wire leads); nylon insulation. Types CM20-3 thru -7 and -20 have gold anodized aluminum shell; #24 AWG stranded wire leads; Type B insulation per MIL-W-16878; semi-resilient thermosetting resin encapsulation. Types CM20-5 thru CM20-7 are small enough to be mounted on .250″ centers for card reader applications. **Spot Specifications:** CM20-1, -19: When projected ⅜″ from end of bulb, spot covers ⅛″ dia. target, concentric with long axis at minimum intensity of 750 ft.-candles. CM20-2: When projected 1″ from end of bulb, spot covers 1″ dia. target with minimum of 350 ft.-candles. CM20-3: When projected ⅜″ from end of bulb, spot covers 1/16″ dia. target concentric with sleeve; intensity ⅜″ from bulb is minimum of 750 ft.-candles; spot is narrow elliptical. CM20-4: Same as CM20-3 except covers ⅛″ dia. target; spot is "round" elliptical. CM20-5 thru -7, -20 have no spot specifications, but have axially aligned lamp; CM20-17 spot is axially aligned with housing.

## CM20 SERIES BEAM EMITTERS

Compact assemblies designed to project narrow cones of infrared and luminous energies over distances of 3″ to 20″. Spots produced are round, varying from ⅜″ to 1¼″. Infrared outputs are approximately 75% of input power, ideal for integration with silicon type sensors. Low power consumption (782 mW), axially aligned spots, easy mounting and long life. **Volts:** 2.3. **Current:** .340 amps, ±10%. **Average Life:** 10,000 hours. **Construction:** Anodized aluminum housing, #24 AWG wire leads, semi-resilient thermosetting resin encapsulation. **Size:** .475″ dia.; CM20-8-01, 1.33″ long; CM20-9-01, 2.08″ long.

| CML Number | Focal Distance | Projected Spot Dia. | Net Each, Lots of* | | | |
|---|---|---|---|---|---|---|
| | | | 1-9 | 10-24 | 25-49 | 50-99 |
| CM20-8-01 | 7″–9″ | 1¼″–1¾″ | $20.51 | $18.15 | $16.44 | $14.60 |
| CM20-9-01 | 14″–16″ | 1″–1⅛″ | 23.68 | 20.95 | 18.96 | 16.85 |

## CM39 SERIES LAMP FILTERS (Not Illus.)

Slip-on filters are translucent, precision molded silicone rubber caps; for subminiature and miniature lamps. They assume basic lamp contours, are impervious to color shift. Replaceable and reusable. Temperature range, −62° to +225° C. **TO ORDER:** Add suffix to CML Number to indicate color: **-1**, red; **-2**, blue/white; **-3**, clear; **-4**, amber; **-5**, green; **-6**, blue; **-7**, yellow.

| CML Number | Lamp Size | Size, In. Dia. x L. | Net Each, Lots of* | | | | |

## CM21 SERIES SOCKETS FOR BI-PIN LAMPS

Pushfit Teflon® sockets accept all CM7 Bi-Pin lamps listed above. Snap directly into panels, brackets or PC boards. Type CM21-1 has beryllium copper contacts with .050" pin centers, for T-1 lamps. CM21-2 has phosphor bronze contacts with gold over silver plating, with .125" pin centers for T-1¼ and T-1¾.

®Registered DuPont trademark.

| CML No. | For Bi-Pin Lamp | Mtg. Hole | Net Each, Lots of* 1-9 | 10-24 | 25-99 | 100-249 | 250-499 |
|---|---|---|---|---|---|---|---|
| CM21-1 | T-1 | .122" | $0.73 | $0.67 | $0.62 | $0.55 | $0.50 |
| CM21-2 | T-1¼, T-1¾ | .221" | .95 | .87 | .81 | .72 | .65 |

## CM26 SERIES T-1 PEANUT-LITES

Low cost commercial substitutes for MS25446 and MS90308 ind
cators. Each T-1 Peanut-Lite contains a subminiature lamp seal
in a high-temperature polycarbonate housing. Lamps range fro
3 to 28 volts. Can be mounted with spring mounting clips (CM2
1012) which are provided with T-1 Peanut-Lites. Type 10384 c
for circuit board mounting is also available. Three types of termi
material are available—CM26-1 has .750" tinned wire lead
CM26-2 has .312" long .020" nickel pins; CM26-3 has #26 AW
stranded wire, 6" long. White, red, amber, green, and blue ca
are standard; other colors available. Also available are spec
length and type pins and leads. Write for information. **HOW T
ORDER:** For cap color, substitute for **XX** in CML number:
white; **07**, red; **09**, amber; **10**, green; **11**, blue. Example: CM26-
07-19 is the wire lead version with red cap and 5V, .06A lam

*See How To Order information above and insert two digits
CML no. as indicated.

## CM25 SERIES T-1 INDICATORS

Subminiature T-1 indicators which meet MS-90308. Unbased T-
lamp is inserted into housing and cap is snapped on to hold lam
and provide color identification. Features include dimpled te
minals (patent pending) for positive electrical contact and i
ternally flared lead guides for easy wire-terminal lamp insertio
Hot-stamped legends can be provided with new cylindrical ca
style. Units are small enough to mount on .250" centers and sti
allow adequate wiring room and space to replace lamp. Base an
cap are polycarbonate. **HOW TO ORDER:** For **base style,** su
stitute for first **X** in CML number: **5,** panel mount; **6,** PC moun
For **cap style,** substitute for second **X** in CML number:
round; **8,** lens; **9,** square. For **cap color,** substitute for fin
**XX** in CML number; **01,** clear transparent; **02,** red tran
parent; **03,** yellow transparent; **04,** green transparent; **05,** whi
translucent; **06,** blue transparent; **07,** red translucent; **08,** yello
translucent; **09,** green translucent; **10,** blue translucent; **11,** amb
translucent. Final number is lamp number; to order less lam
omit lamp number. **Example:** CM25-5-706-715 is panel mount
with a round, blue transparent cap and a 5 V, .115 A lam
CM25-5-706 is the same thing without the lamp. Also availab
as MS90308 -X (**2,** red; **4,** yellow; **5,** green; **6,** blue; **9,** clear) -XX
(lamp number 680, 683, or 715). Requires .190"/.186" dia. rou
mounting hole.

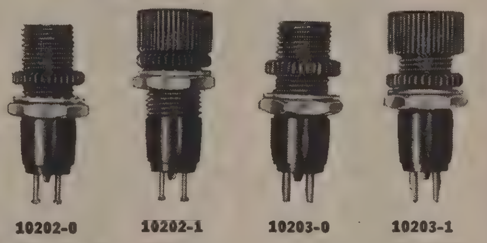
**CML SERIES CARTRIDGE HOLDERS**



## CML SERIES HIDE-A-LITES

Electrical and mechanical specifications identical to CML Series Cartridge Indicators except all indicators appear **white** in off position and take on color only when activated. Colors available: Red, green, blue, amber. Translucent cap only. **HOW TO ORDER:** Replace **XX** in CML number with 50, 60, 70, or 80 to indicate cap style and terminal configuration—**50**, flush, pin; **60**, short cylindrical, pin; **70**, long cylindrical, pin; **80**, macrodome, pin. Replace final suffix **X** with R, G, B, or A for activated color—**R**, red; **G**, green; **B**, blue; **A**, amber. Example: CML 50406 W/R—Flush, translucent cap, 6 volt, .20A, white (red when activated).

## CML SERIES CARTRIDGE HOLDERS

Panel mounting holders for T-1¾ or T-2 lamps. Body, collar and facing nut are black anodized aluminum. Molded phenolic insulation. Turret terminals are spring brass, gold over nickel plate; solder cup terminals are spring brass, tintilate plate. Types 10202-1 and 10203-1 have 9/32″ thick knurled collar nut. Mount in round or "D" hole, .375″ dia., in panels to 15/32″ thick (when not using collar nut). Terminal pins are polarized.

# CHICAGO MINIATURE LAMP WORKS

SPECIALISTS IN DESIGN & MANUFACTU
OF MINIATURE ILLUMINATING, INDICA
ING AND ENERGY EMITTING DEVICES

This is a partial listing of miniature and subminiature lamps. Miniature lamps are most commonly used in numerous applications for panel indicators, aircraft, flashlight and radio or TV pilot lights. The subminiature lamps were specifically designed for modern, up-to-date special equipment such as computers, miniature switches, medical electronic equipment, aircraft, aerospace, etc. Many other uses are met where the ultimate in precision miniature lamp techniques is demanded. Engineered to military specifications, they are used as standards on many classified government projects and business machines. Lamps listed herein are the most popular types available from Chicago Miniature. If your application requires a special lamp or one not shown, send us your application needs. We will be pleased to submit our recommendations.

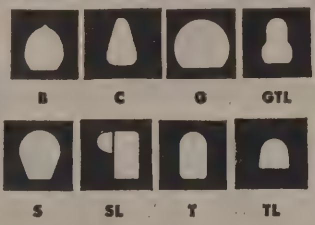
### BULB SHAPES AND SIZES

The bulb is the glass envelope which houses the lamp filament assembly, and contains the vacuum or gas seal. A letter and number identifies bulb shape and approximate bulb diameter in eighths of an inch. Popular bulb shapes are:



**Examples:**

T-1 is ⅛" dia.
GTL-1¾ is 7/32" dia.
G-6 is ¾" dia.
S-11 is 1⅜" dia.
G-16½ is 2 1/16" dia.

## NEON GLOW LAMPS

Cold-cathode gas discharge type lamps. Neon gas ionizes and glows when voltage is applied. Lamp 83(5AH) is a circuit glow lamp; all others are neon indicator lamps.

3130 Series

Bright, highly visible light assemblies utilize miniature slide-base incandescent lamps. Rated 5000 hours life. Available in a variety of colors. Foolproof installation. UL Recognized; CSA approved.

**Series 2800:** Choice of black or stainless bezel. Self-locking, torque-limiting nylon mtg. nut; molded polycarbonate lens is screw-in type for easy lamp replacement. Fits 1¹⁄₁₆″ dia. mtg. hole.

**Series 3040:** Sockets molded from black nylon. Designed to accept short slide base indicator lamps.

**Series 3060:** Choice of round or square lens of molded polycarbonate; snaps on for easy front-panel lamp replacement. Mounts in ½″ dia. hole with hardened spring-steel speednut with rust-resistant finish.

**Series 3130 Legend Lights:** Offers larger message area and brighter illumination. Available in two, three or four terminal versions. Units are easy to install, easily relamped, stay secure, and have long life. Assemblies utilize short slide base indicator lamps. Molded polycarbonate sockets, leads can be attached by soldering or with quick connect receptacles for .205″ x .020″ tab. Mount in either .885″ x .500/.510″ rectangular hole or .500/.510″ double circles on ½″ centers. Two push on speednuts are supplied with each unit socket.

## NEON INDICATING GLOW LAMPS

Gaseous-discharge type for use as indicators. Average useful life, 25,000 hours AC; Types NE-17, 45, 48, 57, 58, 7,500 hours; Types NE-30, 34, 56, 79, 10,000 hours; Type NE-51, 15,000 hours. DC is approximately 60% of AC values. **Ambient Temperature:** Not to exceed 300° F.

*Lamps with screw base have proper ballast built-in. Those with bayonet base or wire terminals do not have them, but are to be supplied and attached by user. Resistance shown for normal operation at indicated circuit volts. †Formed tip bulb. ‡Use 135 V minimum for satisfactory DC operation. §Round end bulb. ♯Center electrode connected to base shell. ▲Argon indicator lamp. ***FET included.**

## CIRCUIT COMPONENT NEON LAMPS

For use as voltage indicators, regulators, switching, etc. All ratings below are DC; all bulb types are T-2 except: NE-67 (T-3¼) and NE-16 (T-4½). All have parallel-post electrodes (W-11), except NE-16, fireman's hat electrodes (P-3). **Ambient Temperature:** −60° F to +165° F, limit.

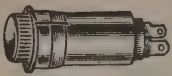
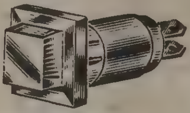
# LEECRAFT® Indicator Lights

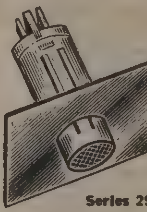


Series 32, 32R Cylindrical Lens

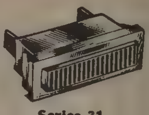
Series 36, 41



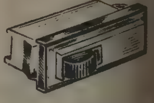
Series 32R Square Lens



Series 29



Series 31 and 31D



Series 51

## SERIES 32, 32R AND 35 SNAPLITE® INDICATOR LIGHTS

UL and CSA Approved. Wide variety of lens and housing colors. Available with either high brightness neon or miniature incandescent lamps. Supplied with 6" insulated 18-ga. wire leads; available with .187" tab terminals at same price by adding suffix **T** to model (e.g., 32-G1-2111**T**).

### WITH CYLINDRICAL LENS*

| Leecraft No.* | Rating |  | Net Each |  | Net/ 100 |
|---|---|---|---|---|---|
|  | Volts | mA | 1-24 | 25-99 |  |
| **32†** | 110–125 | ⅓ W | **$1.08** | **$0.88** | **$53.55** |

| **41EN-G5** | 28 | 40 | **1.50** | **1.14** | **74.67** |

†Neon; all others incandescent.

### *ADD LENS, COLOR SUFFIXES 36-N AND HN, 41-N COLORS

Add suffix for color desired. (Example: 36HN-**3311**=indicator with red housing and red lens.)

| Housing Color | Lens Color |  |  |  |
|---|---|---|---|---|
|  | Red | Amber | White | Clear |
| Black | **1311** | **1313** | **1315** | **1317** |
| White | **2311** | **2313** | **2315** | **2317** |
| Red | **3311** | **3313** | **3315** | **3317** |
| Gray | **7311** | **7313** | **7315** | **7317** |

### 36-EN AND HEN, 41-EN COLORS

Add suffix for color desired. (Example: 36HEN-**2311**=210–250 volts with red flush type lens.) With aluminum bezel, white housing.

| Lens | Red | Amber | Clear | White |
|---|---|---|---|---|
| Flush | **2311** | **2313** | **2317** | **2315** |
| Hi-Hat | **2111** | **2113** | **2117** | **2115** |

## SERIES 29 REAR MOUNT INDICATOR LIGHTS

Lights snap in from rear of panel, locking in place with no additional hardware needed. Removable by compressing release mechanism on unit. Mtg. hole .510" to .520". Available with either wire leads or male tab terminals. Designate tabs by placing **T** after part number when ordering (e.g., 29H-2411**T**). Incandescent versions available, write for information and pricing. UL and CSA Approved. Rated ⅓ W.

| Leecraft Number* | Volts | Net Each |  | Net/ 100 |
|---|---|---|---|---|
|  |  | 1-24 | 25-99 |  |
| **29** | 125 | **$1.17** | **$0.95** | **$58.43** |
| **29H** | 250 | **1.17** | **.95** | **58.43** |

*Add color suffix for housing and lens color desired. (Example: 29H-**2431T**=Indicator with white housing, red lens, 250 volts and tab terminals.)

| Housing Color | Lens Color |  |  |  |
|---|---|---|---|---|
|  | Red | Amber | Clear | White |
| White | **2431** | **2433** | **2437** | **2435** |
| Black | **1431** | **1433** | **1437** | **1435** |

## SERIES 31 AND 31D RECTANGULAR INDICATORS

Provides maximum message display in compact area. Includes long-life high brightness neon or incandescent lamp. Series 31 and 31H equipped with 18-gauge insulated leads. Series 31T and 31HT equipped with .250" brass tabs; .187" tabs also available. White nylon housing with chrome-plated bezel. Mtg. hole 1.281" x .395"; ½" d. behind panel. Rated ⅓ watt at 110–125 volts. Series 31D special units incorporate two lamps, 3 terminations, in standard housing; can activate two legends separately or simultaneously, write for specifications and information. UL and CSA Approved.

| Leecraft No.* | Rating |  | Net Each |  | Net/ 100 |
|---|---|---|---|---|---|
|  | Volts | mA | 1-24 | 25-99 |  |
| **31†** | 110–125 | ⅓ W | **$1.16** | **$0.93** | **$57.75** |

| 5-07 | E | .55 | .37 | 27.00 |
| 5-08 | F | .55 | .37 | 27.00 |

### SERIES 16-00 MIDGET SCREW

Solder terminals, for P-2½, T-1¾ lamp.

| | | | | |
|---|---|---|---|---|
| 16-07 | E | $0.69 | $0.47 | $37.80 |
| 16-08 | F | .69 | .47 | 37.80 |

### SERIES 4-00 CANDELABRA SCREW

Heavy molded phenolic housing extends well above socket shell; for incandescent or neon lamps, such as NE-45, S6 or 10C7. Rated 75 watts at 125 volts; 18 gauge wire leads. UL and CSA Approved.

| | | | | |
|---|---|---|---|---|
| 4-01 | A | $0.69 | $0.47 | $37.80 |
| 4-02 | B | .69 | .47 | 37.80 |
| 4-05 | C | .69 | .47 | 37.80 |
| 4-06 | D | .69 | .47 | 37.80 |
| 4-08 | F | .69 | .47 | 37.80 |
| 4-12 | G | .69 | .47 | 37.80 |

### SERIES 6-00 CANDELABRA SCREW

Tinned solder terminals, for incandescent lamps such as G6 and S6.

| | | | | |
|---|---|---|---|---|
| 6-05 | C | $0.58 | $0.40 | $28.50 |
| 6-06 | D | .58 | .40 | 28.50 |
| 6-07 | E | .58 | .40 | 28.50 |

| 6-11 | L | .58 | .40 | 28.50 |
| 6-13 | M | .58 | .40 | 28.50 |

### SERIES 23-00 WEDGE BASE

Rapid insertion and secure positioning of wedge lamps. Molded housing. Types 23-07 and 23-24 have slotted hole, double contact terminals; others have wire leads.

| | | | | |
|---|---|---|---|---|
| 23-07 | P | $0.58 | $0.40 | $31.50 |
| 23-24 | Q | .58 | .40 | 31.50 |
| 23-207 | P | .65 | .47 | 37.80 |
| 23-224 | Q | .65 | .47 | 37.80 |

### SERIES 10-00, 11-200 SINGLE CONTACT CANDELABRA BAYONET

Similar to double contact candelabra types. Series 10-00 has solder terminals; 11-200 has wire leads.

| Leecraft No. | Mtg. | Net Each 1-24 | Net Each 25-99 | Net/ 100 |
|---|---|---|---|---|
| 10-06 | D | $0.65 | $0.39 | $31.50 |
| 10-08 | F | .65 | .39 | 31.50 |
| 11-271 | C | .65 | .47 | 37.80 |
| 11-272 | D | .65 | .47 | 37.80 |

### SERIES 12-200 DOUBLE CONTACT CANDELABRA BAYONET

Wire leads, for incandescent and neon lamps such as NE-48, G6, S6 or 10C7. Brackets of .035″–.042″ steel (12-240 is clip mounted). Contacts mounted in phenolic disc, separately sprung by small coils. UL and CSA Approved.

| | | | | |
|---|---|---|---|---|
| 12-207 | E | $0.80 | $0.54 | $50.00 |
| 12-225 | O | .80 | .54 | 50.00 |
| 12-240 | H | .80 | .54 | 50.00 |
| 12-271 | C | .80 | .54 | 50.00 |
| 12-272 | D | .80 | .54 | 50.00 |

### SERIES 57-00 DOUBLE CONTACT CANDELABRA BAYONET

Molded phenolic housing, with male tab terminals that fit into terminal boards with female quick-connect terminals. Brackets of .035″-.042″ steel. For incandescent and neon lamps, such as NE-48, S6. Rated 75 watts. UL and CSA Approved.

| | | | | |
|---|---|---|---|---|
| 57-24 | Q | $0.69 | $0.47 | $37.80 |
| 57-45 | R | .69 | .47 | 37.80 |

### SERIES 25-00 MIDGET GROOVED

Subminiature sockets for T-1¾ midget grooved base lamps, including lens-end lamps. Tinned solder lugs (available with wire leads). Size, ⅜″ h.; spaced on centers as close as ¼″.

| | | | | |
|---|---|---|---|---|
| 25-06 | D | $0.82 | $0.60 | $53.55 |
| 25-08 | F | .82 | .60 | 53.55 |
| 25-12 | G | .82 | .60 | 53.55 |
| 25-35 | S | .94 | .73 | 70.00 |

## LAMPHOLDERS FOR SINGLE-ENDED AND DOUBLE-ENDED QUARTZ IODINE LAMPS

**s 2200 Double Contact, Bayonet Base**—Single-ended socket permits lamp to be tioned accurately, securely while minimizing possibility of shaking loose from vibra- . Swift, simple installation. Eliminates extra bulb handling required with screw-in sockets. Optimum heat sink for cool operation. Commonly used for stage, film and lighting; optical devices and instruments; and, general lighting. With 6″ Teflon® lated leads. Meets UL specifications. BRITE-EYE AND GLO-EYE

## BRITE-EYE INDICATOR LIGHTS

Extremely small and lightweight re-lampable indicator uses no lamp base or socket, weighs only 0.3 grams complete. Easily installed and re-lamped from front of panel without tools; locks into place. Ideal for computer logic boards, high density control panels, instrument dials, aircraft and test equipment applications. Meets requirements of MS 90308 with standard console dimensions. Brightness is greater than indicators five times as large; indicates even in direct sunlight. Current drain as low as 8 mA. Base and cap molded from heat-resistant Lexan‡; mounts on .225" centers. Mounting hole size, .191" dia.; base ⅛" deep. Solder terminals. Easily mounted on ⅛" circuit board if desired.

‡G. E. Trademark.

SEE FOLLOWING PAGE FOR GLO-EYE INDICATOR LIGHTS

## TRANS-EYE INDICATOR LIGHTS

Similar to Brite-Eye series, but with built-in transistor driver. Silicon NPN or PNP planar transistors assure high reliability and high temperature characteristics. Lamp current capability, 150 mA max. Operating voltage, 36 VDC max. Temperature range, −20° C to +100° C operating. Base 1⁵⁄₃₂" lg.; base lead ⅝" lg.; emitter lead ½" lg.; lamp terminal ⅛" lg. Models TE201 and TE202 supplied without built-in resistor.

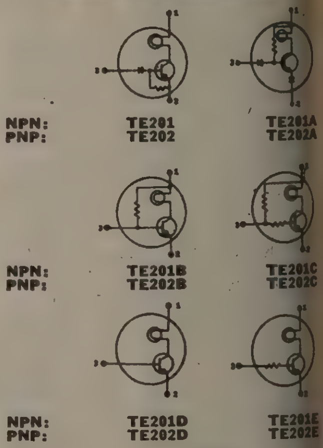
CIRCUIT CONFIGURATIONS



### HOW TO ORDER

Use full number when ordering:

BEP 715 R L P — 1.8K
Ⓐ Ⓑ Ⓒ Ⓓ Ⓔ Ⓕ

Ⓐ **BASE TYPE: BEP**—Brite-Eye panel mount. **BEPH**—Brite-Eye panel mount with heat barrier. **BEC**—Brite-Eye circuit board mount; specify PC board thickness. **BECH**—Brite-Eye circuit board mount with heat barrier. **TE201, -A, -B, -C, -D, -E**—Trans-Eye NPN; see circuit diagrams. **TE202, -A, -B, -C, -D, -E**—Trans-Eye PNP; see circuit diagrams. **BEPR**—Glo-Eye base.

Ⓑ **LAMP:** See pricing tables for various lamps available in Brite-Eye and Trans-Eye designs, above.

Ⓒ **CAP COLOR:** Translucent: **Y**, Yellow; **W**, White; **R**, Red; **B**, Blue; **A**, Amber; **G**, Green. Transparent: **B**, Blue; **C**, Clear; **R**, Red; **A**, Amber; **G**, Green. SEE CAP TYPE (E) for ordering details.

Ⓓ **CAP STYLE: B**—Ball end. **L**—Lens end. **S**—Square end. **D**—Digicap: Square cap with embossed number, letter or symbol. **C**—Cylindrical. **M**—Macrodome. **T**—Tubular. For caps M and T, add **3c** to prices shown. For 1-digit or 2-digit legend on caps C, D or T add **25c** to prices shown.

Ⓔ **CAP TYPE: P**—Transparent (colors red, green, amber, blue or clear); **L**—Translucent (colors red, green, amber, blue, yellow or white only).

Ⓕ **BASE RESISTOR VALUE:** For use only when ordering Trans-Eye lights, if built-in resistor is desired select the value desired from Base Resistor column in table for circuit configurations A through E.

## MINIATURE INDICATOR LIGHTS (CONT'D)

### GLO-EYE ULTRA-BRIGHT NEON INDICATOR LIGHTS

ar to Brite-Eye series; housing presses into .191″ hole and locks in position without additional hardware. Gold-plated r terminals are easily accessible on rear of housing. May be ted on .225″ centers. Weight is less than ½ gram. Produces ations much brighter than units of greater size. Lamps are 3I A1K type covered by MIL-L-15098B. Resistor is ⅛ watt, ral. Unless otherwise specified a 390K resistor will be sup- Physical diameter dimensions are compatible with the -Eye and Trans-Eye indicator lights. Available in seven cap styles, transparent only, in red, amber or clear.

### BRITE-EYE/TRANS-EYE INSTALLATION TOOL

le-ended tool for installation of Brite-Eye or Trans-Eye indicator light with any cap Size, .40″ dia. x 3½″ long.
y No. 601879—Net Each.................................................**$5.00**

## SUBMINIATURE READOUTS

### SUBMINIATURE READOUT TUBES

Low-voltage readout tubes provide 6000 ft.-lamberts brightness at 5 volts (23 mA per segment). Space-saving design for PC board or socket mounting on 0.5″ centers. Slanted characters are .47″ high, .26″ wide. Unlimited color filtering. Totally compatible with IC circuitry. **Recommended Segment Voltage:** 3.5–5.0 volts DC or AC. **Segment Current:** 23 mA at 5 VDC. **Life:** 100,000 hours at 5 VDC. **Viewing Angle:** 140° (included angle). **Segment Luminance:** 6000 ft.-lamberts typical at 5 VDC. **Response Time:** Accent to visibility, 15 msec typical; descent to 50% luminance, less than 20 msec. **Temperature Range:** −50° to +70° C. **Construction:** Glass envelope; tungsten segments; alumina insulator; Dumet pins. **Vibration:** MIL-STD-202D, Method 201A. **Shock:** MIL-STD-202D, Method 213A, Condition J. **Size:** .500″ dia. x 1.50″ high, maximum, not including pins. Pins are .250″ lg. on .250″ dia. pattern. Fits TO-5 socket or can be dip soldered to board.

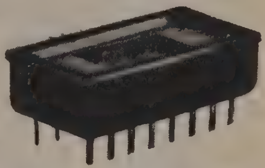
### MICRO-MINIATURE, LOW CURRENT 7-SEGMENT READOUT



Low-voltage operation; delivers 700 ft.-lamberts brightness at 5 volts (8 mA per segment). Miniaturized design with case depth only 0.24″ nominal. Slanted characters are .362″ high, .197″ wide: Mounts on PC board or 16-pin dual in-line IC socket, on 0.5″ centers. Totally compatible with integrated circuitry. Unlimited color filtering. Right decimal point included. **Recommended Segment Voltage:** 4.0 to 6.5 volts DC or AC. **Segment Current:** 8 ma at 5 VDC. **Life:** 250,000 hours at 5 VDC. **Viewing Angle:** 100° (included angle). **Segment Luminance:** 700 ft.-lamberts typical at 5 VDC. **Response Time:** Ascent to visibility, 8 msec typical; descent to 50% luminance, less than 15 msec. **Temperature Range:** −50° to +70° C. **Construction:** Glass face plate; tungsten filament segments; general purpose phenolic insulator; Kovar contacts. **Vibration:** MIL-STD-202D, Method 201A. **Shock:** MIL-STD-202D, Method 213A, Condition J. **Size:** .87″ x .45″ x .24″ plus leads (.12″ long).

## VINYLUGS

To order, select the loose-piece catalog number that meets wire range, tongue type, and stud size. For strip terminals wound on a reel for automatic installation, add prefix S to terminal number (e.g., SBA16-2). Loose-piece terminals are packaged in quantities of 1000 pieces for BA16 and BA14 terminals; 500 pieces for BA10 terminals. Strip-form SBA16 and SBA14 are supplied in reels of 5000 terminals; 3000, larger stud sizes; 2000, SBA10.

### 22-16 AWG WIRE RANGE

Accommodate insulation dia. 0.145″ max. Color code, red. U/L Listed, for sizes 18 AWG and 16 AWG. AWG 18–16. Hand tools for installation of loose-piece terminals are Y10ME-4, Y16MRE-1, and MR8-89-1. Die insert number for installing strip terminal is CVM4-1.

# BURNDY HYLUGS, CLASPS, INSULUGS

## TYPE YAV HYLUG (FIG. G)

iece, uninsulated lugs for terminating a wide range of ercial stranded cable, solid wire, and aircraft stranded Copper construction is tin-plated to resist corrosion and oration. Meets the requirements of MIL-T-7928(AWG) as s MIL-E-16366(SHIPS).

*Suffix **-05** (e.g., 1502-01-**05**19) indicates electro-solder plating; **-01**, silver plating; **-03**, gold plating. †Suffix indicates standard color: **16**, blue for diallyl units; **19**, white for Teflon units. MIL-T-55155 dash numbers **(0/9)** indicate range of colors available. Colors other than standard may be made to order in minimum of 500 unit quantities: for diallyl, add **1c** each; for Teflon, add **2c** each. To order nonstandard colors, replace **19** or **16** final endings of Cambion No. with: **-11**, brown; **-12**, red; **-13**, orange; **-14**, yellow; **-15**, green: **-17**, violet; **-18**, gray. ‡Dash numbers (e.g., 1942-**01**-05 or 1942-**02**-05) indicate varying stud lengths available; specify with order. §Minimum standard package is 50 pieces.

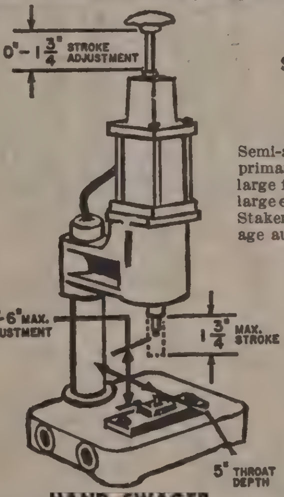
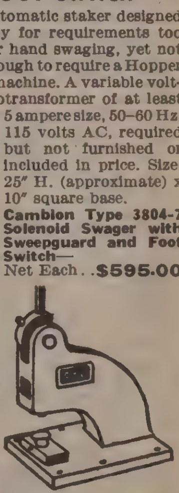
*Available with gold plating only. †Wire-wrap (Reg. Gardner-Denver TM). ‡Knurled mt. Additional quantities available on request. **Minimum standard package is 100 pieces.**



## TYPE 3804-7 SOLENOID SWAGER WITH SWEEPGUARD AND FOOT SWITCH

Semi-automatic staker designed primarily for requirements too large for hand swaging, yet not large enough to require a Hopper Staker machine. A variable voltage autotransformer of at least 5 ampere size, 50–60 Hz, 115 volts AC, required but not furnished or included in price. Size, 25" H. (approximate) x 10" square base.

**Cambion Type 3804-7 Solenoid Swager with Sweepguard and Foot Switch**—
Net Each. . **$595.00**



## HAND SWAGER

Designed for quick, uniform swaging of solder terminals on terminal boards. Adjustable to a wide range of terminal board thicknesses. Swaging in place as far as 1 7/8" from board edge. Less tooling.

**Cambion Type 3802-1**—2 1/2" throat.
Net Each.......................**$49.50**
**Cambion Type 3803-1**—5" throat.
Net Each.......................**$79.50**

## EYELETS AND TERMINALS FOR ABOVE BOARDS

Terminals are MIL Spec. QQ626 silver-plated brass. Specify whether for 1/16" or 3/32" thick boards. Eyelets are hot tin dip finish brass for easy soldering. When ordering turret terminals, add **2** for 1/16" thick board (e.g., 1598-**2**); **3** for 3/32" thick board (e.g., 1598-**3**).

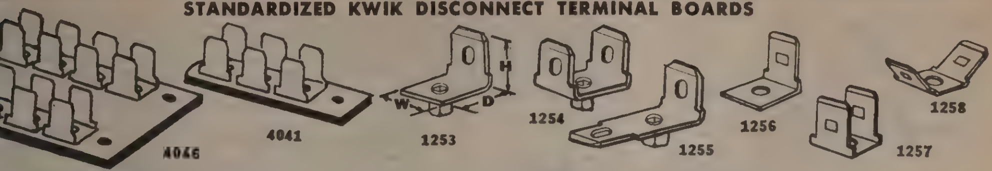
# Keystone Terminal Boards, Tools

## STANDARDIZED KWIK DISCONNECT TERMINAL BOARDS



solderless connections of several s to a common feed line. Material: hick fiberglass, NEMA GRADE ; rated for continuous operation at (300° F). Sheet color, tan. Backing ⅓₂″ thick fiber with drilled mountles. Terminals made of brass per QQ-B-613; No. 1253, 1254 and 1255 8″ thick hot tinned; No. 1256, 1257 258 are .032″ thick with bright plating. Mounting holes, .128″ dia., m ends.

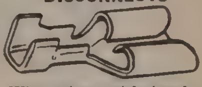
### FEMALE KWIK DISCONNECTS



Wire crimp with insulation support for above terminals. Wire range, #16–20.

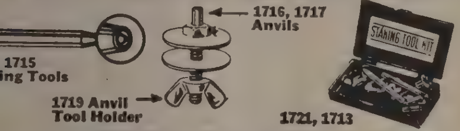
**Keystone No. 4469**—Fits tab .016″–.030″ th., .205″ wide. Net/100. . . **$2.25**

**Keystone No. 4470**—Fits tab .032″ thick, .250″ wide. Net/100. . . **$2.50**

### MOLDED VINYL PLASTIC BOOT

Slips over disconnects.

**Keystone No. 4471** (Clear), **4472** (Red), **4473** (Blue), **4474** (Yellow)—Net/100. . . . . . . . . **$2.50**



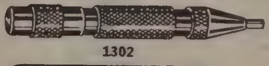
### STAKING TOOL KITS

terminals, rivets and eyelets with ease and safety. Pretool may be used with any drill press; adaptable for use k, arbor, punch or air presses. Or, use as a simple hand driving with hammer. Contoured, heat-treated steel for ear and professional performance. Kits are supplied with tions.

**ne No. 1721 Basic Staking Kit**—For single end terminals, or rivets. Box includes one each of 1714, 1715, 1716, 1717 1719 tool holder. No. 1714 tool handles .062″–.098″ shank 715 tool, .110″–.125″ shank dia.; 1716, anvil with .070″ 00″ end holes; 1717, anvil with .128″ and .152″ end holes; holds ¼″ dia. tools. Net Each Kit. . . . . . . . . . . . . . **$6.50**

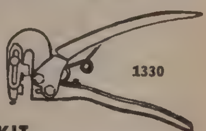
**ne No. 1713 Master Staking Kit**—For single end, double eed-thru), fork terminals, extruded lugs, eyelets, rivets, onsists of one each of 1714, 1715, 1716, 1717, 1719 plus nal 1304, 1305, 1306, 1307, 1315, 1316, 1321, 1324, 1325, 1722 and 1726 tools. No. 1304 tool has .051″ dia. hole; 063″ dia. tool; 1306, .073″ dia. tool; 1307, .086″ dia. tool; 098″ dia. tool; 1315, .045″ dia. pin, for 1⁄16″ dia. eyelets; 068″ dia. pin, for 3⁄32″ eyelets or extruded lugs; 1321, 1325, anvil for 6-32 thread bushings; 1326, anvil for D. bushings; 1722, anvil with .053″ and .065″ end holes; nvil with .040″ and .060″ end slots for fork type terminals. ch Kit. . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . **$25.00**

**ne No. 1707 Impact Staking Kit**—For automatic, hand operation. Impact handle produces light or heavy adjustable by turning of the spring tension cap. Uniform g action attained by pressing down handle. Interchangeools permit assembly of terminal boards, printed circuits nall components. Consists of one each 1315, 1316, 1321, 1717, 1722, 1726 tools plus additional 1310, 1311, 1312, ools; 1301 anvil holder; and, 1302 impact handle. No. ool with .053″ dia. hole; 1311, .062″ dia. tool; 1312, tool 0″–.072″ shank dia.; 1313, tool for .078″–.093″ shank 301, base for ¼″ dia. tools, with mounting holes for pert assembly to bench, felt covered base to prevent marring; ⁄2″ dia. x 5″ long impact handle, accepts 3-56 threaded et Each Kit. . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . **$23.50**



1302

1810



1330

### PROTOTYPE KIT

Ideal for 1⁄16″ and 3⁄32″ thick terminal boards for experimental or production runs. Saves costly tooling and set up charges.

**Keystone No. 1723 Prototype Kit**—Consists of 1⁄16″ and 3⁄32″ Bakelite§, blank and pre-punched boards; hardware such as eyelets, terminals, brackets, bushings, push-in terminals; complete terminal staking tool kit; and instructions.
Net Each Kit. . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . **$17.00**

§Reg. Bakelite Corp. trademark.

### TEST PROBE KITS

Precision molded, low cost, sturdy, easily assembled accessory for signal generators, VTVM, oscilloscopes etc. Designed to contain required circuitry for signal tracers, demodulators, rectifying and isolation probes. **Size:** Handle, 1″ dia. x 5″ long; probe, 13⁄16″ long; terminal board, 11⁄16″ w. x 4″ lgth.; brass tube, 23⁄32″ I.D. x 3″ long.

**Keystone No. 1810 Test Probe Kit**—Consists of one each black hi-impact plastic handle, black phenolic cap, pre-punched terminal board, push-in type terminals, brass shield, senior solderless brass N.P., and screws for fastening cap to handle.
Net Each Kit. . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . **$1.00**

**Keystone No. 1811 Test Probe Kit**—Same as 1810, but less terminal board, terminals and brass tube. Net Each Kit. . . **80c**

### ALL-PURPOSE HAND PUNCH

For punching sharp, burr-free holes in a variety of materials to 1⁄16″ thick untempered metal, 3⁄32″ phenolic, ¼″ Masonite or min. ¾″ dia. tubing. Shears eyelets, leaving clear undamaged hole; or, use as nibbler.

**Keystone No. 1330 Hand Punch**—Equipped with adjustable gauge. Replaces innumerable drill press operations. Depth of throat, 1¼″. Net Each (hand punch only). . . . . . . . . . . . **$13.00**

#### INDIVIDUAL DIE SETS

Consists of top and bottom tool.

**Keystone No. 1331** (for 1⁄16″ dia. hole), **1332** (.072″ dia.), **1333** (3⁄32″ dia.), **1334** (⅛″ dia.), **1335** (5⁄32″ dia.), **1336** (3⁄16″ dia.), **1337** (7⁄32″ dia.), **1338** (¼″ dia.)—Net Each. . . . . . . . . . . . . **$2.20**

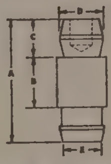
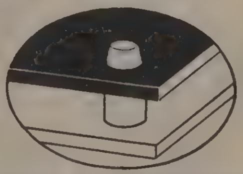
## SPACER/BUSHINGS





Mount and insulate PC boards on metal chassis or panels without nuts, bolts, or lock washers. Save assembly time while providing an economical and mechanical secure mounting device PC boards require only mating holes for the opposite end of the spacer/bushing and may be snapped on and off of the mother board at will. Mtg. hole .152″ dia. in .062″ thick chassis.

## PUSH-IN TERMINALS

Zip push-in terminals push into appropriate size holes and hold without staking (may be staked if required). Use for experimental prototype or production applications. For faster insertion in circuit boards, order insertion tools.

## PHOTORESIST ETCHED CIRCUIT KITS

Designed to produce one or more sharply detailed etched circuit boards from an easily made master positive, in one hour. Positive artwork is used; no negative to be made, no photography required. Simply apply transfer patterns to Mylar* film for master positive, place on pre-photosensitized Vectorbord and expose to suitable light source. High speed etching with virtually no under-cutting is provided by vigorously shaking board and chemicals in closable plastic box.

*Reg. DuPont TM.

**Vector Kit No. 32XA**—Contains five copper clad, photoresist coated boards; two adhesive-backed artwork sheets with IC and transistor patterns; "rub-on" pattern for pads, lines, tabs; plastic box; etchant; developer; glass plate; 3 sheets Mylar; two sheets grid paper; tools. Net Each Kit .................... **$24.95**

**Vector Kit No. 32X**—Contains two boards; cut and peel sheet; transfer patterns; developer; etchant; touch-up resist; Mylar sheet; developing tray; glass plate. Net Each Kit ....... **$8.95**

## EXPERIMENTERS' ETCHED CIRCUIT KITS

Permits making quick, easy etched circuits without fancy art work, negatives or long waiting. Low cost, uncomplicated preliminary circuits can be made at any desk at a low cost. Contains everything needed, except hot water. Simply sketch the circuit on layout paper grid; apply etch resist on copper-clad board using resist ink or tape; place board in plastic bag; and, add hot water—in 45 minutes the circuit is ready to be washed and used. Board can be cut, drilled or punched as needed.

**Vector Kit No. 27X**—With two XXXP phenolic boards, 4½" x 6½", copper clad on one side—one with .062" holes on 0.2" centers, one unpunched; 1 sheet resist circles; 1 sheet resist tape strips; 2 bags of etchant; resist ink; 3 sheets 8½" x 11" layout paper; and full instructions. Net Each Kit ....... **$6.50**

**Vector Kit No. 27XA**—Similar to 27X, except built around "Vectoresist", rub-on transfer resist. Simply apply resist pattern to board by rubbing back of 10" x 15" sheet having assortment of varying width lines, circles, dots and connector pattern with three groups of 21, 22 and 22 contacts spaced .156" on centers. Boards, etchant same as 27X. Net Each Kit ............ **$6.50**

## EXPERIMENTERS' INTEGRATED CIRCUIT KITS

Designed for fast, easy hookup of nearly all IC packages and discrete components. Mounting surface is a pre-punched Mic Vectorbord with .042" dia. holes on 0.1" grid pattern, support by 2" high extruded aluminum Frame-Loc rails.

**Vector Kit No. 29X**—Includes 4.5" x 13.9" P pattern board an frame plus 14- and 16-pin DIP sockets, TO-5 sockets, transist sockets, flatpack adapter plates, T42-1 ZIP terminals, K2 inboard pins, adapter wafers, "Daisy Chain" patchboards, D extractor tool, P149A terminal insertion tool, bus strips, layo paper, wire, hardware. Net Each Kit ................ **$59.7**

**Vector Kit No. 30X**—Breadboard kit includes 8½" x 4½" pattern board plus bus strips, 100 T42-1 Micro-Klip terminals an P149 installation tool, 50 K32 "J" terminals, two sheets gr layout paper, adhesive to mount DIP sockets, bare and insulat hookup wire. Net Each Kit ...................... **$10.7**

**Vector Kit No. 31X**—Includes 4½" x 17" board with all hardwa in 30X kit plus 50 K24C inboard pins, two B20F pot and swit mounting brackets, screws, lockwashers and nuts, six sheets grid layout paper. Net Each Kit .................. **$17.5**

**Vector Kit No. 30XA**—Includes 8½" x 4½" board, 100 T42 Micro-Klip terminals and tool. Net Each Kit .......... **$4.5**

## EXPERIMENTERS' CHASSIS KITS

Save set-up time on experimental circuitry. Chassis, punch boards and solderless clips for quick set-up of circuits with simp hand tools. Some kits also permit soldering for permanent us

**Vector Kit No. 25X**—Punched phenolic deck 8½" x 17" x ¼" wood frame has .093" holes spaced .265" on grid. Employs T30N spring clip for quick, solderless connection; clip holds up to leads with low contact resistance. With tube and transistor socke See parts list, below, for kit contents. Net Each Kit... **$21.4**

**Vector Kit No. 22X**—Punched phenolic deck 4 13/16" x 8½" x mounted on aluminum channels. Employs T9.4 push-in termin for soldered component connection. Transistor sockets and flexi array of parts supplied (see listing, below) for widest applicatio Net Each Kit .................................. **$11.5**

**Vector Kit No. 22XA**—Professional size version of 22X. Extrud aluminum Frame-Loc chassis, 17" x 8½" x 2"; Vectorbord de with 3/32" holes on .265" centers. Eight transistor sockets, 124 Z push-in terminals, 100 springclips, 18 U-clips, 14 patchcords, e (Contents not listed below). Net Each Kit ........... **$28.0**

**Vector Kit No. 21X**—Same as 22X, but board 4 13/16" x 17" x and with tube sockets. See listing, below, for parts supplied. Net Each Kit .................................. **$16.7**

**Vector Kit No. 20X**—Same as 22X, but supplied with tube socke only. See parts listing, below, for contents. Net Each Kit.. **$6.7**

## FLAT PACK IC ADAPTERS

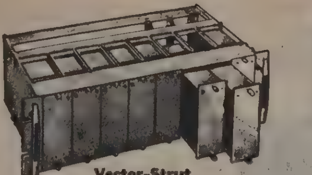
paper wafer (1/16") with copper etched pattern on .05" Provide easy mounting of 14-pin flat pack IC's to P Micro-Vectorbord. Micro-Klip terminals.

| r No. | Description | Net Each |
|---|---|---|
| -14 | Pkg. of four wafers, 1" x 1.6" | $2.10 |
| -14-1 | Single wafer, 4.8" x 4.5"; 12 pads | 3.36 |

## TUBE BASE SHIELDS

unting above socket as base for conventional bayonet type ields. Types **S7.17** and **S9.17** are commercial type. No. nd **S9.22** are military.

**No. S7.17**—7-pin, cadmium iridited steel. Net Each. . **7c**
**No. S7.22**—7-pin, nickel-plated brass. Net Each. . . . **18c**
**o. S9.17**—9-pin, cadmium iridited steel. Net Each. . . . . **5c**
**o. S9.22**—9-pin, nickel-plated brass. Net Each . . . . . . **19c**



Vector-Strut

Multi-Mod

## VECTOR-STRUT CAGES

Adjustable aluminum frames mount in 19" racks and accommodate "EFP" extended front panel cases (listed below).

**Vector No. CA-52-HE-89 Cage Kit**—5¼" high with 9" long sidewalls, cross members (triple T struts) and brackets, plus necessary assembly hardware. Case guides and EFP modules are ordered separately. Net Each . . . . . . . . . . **$19.90**

**Vector No. CMG-7 Guide Kit**—Case guides and hardware to mount eight 2" wide modules in above. Net Each. . . . . **$15.82**

**Vector No. CMG-4 Guide Kit**—Case guides and hardware to mount ten 1.6" wide modules. Net Each. . . . . . . . . **$18.33**

**Vector No. CMA-3-20 Cage**—Completely assembled, for eight 2" wide modules. Consists of CA-52-HE-89 and CMG-7 kits above, assembled. Net Each. . . . . . . . . . **$49.24**

**Vector No. CMA-3-16 Cage**—Completely assembled, for ten 1.6" wide modules. Net Each. . . . . . . . . . **$53.54**

**Vector No. EFP-204-6.6 Module**—Aluminum module case, 2" wide, fits CMA-3-20 cage above (or CA-52-HE-89 with CMG-7 kit). Accepts 4½" x 6½" circuit cards completely inside, in nine extruded grooves. Slide-out side covers for easy access, front and rear panels. Net Each. . . . . . . . . . **$6.07**

**Vector No. EFP-164-6.6 Module**—As above, but 1.6" wide for CMA-3-16 cage; six grooves. Net Each. . . . . . . . . . **$5.90**

**Vector-Strut Cages and EFP modules are available in many other sizes; write for information and prices.**

## MULTI-MOD CASES

Sleek and sturdy aluminum cases have .075" wide slots on .150" centers across case width for screw-free mounting of circuit cards or shielding panels. Easily removable fourth side permits side cover to slide off for quick access. Clear anodized.

| Vector No. | Size, Inches Width | Length | Height | For Circuit Card Size, In. | Net Each |
|---|---|---|---|---|---|

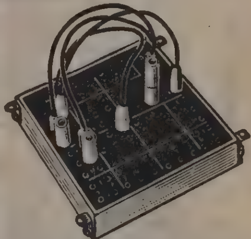
| FT-3 | Rubber bumper feet (package of 8) | | | | .40 |

## VECTOR PAK CASES

Extruded aluminum cases designed to accommodate cards and be used as a plug-in unit. Removable base plate is flat .062" stock; may be clotted to pass circuit board plug tips. Sides slide open without removing base. Brushed satin finish.

| Vector No. | Size, Inches | Max. Card Size | Net Each |
|---|---|---|---|
| HF20-46-62/1 | 2 x 4.62 x 6.21 | 4½" x 6" | $4.58 |
| HF20-31-42/1 | 2 x 3.12 x 4.21 | 3" x 4" | 3.89 |
| HF20-31-86/1 | 2 x 3.12 x 8.68 | 3" x 8½" | 5.72 |

## PATCHBOARDS



Simple reliable units for single conductor patching on computers, control and test panels. Contacts are spaced on .265 centers and accept .090 diameter patchcords listed below. Reliable low resistance contacts (under .001 ohms) are beryllium copper nickel-plated and gold flashed with two holes for soldered leads. Solderless slip-on contacts (listed below) permit solderless connections to back. Alpha-numeric numbering supplied as standard on all units with letters running horizontally and numbers vertically, front and back. New aluminum extrusion frames all units for handsome, custom appearance. Panels are black with white letters and numbers. Mounting brackets furnished with all units.

| Vector No. | Description | Net Each |
|---|---|---|
| PB110-2 | 10 Contacts 2.985 x .600 x 1"‡ | $ 4.25 |
| PB210-2 | 20 Contacts 2.985 x .865 x 1"‡ | 4.45 |

*For two-sided solder terminals, change third digit in Vernitron No. from 1 to **2**; prices are the same as one-sided.

# waldom SOLDERLESS TERMINALS

## SOLDERLESS TERMINALS AND CONNECTORS

als are made from the finest materials. Annealed electrolytic copper and electro-tin plated.
ece design internally serrated, strength gussets and chamfered edge.
**TITE®:** Non-insulated terminals make positive connections and save labor—uniformly
connection. UL Recognized.
**KRIMP®:** Has all the advantages of the Krimptite® terminals, plus permanently attached
inyl plastic insulating sleeve. UL Recognized.

## TERMINALS FOR USE WITH TERMINAL BLOCKS

minate circuit failures, these terminals are produced to exactly the right shape and width to fit arrier blocks indicated. Provide neat, inline appearance; cannot loosen, turn sideways, arc, and Rectangular tongue types are recommended for greatest reliability. Spade tongue terminals are t to install and remove; flanged spade types offer greater reliability. UL Recognized.

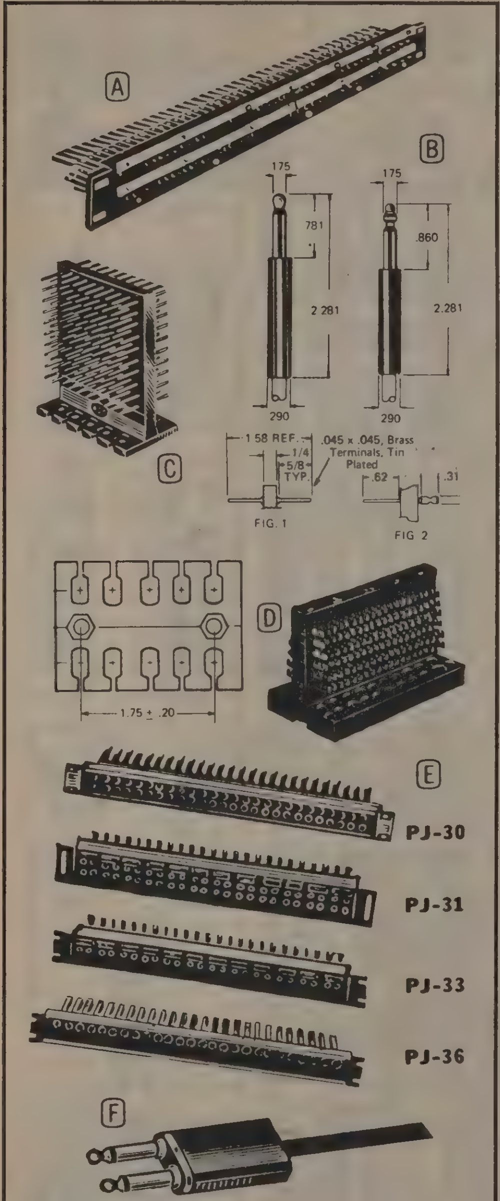
# JACKS, JACK PANELS, PATCH CORDS AND TERMINAL BLOCKS



## BANTAM JACK PANELS (FIG. A)

Compact patch fields for modern communications equipmen Double row panel holds 96 jacks (48 pairs), twice the number o standard size panel. Extruded black anodized aluminum pane 1¾" x 19". Panels with 104 jacks, panel inserts, and special components are available; write for information.

| ADC Type | Description | Net Each, Lots of | | |
|---|---|---|---|---|
| | | 1-9 | 10-24 | 25-99 |
| PJ-731 | Panel, less jacks | $ 19.20 | $16.00 | $12.80 |
| PJ-739 | Panel with PJ-839 jacks | 116.40 | 97.00 | 77.60 |

## BANTAM PATCH CORDS (FIG. B)

Shielded cables with plastic jackets, molded-on plugs, brass plug components and integral strain reliefs. Double-plug patch cords are also available, with 2 or 3 conductors.

| ADC Type | Con-ductors | Length | Net Each, Lots of | | |
|---|---|---|---|---|---|
| | | | 1-24 | 25-49 | 50-99 |
| PJ-701 | 2 | 6" | $3.[illegible]0 | $3.00 | $2.40 |
| PJ-702 | 2 | 12" | 3.66 | 3.05 | 2.44 |
| PJ-704 | 2 | 24" | 3.78 | 3.15 | 2.52 |
| PJ-706 | 2 | 36" | 3.90 | 3.25 | 2.60 |
| PJ-708 | 2 | 48" | 4.02 | 3.35 | 2.68 |

| PJ-652 | | 120 | 3.75" | 7.80 | 6.50 | 5.70 |

## MOLDED TERMINAL BLOCKS WITH 20-PIN ROWS (FIG. D)

Molded black thermoplastic with electro-tin plated brass solder terminals in graduated lengths. Base, 3" wide x 6.062" long.

| ADC Type | No. of Term. | Rows | Height | Net Each, Lots of | | |
|---|---|---|---|---|---|---|
| | | | | 1-9 | 10-24 | 25-99 |
| PJ-103 | 60 | 3 | 2.593" | $ 5.85 | $ 4.88 | $ 3.90 |
| PJ-104 | 80 | 4 | 2.937" | 7.05 | 5.88 | 4.70 |
| PJ-105 | 100 | 5 | 3.281" | 8.25 | 6.88 | 5.50 |
| PJ-106 | 120 | 6 | 3.625" | 9.45 | 7.88 | 6.30 |
| PJ-108 | 160 | 8 | 4.312" | 11.85 | 9.88 | 7.90 |
| PJ-112 | 240 | 12 | 5.593" | 16.65 | 13.88 | 11.10 |

## JACK PANELS (FIG. E)

Steel-reinforced molded phenolic panels fit 19" rack. For use in TV, radio, recording studios and communication centers. Accepts standard double plugs; ⅝" spacing between rows. Type PJ-37 commonly used for "Line", "Equip", "Mon" jack sets. Available less jacks, or with PJ-339 or PJ-318 jacks.

| ADC Type | Panel Style | With Jacks | No. of Jacks | Net Each, Lots of | | |
|---|---|---|---|---|---|---|
| | | | | 1-9 | 10-24 | 25-99 |

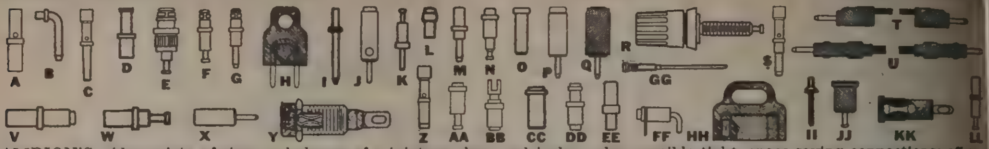
CAMBRIDGE THERMIONIC CORPORATION

**CAMBION®**

# MINIATURE PLUG AND JACK CONNECTOR



CAMBION'S wide variety of sizes and shapes of miniature plugs and jacks makes possible tight, space-saving connections; offers r liable "pluggability" for individual components or assemblies and provides unique PC board design possibilities with patching to from boards. Positive grip, with low contact resistance after may repeated insertions and extractions. Insulated or noninsulated typ —units for swaging, dip-soldering, press mount or threaded stud mounting. **To Order:** Use Cambion Type No. (1521); add Dash N from "Recommended Board Thickness" column to indicate board thickness or patch cord length, as the case may be. Final suffix show indicates finish; **03**, Gold; **04**, Electro-Tin; **05**, Electro-solder; **08**, Bright Alloy plating.

Engineering Kit

## BANANA JACKS

Completely insulated molded body with cadmium-plated ins Accommodates banana plugs of nominal .175″ dia. **Voltage Bre down:** 10,000 VDC. Capacity to 1/16″ panel, 2.4 pF nom. Mou in 21/64″ diameter circular, "D" or double flat hole (1/4″ across flat Single nut furnished for mounting, no other mounting hardwa needed. See Color Chart* on adjacent page.

**Johnson No. 108-0900-001**—Net Each........................1

## STANDARD BANANA JACKS

High quality, machined brass banana jack. Nickel-plated, f nished complete with solder terminal and nut.

| Johnson No. | Dimensions, Inches | | | | Hole Dia. | Thread | Net Eac |
|---|---|---|---|---|---|---|---|
| | F | D | S | H | | | |
| 108-0740-001 | 3/8 | 1/4 | 17/32 | 5/8 | .166″ | 1/4″-28 | 18 |

## RIB-LOC® PRESS-IN BANANA JACKS

Johnson RIB-LOC design permits substantial production li savings as no mounting hardware to handle and assemble. Installa tion by pressing into proper size chassis hole. Accept .120″ tip pl in recessed contact. Silver-plated brass contact. Brass solder te minal silver-plated and iridited for good solderability. Insulati body molded of low-loss polyamide. **Current Rating:** 10 amp **Peak Withstanding Voltage:** 5000. Capacity to 1/8″ panel: 1.4 p nom. Available in six colors, see Color Chart* on adjacent pag

**Johnson No. 108-1100-001**—Net Each........................11

## STANDARD BANANA PLUGS

Accurately machined brass studs extend the full length of plu providing extra strength. Nickel-silver springs are highly resista to corrosion. Bodies and hardware .0001″ nickel-plated. All banan plugs are available with beryllium copper springs and nick cadmium or silver plating. Wide selection of miniature solde type plugs is also available on special order. Quantities in speci platings or plugs should be sufficiently large for economic production runs. Solder terminal and nut or screw furnishe

| Johnson No. | Dimensions, Inches | | | | Thread | Net Each |
|---|---|---|---|---|---|---|
| | S | P | D | H | | |
| 108-0750-001 | 3/8 | 17/32 | .175 | 1 1/8 | 6-32 | 23¢ |

| 108-0753-001 | ...... | 17/32 | .175 | 15/16 | 6-32 | 24¢ |

Similar to standard types listed above, except designed for rive ing. Springs are beryllium copper with cadmium plating.

| | | | | | | |
|---|---|---|---|---|---|---|
| 108-0754-001 | 7/32 | 13/32 | .155 | 13/16 | ........ | 15¢ |

## MINIATURE BANANA PLUGS

Extremely small insulated banana plugs with precision machine phosphor bronze body, nickel-plated. One-piece springs are bery lium copper, nickel-plated, .120″ dia. Polyamide sleeve. **Curren Rating:** 5 amps. Available in 6 colors, see Color Chart* on adjacen page.

**Johnson No. 108-1000-001**—Net Each........................36

## SOLDERLESS BANANA PLUGS

Compact, high voltage insulated plug for a wide variety of appl cations. Designed for fast, solderless connection of up to 16 gaug standard wire. Body and pin are made of one piece nickel-plate brass with high grade nickel-silver springs. Molded sleeve. **Curren Rating:** 15 amps. See Color Chart* on adjacent page.

**Johnson No. 108-0300-001**—Net Each........................25

## DUAL BANANA PLUGS

Extremely versatile plug for either solderless or set screw conne tion. Molded body incorporates polarity indication and strai relief hole for wire leads. Nickel-plated body and high qualit nickel-silver springs. Accurately machined brass studs extend fu length of pins for extra strength. **Voltage Breakdown:** 10,000 VD **Current Rating:** 15 amps. Capacity plug to plug, 1.3 pF. Se Color Chart* on adjacent page.

**Johnson No. 108-0200-001**—Solderless. Net Each.........75

**Johnson No. 108-0250-001**—With set screws. Net Each....85

## PATCHCORD STACKING PLUGS

Developed for custom patchboard assembly and replacement damaged molded patchboard plugs. Assembly of patchcords wit any length and color. Used with standard 0.144″ diameter rubbe or extra-flexible polyvinyl insulated wire. Plug body precisio machined brass with 0.0002″ nickel plating. Polyamide housin available in six colors. Operating temperature range, −55° C t +105° C.

### STACKING STANDARD BANANA PLUGS

Current rating, 15 amps. Assembly with impact punch and fixtu is recommended. Available in 6 colors, see Color Chart* o adjacent page.

**Johnson No. 108-1080-001**—Net Each........................37

### STACKING .080″ STANDARD TIP PLUGS

Current rating, 10 amps. Available in 6 colors, see Color Chart on adjacent page.

**Johnson No. 105-1200-001**—Net Each........................43

### ASSEMBLY PROCEDURE

First feed stripped wire through cross hole of metal contact, the insert contact and wire into housing. Finally place into fixture place tip of tool into rear of contact and snap contact into place

### ENGINEERING KITS

Contain material to assemble 30 patchcords in six colors.

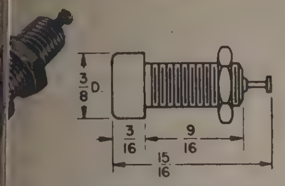
**Johnson Standard Banana Patchcord Stacking Plug Engineeri Kit No. 108-1299-001**—Contains 10 each of white, red, black green, yellow and blue standard banana plugs; one assembly too and one assembly fixture. Net Each........................**$21.95**

**Johnson No. .080″ Tip Patchcord Stacking Plug Engineering Ki No. 105-1299-001**—Contains 10 each of white, red, black, green yellow and blue color .080″ tip plugs; one assembly tool and on assembly fixture. Net Each........................**$24.95**

# TIP JACKS, PLUGS AND PRINTED CIRCUIT CONNECTORS

## TIP JACKS

### DELUXE TIP JACK



body with recessed closed entry
ontact. Silver-plated beryllium cop-
act spring; brass solder terminal is
dipped. **Current Rating:** 10 amps.
**Breakdown:** 11,000 VDC. Ca-
o ⅛" panel: 2 pF. ¼"-32 nut fur-
U.S. Patent No. 2,704,357. See
hart*.

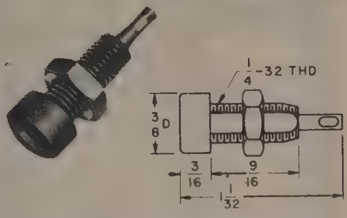
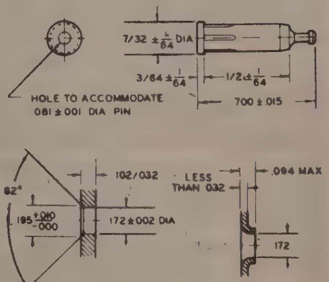
| 6108-10A | **105-0212-200** | Violet |

### STANDARD TIP JACK



Molded body with recessed, cadmium-plated formed phosphor bronze contact. **Current Rating:** 10 amps. **Voltage Breakdown:** 9000 VDC. Capacity to ⅛" panels: 2.0 pF. ¼"-32 nut furnished. See Color Chart* below.
**Johnson No. 105-0800-001**—Net . . . . **14c**

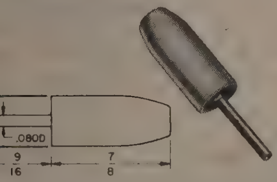
### RIB-LOC® PRESS-IN TIP JACKS



Johnson Rib-Loc design permits substantial production line savings as no mounting hardware to handle and assemble. Installation by only pressing into proper size chassis hole. Accept .080" tip plug in recessed, closed-entry type contact that rejects plugs .085" or larger to prevent accidental contact damage. Silver-plated beryllium copper contact spring. Brass solder terminal silver-plated and iridited for good solderability. Insulating body molded of low-loss polyamide. **Current Rating:** 10 amps. **Voltage Breakdown:** 5,000 VDC. Capacity to ⅛" panel: 1.4 pF nominal. See Color Chart* below.
**Johnson No. 105-1040-001**—Net . . . . **18c**

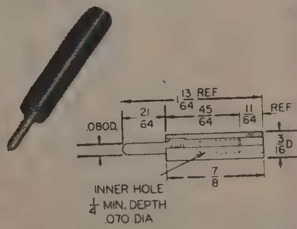
## TIP PLUGS

### SOLDERLESS TIP PLUG



letely insulated, molded sleeve. Re-
metal head prevents exposure of
surfaces when engaged in any stand-
p jack. All metal parts are nickel-
brass. Designed for solderless con-
n of up to 16 gauge stranded wire.
ll standard tip jacks. **Current Rating:**
ps. See Color Chart*.
**son No. 105-0300-001**—Net . . . . **20c**

### SUB-MINIATURE TIP PLUG

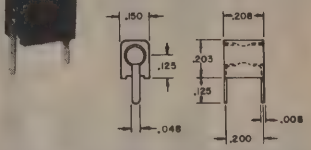


For use with miniature jack, .080" dia. tip. Nickel-plated machined brass body, solder type lead connection. See Color Chart*.
**Johnson No. 105-0770-001**—Net . . . . **22c**

## PRINTED CIRCUIT CONNECTORS

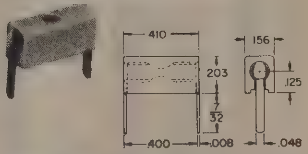
Sub-miniature tip jacks are rated at 5 amps max. current capacity. Operating voltage is 1500 volts rms at sea level and 350 volts rms at 50,000 feet. Contact resistance is less than 2 milliohms; capacitance between 2 adjacent jacks is less than one pF at 1 MHz. Body is of tough, low-loss polyamide per MIL-M-20693A; able to stand hard usage. Jacks equipped with beryllium copper contacts; contacts and terminals are silver-plated.

### NEW HORIZONTAL JACK



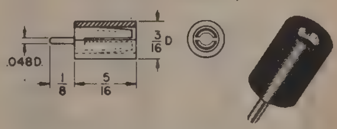
New design accepts 0.080" dia. tip plug in either end. Silver-plated and iridited beryllium-copper formed contact. Two terminals. Approx. one-half size of standard jack. See Color Chart* below.
**Johnson No. 105-1100-001**—Net Ea. . . **9c**

### HORIZONTAL JACK



Unique design accepts .080" dia. plug in either end, or from top or bottom. Silver-plated beryllium copper formed contact. Two terminals. See Color Chart* below. U.S. Patent No. 3,208,027. Without cross hole available on special order.
**Johnson No. 105-0750-001**—Net Ea. . . **9c**

### VERTICAL JACK



Mounts through single .052" hole, requires minimum mounting area. Silver-plated, machined beryllium copper contact. See Color Chart* below.
**Johnson No. 105-0850-001**—Net . . . . **14c**

### *COLOR CHART

Connectors, unless otherwise specified are available in 6 molded colors to Federal Standard 595. Other colors listed are available as specials. E. F. Johnson No. for color desired is determined by adding color numbers on chart below to **6th** and **7th** digits of E. F. Johnson No. listed for series. To order 105-1040-001 in violet color, add **12** to **6th** and **7th** digits of series number and order 105-1052-001.

| Color | No. | Color | No. |
|---|---|---|---|
| White† | 01 | Yellow† | 07 |
| Red† | 02 | Brown | 08 |

| 271 | B | Same, but with nickel-plated beryllium copper spring |
| 281 | B | Same, but with silver-plated beryllium copper spring |
| 295 | C | Screw-term. solderless; nickel-plated phos. bronze spring; 1" handle |
| 296 | C | Same, but with silver-plated spring |
| 297 | C | Same, but with nickel-plated beryllium copper spring |
| 298 | C | Same, but with silver-plated beryllium copper spring |
| 239 | D | Internal spring collet solderless; phosphor bronze nickel-plated spring; 1¼" machined butyrate handle—specify red or black |
| 236 | D | Same, but cross-drilled hole in spacer for solderless connection |
| 204 | E | Set-screw solderless; nickel-plated phosphor bronze spring; 1" handle |
| 254 | E | Same, but nickel-plated beryllium copper spring |
| 213 | F | Split type with side screw; cross-slotted for spring tension |
| 253 | G | Soldered or solderless with internal stud; cross-slotted; 1" handle |
| 291 | H | Stud-soldered midget plug with ⅝" machined butyrate handle; 13/32" plug with nickel-plated phos. bronze spring; specify red or black |
| 292 | H | Same, but silver-plated spring |
| 293 | H | Same, but nickel-plated beryllium copper spring |
| 294 | H | Same, but silver-plated beryllium copper spring |
| 214 | I | Adapts tip plug to banana plug; molded butyrate handle with jack for tip plug; nickel-plated phosphor bronze spring; red or black |
| 1511 | J | Solderless banana plug; banana plugs in top and side of machined butyrate handle for unlimited, multiple circuits; phosphor bronze nickel-plated spring; specify red, black, yellow or green |
| 1512 | J | Same, but beryllium copper spring |
| 255 | K | Meter plug with 4-leaved nickel-plated phosphor bronze spring; specify red or black |
| 285 | L | Giant type with machined phenolic plastic handle, deep solder well; 6-leaved phosphor bronze nickel-plated spring; specify red or black |
| 476 | M | Molded nylon plug; soldered or solderless; phosphor bronze nickel-plated spring; specify color† |
| 477 | M | Same, but silver-plated phosphor bronze spring; specify color† |
| 478 | M | Same, but nickel-plated beryllium copper spring; specify color† |
| 479 | M | Same, but silver-plated beryllium copper spring; specify color† |
| 494 | N | Solderless split-type plug with molded nylon handle; specify color† |
| 426 | O | Midget version of No. 476; specify color† |
| 427 | O | Midget version of No. 477; specify color† |
| 428 | O | Midget version of No. 478; specify color† |
| 429 | O | Midget version of No. 479; specify color† |
| 455 | P | Solderless wrap-around version of No. 476; specify color† |
| 456 | P | Solderless wrap-around version of No. 477; specify color† |
| 457 | P | Solderless wrap-around version of No. 478; specify color† |
| 458 | P | Solderless wrap-around version of No. 479; specify color† |

## INSULATED TIP PLUGS*

| H. H. S. No. | Fig. | Description |
|---|---|---|
| 200 | Q | Solderless threaded type; 1" handle; 2⅛" long |
| 201 | Q | Same, but slightly smaller; 1" handle; 1 19/32" long |
| 250 | R | Sig. C. approved; prod tip recess holds plugs firmly; has 1" ethyl cellulose handle; specify red or black |
| 358 | R | Same, but with 3" handle |
| 237 | S | Easy-solder hollow tip; ⅝" molded butyrate handle, red or black |
| 229 | T | Heavy duty, easy solder connection; 1" handle, 2⅛" long |
| 203 | U | Short tip plug inserts flush to handle; 1" handle; 1½" long |
| 283 | V | Same as above, but solderless connection |
| 270 | W | Subminiature tip with 1" fiber handle; specify red or black |
| 216 | X | Phono needle tip with removable chuck; 1" handle; 1⅞" long |
| 215 | Y | Std. tip plug with jack for banana plug; ¾" molded butyrate handle; specify red or black |
| 235 | Z | Meter tip plug molded in two halves; specify red or black |
| 493 | AA | Removable chuck type with molded nylon handle and phono needle; specify color† |
| 490 | BB | Solderless type with molded nylon handle; specify color† |
| 492 | CC | Short version of above without knurled collar; specify color† |
| 491 | DD | Short tip plug; inserts flush to nylon handle; specify color† |

## INSULATED JACKS‡

| H. H. S. No. | Fig. | Description |
|---|---|---|
| 1501 | EE | Nylon tip jack with metal shell; wrap-around type; specify color† |
| 1502 | FF | Same, but spade terminal type; specify color† |
| 1503 | GG | Same, but feed-thru type; specify color† |
| 1505 | EE | Same as 1501 but all-nylon construction; specify color† |
| 1506 | FF | Spade terminal version of 1505; specify color† |
| 1507 | GG | Feed-thru version of 1505; specify color† |
| 202 | HH | Molded thermosetting plastic head; phone tip; mounted in 5/16" hole |
| 223 | HH | Same, but machined butyrate; specify red, black, yellow or green |
| 240 | II | Molded nylon tip jack rated 5,000 VAC, 60 Hz; specify color§ |
| 206 | JJ | Molded thermosetting plastic head combo jack takes standard phone or banana plugs |
| 282 | KK | Molded thermosetting plastic head meter type; specify color§ |
| 241 | LL | Molded nylon head; insulated from panel; specify color§ |
| 219 | MM | Molded thermosetting plastic head banana jack; recessed body |
| 221 | NN | Nylon head and washer; insulated from panel; for standard banana plugs; specify color§ |
| 205 | OO | Molded thermosetting plastic head banana jack |
| 256 | PP | Molded thermosetting plastic head banana jack; turret terminal |
| 279 | QQ | Phone tip jack with dished lockwasher "speedi-mount"; molded thermosetting plastic body; 13/32" dia. head |
| 299 | RR | Same as 279 except ½" dia. head |
| 286 | SS | Giant banana jack; fits ½" hole; panel to ¾"; tinned copper lug; machined butyrate head; specify red or black |
| 287 | TT | Same as 286 except brass tinned lug |

*Molded thermosetting plastic handle unless otherwise noted. Standard colors: r
black, yellow, green, blue or white except as otherwise noted. †For colors add su
**-101**, white; **-102**, red; **-103**, black; **-104**, green; **-105**, blue; **-106**, orange; **-107**, yell
**-108**, brown; **-112**, purple; **-113**, gray. ‡Standard colors: Red, black, yellow, green, b
or white except as otherwise noted. §Specify red, black, yellow, green or blue.
***Lots of 1–499, Net; 500–999, —16⅔%.**

## NON-INSULATED BANANA PLUGS AND JACKS

| Fig. | Description | Net Each* |
|---|---|---|
| A | 3/8" threaded stud; hex brass body; nickel-plated phos. bronze spring | 25c |
| B | 1/2" threaded stud; hex brass body; nickel-plated phos. bronze spring | 25c |
| C | Screw-on type; hex brass body; nickel-plated phos. bronze spring | 25c |
| C | Same, but with beryllium copper spring | 30c |
| D | 1/2" threaded stud; hex brass body; split type banana plug | 17c |
| E | Midget rivet type; silver-pl. brass body; phos. bronze silvered spring | 18c |
| F | Soldered or solderless type with hex body; phos. bronze spring | 25c |
| F | Same, but beryllium copper spring | 30c |
| G | 6-32 x 3/8" stud type; hex body; phos. bronze spring nickel-plated; 1 3/16" h. | 25c |
| G | Same, but 6-32 x 1/2" stud; 1 5/16" h. | 25c |
| G | Same, but 6-32 x 3/4" stud; 1 9/16" h. | 25c |
| G | Same, but 8-32 x 3/8" stud; 1 3/16" h. | 25c |
| G | Same, but 8-32 x 1/2" stud; 1 5/16" h. | 25c |
| G | Same, but 8-32 x 3/4" stud; 1 9/16" h. | 25c |
| H | 6-32 x 3/8" stud type; hex body; phos. bronze spring nickel-plated; 1 5/32" h. | 25c |
| H | Same, but 6-32 x 1/2" stud; 1 9/32" h. | 25c |
| H | Same, but 6-32 x 3/4" stud; 1 17/32" h. | 25c |
| H | Same, but 8-32 x 3/8" stud; 1 5/32" h. | 25c |
| H | Same, but 8-32 x 1/2" stud; 1 9/32" h. | 25c |
| H | Same, but 8-32 x 3/4" stud; 1 17/32" h. | 25c |
| I | Midget 4-40 x 3/8" stud; nickel-plated phos. bronze spring; 15/16" h. | 20c |
| I | Same, but 4-40 x 1/2" stud; 1 1/16" h. | 20c |
| I | Same, but 6-32 x 3/8" stud; 15/16" h. | 20c |
| I | Same, but 6-32 x 1/2" stud; 1 1/16" h. | 20c |
| J | Midget cross-slotted body type; 10-32 x 21/64" stud; 29/32" h | 12c |
| K | Midget banana jack accepts No. 111 plug | 9c |
| L | Submin. rivet type plug; silver-plated beryl. copper spring; 37/64" h. | 17c |
| M | Submin. 2-56 stud type plug similar to No. 191 | 17c |
| N | Submin. jack rivets direct to chassis or PC board | 9c |
| O | Submin. jack rivets direct to chassis or PC (Package of 100) | ** |
| P | Hex body jack with recessed head; fits 1/4" hole; panels to 5/16" thick | 15c |
| Q | Std. hex head banana jack fits 1/4" hole; panels to 3/8" thick | 15c |
| R | Giant plug with deep solder well; 6-leaved phos. bronze spring | 55c |
| S | Same, but screw fit instead of stud | 45c |
| T | Same as No. 186 but slimmer base | 45c |
| U | Giant banana jack fits 3/8" hole; panels to 1/2" thick | 40c |

The following types are also available as specified. For silver-plated phosphor
spring: Add 3c to price and *add 6 to number (431 becomes 437); †add 7 to num-
dd 4 to number. For nickel-plated beryllium copper spring: Add 4c to price and
2 to number; †add 13 to number; ‡add 3c to price and add 8 to number. For silver-
beryllium copper spring: Add 7c to price and *add 18 to number; †add 19 to
r; ‡add 6c to price and add 12 to number. **$1.30 per 100.

## NON-INSULATED TIP PLUGS AND JACKS

| Fig. | Description | Net Each* |
|---|---|---|
| V | Solderless with knurled collar force fit; 1 29/64" h. | 15c |
| W | Smaller version of above; 1 3/16" h. | 15c |
| X | Heavy-duty force fit type; large soldering well; accepts standard banana plugs; 1 13/32" h. | 13c |
| Y | Standard solder type; 1" long (Package of 100) | ** |
| Y | Large I.D. solder type; 1" long (Package of 100) | †† |
| Z | Drawn (all-hollow) solder type; 15/16" long (Package of 100) | ‡‡ |
| AA | Threaded solderless type; knurled collar; will fit plastic handle; 1 7/16" h. | 15c |
| BB | Smaller version of above; 1 3/16" h. | 15c |
| CC | Heavy duty threaded type; extra large solder well; 1 3/8" h. | 15c |
| DD | Needle tip with removable chuck; 1 5/32" h. | 22c |
| EE | Phone tip jack with hex nut; fits 1/4" hole; panels to 3/8" thick | 15c |
| FF | Headless version of above used with plastic cases | 12c |

r package of 100: **$2.50; ††$3.50; ‡‡$1.70.

## TEST LEAD ACCESSORIES

| Fig. | Description | Net Each* |
|---|---|---|
| GG | Plastic handle spade lug; accepts banana plug; specify red or black | 14c |
| HH | Phone tip to space lug adapter; plastic handle; specify red or black | 40c |
| II | Banana plug splice of plastic; specify red, black, yellow or green | 25c |
| JJ | Phone tip plug splice of plastic; specify red, black, yellow or green | 30c |
| KK | Inline phone tip jack of plastic; specify red, black, yellow or green | 21c |
| LL | Inline banana jack of plastic; specify red, black, yellow or green | 21c |

## BINDING POSTS

| Fig. | Description | Net Each* |
|---|---|---|
| MM | Multi-purpose with banana plug receptacle, wire hole, washer hole, production punch and non-removable nylon head. For 1/16"–1/4" panels. Rated 30 amps, 2000 VAC rms test. Specify red, black, yellow, blue, green, white | 50c |
| NN | 5-way grounding type, red or black plastic, captive head; 8-32 thd. | 22c |
| NN | Same, but 6-32 threaded stud | 22c |
| NN | Same, 8-32 thd., with nickel-plated brass insert in head | 27c |
| NN | Same as No. 230 with nickel-plated brass insert in head | 27c |
| OO | All insulated version of No. 220; red or black plastic, captive head | 45c |
| OO | Same, but 6-32 threaded stud | 45c |
| OO | Same as No. 260 with nickel-plated brass insert in head | 50c |
| OO | Same as No. 259 with nickel-plated brass insert in head | 50c |
| PP | Metal 5-way post has captive hex nickel-plated brass head | 30c |
| QQ | Same as No. 137 but with wrap-around terminal | 35c |
| RR | Molded nylon grd. type with nickel-plated brass insert; red or black | 35c |
| SS | Same, but with Bakelite washer to insulate from chassis; red or black | 35c |
| TT | Molded nylon grounding type; nickel-plated brass insert; red or black | 30c |
| UU | Molded plastic post; brass threaded insert; specify red or black | 25c |
| VV | Molded plastic post; brass threaded insert; specify red or black | 25c |
| WW | Nickel-plated brass post for phone tips or banana plugs | 23c |
| UU | Nickel-plated brass post with screw and lockwasher | 25c |
| XX | Dual assembly; metal heads; molded black styrene insul. cross-slotted for forward or sideways phone tip insertion | 85c |
| YY | Dual assembly; black plastic heads; styrene washer cross-slotted | 70c |
| YY | Same, both heads red | 70c |
| YY | Same, one red and one black head | 70c |
| YY | Same as 224 but with nickel-plated brass insert in head; black | 80c |
| YY | Same, both heads red | 80c |
| YY | Same, one red and one black head | 80c |
| ZZ | Same as No. 263, but heads are molded nylon; both heads black | 95c |
| ZZ | Same, both heads red | 95c |
| ZZ | Same, one red and one black head | 95c |
| AB | Same as No. 263, but heads are molded nylon; both heads black | 70c |
| AB | Same, both heads red | 70c |
| AB | Same, one red and one black head | 70c |

### SOLDERLESS TIP TEST LEADS (FIG. A)

Molded butyrate handles per Fed. Spec. L-P349A, Type 3, Class MS; red and black. Solderless tip of nickel-plated brass. 4" long x ⅜" diameter. Flexible rubber covered wire leads 50" long, also colored red and black.

| H.H.S. No. | Meter End | Net Price per Pair |
|---|---|---|
| 600 | Phone tips | $1.05 |
| 601 | Spade lugs | 1.05 |
| 602 | Alligator clips | 1.10 |

### PHONO NEEDLE TEST LEADS (FIG. B)

Molded butyrate handles per Fed. Spec. L-P349A, Type 3, Class MS; red and black. Nickel-plated brass body. Nickel-plated steel needle tips. Flexible rubber covered wire leads 50" long, red and black.

| H.H.S. No. | Meter End | Net Price per Pair |
|---|---|---|
| 613 | Phone tips | $1.05 |
| 614 | Spade lugs | 1.05 |
| 615 | Alligator clips | 1.10 |
